CHAPTER 2: EXECUTIVE SUMMARY

This Information Memorandum seeks to provide relevant details of securitisation of certain loan assets together with all other present and future rights and benefits arising there from. The Assets (as defined hereinafter) comprise of *inter alia* loan receivables arising from the loan facilities extended by the Originator, in the ordinary course of business through asset finance extended by the Seller to the Obligors for various business activities.

All the expressions used in this document shall unless repugnant to the context or meaning thereof carry the same meanings herein are assigned to them in the paragraph under the heading "Definitions and Glossary of Terms".

2.1 INTRODUCTION TO SECURITISATION

Securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitisation involves sale of specific receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company. The SPV in turn issues financial instruments (promissory notes, participation certificates or other debt instruments) to the investors evidencing the beneficial ownership of the investors in the receivables. The financial instruments are rated by an independent credit rating agency. Additional credit support is provided in order that the instrument may receive the desired level of rating. Typically, the servicing of the receivables is continued by the seller. Cash flows as and when they are received are passed on to the investors. Features of securitisation transactions include:

(a) Absolute and valid sale of assets to an SPV (with defined purposes and activities) in trust for the investors;

(b) Reliance by the investors on the performance of the assets for repayment - rather than the credit of their originator (the seller) or the issuer (the SPV);

(c) Consequent to the above, "bankruptcy remoteness" of the SPV from the originator;

(d) Support for timely payments, *inter-alia*, in the form of suitable credit enhancements;

(e) Securitised debt paper usually achieves a high investment grade credit rating.

(b) The objectives and permitted activities of the SPV are as laid out in the section "The Issuer" of this Information Memorandum.

(j) Each PTCs of a particular series or tranche (i.e. Senior Tranche A1 PTC, Senior Tranche A2 PTC and Equity Tranche PTCs), will evidence the Investor's respective *pro-rata* share and undivided beneficial interest in the Assets on a *pari-passu* basis with other Investors of that series or tranche.
