MANAGEMENT DISCUSSIONS AND ANALYSIS REPORTS

Your Directors are pleased to present the Management Discussion and Analysis Report for the year ended 31st March, 2015.

The management discussion and analysis have been included in consonance with the code of corporate governance as approved by The Securities and Exchange Board of India (SEBI).

Investors are cautioned that these discussions contain certain forward looking statements that involve risk and uncertainties including those risks which are inherent in the Company's growth and strategy. The company undertakes no obligation to publicly update or revise any of the opinion or forward looking statements expressed in this report consequent to new information or developments, events or otherwise.

The management of the company is presenting herein the overview, opportunities and threats, initiatives by the company and overall strategy of the company and its outlook for the future. This outlook is based on management's own assessment and it may vary due to future economic and other future developments in the country.

Overview

The financial year 2014-15 (FY2015) began on a positive note. There was a clear mandate for political stability. Despite the easing of liquidity and reduction in policy rates, FY2015 was a difficult one for the banking sector. Credit growth at 9.5% was the lowest in the last 18 years. Low credit growth coupled with high non-performing assets (NPAs) resulted in banks being reluctant to pass on the benefits of the eased liquidity and rate cuts. It was only in March 2015 that a few banks reduced their lending rates. However, unseasonal rains in February and March 2015 have badly affected the winter (rabi) crop; and a prediction of a poor monsoon could dampen optimism regarding the economy. It remains to be seen whether the slew of initiatives announced by the Central Government like 'Make in India' programme, coal and telecom auctions, increased FDI limits in certain sectors, a financial inclusion effort through its Pradhan Mantri Jan Dhan Yojana and India's improved rating outlook gives a fillip to the performance of the banking and financial sector in the coming year

Industry Structure and Development:

The operation of the company during majority of the year was mainly centered in Finance Business and Share Trading. The company was dealing in Lending, Advancing and Depositing Money in Industrial and other Undertakings and Businesses and to deal in acquiring, selling, subscribing, transferring, holding, disposing, and otherwise dealing and investing in shares, securities, movables, etc. The Company, being into finance and investment activity, the impact of movement of stock markets affects its volatility.

Opportunities And Threats:

The year FY 2015 started on a note of optimism. However, stubborn inflation, high fiscal and current account deficit, slow pace of reforms, sluggish recovery of US economy and continued Euro zone crisis soon led to the sliding of Indian GDP growth to around 5%. Despite various adverse factors we firmly believe that Indian economic will grow and hence the growth of financial services sector presents us with exciting opportunities like India's long-term growth story remains intact notwithstanding declining growth in the past year or two. This presents vast opportunities for us to grow our businesses in the medium to long term, though short-term pain remains a possibility. Broadly, financial services markets are expected to grow four to five folds by 2020 as per leading financial sector houses research report. With nearly 70% of Indian household savings currently finding banks as the most favored destination, scope for diversification of savings through other channels like mutual funds or insurance and through diversification in other asset classes like equities, bonds and commodities are immense. We further believe the policy liberalization and forward-looking regulatory changes will help markets grow in size.

At the same time, we perceive some threats for growth of financial services sector like macroeconomic environment including high inflation, high interest rates, liquidity issues, global commodities prices, fiscal and current account deficit and Euro zone crisis can play spoilsport with the India growth story. While positive Government policies and regulatory changes do enlarge the scope of opportunities for financial sector companies, lack of or delay in reforms or certain regulatory changes can significantly impact the performance or make an existing business model

**ANNUAL REPORT 2014-15**

unviable. A thorough Due Diligence is conducted through market enquiries and other de dupes before agreeing “in-principle” to take up the deal. The Company conduct field investigation, collect and verify KYC and other documents, and carry out due diligence; when satisfied about the reputation and credentials of the potential borrower, the deal is proposed. Antecedents of all the prospective borrowers are verified through CIBIL, RBI Defaulters List and enquiries with their existing bankers. The investment portfolio of the Company is managed by Investment Committee comprising members from the management and approved by the board. The execution of investment transactions is monitored on regular basis with reference to target price. The Committee also lays down benchmarking and other operating guidelines.

Risk & Concerns:

Many developing countries including India have reaped handsome rewards from surging capital inflows in recent years. This is widely regarded as a very welcome phenomenon, raising levels of investment and encouraging economic growth. But surging capital inflows can also be something of a double-edged sword, inflicting rather less welcome and destabilizing side effects, including a tendency for the local currency to gain in value, undermining the competitiveness of export industries, and potentially giving rise to inflation. Capital inflows result in a buildup of foreign exchange reserves. As these reserves are used to buy domestic currency, the domestic monetary base expands without a corresponding increase in production too much money begins to chase too few goods and services.

Internal Control Systems and Their Adequacy

The Company has employed appropriate and adequate internal controls system to ensure that it covers all areas of operations. The transactions entered into by the Company are duly authorized and recorded correctly. A regular review is done in respect of the financial and operating controls of the Company. It has also implemented suitable controls to ensure all the resources are utilized optimally, that financial transactions are reported with accuracy and that there is strict compliance with applicable laws and regulations.

Human Resources / Industry Relations:

The Company believes that its success depends on the high level of skills and professionalism of its people and makes continuous endeavor to improve their efficiency. The Company recruits and retains personnel who possess the competencies and skills required for effective implementation of its strategies and plans. The Industrial Relations during the year continued to be cordial and peaceful.

Compliance

The Compliance function of the Company is responsible for independently ensuring that operating and business units comply with regulatory and internal guidelines. The Compliance Department of the Company is continued to play a pivotal role in ensuring implementation of compliance functions in accordance with the directives issued by regulators, the Company's Board of Directors and the Company's Compliance Policy. The Audit Committee of the Board reviews the performance of the Compliance Department and the status of compliance with regulatory/internal guidelines on a periodic basis.

New Instructions/Guidelines issued by the regulatory authorities were disseminated across the Company to ensure that the business and functional units operate within the boundaries set by regulators and that compliance risks are suitably monitored and mitigated in course of their activities and processes.
