CHAIRMAN'S MESSAGE

Dear Shareholders,

I would like to congratulate all stakeholders for the continuous growth Winsome Textile has witnessed over the

years including in current financial year. We started as a spinning unit, today we have grown from 16,000 spindles to 106,000 spindles, dye house with capacity of 29 tons per day and yarn dyed knitted fabric capacity of 6 tons per day with full integration covering the value chain of industry and providing 100 % value added products to our clients.

Our vision have been to emerge as a 'Global player in innovative and value added textile'. Innovation has been our passion and with continuous efforts, we have emerged as a major player in industry with our differential approach of providing maximum value addition in our products. Our passion has led us to maximize our value added products to 100% of our overall production.

FY 2015-16 was not a great year for world economy as the issues like commodity prices, unrest in Middle East, slowing economy in oil producing nations and slowing growth rate of developed countries kept the world economy at back foot. Despite of a struggling global economy, India emerged as the fastest growing economy banking on reforms placed by government which is creating a positive environment for Indian Industries. Although for textile industry the concerning factor is recent policies implemented by China regarding import of yarn & cotton which has brought the industry on back foot. China has recently reduced import of cotton & yarn which has been primary market for Indian textile spinning companies and these recent restrictions are hurting the industry growth.

FY 2015-16 was not so significant in terms of revenue growth for our company although we have shown marginal growth in our revenue as compared to negligible growth in overall industry. We have shown increase in our revenue in such a crucial time when the industry is struggling. Our margins have significantly improved with our efficient integrated model which allows us to reduce costs. Due to integration we have been able to identify the value addition in our products on each activity level and this helps us to derive our strategy accordingly.

Our manufacturing EBITDA increased by 4% as compared to previous year despite the fact that revenue increased by marginal 1% which reflects our operational efficiency and commitment towards value addition. Our manufacturing EBITDA margin increased to 18% as compared to 17% in previous year which is higher than our peer groups.

With increasing efficiency and cost reduction, we have been able to increase our profit margins over the year. We have been able to increase the efficiency of our operational assets to use them at their full potential. Our net earnings increased by 59% as compared to previous year providing more value to our shareholders.

At the same time we have been able to bring down our total debt to equity ratio to 2.2x from 2.8x since last financial year. Our current approach is to bring down our debt to equity ratio at optimum level where we could minimize our cost of capital.

Our operational efficiency has significantly improved as our production has been increased on the same capacity as compared to last financial year. We continue to develop & modernize our infrastructure with the latest machineries and also increasing our skilled

manpower accordingly. We emphasize on quality of our products, considering that we have also equipped our R&D department with latest technology. Our quality parameters are benchmarked with world standard as different products passes through multilayer of testing before the final delivery of product. We are investing in power saving programs at different levels for the conservation of energy which have helped us in reducing our power cost with a significant margin.

Our customer base has been increasing with significant growth as we are exporting to more than 50 countries all across the globe. Our quality product has been in demand and our ability of improvisation as per the requirement of our customers allowing us to penetrate in unexplored territories where there is a huge market to grow. Our differential product offering have helped us in retaining our customers and Integrating the knitting process into our value chain has helped us in providing final product to our customers which helps them to get the product in lesser time on lesser price.

We are increasing our product range with time, our research and development teams is continuously busy in innovating with our products allowing us to offer new products on timely basis. We have developed ability to customize our products with customer requirements. We have been able to provide different blends of yarn in different shades.

We believe that, if a company needs to use their full potential, they need to respect their human resources and we at Winsome not only own the responsibility of developing our manpower technically but also take onus of the overall development and mental & psychological well-being of our employees. To fulfill this objective, Art of Living workshops are being conducted on regular basis to cover all our staff and workers, which has led to self-development, spiritual enlightenment and improving the happiness quotient amongst our employees. To attain and

maintain quality, efficiency and effectiveness in an organization there is an ever present need for unremitting up gradation of employees through training.

Our growth strategy is blend of differentiation and low cost advantage. We are constantly looking for new opportunities in the market at both domestic and global level. We differentiate our products in every manner as compared to our competitors by infusing maximum value to them and at the same time we manage to keep our manufacturing costs on the lower side. Innovation is and will remain the basic growth ingredient for us as we will keep working on bringing new products in market and explore new opportunities. In addition to that we are working on rebranding of our company to reach its maximum potential. We will be investing in domestic and international marketing with the target of creating a brand value for Winsome in textile market at both domestic and global scale.

I would like to show my regards to all my colleagues across the country and the globe for their tremendous dedication, commitment and contribution to strengthening Winsome. We are continuously working forward to fulfill our mission of generating maximum value for our stakeholders.

I would like to pay my sincere appreciation to the Board of Directors for their guidance. I would like to express my gratitude to all our stakeholders for their continuing faith in Winsome.

Yours Sincerely,
Ashish Bagrodia

MANAGEMENT DISCUSSION AND ANALYSIS

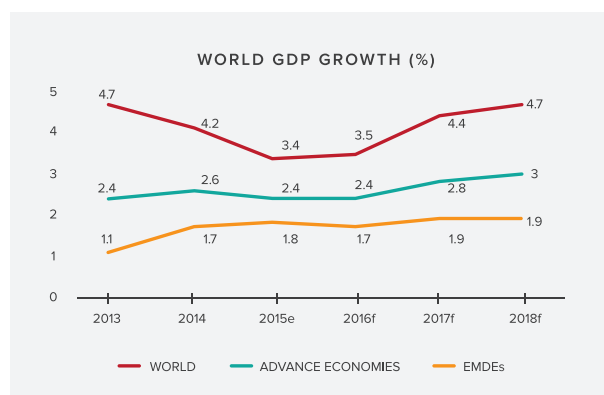

CHANGING ECONOMIC FACTORS

Global Economic Review

Global Economy has been sluggish in recent times with low commodity prices, weak global trade and diminishing capital flows. World Bank has recently forecast down the global economic growth to 2.4% from the earlier projection of 2.9% in January 2016. Commodity exporting emerging market and developing economies have struggled to adapt to lower prices for oil and other key commodities.

Weakness in emerging market and developing economies in 2015 has carried over into 2016. Aggregate growth for this group is projected at 3.5 percent in 2016, only marginally up from a post-crisis low of 3.4 percent in 2015. However, there are substantial differences in economic prospects between commodity exporters and importers. Regions with a large number of importers (East Asia and Pacific, South Asia) are expected to show resilience, while the outlook for regions with a sizable number of exporters (Latin America and the Caribbean, the Middle East and North Africa, Sub-Saharan Africa) continued to deteriorate since the start of the year.

Emerging market and developing economies (EMDEs) are struggling because of decrease

in import from developed economies. Global economic growth is expected to pick up to 3% by 2018, as stabilizing commodity prices provide support to commodity exporting EMDEs.

Indian Economic Review

Despite of Sluggish Global Economy, Indian Economy has performed very well relying on reforms promised by government, RBI's inflation focus with additional support by benign global commodity prices. As per Central Statistics (CSO) and International Monetary Fund (IMF) India has emerged as the fastest growing major economy in the world.

Initiative like 'Make in India' have improved the FDI flow in India. Numerous foreign companies are setting up their facilities in India which also bring the latest technology helping in increasing Industrial Output. Overall Industrial output has shown considerable growth recently and consumer confidence has been improved. The future of Indian Industries seems bright although unstable global economy still slows down the pace of full potential growth.

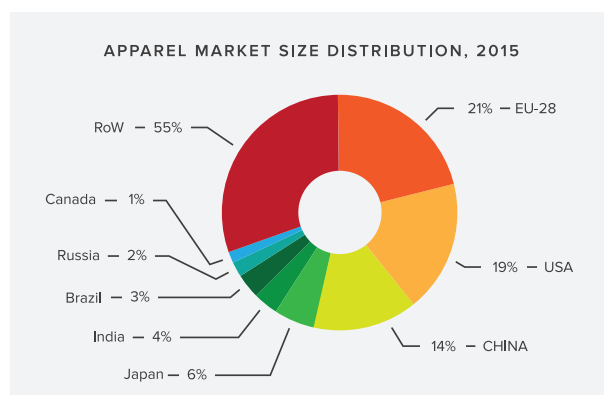

INDUSTRY OVERVIEW

Future of Global Textile & Apparel Trade seems bright with increasing market all across the globe and the increasing contribution of developing economies. Apparel constitutes more than half of share of global textile & apparel trade followed by fabric.

Source: UN Comtrade

Total global Apparel market size in 2015 was USD 1,685 billion and it is expected to reach around USD 2,600 billion by 2025. While the Apparel market is mostly concentrated into EU & USA, developing countries like China, India & Russia are emerging as future market for apparel consumption. Emerging middle class with increasing per capita apparel spending is a major force which is driving the consumption in developing economies. This potential domestic market is providing boost to local textile manufacturers.

China & EU-28 are major exporters of textiles however share of EU-28 in textile export has gradually decreased in last 15 years whereas the base has shifted towards Asia with countries like China & India are gaining market share in textile export. Asia's share in global export of fiber has been continuously growing in last 10 years. The major driving force behind this shift has been the lower cost of production in Asian countries. Similar trend has been noticed with the export of yarn, fabric and apparel where share of Asia in export of these commodities has increased significantly.

Integration is the latest phenomenon

In the world of manufacturing, integration has emerged as a major phenomenon as world's successful companies are bringing all processes of industry's value chain under one roof. We at Winsome are following the same league taking full advantage of industry's value chain.

Knitting Segment is the latest addition in our value chain allowing us to providing one stop store to our customers.

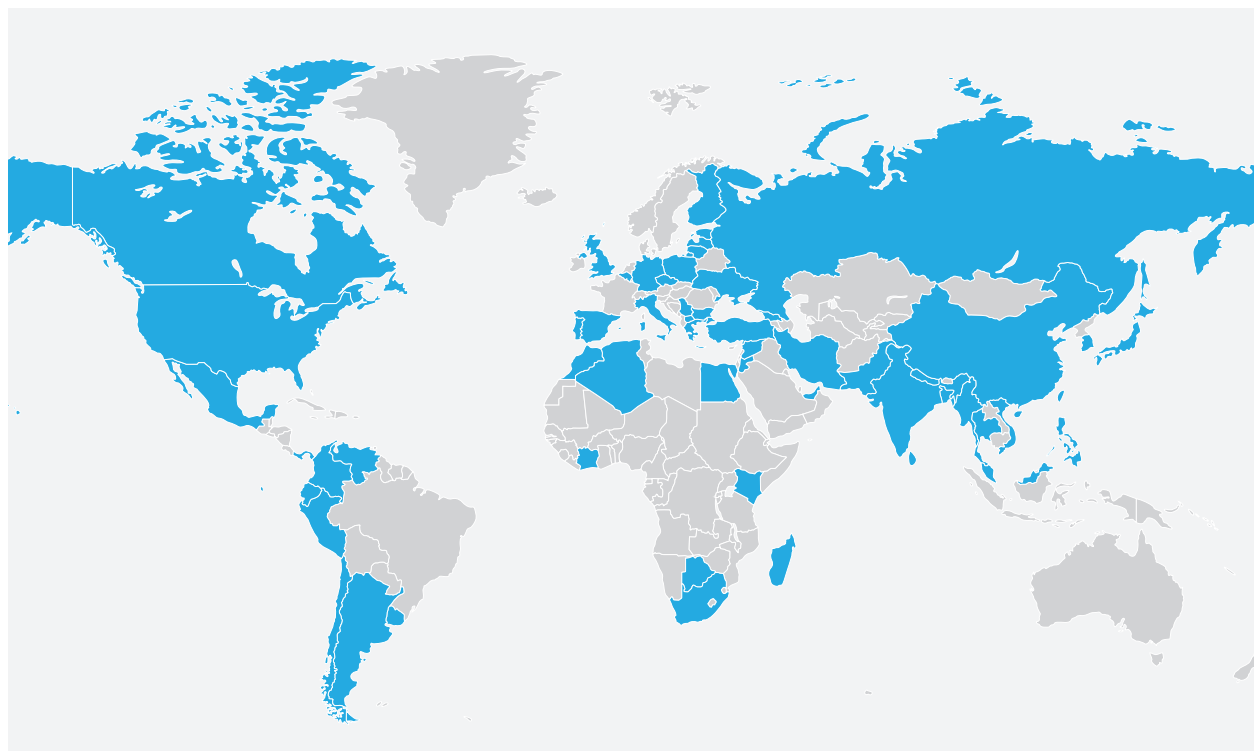

Specialized Knitted Products

Innovation is the key to success and to take the full advantage of Industry value chain, we have set up knitting segment to produce specialized Knitted products with the latest technology of Auto striper which is a niche category in Indian market. It helps us to bring together the various processes of spinning, dyeing, designing & knitting under one integrated head and develop specialized products. It helps us to maximize the value addition in our products with enabling us to produce the final product of value chain. Here we produce quality fabrics

with high technical value with latest machinery from Germany & Italy. This helps us in removal of dye-lot minimums for high premium yarns and at the same time use up our R&D at the mills for new yarns, blends & spinning techniques.

Due to integration of knitting production, we have been able to increase our overall margin on each product which reflects in our financials. We started our production in FY 2013-14 and within two years we have increased our production with CAGR of 51%.

At Winsome, Infrastructure of latest technology allows us to be flexible for customization of our product offering as per customer requirements on a short notice.

Quality

We are known in the market for our finest quality and maintaining quality of our products has been our top priority. To ensure consistent quality yarn, we follow a comprehensive quality control management system. We have well equipped laboratories of international standard for fiber & yarn testing and colour matching & testing.

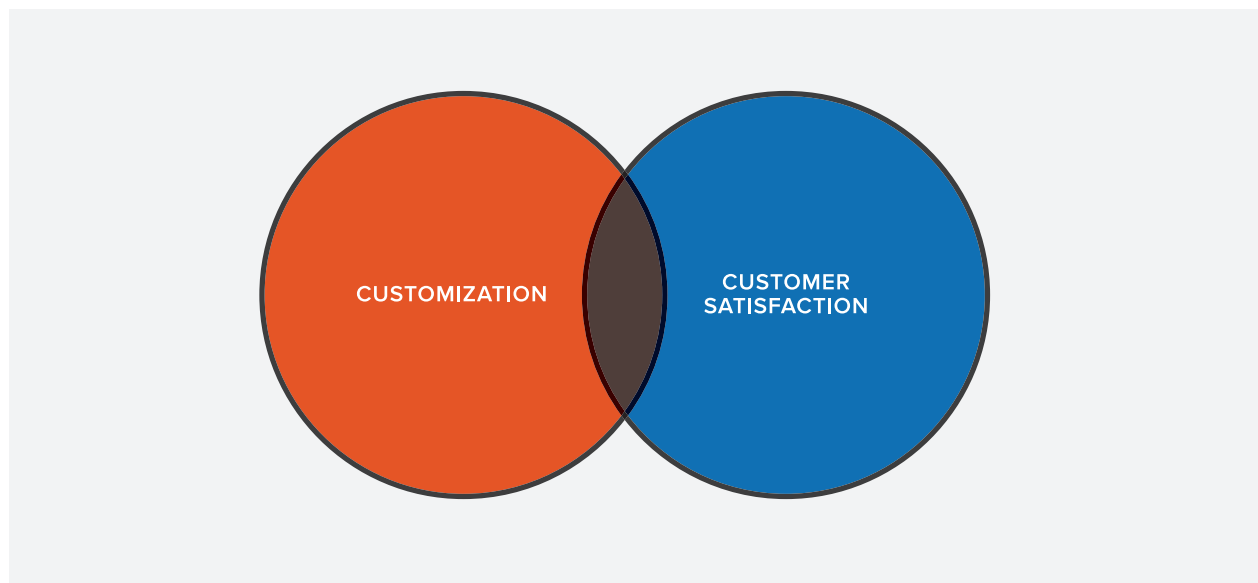

Weakness and Threats

Increase in the power costs, higher transaction costs, high cost of labour and general increase in input costs, are all hindering progress, for which the industry has to concentrate on cost reduction exercises and improvement in efficiency. Shortage of skilled labour, decline in

cotton acreage every year, cotton crop loss due to unfavorable monsoon is indeed a major area of concern for textile industries. Cotton acreage in top grower India is likely to drop by the most in over a decade this year, as plunging prices and fears of a drought prompt farmers to switch to cultivating pulses in the hope for better returns. As per Cotton Association of India, since other crops are giving better returns, there is a drop of around 7 per cent in cotton acreage and that will be the steepest fall since 2002-03.

Uncertainties in global textile market regarding yarn prices, fluctuation in foreign currencies, disturbed countries crisis etc. leads to affect cotton procurement, product pricing, decline demands & customer base. Additional tax levies in different forms also affect profitability.

Your Company is persistently working hard to face such challenges by cost reduction, process improvements, minimizing wastage and improving productivity & quality in proximity to mitigate the growing cost pressure in our overall operations. We are moving ahead swiftly through our result oriented strategies for future sustainability & development.

ANNEXURE - B TO THE AUDITORS' REPORT

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Winsome Textile Industries Limited ("the Company") as of 31st March 2016 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI, deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, *read with the matters described below under **Emphasis of Matters and our comment in main report under the heading "Basis of Qualified Opinion"***, the Company has maintained, in all material respects, an adequate internal financial controls over financial reporting and such internal financial controls over financial reporting were operating effectively as of 31st March 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Emphasis of Matter

Attention is drawn to:

- (i) Balances of certain receivables, loans and advances, trade payables and other liabilities are subject to confirmation/reconciliation.
- (ii) As per the past practice, Consumption of raw materials have been accounted for as balancing figure as assessed and estimated by the management.

Our opinion is not modified in respect of matters stated above.

We have considered the weaknesses identified and reported above in determining the nature, timing and extent of audit tests applied in our audit of the March 31st, 2016 financial statements of the Company, and these weaknesses do not affect our opinion on the 2016 financial statements of the Company.
