**Global Economy:** Growth of global economy continued to stagnate following slow trades, low investments and policy uncertainties in advanced economies and the political developments in United State of America and United Kingdom are expected to have long-term effects on the global economy. Supported by the growth in Industry and service sectors Global Economic activity is picking up and the growth is expected to rise from 3.1% in year 2016 to 3.5% in 2017 and 3.6% in 2018.

**Indian Economy:** Indian economy followed a path of recovery during the year 2016-17, registering growth in the first three quarters with the Agrarian and Rural economy, benefiting from a good monsoon after two successive rain deficit years and the favourable policy as well as executive reforms by the Government to support strong and sustainable growth, the prudent fiscal regime and calibrated monetary easing that reigned in inflation, have helped to strengthen macroeconomic stability. However, according to estimates, India's GDP growth has moderated in FY 2016-17 to 7.1% from 7.6% recorded in the previous financial year. This happened largely owing to the demonetization initiative that led to temporary de-circulation of money and the situation has largely normalized, following the Government's re-monetization process.

**Outlook:** The growth momentum in Indian economy should rise, driven by the Government's policy initiatives in areas such as Taxation (GST), Foreign Direct Investment (FDI), and the ease of doing business and a well-regulated monetary policy by the Reserve Bank of India to stabilize prices, and improving fiscal Condition. According to the Report of Asian Development Bank (ADB), The India's economy is set to grow at 7.4% in the current fiscal year 2017-18 against 7.1% in the previous year. As per research, Cement demand is expected to increase by 5-6% y-o-y in FY18 on account of increased spends on roads and railways, push on affordable housing by central govt. Further materialization of pent-up demand, particularly in rural housing and low base is expected to support modest increase in demand. Over a five-year period, cement demand is projected to increase at 6-7% CAGR, led by revival in government spending in housing (esp. affordable housing), marginal uptick in private housing, and fast growth in infrastructure spends like urban infrastructure, road, and irrigation. The impact of major reform in taxation i.e. GST legislation is yet to be felt.

**Opportunities and Threats:** The industrial environment of the country offers several opportunities for further improvement in the performance of the company. Given the size of population in the country, there are reasonable opportunities for the demand to pick up further. The need for creation of more and more houses specifically in the affordable segment, sea ports, airports and other such infrastructure facilities to improve the standard of living of the vast population has a large potential for the country. All the development efforts of the Governments are aimed at the welfare and well being of the masses and hence the need for and demand of cement is expected to go up. Through opportunities are there, it cannot be presumed that it is going to be an easy journey. There are number of challenges which have to be tackled carefully in order to ensure a smooth journey the increase in the price of coal and other inputs poses a threat to the industry. Normally all the increases in the costs of inputs are expected to be passed on to the buyers, but in the case of an oversupply situation, the supplier is compelled to absorb some of the increases in costs. This has already happened in 2016-17 and the industry's ability increased input costs have been tested in the year and the industry is only partially successful. That fact that most of the ingredients/ raw materials are under Government controlled mechanism, it makes life difficult for the industry to resist the increase in the input costs. The Mines and Minerals ( Development and regulation) Act, 2015 though brought positive impact in terms of the increased lease periods, it has also brought additional levies such as District Mineral Foundation, national Mineral Exploration trust etc, which have major impact on the cost structure of the cement industry and it has been

difficult to increase the prices of cement to take care of such additional costs and in case of any attempt to increase prices, it triggers pressure from Consumers and Governments.

- Uncertainty in coal supplies and increases in the prices.
- Failure or deficiency in the monsoon which may lead to reduction/ loss of revenue due to reduction in demand for cement
- Changes in Government policy impact the costs, demand and supply.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting

**Meaning of Internal Financial Control over Financial Reporting.**

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted

accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

**Inherent Limitations of Internal Financial Controls Over Financial Reporting.**

Because of the inherent limitations of financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**Opinion**

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017 based on “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.”
