### Management Discussion and Analysis

Financial Year 2013-14 was yet another challenging year for the Indian economy. The investment scenario was weighed down due to many factors. The uncertain macro-economic environment affected the automobile industry, too. The data published by SIAM (Society of Indian Automobile Manufacturers) indicate that the total sales of Commercial Vehicles for 2013-14 were down by 19% compared to the year before. The Medium and Heavy Commercial Vehicles recorded 22% dip in sales. Gravity of the situation can be gauged from the fact that in the financial year 2012-13, too, Medium and Heavy Commercial Vehicles were in negative territory year-on-year by 26%. Hence, this is the second year in a row that Commercial Vehicles sales are down compared to their corresponding previous year.

The recent cut in excise-duty in the Interim Budget, despite being passed on to the customers, did little to lift sales of automobiles in the country. This shows that the economic slowdown and higher interest rates continue to weigh high on demand. Truck fleet owners have remained highly cautious in adding new fleet despite record discounts, minimum margin money on the back of weak economic indicators, lower GDP and uncertain investment climate. Commercial Vehicle sector was also hurt due to lack of mining activities and stalled infrastructure projects. There has

been no respite from high inflation, rising fuel price and the unfavourable interest-rate regime that is dampening customer interest in a weak economy.

Keeping the above challenging economic conditions in perspective, sales-performance of Power Steering can be termed as satisfactory. Sales-performance of Mechanical Steering was impressive in view of growth in Tractor numbers, thanks to good monsoon. Throughout the year, due to weak rupee, landed cost of Rack & Pinion Power Steering became higher, thereby losing its price-competitiveness and sales numbers.

### Review of Operations

#### Operating Results of the Company

#### Auto Components

Comparative quantitative figures of Sales are as under:

(numbers)

Type	2013-14	2012-13	Growth
Power Steering	162,437	178,192	-8.84%
Mechanical Steering	185,676	152,641	21.64%
Rack & Pinion Power Steering for Car	3,019	16,930	-82.17%

Sales, in value terms, was down by 8.42%.

### Renewable Energy –

#### Solar

Financial Year 2013-14 was the second year of full year operations for your Company's 5 MW Solar Power Project at Gujarat Solar Park, Charnka Village, District Patan (Kutch) Gujarat. As you may be aware, the electricity generated is purchased by Gujarat Urja Vikas Nigam Limited (GUVNL), Government of Gujarat. The Plant generated 8.50 million Units of Electricity with sales-revenue of Rs. 95.11 million in the Financial Year 2013-14.

#### Wind Mills

Seven Wind Turbine Machines, owned and operated by the Company, located in districts of Satara and Ahmednagar, having aggregate capacity of 6.7 MW are mainly used for captive power consumption. Total 9.72 million units were generated in the financial year 2013-14. The 8.67 million Units used as captive consumption almost accounted for entire consumption of power of the Company's factory. The Company also sold 1.04 million units to Maharashtra Electricity Board with revenue of Rs.2.62 Million.

#### Other Income

Income received on financial-investments, held by the Company, was Rs. 59.6 million, lower compared to Rs. 103.3 million for the financial year 2012-13, in view of lackluster financial markets for major part of the year. It should also be noted that more than 50% of the Investment portfolio is allocated as the Company's contribution in the Joint-Venture Company, which is yet to yield any returns.

## Finance

Finance cost was Rs. 6.9 million against Rs. 36.4 million, as the Company had prepaid the Term Loan availed for the Solar Project by the end of financial year 2012-13.

## Profitability

Profit before Tax (PBT) for the year was Rs. 449 million against Rs. 490 million in the preceding year, mainly due to dip in Other Income. Despite drop in Sales by 8% and Other Income (from Investments) down by almost 42%, PBT has been impacted only by 9%, due to strict cost-cutting and austerity measures undertaken at all fronts.

Earnings Per Share is Rs.15.55 for the year ended March 31, 2014.

## Outlook/ Opportunities

We expect demand outlook to continue to remain weak for Commercial Vehicles, primarily due to the uncertain macro-economic environment. In the long run though, expected easing of interest rates, following expected tapering of inflation, will revive demand and would be the key driver for volume growth. While the near term environment continues to remain challenging for the automotive sector, we believe the long-term structural growth drivers for the industry, such as GDP growth (leading to increasing affluence of rural and urban consumers), favorable demographics, low penetration levels, entry of global players and easy availability of finance, remain intact.

A new category of four-wheelers, 'Quadricycle' (alternative to auto rickshaw) will be allowed to ply in cities across the country, from October 2014. Notification to this effect has been issued by the Government. You will be pleased to know that your Company's Research and Development team has successfully developed a Rack and Pinion manual steering gear for the Quadricycle, which has been approved by the leading prospective Quadricycle- Manufacturer.

## Joint Venture (JV)

#### F) Employees Retirement Benefits :

Defined Contribution plans: The company makes specified monthly contributions towards employee provident fund. Defined benefit plans: The company's gratuity and leave encashment are defined benefit plans. The present value of the obligation under such defined benefit plans is determined based on actuarial valuation using the projected unit credit method, which recognises each period of services as giving rise to additional unit of employee benefit entitlement and measure each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows.

The discount rates used for determining the present value of the obligation under defined benefit plans, is based on the market yields on Government securities as at the balance sheet date.

Actuarial gains and losses are recognised immediately in the profit and loss account.

Short term employee benefits are recognized as an expense at the undiscounted amount in the Profit and Loss Account in the year in which they relate .

**G) Foreign Currency Transactions :**

Deferred tax assets arising from temporary timing differences are recognised to the extent there is reasonable certainty that the assets can be realised in future.

**I) Segment Reporting**

**a) Identification of Segments**

The Company's operating business are organised and managed separately according to the nature of activity , with each segment representing a strategic business unit that offers different activity.

If the carrying amount of the assets exceeds its recoverable amount, an impairment loss is recognised in the profit and loss account to the extent the carrying amount exceeds recoverable amount. During the year there was no impairment of assets.

**K) Provisions and Contingent Liabilities**

a) Provisions in respect of present obligation arising out of past events are made in the accounts when reliable estimates can be made about the amount of obligation.

b) Contingent Liabilities are disclosed when there is a possible obligation that may, but probably will not, require an outflow of resources.

**L) Earnings per Share**

Basic and diluted earning per share is computed by dividing the net profit attributable to equity share-holders for the year, by the weighted average number of equity shares outstanding during the year.

When the grant or subsidy relates to revenue, it is recognized as income on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs, which they are intended to compensate .Where the grant relates to an asset, it is recognized as deferred income and is allocated to statement of profit and loss over the periods and in the proportions in which depreciation on those assets is charged .
