##### INDUSTRY STRUCTURE AND DEVELOPMENT

The company had been engaged in the manufacture and sale of hill grass brooms, suparis etc which are a household consumable product and are basically sold on the quality of grass and other ingredients used with added support of brand image. Even technological innovations from time to time in the manufacture and mix of the grass with innovative handles developed in the inhouse research and development centers had contributed to the building up of market share when the company's commercial activities were operational.

Later, On account of high competition and low margin in the manufacture of brooms the main focus of the Company during the past had been shifted on the trading activity of the hill grass brooms. However due to the non availability of the working capital funds, the company has completely stopped its business activity. Your company hopes to commence its business once the working capital funds are available.
