MANAGEMENT DISCUSSIONS & ANALYSIS REPORT:

Industry Structure and Development:

The Bio Pharma Industry, especially the r-DNA products being imported to India are facing a tough competition of late. Though our company has got it's standing in selling erythropoietin, we could not sell much quantity, as compared to last year. We could reach only 50% in terms of quantity compared to last year. Due to sharp increase in the exchange value of US Dollar, our profit margins of Erythropoietin have gone down.

Opportunities and Threats, Product wise Performance and Outlook:

The Industry is growing exponentially and so is the competition. Heavy competition is a major threat to our business. The management of our company is pursuing various options to overcome this threat. The following are a few steps that the company is taking to face the competition.

- * Increasing the quantity and reducing the prices to compete with others (We could marginally increase the quantity by 16%)
- * Introducing new formulations (Products) for which there is lesser competition (We have initially introduced 20 generic formulations)
- * Negotiating with the custom manufacturers for a lesser price (We have taken a pharmaceutical unit on loan licence to produce the generics).
- * Since it is the first year of operation for the Generic formulations, we could not get much of the anticipated sales. We are planning to increase the sales, controlling the manpower cost at the present level.

The company is treading cautiously while introducing new products due to the increased cost of launching new product, challenges faced in getting the necessary approvals and complications in conducting clinical trials.

The company is presently importing and marketing 'Recombinant Human Erythropoietin' with the brand names EPOVIN, EPOSINO, TRANSFER & NEPHRODIL. The turnover of the company can be further increased, if we get the approval for higher potencies, which is still pending with DCGI.

Due to heavy competition in the biotech sector, our company is entering into the marketing of Branded Generic Medicines. We have been negotiating for custom manufacturing of some fast moving Branded Generic Medicines to market at affordable prices even to the lower middle class and poor. We have identified the custom manufacturer and have entered into an agreement. The company will initially be launching dry and liquid injectables, dry/liquid syrups, Eye/Ear/Nasal drops, pre-filled syringes and sterile/ non-sterile ointments and tablets during the 2nd quarter of 2012-13. The company is opening regional offices in Bangalore and Cochin for marketing of our existing Biotech products as well as the newly launched pharma generics.

Risks and Concerns:

- 1) The competition in the existing product portfolio has increased over the years which are affecting the profits of the company
- 2) The cost & time for getting approvals for new products have become unpredictable and there is no guarantee that the company will get the approvals.
- 3) The DCGI is insisting clinical trials for every product, even though it is marketed in many countries after successful clinical trials in other countries. The conduct of clinical trials involves huge amount of money and time and thus reduces the competitiveness of the product in terms of price.
- 4) The exchange rate of US Dollar is adversely effecting the Erythropoietin business.
- 5) The increase in the cost of manpower for marketing generics.

Internal Control systems and their adequacy:

The internal control systems are adequate to the size and nature of operations of the company.

Discussion on financial performance with respect to operational performance: During the year the company has sales revenue of Rs.389.07 Lakhs as against last year sales revenue of Rs270.59 Lakhs, achieving an increase of about 44% in rupee terms. The management is expecting that the revenues will further increase during this year as we have introduced Generic formulations in addition to Biotech products.
