3. Reserves

4. Results of Business Operations and the State of Company's Affairs

There is no change in the status of the Project since last reported.

Your Company, through its wholly owned subsidiary, SRM Energy Tamilnadu Pvt. Ltd., had proposed to set up Thermal Power Projects at various locations in the state of Tamil Nadu with a capacity of 3X660 MW i.e. 1980 MW capacity.

The implementation of the project requires huge amount of investments and also the acquisition of considerable part of the land. Your management had put in its efforts to find the investors for the project, through the Merchant Bankers, but did not materialize, majorly due to:

- Current investment by the promoters being very low vis-a-vis the amount of investment needed for the implementation of the project.
- The unfavourable Industrial scenario, Govt. policies, Company's current status of approvals, status for the land acquisitions and its financial health etc.

Your Company has no other operations, hence, the related expenses incurred during the current period are considered as pre-operative expenses pending allocation to the power project.

The aforesaid continued adverse situation of the Company has led into the further reduction of Net worth of the Company, which further slipped from (Rs. 8.51) Millions of the 2016-17 to (Rs. 12.79) Millions of 2017-18. The promoters have been infusing funds to meet the liabilities and future running expenses of the Company. The losses for the Company has been (Rs. 4.28) Millions for 2017-18 which has further increased the negative Reserves to (Rs. 103.39) Millions in 2017-18 from (Rs. 99.11) Millions in 2016-17.

Further, your Board of Directors on March 09, 2015 had decided to sell/dispose off the assets /power plant/project in the wholly owned subsidiary, subject to necessary approvals from the shareholders and other statutory authorities, if any, which is still under consideration and finalization. In view of the commitments of your promoters to infuse funds into the Company and to provide necessary funding, the accounts have been prepared on going concern basis. The assets/power plant in the wholly owned subsidiary, which is intended to be sold/disposed off as explained above, is in pre-operative stage and no expenses have been charged to Statement of Profit and Loss. Accordingly, the loss for the year does not include any loss relating to ordinary activities attributable to discontinuing operations.

DEMAND OF LOAN TO BE REPAYED BY SRM ENERGY TAMILNADU PVT. LTD., (THE WHOLLY OWNED SUBSIDIARY)

In its last financial year's Directors Report, the Company had informed its esteemed Shareholders about the unsecured loan received by its Wholly owned subsidiary. Mr. Gagan Rastogi, the Director of the subsidiary Company had repeatedly requested for the money to be repaid and he has also expressed his inability to infuse further funds. As all the expenses of the said wholly owned subsidiary Company were met by the Director, Mr. Gagan Rastogi.

In the previous year, the Wholly owned subsidiary had settled the loan of Mr. Gagan Rastogi with an amount of Rs. 9.257 crore by way of assigning the amount as receivable from Krishna Enterprises, in its favour, through an MOU and assignment agreement on "as is where is basis". Upon being settled with the said amount, Mr. Rastogi further raised his concern about the settlement of his entire loan amount as advanced to the Company. The loan balance as on the date of this report is Rs. 42,80,61,000 /- i.e. as on 13th August, 2018.

Considering all the possibilities and the prevailing scenario of the Companies, its business status, its financial position etc., the board had decided to settle his loan by offering the available assets of the subsidiary, which majorly comprises of land. The wholly owned subsidiary (WOS) had arranged to get the valuation of the Land done by two Independent Valuers, which was valued to Rs. 9.50 crores and 9.75 crores respectively by the two Valuers. The proposal was placed before Mr. Gagan Rastogi to accept the ownership of the land with its current valuation as settlement of the amount outstanding in the books in his name. He accepted the offer subject to the condition that all the applicable costs and fees that are applicable in the change of ownership of the land would not be borne by him. However, Mr. Gagan Rastogi had suggested an alternative route of transferring the Equity Shares of the subsidiary Company equivalent to the outstanding loan amount in his name.

The matter is still pending for finalization. Upon a suitable course of action being decided by the Board of Directors, it shall be put forward before the Shareholders of the Company for their approval.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The Management's Discussion and Analysis ("MDA") Report mainly focuses on various factors and their impact on the business of SRM Energy Limited and its subsidiary SRM Energy Tamilnadu Private Limited ("SRM" or the "Company") during the Financial Year 2017-18 and to the date of this report. This report discusses and analyses the financial results for the period 2017-18 along with the review of business risk faced by the Company. MDA also contains the overall scenario of the industry, its growth at global and domestic level, this further contains the possible effect of such industry scenario on the business of the Company.

The management of the Company opine and give their comments on the various resources that may affect necessary development of the Company's business.

1. INDUSTRY STRUCTURE AND DEVELOPMENTS

The India cannot overlook the essential role of the power sector in fuelling its overall development. The country's power sector has been going through a massive transformation. The government has been supportive to growth in the power sector by undertaking various programmes for the same. The 2018 Global Economics Prospect (GEP) released by the World Bank, projects India's GDP growth to pick up to 7.3% in 2018-19 and to 7.5% for the next two years.

In view of the Central Electricity Authority (CEA), the electricity demand in the country will grow at 7.1% (CAGR) between F.Y. 2017 and F.Y. 2022, driven primarily by industrial demand which is expected to pick up owing to the 'Make in India' initiative of the Government.

Further, India is expected to attract a substantial investment of Rs. 11,55,652 crore in power generation sector by the year 2022 in setting up projects across thermal, hydro, nuclear and renewables segment. A total capacity addition of 58,384 MW from conventional sources has been foreseen consisting of 47,855 MW of coal-based power stations, 406 MW of gas-based power stations, 6,823 MW of hydropower stations and 3,300 MW of nuclear stations.

The Government of India has released its roadmap to achieve 175 GW capacity in renewable energy by 2022, which includes 100 GW of solar power and 60 GW of wind power. In addition, the Union Government of India is preparing a 'rent a roof' policy for supporting its target of generating 40 gigawatts (GW) of power through solar rooftop projects by 2022. Also the Coal-based power generation capacity in India, which currently stands at 192 GW is expected to reach 330-441 GW by 2040.

1.2. Total Installed Capacity

As of March 2018, India has a total thermal installed capacity of 222.90 GW. Almost 88% of the thermal power is obtained from coal and the rest is from diesel and gas.

The private sector generates close to 45.2% of India's thermal power, whereas States and Centre have a share of 24.6% and 30.2% respectively. The share of large hydro and nuclear energy in total installed capacity is approximately 13.2% and 2% respectively.

1.3. Fuel

Fuel	MW	% of Total
Coal	1,96,958	57.3%
Gas	24,897	7.2%
Oil	838	0.2%
Total Thermal	2,22,693	64.8%
Hydro (Renewable)	45,403	13.2%
Nuclear	6,780	2.0%
RES* (MNRE)	69,022	20.1%
Total	343,899	

* Installed capacity in respect of RES (MNRE) as on 31.03.2018. RES (Renewable Energy Sources) include Small Hydro Project, Biomass Gasifier, Biomass Power, Urban & Industrial Waste Power, Solar and Wind Energy.

1.4. Generation

The electricity generation target of conventional sources for the year 2018-19 has been fixed as 1265 Billion Unit (BU). i.e. growth of around 4.87% over actual conventional generation of 1206.306 BU for the previous year (2017-18). The conventional generation during 2017-18 was 1206.306 BU as compared to 1160.141 BU generated during 2016-17, representing a growth of about 3.98%.

1.5 Transmission

The Indian transmission sector has seen a robust growth in the last 5 years. The sector is largely dominated by the state utilities while the private sector currently accounts for only 3-4% of the total transmission capacity. The Central Electricity Authority (CEA) estimates that an investment of INR 2.6 lakh crore will be made between F.Y. 2018 and F.Y. 2022. The investment will be used for the 100,000 circuit km of transmission lines and 2,00,000 MVA transformer capacity of substations at 220 KV and above voltage by the end of 13th five year plan.

1.6. Distribution

Power distribution in India has shown considerable improvement, though there is significant scope for future interventions. The power distribution segment is similarly dominated by state utilities with presence of private players only in few cities across India. Recently the government has tried to increase private participation in electricity distribution through distribution franchise model and sub-contracting of non-core operations. However, the sector still remains inefficient with high AT&C losses and poor financial health of distribution utilities.

2. OPPORTUNITIES AND THREATS

India has the fifth largest power generation capacity in the world. The country ranks third globally in terms of

electricity production. In May 2018, India ranked 4th in the Asia Pacific region out of 25 nations on an index that measures their overall power. Electricity production in India reached 1,201.543 Billion Units (BU) during F.Y. 2018.

Opportunities:

- Expansion in industrial activity to boost demand for electricity.
- Growing population and increasing penetration and per-capita usage to provide further impetus.
- Power consumption is estimated to increase from 1,160.1 Terawatt-Hour (TWh) in 2016 to 1,894.7 TWh in 2022.
- Diversification into renewable sources increasing growth avenues.
- Schemes like Deen Dayal Upadhyay Gram Jyoti Yojana (DDUGJY) and Integrated Power Development Scheme (IPDS) have already been implemented for rural and urban areas respectively.

Threats:

- Threats of substitute - Does not have any substitutes.
- Bargaining power of suppliers is high as presence of bigger players block the new entrants, on contrary of above, bargaining power of buyers is Medium, as for retail consumers, government sometimes interferes to regulate prices. However, prices are not regulated for industrial customers.
- Rivalry is not intense due to oligopoly structure.
- In India, the projected demand is already above the supply levels.
- Capital intensive nature of the industry makes it difficult for new entrants
- Regulatory approvals, land remain a major problem.
- Competitive rivalry is expected to increase due to government encouraging private players to enter the sector.

3. OPERATIONAL PERFORMANCE

The Company has plan to set up a power project at Tamilnadu with a capacity of 3X660 MW i.e. 1980 MW. The said plan was proposed to be set up through the Wholly Owned Subsidiary SRM Energy Tamilnadu Pvt. Ltd. Your Company has no other operation at present and the related expenses incurred during the current period are considered as pre operative expenses pending allocation to the power project.

As informed that the Company has no other operation at present and also the project in hand is not become operations, this had led to the situation where the Net worth of the Company has been significantly reduced and it has been incurring cash losses.

Pursuant to the repetitive demand of one of the Directors in the subsidiary Company for the repayment of the loan extended by him to the said subsidiary, the board of directors of the company, in its meeting held on March 9, 2015 had decided to sell/dispose off the power plant transferred in its wholly owned subsidiary, subject to necessary approvals from the shareholders and other statutory authorities, if any. The aforesaid

decision has taken various further steps, the latest position has been detailed in the Board Report.

4. PROJECT AT CUDDALORE

As stated in the last Annual Report, the paucity of funds, resulting from the Company not being able to proceed with the Proposed Rights issue, due to reasons beyond its control, has considerably slowed down the progress of the project. Considering the prevailing power industry scenario in the country coupled with the slower pace of growth of the country as a whole, prospective investors have deferred their decisions on investments, which has further compounded the problems.

The Company's applications for allotment of Govt. land entrapped in the project site is in process with the authorities concerned and it is expected that the necessary allotments will be received shortly once we initiate project activities on ground.

5. HUMAN RESOURCES

The Company is working with the limited necessary staff as the project of the Company has not become operational. 7. RISKS AND CONCERNS

The power sector is facing challenges around to fuel issues, statutory obligations, emission levels, water scarcity, power theft, low power demand growth, poor quality of coal, availability of transmission corridors, low performance of old power plants and financial crisis of private power generators/IPP's etc. Some of the key risks and concerns specific to your Company are as follows:

- Issues in land acquisition and resettlement and rehabilitation (R&R) affecting acquisition of coal blocks.
- Lack of state of the art infrastructure with state transmission and distribution utilities.
- Increase in stressed thermal assets due to non-availability of long term PPAs and unviable tariffs.
- Increased environmental cess and stricter emission norms likely to impact cost of production of thermal power plants.

- Inadequate fuel supplies and dependence on imported coal.
- Discoms are refraining from signing fresh thermal PPA's due to subdued demand growth.

The major steps from the Government may help improve the financial health of the nation's power distribution companies by driving increased efficiency of domestic coal production and delivery which will result in even less need for thermal coal imports. India's electricity generation future, in other words, will be based on cheap renewables and domestic coal, with the Central Electricity Authority continuing to target a cessation of thermal coal imports.

ANNEXURE "A"

TO THE INDEPENDENT AUDITORS' REPORT

(Referred to in paragraph 1 (f) under 'Report on Other Legal and Regulatory Requirements' of our Report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **SRM ENERGY LIMITED** ("the Company") as of March 31, 2018 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance or adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention

and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation or reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over

financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment or the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls

over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanation given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The Ind AS are prepared under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and the relevant amendment rules issued thereafter.

Effective April 1, 2017, the Company has adopted all the Ind AS standards and the adoption was carried out in accordance with Ind AS 101 First time adoption of Indian Accounting Standards, with April 1, 2016 as the transaction date. The transaction was carried out from Indian Accounting Principles generally accepted in India as prescribed under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (IGAAP), which was the previous GAAP.

2.2 Basis of preparation

The financial statements have been prepared on the historical cost convention on accrual basis except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the accounting policies mentioned below.

Historical cost is generally based on the fair value of the consideration given in exchange of goods or services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.

The principal accounting policies are set out below.

All assets and liabilities have been classified as current or non-current according to the Company’s operating cycle and other criteria set out in the Act. Based on the nature of products and the time

between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as twelve months.

2.3 Property, plant and equipment [PPE]

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation and accumulated impairment losses, if any.

All items of property plant and equipment have been measured at fair value at the date of transition to Ind AS. The Company have opted such fair valuation as deemed cost at the transition date i.e. April 1, 2016.

Cost of acquisition or construction is inclusive of freight, duties, relevant taxes, incidental expenses and interest on loans attributable to the acquisition of qualifying assets, up to the date of commissioning of the assets. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for qualifying assets, upto the date of commissioning of the assets

2.4 Capital Work in Progress:

Project under which assets are not yet ready for their intended use are carried at cost comprising direct cost, related incidental expenses and attributable interest.

2.5 Depreciation

Depreciation has been provided following Written Down Value Method based on life assigned to each asset in accordance with Schedule II of the Companies Act, 2013, unless stated otherwise.

2.6 Impairment of Assets

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/ external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets net selling price & value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital.

After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

A previously recognized impairment loss is increased or reversed depending upon changes in circumstances. However the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation if there was no impairment.

2.7 Borrowing costs

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing

of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs. Borrowing costs, allocated to and utilised for qualifying assets, pertaining to the period from commencement of activities relating to construction/development of the qualifying asset upto the date of capitalisation of such asset is added to the cost of the assets. Interest income earned on temporary investment of specific borrowing pending expenditure on qualifying asset is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are expensed in the period in which they occur.

2.8 Leasing

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the company is classified as a finance lease. The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

2.9 Foreign Currencies

Foreign Currency transactions are recorded at the exchange rate prevailing on the date of transaction. Foreign currency denominated asset and liabilities (monetary items) are translated into reporting currency at the exchange rates prevailing on the Balance Sheet date. Exchange difference arising on settlement of foreign currency transactions or restatement of foreign currency denominated assets and liabilities (monetary items) recognized in the Statement of Profit and Loss / Pre-operative expenses.

2.10 Employee benefits

Employee benefits such as salaries, allowances, non-monetary benefits which fall due for payment within a period of twelve months after rendering service, are capitalised if related to project else recognised in the Statement of Profit & Loss in the period in which the service is rendered.

Employee benefits under defined benefit plans, such as gratuity which fall due for payment after completion of employment, are measured by the projected unit credit method, on the basis of actuarial valuation carried out by the third party actuaries at each balance sheet date. The Company's obligations recognized in the Balance sheet represents the present value of obligations as reduced by the fair value of plan assets, where applicable.

During Current financial year, Provision for leave encashment is accounted on year to year basis and considered as short term employee benefits

and are recognised as an expense at undiscounted amount in the profit and loss account for the year in which the related services are rendered.

Actuarial gains and losses are recognized immediately in the Statement of Profit & Loss.

2.11 Investments

Investments that are readily realizable & intended to be held for not more than a year are classified as current investment. All other investments are classified as long term investments. Current investments are carried at lower of cost & fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution in value is made to recognize the decline other than temporary in the value of investments.

2.12 Provisions and Contingent Liabilities

Provisions

The company recognised a provision when there is a present obligation (legal or constructive) as a result of past events and it is more likely than not that an outflow of resources would be required to settle the obligation and a reliable estimate can be made. When the company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pretax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liability

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.

2.13 Taxation

- (i) Provision for Current Tax is made after taking into consideration benefits admissible under the provisions of The Income Tax Act, 1961.
- (ii) Deferred tax resulting from "timing differences" between book and taxable profit is measured using the tax rates and laws that have been enacted or substantively enacted as on the balance sheet date. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income

levied by same governing taxation laws. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that they can be realised against future taxable profits.

- (iii) At each balance sheet date the Company re-assesses unrecognised deferred tax assets. It recognizes, unrecognised deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be that sufficient future taxable income will be available against which such deferred tax assets can be realised. The carrying amount of deferred tax assets are reviewed at each balance sheet date. The company write-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realised. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

2.14 Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year is adjusted for the effects of all dilutive potential equity shares.

2.15 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) after tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

2.16 First-time adoption - mandatory exceptions, optional exemptions

Overall principle

The Company has prepared the opening balance sheet as per Ind AS as of April 1, 2016 (the transition date) by recognising all assets and liabilities whose recognition is required by Ind AS, not recognising items of assets or liabilities which are not permitted by Ind AS, by reclassifying items from previous GAAP to Ind AS as required under Ind AS, and applying Ind AS in measurement of recognised assets and liabilities. However, this

principle is subject to the exception and certain optional exemptions availed by the Company as detailed below:

Past business combinations

The Company has elected not to apply Ind AS 103 Business Combinations retrospectively to past business combinations that occurred before the transition date of April 1, 2016.

Consequently,

- The Company has kept the same classification for the past business combinations as in its previous GAAP financial statements;
- The Company has not recognised assets and liabilities that were not recognised in accordance with previous GAAP in the balance sheet of the acquirer and would also not qualify for recognition in accordance with Ind AS in the separate balance sheet of the acquiree;
- The Company has excluded from its opening balance sheet those items recognised in accordance with previous GAAP that do not qualify for recognition as an asset or liability under Ind AS;
- The Company has tested the goodwill for impairment at the transition date based on the conditions as of the transition date;
- The effects of the above adjustments have been given to the measurement of non-controlling interests and deferred tax.

The above exemption in respect of business combinations has also been applied to past acquisitions of investments in associates, interests in joint ventures and interests in joint operations in which the activity of the joint operation constitutes a business, as defined in Ind AS 103.

ANNEXURE "A"

ANNEXURE TO THE INDEPENDENT AUDITORS' REPORT

TO THE INDEPENDENT AUDITORS' REPORT

(Referred to in paragraph 1 (f) under 'Report on Other Legal and Regulatory Requirements' of our Report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of SRM ENERGY LIMITED ("the Holding Company") and its subsidiary SRM ENERGY TAMILNADU PRIVATE LIMITED (the Holding Company and its Subsidiary together referred to as "the Group") as of March 31, 2018 in conjunction with our audit of the financial statements of the Group for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for

establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Group considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance or adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Group's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Group's internal financial controls over financial

reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Group's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Group's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Group's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Group; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Group are being made

only in accordance with authorizations of management and directors of the Group; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Group's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanation given to us, the Group has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Group considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The Ind AS are prepared under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules,2015 and the relevant amendment rules issued thereafter.

2.2 Basis of preparation and consolidation

The consolidated financial statements have been prepared on the historical cost convention on accrual basis except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the accounting policies mentioned below.

Historical cost is generally based on the fair value of the consideration given in exchange of goods or services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an

orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.

The principal accounting policies are set out below.

All assets and liabilities have been classified as current or non-current according to the Group’s operating cycle and other criteria set out in the Act. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Group has ascertained its operating cycle as twelve months.

The consolidated financial statements incorporate the financial statements of the holding company and its subsidiaries. Control is achieved when the group:

- has power over the investee;

finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the group is classified as a finance lease. The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

Employee benefits such as salaries, allowances, non-monetary benefits which fall due for payment within a period of twelve months after rendering service, are capitalised if related to project else recognised in the Statement of Profit & Loss in the period in which the service is rendered.

Employee benefits under defined benefit plans, such as gratuity which fall due for payment after completion of employment, are measured by the projected unit credit method, on the basis of actuarial valuation carried out by the third party actuaries at each balance sheet date. The Company's obligations recognized in the Balance sheet represents the present value of obligations as reduced by the fair value of plan assets, where applicable.

During Current financial year, Provision for leave encashment is accounted on year to year basis and considered as short term employee benefits and are recognised as an expense at undiscounted amount in the profit and loss account for the year in which the related services are rendered.

Actuarial gains and losses are recognized immediately in the Statement of Profit & Loss.

2.12 Investments

Investments that are readily realizable & intended to be held for not more than a year are classified as current investment. All other investments are classified as long term investments. Current investments are carried at lower of cost & fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution in value is made to recognize the decline other than temporary in the value of investments.

2.13 Provisions and Contingent Liabilities

Provisions

The group recognised a provision when there is a present obligation (legal or constructive) as a result of past events and it is more likely than not that an outflow of resources would be required to settle the obligation and a reliable estimate can be made. When the group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pretax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liability

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.

2.14 Taxation

- (i) Provision for Current Tax is made after taking into consideration benefits admissible under the provisions of The Income Tax Act, 1961.
- (ii) Deferred tax resulting from "timing differences" between book and taxable profit is measured using the tax rates and laws that have been enacted or substantively enacted as on the balance sheet date. Deferred tax assets and deferred tax

liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that they can be realised against future taxable profits.

- (iii) At each balance sheet date the Company re-assesses unrecognised deferred tax assets. It recognizes, unrecognised deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be that sufficient future taxable income will be available against which such deferred tax assets can be realised. The carrying amount of deferred tax assets are reviewed at each balance sheet date. The company write-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realised. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

2.15 Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year is adjusted for the effects of all dilutive potential equity shares.

2.16 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) after tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the

Company are segregated based on the available information.

2.17 First-time adoption - mandatory exceptions, optional exemptions

Overall principle

The Group has prepared the opening balance sheet as per Ind AS as of April 1, 2016 (the transition date) by recognising all assets and liabilities whose recognition is required by Ind AS, not recognising items of assets or liabilities which are not permitted by Ind AS, by reclassifying items from previous GAAP to Ind AS as required under Ind AS, and applying Ind AS in measurement of recognised assets and liabilities. However, this principle is subject to the exception and certain optional exemptions availed by the Group as detailed below:

Past business combinations

The Group has elected not to apply Ind AS 103 Business Combinations retrospectively to past business combinations that occurred before the transition date of April 1, 2016. Consequently,

- The Group has kept the same classification for the past business combinations as in its previous GAAP financial statements;
- The Group has not recognised assets and liabilities that were not recognised in accordance with previous GAAP in the consolidated balance sheet of the acquirer and would also not qualify for recognition in accordance with Ind AS in the separate balance sheet of the acquiree;
- The Group has excluded from its opening balance sheet those items recognised in accordance with previous GAAP that do not qualify for recognition as an asset or liability under Ind AS;
- The Group has tested the goodwill for impairment at the transition date based on the conditions as of the transition date;
- The effects of the above adjustments have been given to the measurement of non-controlling interests and deferred tax.

The above exemption in respect of business combinations has also been applied to past acquisitions of investments in associates, interests in joint ventures and interests in joint operations in which the activity of the joint operation constitutes a business, as defined in Ind AS 103.
