### 2 Summary of significant accounting policies

### 2.1 Basis of preparation

The financial statements are prepared in accordance with Generally Accepted Accounting Principles (GAAP) under the historical convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 ('the Act') read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act (to the extent notified) and guidelines issued by the Securities and Exchange Board of India (SEBI). Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

### 2.2 Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting period end. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates.

### 2.3 Tangible fixed assets

Fixed assets are stated at cost, less accumulated depreciation and impairment loss, if any. Cost comprises the purchase price and any cost attributable to bringing the asset to its working condition for its intended use.

### 2.4 Depreciation on tangible fixed assets

Depreciation on tangible asset is provided on the written down value method over the useful lives of the asset as prescribed under Part C of Schedule II of The Companies Act, 2013.

### 2.5 Impairment of assets

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal / external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital. After impairment, depreciation is provided on the revised carrying amount of the assets over its remaining useful life.

### 2.6 Investments

Long-Term investments are stated at cost and provision for diminution is made, if the decline in value is other than temporary in nature as required under AS 13. Pre-acquisition dividends received are reduced from the cost of investments. On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

### 2.7 Revenue recognition

Dividends from companies are accounted as income in the year in which they are declared. Interest is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

### 2.8 Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares, if any.

### 2.9 Provisions

A provision is recognised when an enterprise has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

### 2.10 Taxes on income

Provision for current tax is made based on the liabilities computed in accordance with the relevant tax rates and tax laws. Provision for deferred tax is made for the timing differences arising between the taxable income and accounting income computed at the rates enacted or substantively enacted by the balance sheet date.
