MANAGEMENT DISCUSSION AND ANALYSIS

As per the requirement of Clause 49 of the Listing Agreement the Management Discussion and Analysis Report is provided as under:

ECONOMIC REVIEW

The FY 2013-14 was a year of uncertainty when expectations weathered a setback. The constant change in the Indian and global economic landscape created uncertainty and risks to the growth momentum. The Indian economy continued to languish recording a below 5% growth for the second consecutive year during FY 2013-14. The sudden and strong depreciation of rupee towards the end of Q1 FY14 let down expectations of an upturn in the growth prospects of the economy in the near term. India's Current Account Deficit widened while GDP growth slowed from above 8.5% to below 5%. Despite the loss of momentum of the Indian economy, inflation continued to remain elevated, especially the retail inflation. While high cost of borrowing, low business confidence and delays in project approvals impacted investments, high inflation and slowdown in employment generation led to reduced spending by households. Confronted with a difficult macroeconomic situation of slowing growth, high inflation and depreciating rupee, the Government and the RBI had taken a number of corrective measures to support economic growth. The Indian as well as the global economy is thus at crossroads poised to witness recovery during the FY 2014-15.

INDUSTRY STRUCTURE AND DEVELOPMENT

In the residential replacement industry, ceramic tiles are used for many purposes such as designing, floor and wall fittings, protection from rain and moisture, and other environmental hazards. Residential replacement, besides having maximum market share, is also expected to be the fastest growing application segment of ceramic tiles at a CAGR of 8.6% from 2012 to 2018. Similarly, the floor tiles product category within the ceramic tiles market boasts the maximum share and has the fastest growth at a CAGR of 8.6% from 2012 to 2018.

Floor tiles were followed by wall tiles, and other tiles that include countertop, façade, and so on, respectively. Wall tiles alone accounted for approximately 40% of the total ceramic tiles market in 2011. The global demand for wall tiles is expected to reach 7,096.4 million square meters by 2018, growing at a CAGR of 8.0% from 2012 to 2018. The increasing applications of all types of ceramic tiles are expected to drive the global ceramic tile market.

(data source: www.reuters.com)

OUTLOOK

The growth of Ceramic Industry is directly linked with the growth of real estate sector to a great extent. Over the past few years, residential segment in India has rapidly grown in demand. However, given slowdown in the economic activity and moderation in income, housing sector has suffered a setback. According to data released by Centre for Monitoring Indian Economy (CMIE), during FY 2013-14, approximately Rs. 214.9 billion worth of new investment was made in the housing construction sector as compared with Rs. 412.04 billion during FY 2012-13 – plummeting by 48% year on year basis. Demand

for ceramic tiles in India is driven by a combination of factors like rise in housing sector, urbanization rate, rise in nuclear families, rise in per capita income. Commercial sector and infrastructure projects form a huge customer base for tile industry. The commercial segment comprises office space, retail and hospitality space. The resourcing boom coupled with economic uptrend is expected to create a huge demand for office space in India and this in turn will boost increased sale of tiles.

OPPORTUNITIES & THREATS

With the increasing construction activities, the tiles market in the country is set to flourish. The demand from institutional customers is outpacing the retail demand in many regions of the country. The overall Indian tiles market is expected to witness compounded annual growth rate of more than 18% till 2017. However, during the same period demand for vitrified tiles is expected to grow at the compounded annual growth rate of 21% due to increasing institutional sales.

Your Company sees opportunity in the digitally printed tiles – the latest in trend. These tiles are increasingly in fashion as they give walls a stunning art work look deviating from the clichés of the dull painted walls. These tiles are created based on principles and procedures which are similar to graphic art work which offer photo-like high-resolution impressions. Through digital design, tiles can be decorated virtually with the best photo-quality image or design on plain or a textured surface. The USP of such tiles are that they are high definition (HD) digital tiles, that is, advanced digital printing technology which provides enhanced high-definition reproduction of colours and objects and also provides exact impressions of stones, marble and wood.

The continuous sharp increase in the prices of natural gas a major source of fuel in manufacture of tiles, and the tiles manufactured in unorganized sector are the major threats to your Company.

CAUTIONARY STATEMENT

The Management Discussion and Analysis Report may contain some forward looking statements. Actual results could differ from those expressed or implied. Important factors that could make a difference to the Company's operations include availability of raw materials and their prices and domestic and global demand and supply conditions, changes in Government regulations and tax policies, economic development within India and so many other incidental and relevant factors. RISK MANAGEMENT

Risks are inherent in every business but successful risk mitigation protects profitability and enhances efficiency. Risk evaluation, planning, assessment and its mitigation is a continuous process followed by a forward looking Company as well as is a strategic and systematic approach to control potentially disruptive areas.

Orient Bell Limited views risks as external or internal events that may exploit the weaknesses in the Company's processes, procedures and systems, impacting objectives and financials. The Company employs a series of governance and activity-level controls to ensure financial statements free from material misstatements. At the enterprise level, risk identification and mitigation procedures employed are discussed below.

Risk Type	Risk Category	Nature of Risk	Measures to mitigate Risk
Industry	Medium	Industry downturn can affect sales and viability of the business.	The tile industry has a direct linkage with real estate sector. There is a growth prospect for the real estate sector and thus for the tile industry, given the fact the refurbishment market provides additional demand and per capita tile consumption is very low in India. The industry is expected to grow at over 15% over the next many years. Orient Bell Limited has planned to open more and more Tile Boutiques over the next period for much larger brand promotion and awareness.

Risk Type	Risk Category	Nature of Risk	Measures to mitigate Risk
Competition	Medium	Imported and Domestic tile manufacturing competitor companies may affect the price realization and sales.	<p>The import of tiles has become expensive due to high FOREX cost and depreciating rupee. As a result the import of tiles dropped. Orient Bell has a separate team of Spanish Designers and well trained domestic designers who have capabilities to develop the contemporary and internationally accepted designs to compete with the imported tiles.</p> <p>The Unorganized and Organized Sector tile manufacturers are always a threat and risk to the business of your Company. We see a better future for our company's contemporary designs of digital tiles. The wide distribution network and huge sales force makes a difference between unorganized and organized sector tile manufacturer. Orient Bell Limited has got not only 'Orient' and 'Bell' well-established brands but also we have local manufacturing capabilities, a large sales force and an established distribution network. Lately, the Government has banned the use of coal gas by some of the unorganized players which neutralizes the competition to some extent.</p>
Cost of Production & Margins	High	Increase in cost of natural gas and cost of raw materials, particularly imported ones may increase the cost of production substantially; may affect margins and profitability.	<p>Natural gas is sourced from GAIL. The long term contract signed by the Company with GAIL will end in the year 2028. The prices of Regasified Liquefied Natural Gas (RLNG) depend on the prices of crude oil and rupee exchange rate with USD. The price of RLNG has almost doubled within the last year.</p> <p>Your Company is using saw dust as an alternate fuel to reduce the cost of fuel. Our focus remains on the selling of high value products with higher margins which will help to absorb some of the possible cost increase.</p>
Customers	Medium	Customer attrition or default risk.	Customers get more attracted to branded products and prefer good and genuine tiles for their areas to look more attractive and contemporary. Orient Bell Limited is strategically expanding its brand awareness in different parts of Country through its exclusive tile boutiques. To attract customer we do road shows, participate in exhibitions and also come out with attractive schemes.
Currency	Medium	The risk of fluctuations mainly in USD and Euro that would render imports costlier and affects cost of production indirectly.	The foreign exchange fluctuation directly impacts the price of RLNG and resultantly, the cost of production. The industry can pass on this price hike in the absence of imports. The Company has reduced the import of tiles and is not excessively dependent on import of raw materials.
Human Resources	Low	Risk of employee attrition	The company has come out with the Employee Stock Option Scheme for retention of Employees. The attrition rate of the Company is within acceptable limit. The employer-employee relations in the Company are cordial and working environment is healthy.
Transportation Cost	Low	Fluctuations in Transportation cost directly impact the cost of production	The Company has arrangements with a fleet of transporters across the country to curb the possibility of monopoly of transporters. The Company does survey at regular intervals to keep the transportation costs within limits.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the Accounting Standards notified under the Companies Act, 1956 ("the Act") read with the General Circular No. 15/2013 dated 13th September 2013 of the Ministry of Corporate Affairs in respect of Section 133 of the Companies Act, 2013. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods. Differences between the actual results and estimates are recognized in the year in which the results are known / materialized.

Revenue from sale of goods is recognised when all the significant risk and rewards of ownership of the goods have been passed to the buyer, usually on the delivery of the goods. The company collects sales tax and value added tax on behalf of the government, therefore, these are not economic benefits flowing to the company, hence, these are excluded from the revenue. Further Trade discounts are excluded from the Revenue. Excise duty deducted from Revenue (Gross) is the amount that is included in the revenue (Gross) and not the entire amount of liability arising during the year.

Interest

Current Income Tax relating to the items recognised directly in equity is recognised in equity and not in the statement of Profit and Loss. Deferred tax assets subject to consideration of prudence, are recognized and carried forward only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. Such assets are reviewed as at each balance sheet date to re-assess realization.

Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in the year is charged to the statement of profit and loss as current tax. The company recognises MAT credit available as an asset only to the extent that there is convincing evidence that the company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which company recognises MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternate Tax under the Income Tax Act, 1961, the said asset is created by way of credit to the statement of Profit and Loss and shown as "MAT Credit entitlement ". The company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the specified period.

l) Employee Benefits

(c) Defined Benefit Plan

The obligation in respect of defined benefit plans, which cover Gratuity, are provided for on the basis of an actuarial valuation, using the projected unit credit method, at the end of each financial year. Actuarial gains/losses, if any, are recognised immediately in the Statement of Profit and Loss.

On the basis of Company's policy, compensated absences up to 60 days are recognised as long term employee benefit and compensated absences beyond 60 days, if any are to be recognised as short term employee benefit.

m) Impairment of Assets

The company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, the recoverable amount is determined. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset.

Impairment losses of continuing operations, including impairment on Inventories, are recognised in the statements of profit and loss, except for previously revalued tangible fixed assets, where the revaluation was taken to Revaluation Reserve. In this case, the impairment is also recognised in the revaluation reserve upto the amount of any previous revaluation.

After impairment, depreciation is provided on the revised carrying amount of the assets over its remaining useful life.

A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the assets recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in statement of profit and loss unless the asset is carried at a revalued amount, in which case the reversal is treated as revaluation increase.

n) Provision, Contingent Liabilities and Contingent Assets

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources. Contingent liabilities are not recognized but are disclosed in the notes. Contingent assets are neither recognized nor disclosed in the financial statements.

o) Lease

Leases, where lessor effectively retains substantially all the risk and benefits of ownership of the leased item, are classified as Operating Lease. Operating lease payments are recognised as an expense in the statement of profit and loss on straight - line-basis over the leased term.

p) Earning Per Share

Basic Earning per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating Diluted Earning per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

q) Cash flow Statement

Cash flow statement is prepared as per the indirect method prescribed under Accounting Standard-3 "Cash Flow Statement" notified under the Companies (Accounting Standard) Rules, 2006.

Current Income Tax relating to the items recognised directly in equity is recognised in equity and not in the statement of Profit and Loss. Deferred tax assets subject to consideration of prudence, are recognized and carried forward only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. Such assets are reviewed as at each balance sheet date to re-assess realization.

Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in the year is charged to the statement of profit and loss as current tax. The company recognises MAT credit available as an asset only to the extent that there is convincing evidence that the company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which company recognises MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternate Tax under the Income Tax Act, 1961, the said asset is created by way of credit to the statement of Profit and Loss and shown as "MAT credit entitlement". The company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the specified period.

Certain employees of Dora and Hoskote Units are covered by a superannuation fund benefit of Life Insurance Corporation of India at a company contribution 15% of basic salary. This is a defined contribution scheme and the contributions are charged to Statement of Profit and Loss of the year when the contribution to the fund is due. There are no obligations other than the contribution payable to the fund.

(c) Defined Benefit Plan

The obligation in respect of defined benefit plans, which cover Gratuity, are provided for on the basis of an actuarial valuation, using the projected unit credit method, at the end of each financial year. Actuarial gains/losses, if any, are recognised immediately in the Statement of Profit and Loss.

The company through its trust has taken a policy, for employees of Head Office and Sikandrabad Unit, with Kotak Mahindra Old Mutual Life Insurance Ltd. to cover the gratuity liability of the employees.

For the employees at Dora and Hoskote unit, company has taken an Employees' Gratuity Scheme which is a defined benefit plan of Life Insurance Corporation of India.

(d) Other Long-term Benefits

Long term compensated absences are provided for on the basis of actuarial valuation, using the projected unit credit method, at the end of each financial year. Actuarial gains/losses, if any, are recognised immediately in the Statement of Profit and Loss.

On the basis of Company's policy, compensated absences up to 60 days are recognised as long term employee benefit and compensated absences beyond 60 days, if any are to be recognised as short term employee benefit.

m) Impairment of Assets

The company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, the recoverable amount is determined. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset.

Impairment losses of continuing operations, including impairment on Inventories, are recognised in the statements of profit and loss, except for previously revalued tangible fixed assets, where the revaluation was taken to Revaluation Reserve. In this case, the impairment is also recognised in the revaluation reserve upto the amount of any previous revaluation.

After impairment, depreciation is provided on the revised carrying amount of the assets over its remaining useful life.

A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the Assets recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in statement of profit and loss unless the asset is carried at a revalued amount, in which case the reversal is treated as revaluation increase.

n) Provision, Contingent Liabilities and Contingent Assets

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources. Contingent liabilities are not recognized but are disclosed in the notes. Contingent assets are neither recognized nor disclosed in the financial statements.

o) Lease

Leases, where lessor effectively retains substantially all the risk and benefits of ownership of the leased item, are classified as Operating Lease. Operating lease payments are recognised as an expense in the statement of profit and loss on straight - line- basis over the leased term.

p) Earning Per Share

Basic Earning per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating Diluted Earning per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

q) Cash flow Statement

Cash flow statement is prepared as per the indirect method prescribed under Accounting Standard-3 "Cash Flow Statement" notified under the Companies (Accounting Standard) Rules, 2006.
