## **MANAGEMENT DISCUSSION AND ANALYSIS**

### **Industry Structure and Development**

Cement is a core commodity without any substitute. The Indian Cement Industry with an installed capacity of 207 million tons as on 31st December, 2008 ranks second in the world, manufacturing cement conforming to global standards. The demand for cement has grown at compounded average growth rate of nearly 10 percent over the last three years. The Industry has been operating at around 90 percent capacity utilization despite capacity additions of about 31 million tons during the last 18 months. The Government is placing thrust on low cost housing and infrastructure in terms of dedicated rail corridors, roads, highways, power and port projects etc., which will ensure sustained demand for cement. This coupled with the proposed expenditure under the Eleventh Five Year plan is expected to give a fillip to the Cement Industry and absorb the expected capacity additions. Thus, the outlook for the Cement Industry continues to remain stable in the long run.

The Company's primary market, Gujarat, is witnessing significant investments in infrastructure, industrial projects, ports, roads, etc. Intention of investment of over Rs.12,000 billion has been announced under the Vibrant Gujarat initiative of the Government assuming a reasonable demand growth in Gujarat.

### **Future Outlook**

Given the overall economic growth, thrust on infrastructure development and Government's thrust on housing construction, the long-term outlook of Cement Industry looks stable and expected to grow in line with the GDP growth. It is expected that new capacity will be installed in line with the growth in demand. However, the short-term imbalance of demand and supply of cement is inevitable when the new capacities come on stream.

### **Opportunities and Threats**

The Eleventh Five Year plan estimates growth in domestic cement consumption between 10 percent to 11.5 percent per annum. Historically the growth rate for cement consumption in Gujarat is about 20-25 percent higher than that for All India cement consumption. The Government has recently imposed Countervailing Duty (CVD) and Special Additional Duty (SAD) on import of cement and on the other hand, Government has not only withdrawn the ban on export of cement but also announced more incentives on export of cement. The Government has already announced two stimuli packages with special thrust on housing and infrastructure. Further, Reserve Bank of India has directed the Banks to reduce the lending rate on the housing loans which is expected to boost construction and thereby cement demand. All these are expected to provide opportunities to the Company to improve its market distribution and realisations.

The substantial increase in the cost of inputs such as coal, fuel, transportation etc., witnessed in the last year have proved to be temporary aberrations and the industry is now witnessing corrections in these areas. The Government has also reduced excise duty on cement.

The Company has installed a 25 MW Captive Thermal Power Plant to reduce the cost of power. The commercial production from the power plant is expected shortly, which will substantially improve the Company's profit margins.

### **Global Economic Situation**

In view of the recessionary trends around the globe and specially some of the countries where your company exports its products, there is a down turn. Your Company has chalked out its strategy to find an alternate market and efforts to reduce the cost of manufacture, transportation and other overheads. These efforts are expected to help your company to partly off set the tight economic conditions in the recessionary environment.

### **Segment Review and Analysis**

The Company has a single segment, which is cement. However the company produces a variety of cement products, which include Ordinary Portland cement, (OPC), and Portland Pozzolana Cement (PPC) and Sulphate Resistant Cement (SRC), which are well accepted in the domestic as well as export markets.

### **Risks and Concerns**

The real estate sector is going through a challenging phase. Export of cement may be affected in short term considering global economic meltdown. New production capacities as and when materialise may cause temporary aberration in the price realization. However, the planned infrastructure development including housing is expected to mitigate the impact. Further, Government policies have direct impact on over 50 percent of the cost of sales. Thus the Government policies would continue to have bearing on the Company's performance.

**Internal Control systems and their adequacy**

The Company has an adequate system of internal controls. The internal auditor reviews the effectiveness and efficiency of the systems. The management periodically reviews the reports of the internal audit highlighting suggested improvements, cost control measures and need of policy modification and assuring its adherence. The audit committee reviews the financial results, adequacy of disclosures and adherence of accounting principles. The corrective steps and suggestions of the audit committee are implemented and the internal auditor reviews the same and reports of any deviations and other recommendations to formulate management policies and risk management procedures.

**Human Resource Development / Industrial Relations**

The Company recognises that employees form the backbone of the organization for attaining the strategic goals, enhancing stakeholders value and achieving growth hinges on the ability of the Company to attract, retain and develop skills. The Company believes that learning is a never ending process and thus provides training to acquire new skills, upgradation of knowledge and expertise and increase one's performance. It is also a great motivational tool as it recognises the employee can deliver better performance.

The Company has adopted the Code of Conduct for inclusiveness of socially and economically backward SC and ST communities in employment and has communicated to the Associated Chambers of Commerce & Industry of India (ASSOCHAM). The same is also incorporated in the HR policy and communicated to all its senior executives.

The industrial relations at the plant were cordial.

The Company had 536 permanent employees as on 31.12.2008.

**Corporate Social Responsibility****Social Accountability:**

The Company believes that in providing basic Health care facilities and Education would bring about general upliftment in the lives of the people.

**Health Care**

The Plant conduct various Immunization programmes, family welfare education, health care, safety as well as various periodical health check-up and first aid training programmes for employees and workers.

**Education:**

The Company's plant has a full-fledged primary school for the children of the employees and local people staying in nearby areas. In order to enable the children studying in English medium schools or colleges in Porbander, the Company provides school bus facility.

**Afforestation:**

The Company is committed to the protection of environment and maintenance of biodiversity. A green belt has been developed in the plant and nearby areas. During the period over 10000 saplings were planted at various places in the plant and mines area. The plant has also carried out rain water harvesting and this has increased ground water resources besides providing greenery.

The Statements are based on certain assumptions and expectation of future events. Actual results could however differ from those expressed or implied.
