❖ **INDUSTRY OVERVIEW OF INDIAN ECONOMY AND COMPANY OUTLOOK GLOBAL GRANITE INDUSTRY**

Granite industry is considered one of the oldest industries in the world; existing as far back as Ancient Egypt. Granite stones due to its amenability for taking mirror like polish, high compressive strength, longevity and aesthetics, finds applications in decoration in building and other places.

Being a product dependent upon availability of natural resources, production of Stone is concentrated among few countries. China, India, Brazil, Iran, Turkey and Italy altogether accounted for 70% of the global extraction of stones. World stone export market sized \$23 billion.

Major competition for India as a granite exporter comes from China & Brazil. Some of the big concerns in the Natural stone industry are weaker demand of USA and Europe, sharp devaluation of currencies of some of the producing countries and increasing popularity of engineered stones.

Indian Granite Industry

India, even though has huge reserves of granite is losing market share to other competing countries like Brazil and China. Indian exporters are finding it difficult to procure raw material to satisfy demand of customers. Even China which is major importer of rough blocks from India, and due to slowdown in China, exports to China has declined.

All these forces have made the current situation in the industry very challenging and

has forced the closure of many small units, in the period gone by. There is a need to make the mining industry more competitive and transparent, given the big export potential. The industry has made representations to commerce ministry to make the industry more competitive and give incentives for more processing of raw blocks to be done out of India.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. - 1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- 2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial control system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over
