Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period.

The weighted average number of equity shares outstanding during the period are adjusted for events of bonus issue; bonus element in a rights issue to existing shareholders; share split; and reverse share split (consolidation of shares). For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilative potential equity shares.

xiii. Provisions and Contingent Liabilities

Provisions are recognized by present obligations, of uncertain timing or amount, arising as a result of a past event where a reliable estimate can be made and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation. Where it is not probable that an outflow of resources embodying economic benefits will be required or the amount can not be estimated reliably, the obligation is disclosed as a contingent liability unless the probability of outflow or resources embodying economic benefits is remote.

Possible obligations, whose existence will only be confirmed by the occurrence or non- occurrence of one or more uncertain future events, are also disclosed as contingent liabilities unless the probability of outflow of resources embodying economic benefits is remote.

Non-monetary items denominated in foreign currency are reported at the exchange rate ruling at the date of transaction.

vii. Employee Benefits

An impairment loss is recognised wherever the carrying amount of an asset exceeds its recoverable amount.

xiii. Earning per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period.

Partly paid equity shares are treated as a fraction of an equity share to the extent that they were entitled to participate in dividends related to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period are adjusted for events of bonus issue; bonus element in a rights issue to existing shareholders; share split; and reverse share split (consolidation of shares).

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilative potential equity shares.

xiv. Provisions and Contingent Liabilities

Provisions are recognized by present obligations, of uncertain timing or amount, arising as a result of a past event where a reliable estimate can be made and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation. Where it is not probable that an outflow of resources embodying economic benefits will be required or the amount can not be estimated reliably, the obligation is disclosed as a contingent liability unless the probability of outflow or resources embodying economic benefits is remote.
