MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Steel occupies a prominent place in the manufacturing sector in India and Steel Industry has been growing strongly at the rate of 8% and it is expected to grow over by 11-12% in the next five years. The per capita steel consumption in India is 55 kg which is well below the 215 Kg for world and 460 kg for China. [Source: Ministry of Steel - report of the Working Group on Steel for the 12th Plan].

This shows the significant potential growth to steel industries in India. Steel demand is closely linked to the growth in GDP. Indian GDP was weak during the Year 2012-13 and remained challenging to Steel Companies.

Kanishk Steel is a largest steel manufacturer in south India since 1989 having of its Furnace Unit and Rolling Mill to produce various front-line Rolled Steel products. The products of the Company under the brand of "KANISHK STEELS" continue to deserve for Quality, Price and Delivery in the Indian Steel Market.

Kanishk Steel continued focused improvements in the quality of products during the year 2012-13 and be reviving its market strategy according to the prevailing risks, opportunities and threats and will be stable in the competitive and volatile market.

The factors like continuous rise in crude Oil prices, volatile raw materials prices, regional demand & supply imbalances, INR depreciation against global currencies and political instability on policy reforms have impacted significantly the Indian steel industry and resulted sharp fall in demand ultimately impacted on profit of the Company.

The high cost and short supply of power in India may hamper the steel industry's production level. Cheap import of steels products from neighboring countries may result in the lowering prices and making the market highly competitive.

Steel Demand of steel is expected to rise in future with economic and Industrial growth. Growing infrastructure like roads and highways, railways, aviation, shipping, energy, power or oil & gas will boost the demand for specialized steel and the Company's growth seems better in the future.

".....the cost of acquisition of shares in the resulting company shall be the amount which bears to the cost of acquisition of the shares held by the assessee in the demerged company the same proportion as the net book value of the assets transferred in a demerger bears to the net worth of the demerged company immediately before such demerger..."

"Explanation — for the purpose of this section, net worth shall mean the aggregate of paid up share capital and general reserves as appearing in the books of accounts of the demerged company immediately before the demerger..."

4. With regard to the cost of acquisition of original shares in KSIL, section 49(2D) of the Income Tax Act, 1961 provides the formula for splitting the original cost of acquisition of shares of KSIL between New Shares allotted in GREL and CFIL and original shares in KSIL.
