Management Discussion and Analysis**Economy Review**

The Textiles sector comprising cotton, man-made fibers, jute, sericulture & silk, wool, a number of specially fibres and their products and Handlooms and Handicrafts, play a key role in the Indian Economy by way of significant contribution to GDP, manufacturing output, employment generation and export earnings. The Indian Textiles contributes 12% to the industrial production, 2% to the GDP at factor cost, 11% of total manufacturing exports and directly employs about 45 million people. The textile sector is the second largest producer of employment after agriculture.

India's textiles and clothing industry is one of the mainstays of the national economy. It is also one of the largest contributing sectors of India's exports worldwide. The report of the Working Group constituted by the Planning Commission on boosting India's manufacturing exports during 12th Five Year Plan (2012-17), envisages India's exports of Textiles and Clothing at USD 64.41 billion by the end of March, 2017. The textiles industry accounts for 14% of industrial production, which is 4% of GDP; employs 45 million people and accounts for nearly 11% share of the country's total exports basket.

Industry Overview

With 47 Million Spindles and 0.75 Mn Open-End Rotors, India has the world's second largest spinning capacity, commanding a share of the global Cotton Yarn market—currently producing over 4700 Mn. Kgs of spun yarn of which over 3,400 Mn. Kgs is cotton yarn. Cotton Yarn accounts for nearly 73% of total spun yarn production. Indian Spinning Industry is the most modern and efficient in the world.

India produces a comprehensive range of yarns for every conveyable end use – non-spun or open-end; combed or carded, basic, compact, mélange or fancy. India's 1943 spinning mills produce them all for requirements ranging from a fine 200 count to a coarse 2 count.

The world's most renowned Indian Cotton Yarns are available as greige, bleached, mercerized, gassed, twisted, dyed or an endless range of fashion yarns like mélange, stretch, blends, high twist and so on to meet the different applications in fashion, clothing, home textiles, hosiery and industrial fabrics. India can meet every customer requirement whether large or small, regular or customized, premium or basic.

Constant induction of state-of-the-art technologies like compact spinning, using the most advanced yarn – processing technology and high-precision process controls tools like electronic cleaners, auto

slavers, splicers, two-for-one twisters and auto-coners give Indian mills a competitive advantage.

Today, Indian yarn is widely accepted in International markets as the exporters here regularly meet the needs of importers with unmatched efficiency and economy in countries like USA, Italy, Spain, Japan, China, South Korea, Taiwan, Bangladesh, Vietnam etc.

Outlook

The Vision Statement for the textiles industry for the 11th Five Year Plan (2007-12), inter-alia, envisages India securing a 7% share in the global textiles trade by 2012.

With time, India has surged ahead of other countries and positioned itself as a value-added manufacturer with a varied material base, an educated and English-speaking class of executives with high product development and design orientation.

There has been considerable broadening and deepening of the Indian financial markets due to various financial market reforms undertaken by the regulators, the introduction of innovative financial instruments in recent years and the entry of sophisticated domestic and international players. Strong economic growth, favourable demographics, increased geographic penetration, growth of small and medium enterprises and the increasing needs for capital among Indian corporations are expected to continue to drive India's financial services industry.
