GALADA

POWER AND TELECOMMUNICATION LTD.

SAVING ENERGY THROUGH PIONEERING TECHNOLOGY

MESSAGE FROM MANAGING DIRECTOR

Dear fellow Share holders,

Transition from 10th to 11th five year plan ended up in certain marketing constraints for equipment suppliers and EPC contractors in transmission & distribution sector. The main reason for this was non-disbursement of funds to projects in this sector, pending careful scrutiny of performance during 10th plan. The decisions on allocation and disbursement of funds for 11th plan projects were taken up during recent months of 2008.

Recently, a sum of Rs. 28000 crores for RGGVY Scheme and Rs. 51000 crores for APDRP Scheme for rural electrification and distribution have been announced and the two nodal agencies namely REC and PFC have started funding these schemes. Transmission sector also has opened up with Powergrid's announcements of tenders for equipment required for 220, 400, 800 kv AC segment and ± 500 kv / ± 800 kv HVDC segment.

In all, transmission & distribution sector offers a business potential of about 0.4-0.5 Million MT of conductors during next twelve months.

Simultaneously, the experience of substandard quality of inputs in transmission & distribution sector during 10th plan has driven Ministry of Power to introduce a "Three Tier Quality Control Mechanism" with immediate effect which is aimed at weeding out substandard quality of inputs consisting of materials and construction.

Your company has two distinct advantages, namely, it is approved by all CPSUs and Utilities who are the project implementing agencies and it is one of the very few companies who has maintained quality of all its products over years inspite of competitive pricing. In fact, 'GALADA' is considered as a technological leader for its innovative and pioneering efforts in the development and popularisation of AAA conductors in India. Your company therefore should see a better performance during this year and the trend is likely to further improve in the next three years of 11th plan. Your company has initiated steps to diversify its activity in this direction. It will make use of its brand image and knowledge capital to become a consultant to various government and private organizations in the power sector.

During the lean year 2007-08, the company took proactive steps to shift all the manufacturing facility at Uppal plant to Silvassa. This is a step to optimize cost of conductor manufacture by controlling fixed costs and also by going in for backward integration through manufacture of rods (EC & Alloy) which are our main raw materials. These new facilities are in operation. Possibilities of making new products for electrical and other sectors are opening up now which will make your company financially stronger.

One time settlement proposals, through delayed, are in advanced stage and we expect to complete them in the coming months.

I wish to acknowledge the excellent support from our esteemed shareholders, customers, Institutions, BIFR, employees, government agencies and all others who have boosted our morale. Your company is now gearing up to turn into a profitable company.

PRODUCTION AND SALES

The Company has not been operating its Uppal (Hyderabad) plant since May 2000 and at present only its Silvassa plant is working. As the banks suspended all the credit facilities earlier made available, the Company revised its business strategy by accepting and executing job orders. This is reflected in continuance of business in spite of absence of working capital facilities.

REFERENCE TO BIFR

The Company was declared as a sick industrial undertaking by BIFR in September, 2001 and Industrial Development Bank of India (IDBI) was appointed as the "Operating Agency" to examine the viability of the Company and formulate a scheme for its revival. As required, the Company submitted its Rehabilitation Proposal to IDBI and others in November, 2001 for their consideration. After a series of discussion, at the instance of the lending institutions, the Company submitted its revised Rehabilitation Proposal in October, 2003 and requested the institutions for its early consideration. After examining the proposal and further discussion, the Lenders initially gave time to the Company upto 30th September, 2004, which was later on extended upto 30th June, 2005, to show significant operational improvement in its performance. The Lenders also advised the Company to look into the possibility of one-time settlement of dues and the Company earnestly has pursued the matter with the Lenders.

In the hearing held on 27th August, 2007, BIFR confirmed its prima facie opinion that the company to be wound up in terms of Section 20(1) of the Sick Industrial Companies (Special Provisions) Act. The Company filed an appeal before the Appellate Authority for Industrial and Financial Re-construction and the aforesaid Order passed by BIFR was stayed.

In the meantime, the Company's efforts to make a break through in the matter has borne fruit and IDBI, SASF & Canara Bank have since indicated their willingness for one-time settlement of their dues and the modalities are being worked out. Similarly, the Company is making efforts to settle the dues of other lending institutions and banks. It is hoped with the improvement in the power scenario due to reforms, the situation is expected to turn-around in favour of the Company.

MANAGEMENT DISCUSSION AND ANALYSIS

(forming part of Directors' Report)

a) **Business review and outlook.**

The power sector, after going through a turbulent time for over a decade, has started looking up due to reforms initiated by the successive Governments. This augurs well for the aluminium industry, particularly for those like us engaged in the manufacture and supply of electrical conductors for overhead power transmission and distribution lines.

Most of the State Electricity Boards have accepted to implement "reforms" to enable them to become commercially and economically viable. As a result of the reforms under implementation, the following two major benefits will accrue to the State Electricity Boards:

- rational pricing of power with the approval of the State Electricity Tariff Advisory Committee which will put the State Electricity Boards back on viable lines.
- privatisation of distribution network which will bring down substantially the technical losses and set right the revenue collection mechanism for the State Electricity Boards.

Most of the finance is now made available under Accelerated Power Development and Reform Programme (APDRP) announced by the Government of India and only those State Electricity Boards who have gone in with the formulation and implementation of power reforms are eligible for availing of the said finance. This is expected to play a vital role in easing financial difficulties and ensuring growth in the power sector, which in turn will immensely benefit manufacturers like us.

b) **Internal Control System and their adequacy.**

The Company has a proper and adequate system of internal controls with laid-down policies and procedures for all its operations and financial functions to see that all its assets are safeguarded and protected against loss from any unauthorised use or disposition and all financial records are maintained properly. The Company's Board has an Audit Committee which consists of four independent Directors to review, inter alia, the significant findings of the internal audit.

c) **Rehabilitation Scheme.**

In the hearing held on 27-08-2007, BIFR confirmed its prima facie opinion that the Company to be wound up in terms of Section 20(1) of the Sick Industrial Companies (Special Provisions) Act. The Company filed an appeal before the appellate Authority for Industrial and Financial Re-construction and the aforesaid Order passed by BIFR was stayed.

In the meantime, the Company's efforts to make a break through in the matter has borne fruit and IDBI, SASF and Canara Bank have since indicated their willingness for one-time settlement of their dues and the modalities are being worked out. Similarly, the Company is making efforts to settle the dues of other lending institutions and banks. It is hoped that with the improvement in the power scenario due to reforms, the situation is expected to turn-around in favour of the Company.

d) Material developments in human resources / industrial relations.

The Company values human resource as one of its most important assets and is strengthening it in line with its growth plans. The Company has always had an excellent track record of cordial and harmonious industrial relations. This year too, the industrial relations in the Company have been very cordial and not a single man-day was lost on this account.

e) Cautionary Statement.

Statements in the Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations may be 'forward-looking statements' within the meaning of applicable securities law and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to the Company's operations include economic conditions affecting demand / supply and price conditions in the domestic and overseas markets in which the Company operates, changes in the Government regulations, tax law and other statutes and other incidental factors.

20. NOTES ON ACCOUNTS

- 1 The following are the significant accounting policies adopted by the Company in the preparation and presentation of financial statements.
 - i) Financial Statements are based on historical costs and on accrual basis.
 - ii) The preparation of financial statements requires the management of the Company to make certain estimates and assumptions that affect the reported *balances of assets and liabilities and disclosures relating to the contingent liabilities* as at the date of the financial statements and reported amounts of income and expenditure for the year. Examples of such estimates includes provisions for doubtful debts, employee retirement benefits and provision for taxes etc., Any revision to such estimates is recognised prospectively in the year in which it is revised.
 - iii) Tangible Fixed assets are stated at cost/replacement value net of depreciation provided.
 - iv) Investments classified as long term investments are stated at cost. Provision is made to recognise a decline other than temporary in the value of each investment.
 - v) Depreciation on the assets of the Company is provided on straight line method/written down value method as per schedule XIV to the Companies Act, 1956.
 - vi) Raw materials are valued at cost based on First-in First-out method and other stores and spares are valued at cost based on weighted average method. Work-in-process is valued at cost. The other Stock-in-trade are valued at lower of cost or realisable value.

 - viii) Borrowing costs which are directly attributable to the acquisition, construction or production of fixed assets are capitalised as a part of the cost of that asset.
 - ix) All contingent liabilities are indicated by way of a note and will be provided/paid on crystallisation.
 - x) The Excise Duty payable on finished/saleable goods is accounted for on the production of such goods.
