PERFORMANCE :

The year under review was a challenging year with unprecedented economic uncertainty in Europe, geopolitical upheaval in the Middle East and slowing down the economic growth across Asia. Our economy had tight liquidity and high interest rates to contain rising inflation and this coupled with unstable political environment had a profound impact on demand and resulted into industrial sluggishness.

Even under these tough times, your company had its Freight Earnings at Rs. 9175 lacs as against Rs. 8854 lacs thereby recording a marginal growth of about 4% in business. As as result of constant efforts to reduce costs and optimize operational efficiencies the Porfit before Tax was recorded with a 12% increase at Rs. 137 lacs as against Rs. 122 lacs in the previous fiscal.

Your Directors anticipate that there is likely to be more tough time in near future owing to stiff competition, increasing fuel and auto component prices, high cost of asset replacement and enhance interest rates all having very prominent impact on margins as well as on business. The threat from competitors offering complete logistic and supply chain solutions has also increased manifold and is having very adverse impact on companies which offer pure transporation services only. In order to combat these adversities and compete in the new environment your company has already initiated the process of strategic alliance and has entered into joint ventures agreements for developeing new warehouses, transshipment hubs and logistic parks.

DIVIDEND:

The Directors recommend for consideration of the shareholders at ensuing annual general meeting, payment of Dividend @ 9% for the year ended 31st March 2012. The amount of dividend and the tax thereon aggregates to Rs.43 lacs.

FINANCE AND ACCOUNTS:

The company's performance during the year reflects the constant focus of the management which led to savings in both direct and indirect operational costs. Both pile and post tax profits were recorded with about 12% increase over previous year vis-a-vis a 4% increase in business. The impact on procurement costs due to enhanced interest rates was countered by effective redesigning of disbursement perms of trade payables. Borrowings from institutional lenders for fleet acquisition were serviced in committed manner. The Networth of your company was recorded for Rs. 1465 lacs as against Rs. 1413 lacs in the previous financial year.

DEPOSIT :

No Public Deposits were invited or accepted during the year under report.

AUDITORS:

M/s. Agarwal Maheswari & Co., Chartered Accountants, retire at the ensuing Annual General Meeting and are eligible for re-appointment.

AUDITORS REPORT

The report of the Auditors is self-explanatory and does not call for any further comments from the Directors.

MANAGEMENT DISCUSSION AND ANALYSIS

ECONOMIC PERSPECTIVE

The Indian economy is estimated to have been growing by 6.9% in 2011-12 as compared to growth rate of 8.4% in each of the two preceding years, finding itself in a weak growth position. The global economic environment, which has been tenuous to the best throughout the years turned sharply adverse in September, 2011 owing to the turmoil in the Euro zone and question about the outlook on the US economy provoked by rating agencies. The year under review was challenging on many fronts. Inflationary pressures continued unabated during the year with adverse effect on the growth prospect. The cost of fuel, auto component parts and asset replacement continues to rise.

ROAD FREIGHT TRANSPORT SECTOR

The Indian Road freight transport sector continues to remain unorganised and fragmented. The poor road infrastructure conditions, multiple check post for octroi and sales tax and unnecessary barrier in various states, delays, bureaucratic hurdles and other numerous problems make the freight industry unproductive and outmoded. The implementations of Service Tax on goods transport agencies have further compounded the problems.

The freight rates in the country were severely affected by the political and maoist disturbances in various states and intense change in climatic conditions. Instense competition from unorganised players, the growing trend of reverse auctions and high operating costs had an adverse impact on the working of the road transport segments.

The road freight sector is poised for major changes in the coming years due to construction of National Highway network; the road density and quality are on the rise. The two major sections—the Golden Quadrilateral and the North-South-East-West corridors are expected to serve as new life line for road transport industry. However during the past financial years there has been a nationwide slowdown in road development work and it is expected to continue. As such the benefits of running heavy payload vehicles and better road qualities that could help in reducing per tonne-km transportation cost are still far.

BUSINESS STRATEGY & OPPORTUNITIES

The process of economic reforms has brought the global markets closer to the Indian economy. The customers now have access to better quality products & services at competitive rates. Globalisation and competition have given emphasis to better supply chain management, which in turn has created a market for third party logistics (3PL) service providers. A growing number of customers are outsourcing their Logistic to 3PL providers in order to concentrate on their core competencies. Your company offers integrated logistics solutions using multi-modal transportation including state of the art warehousing facilities, customised customer services and other value added services. Your Company's advanced internet based consignment tracking and enterprise wide on-line computerised systems gives it a superior edge over its rivals.

Logistics solutions have emerged as a new growth opportunity for the express cargo Industry. Manufacturing companies are increasingly outsourcing thier logistics requirements from third party logistics providers. Express companies world-wide, with their inherent know-how and distribution management skills coupled with warehousing facilities and technology leanings, are in the best position to offer such value added services.

On the other hand the unorganised/semi-organised segment of the express cargo industry will face pressure on margins because of unfavourable pricing environment. The unorganised sector is mostly into the documents business, where the margins are already squeezed. This segment is heavily populated with a number of players. The entry barriers in the documents business is low and coupled with the internet revolution, the importance of quick delivery of documents has lost its significance.

Logistics — The cargo and logistics companies have identified opportunities to take up integrated logistics solutions for clients. This outsourcing would enable manufacturing companies to concentrate on thier primary activities, viz, production and marketing, Outsourcing inventory management will help the customers to have lower capital tie-up, thus reducing the associated risks

Value added services - In an industry where differentiation is easily replicated, the cargo companies need to innovate new techniques to attract customers. In this endeavour, they add value to the core product to differentiate themselves from their competitors.

RISKS AND CONCERNS

All India cargo companies face threat from local players who act as niche players at state and zonal level. Because of lack of regulations, the industry is crowded with too many players, which has led to unhealthy price cutting, discounts, etc. On the other hand, the entry of MNCs has added another dimension. They enjoy the patronage of MNC customers, better equipped as they are with the latest technology and skilled and trained manpower.

There is always the threat of the industry being affected by the economic slowdown However, with the expected revival of the economy, implementation of WTO guidelines, the industry is expected to show better performance.

- 2. Entry of large multinationals, by way of joint ventures and/or through 100% subsidiaries.
- 3. Large share of unorganised and semi-organised segment.
- 4. Sensitivity to economy this industry is highly dependent on the overall economic scenario. In the mid 80's, the industry grew at a rapid pace at 30-35%. This growth rate was sustained in the 90's. But due to the general slowdown of the world economy and of the Asian economy in particular, there had been a slowdown in this industry as well, and the growth rate was sluggish around 10%.

- 5. These factors potentially expose the Company to any significant fluctuations in the state of the Indian economy. The Company's operations have historically shown significant resilience to the normal ups & downs of the economic and industry cycles, with demand for its services continuing to grow at healthy rates even at times of an overall economic slowdown.
- 6. All the revenues from the existing operations are derived from services rendered in the Indian markets. The Company has also been making and contemplating investments in attractive segments.
- 7. Your Company's highly integrated and competitive operations, leading positions in domestic markets, and thrust on value addition have proved to be an effective way to mitigate the impact of genetic industry factors.

Your Company continue to follow suitable strategies to positively modify its risk profile by eliminating and significantly reducing key business risks and developing and implementing strategies to achieve that maximum possible degree of insulation from broad macroeconomics risks.

OUTLOOK

Your Company has drawn plans to

Consolidate its activities relating to logistics and to create a strong base of operations.

Devise strategies to bring operational efficiency, cost effective services and to face economic slowdown and competition.

Fine tune the operating structure, and improve the customer focus and increase the Company's competitive advantage. The new structure usher an era of efficiency and growth.

Your company will continue to focus on its key businesses by exploiting its core competence. In order to be a leading edge Company, a well-crafted strategy has been adopted entailing capitalising on the strong brand equity, optimising costs and improving operational efficiencies at all the levels. These endeavours should facilitate superior margins, despite the forecast of a challenging business environment in the immediate future.

Your Company is also in process of developing required infrastructure viz. warehouses, transshipment hubs, logistic parks etc required for multimodal transportation, composite supply chain solutions including end to end logistic services and has also initiated process of alliance with strategic partners by making joint venture agreements.

INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY

The Company has an internal control system commensurate with its size and nature of business and to meet the following objectives:

Completeness, accuracy, promptness of the reports generated for all the transactions in the Company.

HUMAN RESOURCE MANAGEMENT

Training programmes have been devised to develop cross-functional skills. The objective is to provide your Company's people with an opportunity to address areas, not only relevant to their job profile, but also for their all round development.

OVERVIEW

Large number of players, international as well as local, are setting up their shops in Logistics and hope to get a share of this emerging new economy business.

Your company has an edge over other players, by virtue of having strong information technology back-up and better understanding of Indian roads, local laws, customer needs etc. Your Company, being a pioneer and trendsetter in road transport and logistic industry, will always play a vital role in this industry.

SOCIAL RESPONSIBILITIES

Your Company always believes that organisational growth objective is always linked with the overall development of the society and the community at large.

Your Company has introduced a Drivers Group Accident Policy (Rashta Apatti Kavach Policy) to cover all the drivers of vehicles attached to the Company. This is a goodwill gesture to insure them in case of any unforeseen event, is being undertaken as part of the corporate social responsibility. The company has made provisions for rest rooms, sanitation and medical aids for drivers at all its major transshipment hubs across the routes on which the vehicles of the company ply. Special efforts have been initiated in collaboration with several NGOs to spread the awareness about HIV Aids amongst drivers who are most prone to this disease.
