MANAGING DIRECTOR'S MESSAGE

Dear Shareholders,

On behalf of the Board of Directors, I have pleasure in welcoming you all today to the 22nd Annual General Meeting of your Company.

We are undergoing a difficult phase with a volatile market situation and some slowing down in the Industry. This has led to reduction of economic growth curve. In the wake of the India as well as global financial meltdown, it was hard for businesses to raise resources and maintain the high trend growth rate of the last few years, especially for Infrastructure Industry.

Performance Review:

India is also affected by the financial crises all over the world. Almost every sectors were affected by the same specially Infrastructure Sector is affected badly. Due to which the performance of the company has been reduced.

During the year under review, Revenue and Net Loss for the year was Rs. 387.27 Lacs and Rs. (1949.17) Lacs as compared to the previous year Rs.678.95 Lacs and Rs.(24871.03) Lacs.

The accumulated loss of the Company as on 31.03.2013 is more than 100% of its net worth during the year and immediately preceding the financial year and as such falls within the definition of "sick industrial Company" under section 46(AA) (i) of the Companies (Second Amendment) Act, 2002. The Net Worth of the company had also been eroded during the financial year 2011-12 itself resulting, the Company had become a sick industrial company within the meaning of section 3(1)(o) of the Sick Industrial Companies (Special Provisions) Act, 1985.

The company has made a reference during the financial year 2012-13 to the "Board for Industrial & Financial Reconstruction" under section 15(1) of Sick Industrial Companies (Special Provisions) Act 1985 however the same reference has been declined by BIFR.

Presently the management is trying their best to revive the company.

Management Review:

The present directors are having adequate knowledge and experience to run the Company more professionally and strategically. In order to leverage their knowledge and wide experience in the Infrastructure sector, Directors are trying their best for getting hiring projects in various parts of the Country.

During the previous year 2011-12 the company has taken over the **saw pipe division of Sancia Infra Global Private Limited** with its full assets and liabilities on a going concern basis however the same project is not take-off till date due to lack of working capital.

Corporate Governance

As such we have adopted the Group's Corporate Governance Practices and Code of Conduct. These guidelines prescribe a set of systems, processes and principles that conform to the best global standards, and are aimed at promoting the interests of all our stakeholders.

Commitments

Powered by the experience and expertise of the Sancia Global group in project management, we will seek to achieve the highest performance standards in the industry.

I am Grateful to the Board of Directors for their unwavering support and guidance. I also take this opportunity to express my gratitude to all our shareowners, who have reposed trust in us and extended their constant support.

Management Discussion & Analysis Report

1. INDUSTRY STRUCTURE DEVELOPMENTS AND OUTLOOK

Over the past several years, the Indian economy grew faster than average global growth rate. The strong economic growth in India was largely due to factors such as increasing level of domestic demand, solid economic growth in all spheres of economic activity, the emergence of India as a low cost manufacturing destination and so on.

The main business of our company is to give on hire, equipments to companies engaged in construction activities particularly in construction of road, building and port. Thus the activities of the company are affected by the conditions in the infrastructure industry. Construction activity is an integral part of a country's infrastructure and industrial development. It includes hospitals, schools, townships, offices, houses and other buildings; urban infrastructure (including water supply, sewerage, and drainage), highways, roads, ports, railways, airports, power systems; irrigation and agriculture systems; telecommunications etc.

The construction equipment cost particularly in the road projects, bridges / dam construction and port projects constitutes a major cost of the projects. Further, with rapid technological developments, the cost of replacement of these equipments is also very high and can have a major impact on the profitability of a project. This is where the companies with a facility of providing equipments on hire have started coming in. However now these unorganized sector have started pooling in there equipments so that they are able to get better returns of their investment by way of maximum utilization of the equipment, better rental value and better maintenance of the same.

However as the project location are diverse and the equipment requirement at various sites may vary the sector has recently seen consolidation. As development of infrastructure at various geographical location all over India will involve huge funds outlays which can be only managed by the companies in the organized sector who have access to the funds easily and are able to develop the infrastructure.

2. RISKS CONCERNS AND RISK MITIGATION OBJECTIVE

Sancia Global Infraprojects Limited has successfully implemented risk management framework to achieve the following objectives:

- (a) Strategic: High-Level goals, aligned with and supporting its mission.
- (b) Operations: Effective and efficient use of its resources.
- (c) Reporting: Reliability of financial reporting.
- (d) Compliance: Compliance with applicable laws and regulations.

Risks are assessed and ranked according to the likelihood and impact of them occurring. Existing controls are assessed and mitigation measures discussed.

Risk are assessed and reviewed regularly at top level and risk mitigation measures taken promptly to address any adverse situation.

The company's activities comprise of providing equipment(s) on rental basis to entities which provide for levy of penalty normally for time-over-run cases. In case the Company is unable to meet the performance criteria as prescribed by the respective client and if penalties are levied, the financial performance of the company may be adversely affected. However, company has its own work-force which operates the machines and has a stock base of spare parts / its own workshop which ensures the minimal disruption of equipments etc.

3. THE EXCHANGE RATE FLUCTUATIONS MAY HAVE IMPACT ON THE PERFORMANCE OF THE COMPANY

The Company is exposed to exchange rate fluctuations, uncertainties in the global financial market may have an impact on the exchange rate between Rupees vis-à-vis other currencies. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in the future. Such fluctuations can have an impact on revenue patterns.

The company has insurance policy consists of coverage for risks relating to physical loss. In addition, we have obtained separate insurance coverage for workmen related risks, motor vehicle risks and loss of movable assets risks. While we believe that the Insurance coverage maintained, would reasonably be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully. To the extent that we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, or the insurance policy covering such risk is not honored, our results of operation and cash flow may be adversely affected.
