The company has identified niche area in the USA market and has developed product and services for both B2B & B2C. The company has deployed its most efficient team on the projects is optimistic about its business to grow rapidly in the USA. The company further plans to step in UK, Canada, New Zealand and Australia in coming years with the similar products and services which has been a success in the USA.

EMS:

Manufacturing (Capacity Expansion): EMS sector has seen rapid growth in last few years. In order to remain updated and lead in this competitive market the company has increased its capacity to 225% and installed state of the art SMT line. However the cost of raw material went too high to meet the cost parity and compete with global players. Thus the company decided to reconsider its strategy for developing business in EMS and identify profitable projects only. The

Company is running the operations at minimal levels to reduce outflows. Although it has not at all affected adversely in the Top Line and Bottom Line of the company. However recently we have queries for large domestic projects. We have done the assessment and tested the viability. Once negotiations are over and terms are freeze. The production will commence in full swing.

Few major sectors in which Mobile Telecommunications Ltd. has successfully created space in the market are listed as under:

LED/LCD (Cosima): Manufacturing of LED/LCD

Mobile Telecommunications Ltd. has entered the vast market of LED/LCD manufacturing, Branding & Marketing in the name of Cosima world.

A short brief about LED Market:

The market momentum for LED lighting applications slowed somewhat in 2009 as the overall lighting market declined by 15-20%, but it is resumed vengeance in 2010 and 2011. Although LED lighting still accounts for less than 2 % of the overall lighting market, and still mainly addresses niche applications, growth continues to be robust, is estimated at around 20% for 2012.

Many mainstream lighting projects are beginning to be addressed by LED lighting. Some of these include major retrofits at retail chains, hotels and shopping malls, and Government/municipal lighting. Energy efficiency is often the major driver, but other attributes of LED lighting such as long life, low maintenance costs and improved quality of light are often important factors.

A short brief about LCD Market:

The strength in India's LCD manufacturing can be attributed to the brisk expansion of LCD-TV production capacity as well as to the growing demand from both the domestic and export markets. In particular, MTL has invested a huge amount in production lines, becoming more competitive with the global brands in the overall LCD arena.

Speaker (Sian-Hyundai):

MTL has come up with another brand name called as Sian-Hyundai for penetrating in the much awaited vast speaker market. To provide closer services to customers and to develop the emerging market, Mobile Telecommunications Ltd. announced to establish a joint venture module with Hyundai being one of the leader in Speaker manufacturer industry, in China, with Sian for speaker assembly and sales business. The joint venture will be a boost for MTL to advance into the emerging market with its strategic partner. It also demonstrates the new business model of supplying the international brand customer from the JV. The brand name and quality of the product along with the marketing network of the company will put the company in a win-win situation. MTL is also establishing its first to offer customer in-time services and support center.

Video Surveillance (Ugocam):

Mobile Telecommunications Ltd. has come up with video surveillance service in the brand name of Ugocam. Ugocam is the next generation of Web based video surveillance, i.e. Managed Video as a Service (MVaaS) solution. The service offers an inclusive intelligent hosting technology tool

that enables our customers to manage, view, record and broadcasting videos for surveillance, monitoring and visual information needs via any browser and mobile phone.

Company has identified a niche area in to solar energy field. Company intends to get into the following activities under this domain:

- EPC project
- Manufacturing and Trading of Solar energy equipment

The World Bank has allocated a financial aid of \$2.00 billion (Rs.11000 crores). A lot of tenders for procurement of these systems are being floated by various state governments and energy development authorities.

The company intends to be an aggressive player in to this area and tap the potentials in this market by bringing in a sophisticated and well qualified team of professionals.

To start with the company is getting into trading act. In solar energy equipment as mentioned above. This strategy will compensate the reduction in the buss, of networking equipment where the company is not willing to take exposure with the existing telecom operators as the industry is facing tight liquidity and lower margins.

Transmission and Distribution Losses:

The core problem with the power sector, as was identified in the mid- 90s, has been poor state of sub-transmission and distribution system of SEBs and other electricity utilities. The initiatives taken by the Central government and State governments to attract investments focused primarily on generation with limited success. Distribution segment of power industry remained neglected for decades.

The plan outlay for the power sector has been heavily biased towards generation. While a balanced proportion is 1:1 (1 for generation, 1 for transmission & distribution), this was 3:1 in 1993 and has improved to 1.3: 1 in the ninth plan period (1997- 02). This shift has been due to the realization of the anomaly, and also due to the fact that the State is not investing much in generation now. In most parts of the country, distribution infrastructure suffers from inadequate transformation capacities, lack of redundancies, high technical losses, poor consumer services, absence of IT to address the issues of reliability and consumer concerns.

The Company has further identified implementation of **SCADA** (Supervisory Control and Data Acquisition) projects to various state governments, and private energy producers. SCADA system monitors and acquires data of transmission and distribution losses and controls and supervises the Transmission and Distribution system.

In order to qualify for bidding such projects company is in talks with various transmission and distribution companies all over the globe for a strategic tie-up for development and implement of SCADA.

Telecom:

Wireless Communicating Equipments:

Currently the telecom wireless equipment sector in India is on its peak as never before. With Telecom companies launching new services for better customer satisfaction and trying to acquire customer preference in the fight against other competitors, the wireless equipment market is at its peak.

With 3G & 2G services launched the customer's demand is increasing every day which in turn demands the bandwidth requirement with the operators and thus drives the equipment market.

Mobile Telecommunications Ltd. has acquired vast space in the quality Telecom Wireless arena with its collaboration with OEM's from United States, Germany and United Kingdom.

Being one of the leaders in distribution of wireless equipments for the Telecom industry Mobile Telecommunications Ltd. is now planning to setup its own brand to cater the vast requirement of the industry.

Mobile Tele caters to a huge clientele in the wireless industry bifurcated in 2 divisions:

- 1. Telecom companies
- 2. System Integrators

Mobile Telecommunications Ltd. forecast's a huge future prospect in this industry.

SMART CARDS:

INDIA has one of the largest public transportation markets in the world. This makes it an ideal ground for ITMS business (Intelligent Transit Management System)

MTL has setup grounds for acquiring space in this vast market with our end to end solution of smart cards. MTL would tap four major smart card business sector to start with. Details as under:

1. Buses:

The card is placed near the HHV or bus validator which verifies and deducts the travel amount from the card for e-wallet users Validator machines at entry and exit of the bus and HHV with the conductor act as check points for validity of season passes.

2. Railways & Metro's:

The travelers will place the card at the RCP's when they enter and leave the stations. It will deduct the travel charge from the preloaded card.

Validator machines at the stations as well as HHV with the ticket checking staff will be the 2 check points for the regular and irregular travelers.

3. Petro Cards:

After filling the fuel the user gives the card which will be tapped at the validator machine on the fuel station which will deduct the charge from the preloaded card Validated by the validator machines at the fuel stations.

4. Electricity bill Payment:

The user can tap the card at the validator machine at the terminal and the charge is deducted from the preloaded card.

The validators installed at the BEST SDP and terminals would validate the payment.

Financial Solutions:

The current market situation and economic scenario across the nation has brought in front the need of certain solutions. The Company's management has identified areas where it can deploy its development team to create solution in the field of Finance and Banking which is a known domain of the Management.

The Company conducted research and it observed that many people are unaware banking and financial system and are paying high cost for debts. They have not taken benefits and schemes moved by the Government and banks and financial instructions. The company has decided to develop and market certain products which will make the individuals and corporate aware of how they can structure their finances and debts well and reduce their cost of debts, correct their credit record and keep a track with new financial policies. Further company has also developed certain products to assist banks and financial institutions and other bodies to assess, value, market and dispose/liquidate assets belonging to NPAs for recovery of Debts.

Both the products are a part of company's policy to diversify in to new markets and segments. The Management is confident about the huge potential in the products and expects its nationwide acceptability. By the launch of these products the company will also fulfill its Corporate Social Responsibility by conducting seminars and workshops for making people aware about the dynamic financial sector.

Company has successfully done the business of collections and debt structuring in the US market and based on the expense in the US market its launching CIBILDOCTOR.com and SWITCHBANKER.com in the domestic market.

To summarize the above discussion, focus will be on mobilization of cheap funds to scale up the operations in the areas discussed above. Company is planning to raise funds in debts as well as equity once the financial market stabilizes.

AUDITORS' REPORT

To,
The Members of
M/s. **Mobile Telecommunications Limited**

Report on the Financial Statements

We have audited the accompanying financial statements of Mobile Telecommunications Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2013, and the Statement of Profit and Loss and Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the Accounting Standards referred to in sub-section (3C) of section 211 of the Companies Act, 1956 ("the Act"). This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Empowering Technology Infrastructure

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

SIGNIFICANT ACCOUNTING POLICIES

1. Basic of preparation of financial statements

The financial statements are prepared under historical cost convention, on the accrual basis of accounting and in accordance with the generally accepted accounting principles, accounting standards issued by the institute of Chartered Accountants of India and provision of Companies Act, 1956.

2. Revenue recognition

- a) Revenue from Sale of goods and services are recognized as per sale contracts terms.
- b) Other Income is accounted on accrual basis except where the receipt of income is uncertain.

3. Fixed Assets

Fixed Assets are stated at the cost of acquisition including taxes, duties, freight and other incidental expenses related to acquisition and installation.

4. Depreciation

Depreciation on Fixed Assets is provided on the straight-line basis at the rates and manner prescribed under schedule XIV of the Companies Act, 1956.

5. Inventories

- a) Raw Materials, Stores and spares, and other inventories are valued at cost or net receivable value whichever is low on FIFO basis.
- b) Hardware, peripheral and software sets are valued at cost on FIFO basis.

6. Miscellaneous Expenditure

The preliminary and pre-operative expenses and project development expenses are written off over a period of 10 years.

7. Foreign Currency transactions

Transaction in foreign currency is recorded at the rates prevailing on the date of transactions. The year end balances in foreign currency are translated at rates as the end of the year. The gain/loss on such translation is charged to the profit and loss account.

8. Retirement Benefits

The gratuity payable is accounted as and when applicable on the actuarial basis.

9. Provisions, Contingent Liabilities:

A provision is recognized when the Company has present obligation as a result of past events and it is probable that an out flow of resources will be required to settle such obligation, in respect of which a reliable estimate can be made.

Contingent liabilities not provided for in the accounts are disclosed in the accounts by way of notes specify the nature and quantum of such liabilities.

10. Income Tax

Provision for taxation includes current tax and deferred tax. Current Tax is measured at the amount expected to be paid to the tax authorities, using the applicable tax rates and tax laws.

Deferred tax assets and liabilities are recognized for further tax consequences attributable to the timing differences between taxable income and accounting income that are capable of reversal in

Empowering Technology Infrastructure

one or more subsequent periods and are measured using tax rates enacted or substantively

enacted as at the Balance Sheet date. Deferred Tax assets are not recognized unless, in the management judgment, there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. The carrying amount of deferred tax is reviewed at each balance sheet date.

4.06 OTHER NOTES ON ACCOUNTS

- 1. In the opinion of the Board, current assets, loans and advances have a value on realization at least equal to the account at which they are stated in the books of accounts and provision for all known liabilities have been made, except as mentioned otherwise.
- 2. The Company is engaged in the business of Telecom System development and electronic hardware and software trading and other product and there is no separate reportable segment as per Accounting Standard (AS) 17 on segment reporting.
- 3. In accordance with the Accounting Standard (AS) 28 on "Impairment of Assets" issued by the Institute of Chartered Accountants of India, the company assesses potential generating of economic benefits from its business assets and is of the view that assets employed in continuing business are capable of generating adequate returns over their useful lives in the usual course of business. There is no indication to the contrary and accordingly the management is of the view that no provision is called for in the accounts for the year.
- 4. The balances of debtors, creditors, loans & advances are subject to confirmation.
- 5. The previous year's figures are regrouped, rearranged or recast, wherever required, to make them comparable.
