MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Industry Structure and Overview

Indian textile industry is one of the leading sectors of Indian economy which contributes about 14% to the country's industrial output and 17% of total foreign exchange of India by way of export earnings. The Indian textile industry plays major role in the economy of the country and employs more than 35 million people directly and another 20% indirectly in the allied sectors like agriculture.

The Indian textile industry has been facing challenges including sluggish demand due to high inflation and interest rates resulting in long periods of extended end-of-season sales, pressure on margins, thus impacting profitability. However, there has been an increase in demand from European Union increasing the orders for India, Bangladesh and Vietnam.

Opportunities and Threats

Textile industry is one of the largest employers in India and has strong linkages with the rural economy. The growing young middle-class population is a source of great potential and provides immense opportunities to spur growth in the industry going forward. The major challenge that the textile and apparel industry is facing is increasing cost of production arising out of rising wages, high power and interest costs.

Risks and Concerns:

The price of cotton plays a crucial role in the coming season as it depends on monsoon and availability of cotton. Cotton prices which have almost stabilized now may tend to increase due to various extraneous factors and lead to uncertainty. Further, non-availability of skilled labour coupled with high inflation are causes of concern. Removal of excise duty, mentioned above, has however provided much needed relief.

Outlook:

The Company has commenced its manufacturing activity by leasing a Garments manufacturing unit in Tirupur, Tamilnadu. The subsidiaries of the Company viz. Sri Mahasakthi Mills Ltd and Sri Arumuga Cottspin Private Ltd are engaged in manufacturing of fine quality of hosiery and warp yarn. Margins have been under pressure because of rising interest cost and cost of raw materials.

The prices are likely to ease which will enable the Company to perform better. The fluctuation in foreign exchange rates is also a cause of concern.

Performance and financial review

During the year, the Company reported a Profit after Tax (PAT) of Rs.19.80 lakhs as against Rs.18.60 lakhs for the previous year. During the year under review, the sales and other income were at Rs.141.61 lakhs as against Rs. 102.33 lakhs for the previous year.

Risks and Concerns

Our Company does not face any risk other than those prevalent in the Industry. The Company is taking measures to mitigate such risks through prudent risk management system.

Internal Control System and its Adequacy

Our Company has a sound and adequate system of internal controls to monitor and regulate all the activities. The Company complies with internal control policies and procedures and other regulatory requirements.

Human Resources Development

During the year, our Company maintained very harmonious and cordial relations with its employees. Our Company's human resources philosophy is to establish and build a strong performance and competency driven culture with higher sense of accountability and responsibility among its employees.
