MANAGEMENT DISCUSSION AND ANALYSIS

Industry structure and developments

As the Company has not started any activities at its factory premises at MIDC, Lote (Maharashtra) due to financial constrain and non-availability of the funds. During the year under review the Company has successfully exported one consignment of agro commodities and the company is in the process of exploring new opportunities in the trading business including export. The report contains certain forward-looking statements, which are based on certain assumptions and expectations of future events.

Opportunities and threats

There is growing demand for agro commodities in India and abroad specifically due to opening of the Indian Economy to world competition. Agro products and commodities are on demand both in the local and export market. The Company has plans to tie up with various prospective buyers (for test marketing) of indigenous as well as foreign market.

As far as threats are concerned no significant threats except the general market conditions are perceived in the near future.

Outlook

The outlook for agro products and commodities in general is good for the years to come. The Company is taking necessary measures to arrange the required finance for the project implementation and working capital requirements for its plant at MIDC, Lote (Maharashtra) or will have to evaluate other avenues or to dispose off the existing manufacturing facilities and diversify in to other areas.

Internal control systems

The company has a proper and adequate security system to ensure that all assets are safeguarded and protected against any possible loss from unauthorised use or disposition. The internal systems and other records are reliable, for preparing financial statements and other information, and for maintaining accountability of assets. Proper security arrangements are being made for safety of all assets, even though the insurance cover for plant and machinery is not obtained.

Financial and operational performance

During the year under review, the Company has continued its export business and has not carried out any manufacturing activities from facilities available with the company and the necessary permission under pollution control regulations is still awaited.

Cautionary Statement

The delay in project implementation has caused increase in project preoperative expenses. Statements in this Management Discussion and Analysis Report are based upon the data available with the company at this point of time and on certain assumptions having regard to the economic conditions, government policies, political developments within and outside the country. The management is not in a position to guarantee the accuracy of the assumptions and the projected performance of the company in future. It is, therefore, cautioned that the actual results may differ from those expressed or implied herein. Delay in project implementation and commercial production has already caused depletion of the existing plant & machinery, due to plant being in chemical zone and the same will have a barring in the near future for extensive repairs & maintenance.
