

Co-location of Servers

Members can avail of the Co-location facility provided by BSE for their IT infrastructure for faster execution of the trades.

Bombay Stock Exchange recently announced its first Co-location facility at BSE premises with Netmagic Solutions Pvt. Ltd., one of the India's leading Managed IT Service Providers. This Co-location Facility will be extended to Broker members and their customers to host their servers near to BSE's trading platform within BSE premises and will facilitate faster trade execution.

- Racks would be allocated to members for their servers at the cost of Rs 4.5 lacs per annum per rack for 3KVA rated capacity. This special rate will be available for only trading related servers.
- Member's server co-located at BSE premises will be connected to BSE's core trading engine over LAN.

However, if any member wants to host their servers at BSE with immediate effect, the servers can be located at BSE's own facility till Netmagic comes up with their data center. Once this is ready, the servers would be moved to Netmagic facility from BSE's own data center.

In order to know more and avail the facility, request you to please write in to us.
