## MANAGEMENT DISCUSSION AND ANALYSIS REPORT

---

### INDUSTRY HIGHLIGHTS

Gems and Jewellery have played a very important role in the tradition, culture and history of civilization. The intrinsic value of Jewellery has always attracted people across geographies, cultures and social strata. Consumer preference and reasons for buying Jewellery started getting segmented into 'fashion', 'bridal' and 'investment'. Over time, an 'industry' evolved, initially concentrated around specific geographies and meeting specific needs, but gradually emerging as a global industry.

Today, the industry is at turning point. It is expected that the interplay of various trends such as globalization, increasing role of regulation, technological advances, increasing consumer sophistication, emergence of alternative retail channels and such. These could potentially change the industry structure and the way it functions in multiple ways.

### MAJOR INDUSTRY COMPONENTS

- 1. Diamonds:** Diamonds have always enjoyed a special place among precious gemstones, contributing about 47 per cent to the total industry size, in value terms. In the past, diamond Jewellery was limited to a very small elite segment of the global population. However over the past 50 years, diamonds have seen increasing democratization. Diamond Jewellery has, therefore, emerged as segment showing significant growth in some of the emerging markets.
- 2. Gold:** Gold has always been the jeweler's favorite metal, given its intrinsic luster and ease of fabrication. Gold Jewellery enjoys the leading position in most markets across the world, and in many ways forms the backbone of the precious Jewellery industry. Given the fact that gold is also one of the traded metals, gold jewellery consumption is also impacted by gold price movements. This segment today forms about 42 per cent of the total industry, in value terms.

### Global Gems & Jewellery Industry

Global Jewellery sales is expected to grow at 4.6 per cent year-on-year to touch USD 185 billion in 2010 and USD 230 billion in 2015.

The Gems & Jewellery Industry occupies a prominent position in Indian economy and is a leading foreign exchange earner accounting for USD 17 billion of exports. Out of this, USD 12 billion are processed diamonds and USD 5 billion are diamond Jewellery.

The global market for gold is estimated at 3300 tones South Africa is the world's largest producer of gold, followed by the USA and Australia. Together, these countries account for 45 per cent of the world's total gold production. India is the largest consumer of gold, followed by the USA AND China.

## **The Indian Gems and Jewellery Industry**

The Indian gems and jewellery industry is competitive in the world market due to its low cost of production and availability of skilled labour. In addition, the industry has a worldwide distribution network, which has been established over a period of time for promotion and marketing of Indian diamonds. The Indian diamond industry has acquired leadership position in cutting and polishing of rough diamonds. India is therefore a significant player in the world gems and jewellery market both as a source of processed diamonds as well as a large consuming market.

## **Industry Developments**

The two major segments of the sector in India are gold jewellery & diamonds.

Gold Jewellery forms around 80 per cent of the Indian jewellery market, with the balance comprising fabricated studded Jewellery that includes diamond studded as well as gemstone studded jewellery. A predominant portion of gold jewellery manufactured in India is consumed in the domestic market.

## **Competitive Advantage**

The factors leading to the Indian gems and jewellery industry's growth are many. A near dominance in diamonds and colored stones, manufacturing excellence, forward looking entrepreneurs, liberalized government policies and an extensive international marketing network has helped India establish itself as one of the leading jewellery centers in the world. Moreover, its high consumption of gold, steady inflow of silver and growing interest in platinum enable India to develop the entire range of jewellery, in plain metal and studded, that caters to the desires of every market.

## **Outlook**

The future of the industry is quite promising. More and more buyers across the world are turning to India as their preferred source for quality jewellery.

The Gems & Jewellery export Promotion Council (GJEPC) is looking at exploring new markets, such as Latin American countries. The industry also plans to make India a trading center for cut and polished diamonds, and is closely working with the Government of India in this regard. The long term prospects looks good with Jewellery exports alone expected to touch USD 16 billion in 2010 according to industry estimates.
