CHAIRMAN'S LETTER

PERSEVERANCE IS THE SECRET OF SUCCESS

Dear Fellow Shareholders,

During the year under review, your Company has weathered through the extraordinarily difficult legal and regulatory environment. The year gone by witnessed a paradigm shift in Indian indirect taxation system as the nation migrated to the goods and services tax ('GST') regime effective from July 01, 2017.

GST IMPACT

Under the erstwhile system, the solar power generating systems were exempt from the whole of excise duty and most state VAT laws provided merit rate of tax thereon. It is perhaps considering this rate structure that renewable energy devices and parts thereof including solar power-based devices, solar power generating systems, solar lantern/solar lamp have been made subject to GST at the rate of 5%. In earlier regime the execution of turn key projects were treated either in supply plus service tax criterion or sometimes in works contracts where there is only a single price and absence of cost of service part. The rate of GST on works contract is 18%.

Hence, post GST this confusion created a lot of lost opportunity. The difference is of 13% is a sunk cost for purchaser as final produce Power is out of GST purview.

Despite representations, no clarity has yet been announced to bring every one on one page. Hence, solar sector is under shadow of clouds of non-clarity.

OA CHARGES

Your company operates in Solar Park business, various states have slapped additional cross subsidy charges for the Open Access power customers, this make investment in Solar Park under OA supply difficult, hence, this business also took the hit.

COMPANY PERFORMANCE

Due to the above-mentioned regulatory changes the growth of your company is hampered and it resulted in a downfall of 28.88% in its annual turnover at ` 334.17 Crore for the fiscal year 2018, in comparison to that of ` 486.34 Crore in the previous fiscal year 2017.

The Profit after tax is ` 17.01 Crore for the fiscal year 2018 in comparison to that of ` 35.93 Crore in fiscal year 2017.

Every business faces down cycle and your company is also facing a similar cycle, but

Your Company is looking on various opportunities to grow in Energy space. We are toying up with new ideas to create value for all stakeholders.

I would like to take this opportunity to thank our Board of Directors, employees and partners for being an integral part of this journey. Our shareholders, too, have been a constant source of support, as have been the governments and other institutions that we engage and interact with. I would again like to repeat that "PERSEVERANCE IS THE SECRET OF SUCCESS"

We remain committed to our strategy and vision and are confident of the continued support of all our stakeholders and well-wishers.

With Best Wishes,

*Shyamsunder Mundra

None of the Director of the Company or the Key Managerial Personnel of the Company or their respective relatives are, in any way, concerned or interested, financially or otherwise, in passing the resolution in respect of alteration of the main object clause of the Company as set out at Item Nos. 6 of the Notice.

Item No. 7:

The Company is in the business of Solar Energy Power Generation. The Board of Directors is of the opinion that the Company requires additional funds to meet with the needs of growing business, in addition to the funds raised internally and through debt from banks and financial institutions. Hence it is imperative to have enabling approvals to raise a part of the funding requirements for the said purposes as well as for such other corporate purposes as may be permitted under applicable laws through the issue of appropriate securities as defined in the resolution, in Indian or international markets.

Accordingly, It is proposed to raise funds of upto ` 500 crores in one or more tranches through a mix of equity/equity-linked instruments, as may be appropriate. The Members' approval is sought for the issue of such number of Equity Shares, Global Depository Receipts (GDRs), American Depository Receipts (ADRs), Foreign Currency Convertible Bonds (FCCBs), and/or Equity Shares through Depository Receipt Mechanism and/or Fully Convertible Debentures (FCDs) and/or Non Convertible Debentures (NCDs) with warrants, or any other financial instruments convertible into or linked to Equity Shares and/or any other instruments and/or combination of instruments with or without detachable warrants with a right exercisable by the warrant holders to convert or subscribe to the Equity Shares or otherwise, in registered or bearer form or any combination of Securities through public issue(s), private placement(s) or a combination thereof, including issuance of Securities through a Qualified Institutions Placement under Chapter VIII of the SEBI ICDR Regulations.

The Board may in their discretion adopt any one or more of the mechanisms prescribed above to meet its objectives as stated in the aforesaid paragraphs without the need for fresh approval from the shareholders of the Company.

The pricing of the Securities that may be issued to qualified institutional buyers and to other buyers under the Private Placement shall be freely determined subject to such price

not being less than the price calculated in accordance with the SEBI ICDR Regulations. The Company may, in accordance with applicable law, offer a discount of not more than 5% or such percentage as permitted under applicable law on the price determined pursuant to the SEBI ICDR Regulations. The “Relevant Date” for this purpose will be the date when the Board or the Committee of the Board thereof decides to open the Issue for subscription.

The Special Resolution also seeks to give the Board powers to issue Securities in one or more tranche or tranches, at such time or times, at such price or prices and to such person(s) including institutions, incorporated bodies and/or individuals or otherwise as the Board in its absolute discretion deem fit. The detailed terms and conditions for the issue(s)/offering(s) will be determined by the Board or its committee in its sole discretion in consultation with the advisors, lead managers, underwriters and such other authority or authorities as may be necessary considering the prevailing market conditions and in accordance with the applicable provisions of law and other relevant factors.

The Equity Shares allotted or arising out of conversion of any Securities would be listed. The offer/issue/allotment/

conversion/redemption would be subject to the availability of regulatory approvals, if any. The conversion of Securities held by foreign investors into Equity Shares would be subject to the applicable foreign investment cap and relevant foreign exchange regulations. As and when the Board does take a decision on matters on which it has the discretion, necessary disclosures will be made to the stock exchanges as may be required under the provisions of the Listing Regulations.

Section 62(1)(c) of the Companies Act, 2013, provides, inter alia, that when it is proposed to increase the issued capital of a company by allotment of further Equity Shares, such further Equity Shares shall be offered to the existing shareholders of such company in the manner laid down in Section 62 of the Companies Act, 2013 unless the shareholders in a General Meeting decide otherwise. Since, the Special Resolution proposed in the business of the Notice may result in the issue of Equity Shares of the Company to persons other than shareholders of the Company, consent of the shareholders is being sought pursuant to the provisions of Sections 42, 62 and other applicable provisions of the Companies Act, 2013 as well as applicable Rules notified by the Ministry of Corporate Affairs and in terms of the provisions of the Listing Regulations.

MANAGEMENT DISCUSSION AND ANALYSIS

GLOBAL ECONOMY OVERVIEW

The acceleration in global activity that started in 2016 gathered steam in 2017, reflecting firmer domestic demand growth in advanced economies and improved performance in other large emerging market economies. Global growth is expected to sustain for the next couple of years and has also accelerated mainly in the emerging market and developing economies due to the commodity exporters. Global growth is set to be just over 3.5% in this calendar year 2018, the fastest for seven years, with improved outcomes in both advanced economies and the Emerging Market Economies. The US taxation policy has stimulated the growth in the country primarily driven by increase in investments in USA due to favourable corporate tax rate. Although the global economy has grown at a seven year high in the near term it is expected that the economy will see a sharp turn over the long term horizon and is subjected to substantial downside risk mainly due to increased protectionist policies, possibility of financial stress and rising geo political tensions.

Confidence measures and levels of new orders for businesses have remained strong. This long awaited lift to global growth, supported by policy stimulus, is being accompanied by solid employment gains, a moderate upturn in investment and a pick-up in trade growth. The continued expansion depends on robust global growth and governments' support for right trade policies. However, there are signs that escalating trade tensions may already be affecting business confidence and investment decisions, which could compromise the current outlook.

INDIAN ECONOMY OVERVIEW

Indian economic growth is giving a positive signal for the current and future scenario. It is projected to strengthen to above 7%, gradually recovering from the transitory adverse impact of rolling out the Goods and Services Tax (GST) and measures to choke off the black economy, including demonetization. India's GDP grew 7.2% in the third quarter of 2018, surpassing expectations and wresting back the mantle of fastest growing economy from China on the back of a rebound in industrial activity, especially manufacturing and construction, and an expansion in agriculture. Reserve Bank of India has estimated GDP growth in a range from 7.4% to 7.9% for the Financial Year 2019-2020. (Source: OECD and Economic Times)

The biggest challenges for 2018 are as to how the economy can maintain its recovery in the face of increasing inflationary pressures, coupled with a higher fiscal deficit as well as an increasing debt burden. The key to this conundrum lies in the revival of consumer demand and private investment.

Fiscal deficit for 2017-18 is revised to INR 5.95 lakh at 3.5% of the GDP which is approximately the same as 2016-17

in spite of transformation in the economy. In addition to initiatives like; "Make in India", "Housing for All", "Digital India" government has also introduced "Sagarmala" and "Bharat Mala" initiatives which is expected to boost the domestic growth of the country.

GLOBAL RENEWABLE OVERVIEW

Renewable energy is the fastest growing energy source, accounting for 40% of the increase in energy. Natural gas grows much faster than either oil or coal. The energy mix by 2040 is the most diversified ever seen. In 2017, the global renewable generation capacity amounted to 2,179 GW of which Hydro accounted for the majority share of 58.3% with an installed capacity of 1,271 GW; Wind constituted for 23.5% with capacity of 514 GW and solar energy constituted for the balance of 17.94% with capacity of 391 GW.

In comparison to last year, renewable generation capacity saw an up rise of 8.3% to 167 GW in 2017, keeping in line with 8-9% annual capacity growth rate during the decade. Solar energy registered a capacity increase of 94 GW (+31.5%) and wind energy with an increase of 46 GW (+10%). Hydropower and bioenergy capacities increased by 23 GW (+2%) and 5 GW (+5%) respectively. Geothermal energy increased by just less than 1 GW. Renewable capacity expansion continues to be driven mostly by new installations of solar and wind energy.

By region all the growth in energy demand came from fast growing developing economies drive by increasing prosperity. China, India & other emerging economies in Asia accounted for roughly two thirds of the global energy demand. As per world economic forum China, USA & India will account for roughly two thirds of the total renewable production in the world by the year 2022.

INDIAN RENEWABLE OVERVIEW

India accounts for approximately 4% of the total global electricity generation and contributes 4.43% to the global

renewable energy capacity. The International Energy Agency’s World Energy Outlook projects a growth of renewable energy supply to 4,550 GW in 2040 on a global basis. As of March 2018 the total renewable energy power generation installed in the country stood at 114.315 GW which is 33% of the total installed capacity of 344 GW. The installations of renewable energy plants have shown a growth of 12.48% CAGR over the period of FY 2012-2018.

https://en.wikipedia.org/wiki/Electricity_sector_in_India#cite_note-GES-3

The renewable energy sector in India represents future growth and change in the power generation sector in India. Renewable energy offers India unique value proposition i.e. bridging the gap in country’s energy requirement to power its entire population 24x7 and at the same time cutting on emission due to combustion of fossil fuels for energy. The push to develop and harness power through renewable energy resources is the Government’s attempt to rebalance the energy mix in favour of cleaner energy generation. The two main kind of renewable energy sources which have found the widest application are wind energy and solar energy. India with 3,200 km of coastline and tropic of cancer passing through the centre of the country, there is ample opportunity for more solar and wind farms to be set up.

<http://www.careratings.com/upload/NewsFiles/SplAnalysis/Report%20on%20renewable%20power.pdf>

The government of India has been banking a lot on the renewable space and has notified in the Paris climate agreement that India will reduce its carbon emission by 30% till year 2040 this move will be strongly backed by the increase in the renewable energy portfolio of the country. The country has grown substantially when it comes to renewable plant addition from around 42GW in the year 2007 to 114 GW at the end of 2018. In the renewable space the highest growth has been seen in the wind and solar power sector where macro-economic environment have made these projects viable and economical. In the overall renewable sector maximum contribution is from the wind power sector after which solar sector forms the major renewable source of power.

OVERVIEW OF THE GLOBAL SOLAR SECTOR

In the year 2017-18 the total solar installation around the world is estimated to reach 100 GW and after this the total annual solar installation in the world is expected to be cross 100 GW each year up to 2022. In the total solar installation in the world, Asia has dominated the most with more than three quarter of the total installation in the solar sector from the emerging and developing economies in the EMA region. China was at the forefront of solar power plant installation in the world accounting to around 53 GW of the total solar power plant installation, followed by India at 9.6 GW and Japan at 7 GW. China alone contributed more than half of all new solar capacity installed in 2017. Other countries that installed more than 1 GW of solar in 2017 included: USA (8.2 GW); Turkey (2.6 GW); Germany (1.7 GW); Australia (1.2 GW); South Korea (1.1 GW); and Brazil (1 GW).

INDIAN SOLAR SECTOR OVERVIEW

The Indian solar sector has seen a phenomenal growth recently where the reduction in the capital outlay for development of a solar plant has fuelled the growth in the country. The reduction in the cost of setting up a solar plant, technological breakthroughs have positioned the industry for huge growth. Invention of thin film panels, smart solar modules, efficient solar cells and light-sensitive nanoparticles have triggered improved efficiency, better reliability and excellent cost-effectiveness which have made solar plants more economical and financially viable.

All these economic advantages have been very well addressed by the government when they upgraded the solar installation target under the Jawaharlal Nehru National solar mission from 20GW to 100 GW to be achieved by 2022. Such an ambitious

target has led to an increase in investments and growth in jobs in the country as well. In just 2 years the cumulative solar installations in the country have crossed to 20 GW in 2018.3

https://mnre.gov.in/sites/default/files/uploads/mission_document_JNNSM.pdf

Solar Power contributes approximately 21.6 GW out of the total installed renewable energy capacity of 69.02 GW in the country. By 2022, this capacity target has been set, to achieve 100 GW of solar installations.

Solar module prices, which account for ~50% of the total cost, has declined more than 70% over FY08-FY17 due to availability of cheaper raw materials (Polysilicon and silicon wafers). This has caused a fall in project capital cost from ~` 300 Mn/MW in FY08 to ~` 50 Mn/MW in FY18. Consequently, average solar tariff, which is largely dependent on capital cost, has declined from ~` 30 per unit to ~` 5 per unit, thereby becoming competitive with other conventional forms of electricity generation. The lower tariff, likely to be stable with negative bias, is now leading to more players setting up solar power plants in the country. Currently, the average tariff for commercial purpose stands at ` 7- ` 8 per unit and the risk of increase in tariffs (from the jump in input costs of conventional form of electricity generation like coal and fuels) makes the solar investment one of the cost-effective options to generate electricity.

GOVERNMENT POLICIES AND INITIATIVES

INTERNATIONAL SOLAR ALLIANCE (ISA):

The ISA is a treaty based inter-governmental organisation proposed by India in 2015 with the primary objective of creating a forum of solar rich countries to ensure increased utilisation and promotion of solar energy. The Framework Agreement for the ISA was signed by 19 countries in Marrakech, on the side-lines of the Marrakech Climate Change Conference in November 2016, and aims to bring together 121 countries. With the former secretary of MNRE, Upendra Tripathy, being appointed as the full-time Interim Director General of the ISA and the World Bank announcing their support for the initiative, the ISA is well poised to work towards one of its important goals of mobilising 1 trillion dollars of finance for solar energy.

SOLAR PARK CAPACITY ENHANCEMENT SCHEME:

The central government enhanced the allotted capacity for Solar Parks and Ultra Mega Solar Power Projects from 20 GW to 40 GW in March, 2017. The scheme envisages at least 50 solar parks each with a minimum of 500 MW capacities to be set

up by 2019-20 each. A Central Financial Assistance (CFA) of ` 8,100 crore has been sanctioned for the scheme, and the Solar Energy Corporation of India (SECI) has been nominated as the implementing agency. The financial assistance would include ` 25 lakh for the preparation of the Detailed Project Report (DPR) of the solar park and up to ` 20 lakh per MW or 30% of the project cost, whichever is lower, subject to completion of pre-agreed milestones to be achieved by the park developer.

<https://www.indianeconomy.net/splclassroom/what-is-solar-park-project/>

END OF DOMESTIC CONTENT REQUIREMENT (DCR) CATEGORY:

India introduced a DCR category under the National Solar Mission to support its local solar cell and module manufacturing base. Citing discrimination against solar inputs from other countries, the United States formally filed a complaint with the World Trade Organisation (WTO) against this policy in 2013. In February 2016, the WTO found that India was indeed in violation of its commitments under the General Agreement on Tariffs and Trade (GATT) and Agreement on Trade Related Investment Measures (TRIMs) (Pradeep S. Mehta, 2016). This dispute has finally ended with the recent announcement on 14th June, 2017 that India and the United States have mutually agreed to put an end to the DCR procurement latest by 14th December, 2017.

CHALLENGES & OPPORTUNITIES

RENEWABLE PURCHASE OBLIGATION

Renewable purchase obligation (RPO) refers to an obligation enforced to the obligated entities like DISCOM, SEBs, thermal captive consumers, open access consumers etc. to meet a certain percentage of their power consumption requirement using renewable energy sources. The Indian government has increase the renewable purchase obligation target from 17% now to 21% by 2022 which is the major driving force in India to promote the renewable energy sector. With an increase in the target, the Ministry of Power (MoP) has also recently announced an order for long-term growth trajectory of Renewable Purchase Obligation (RPO) for solar and Non-solar for a period of three years i.e. from the year 2019-20 to year 2021-2022 as follows:

The obligation referred to here is consumption of power by obligated entities excluding power consumption from hydro power. The government has specified that the solar RPO should be met to the extent of 85% or above and if it does then the shortfall if any can be met by non-solar RPO for that particular year.

RPO mechanism has been in the frame for a long time but have its own share of ups and down. Since last year, the process is getting back on trade and REC trading is also working consistently. MNRE recently announced about building an RPO compliance cell providing aid to SERCs for better implementation.

<https://mnre.gov.in/file-manager/UserFiles/Solar%20RPO/analysis-of-state-RPO-regulations.pdf>

RENEWABLE ENERGY CERTIFICATES

Renewable energy certificates were introduced in the renewable sector in order to meet the gap between the supply of renewable power and the demand for the same. These RECs play an important role for the RPO obligated entities to meet the renewable purchase obligation and also they provide an additional return to solar power producers operating under the open access mechanism.

Honourable Central Electricity Regulatory Commission has determined floor and forbearance prices for REC (solar and non-solar) which will be valid from April 1, 2017 onwards. The prices for solar RECs have reduced the Floor Price to INR 1,000 and the Forbearance Price to INR 2,400. Previously, in March 2017, the CERC had revised the solar REC prices and the Forbearance prices from INR 9,300 to ` 5,800 in March 2014. The recent reduction was a result of falling tariffs in competitive bidding for solar energy and reducing costs for both solar and wind energy.

<http://www.cercind.gov.in/2014/regulation/ord16.pdf>

After the stay announced by the Honourable Supreme Court had stayed the trading of Solar RECs in May 2017 the RECs have resumed trading in April 2018 after the honourable Aptel dismissed all petitions appealing for vintage multiplier of Solar RECs.

GST RATE OF 5% FOR SOLAR EQUIPMENT

The new GST regime became applicable from July 1, 2017. Solar power generating system, equipment and parts have been placed under the lowest rate slab of 5%. However, there is still confusion on GST rate on the equipments other than modules (GST launched but clarity still missing for the solar sector). To tackle the confusion regarding the GST rate many companies

are selling equipment with a GST rate of 5% but seeking an undertaking from the buyer that the latter will bear extra cost if applicable GST rate is eventually determined to be 18%. Prior to implementation of GST, various tax incentives including zero or concessional value added tax (VAT) and excise duty exemptions were available for the industry. The sector will cease to enjoy all these sundry exemptions except customs duty concessions.

On the GST front there have been mixed review on the applicable rate of GST where certain Advance rulings authority have mixed reviews on the applicable rate for solar power plants. Maharashtra AAR rules out that the applicable GST rate for a solar plant is 18% which will make the solar plant costlier since electricity does not come under the purview of GST and the input GST becomes a cost as the concerned parties do not get any credit for the same. At the same time Karnataka AAR have ruled out that the applicable GST rate would be 5% putting the sector in a confused.

TRANSMISSION

The Ministry of Power has extended the waiver for inter-state transmission charges and losses for solar projects until 31st March 2022. The waiver is available for a period of 25 years from the date commissioning of the project for generation projects based on solar and wind resources, no inter-state power transmission charges and losses will be levied on a transmission of the electricity through inter-state transmission system for sale of power by such projects commissioned till March 31, 2022.

ROOFTOP BUSINESS

India has set an ambitious renewable energy target of 175 GW by 2022, including 100GW of solar power. Of that, the government aims for 60 GW to be utility-scale solar, and the rest i.e. 40 GW to be achieved from rooftop solar projects. Though India has made significant progress on the 60 GW utility-scale solar target, getting to the 40 GW rooftop solar target will be a significant undertaking. As of December 2017, installed capacity of rooftop solar was only ~2.1 GW, which means that ~9 GW would need to be installed every year to reach the 40 GW target by 2022 i.e. the rooftop solar installation need to increase by 32 times. Filling this gap between the current

instalment and the 40 GW goals will require an estimated investment of USD 39 billion.

The government with the help of MNRE have formulated a number of policies for these installations to undertake:

- 1) **Net metering:** 29 states and 7 union territories have notified grid connectivity regulations with provision for net/gross metering but on-the-ground implementation remains patchy.
- 2) **Subsidy for residential, institutional and government consumers:** Rooftop solar projects attract a subsidy based incentive scheme depending on the target costumers for the solar rooftops. Residential rooftops attract 30% capital subsidy whereas government projects attract an additional 30% capital subsidy.
- 3) **Boost in government demand:** In order to push rooftop solar projects in the country government has issued statement where all government institution and building will be power by solar power using solar rooftops
- 4) **Concessional debt financing:** The Government of India, with assistance from multilateral financial institutions such as Asian Development Bank, The World Bank and New Development Bank, has earmarked US \$ 1,470 million of concessional credit lines for the rooftop solar market.
- 5) **Building bye-laws:** The Government of India has recommended mandatory rooftop solar installations for buildings exceeding specified size and/or power consumption thresholds under the model Building Bye Laws. Four states and union territories - Uttar Pradesh, Haryana, Chandigarh and Chhattisgarh have adopted these regulations so far.

EPC BUSINESS

In the EPC segment the company leverages extensive 35 year experience it has in the solar and the power sector and effective and efficient EPC solutions to potential solar power generator. Realizing huge opportunity available on a pan India basis in the EPC segment the company has executed more than 60 MW in the EPC till date while staying focused in its asset light model.

In FY18 the company has executed 17 MW of solar plants through EPC.

a) SEGMENTAL PERFORMANCE

Ujaas Energy has three segments of business wise Transformer, Solar Power Plant Operation and Manufacturing & Sale of Solar Power Systems. In fiscal 2015, 2016, 2017 & 2018 revenue from solar power plant operation was INR 2,177.63 lakhs, INR 2,995.27 lakhs, INR 4,285.67 lakhs & INR 3,155.84 lakhs respectively. Further, in Fiscal 2015, 2016, 2017 & 2018 revenue from manufacturing and sale of solar power system was INR 8,476.89 lakhs, INR 24,716.45 lakhs, INR 44,349.11 lakhs & INR 30,261.47 Lakhs respectively.

b) OUTLOOK

India power demand is at an all-time high where it is estimated that the country will require an additional power supply of 450 GW. In the overall power scenario solar is at the forefront with the highest multiple of growth to be expected from the solar sector. The government target of total solar installation of 100GW by the year 2020 opens up a huge market for the company and all other sector players as well. The future of solar power looks bright where solar power has reduced to an all-time low of INR 2.44 Kwh which is lower compared to the conventional source of power like thermal or coal. If retail electricity is not subsidised, it is usually more economical to produce solar on rooftop and consume the clean power in-house where solar has an unmatched advantage of generation of power at the point of consumption. The reduction in the costs for setting up a solar power plant has made this technology attractive for many users and investors around the world.

With various types of solar projects like utility scale solar projects and rooftop solar projects, the company has a very strong market opportunity in the rooftop solar space especially in the residential rooftop segment where the company is the one of the largest player in the organized rooftop market where the company is able to convert its megawatts economics to kilowatts economics with presence across the country in the rooftop segment.

c) RISK AND CONCERNS

While the company faces traditional business risks such as un-anticipated labour costs, market risks such as interest rates, operational risks such as supplier/distributor problems and execution challenges and changes in government regulations, no major risks are foreseen. But in FY18 the company has faced one particular risk which resulted in the low revenue of the company that is the GST confusion where there is a huge confusion in the sector over the applicable rate of the GST for developing a solar plan. The company is at the forefront over seeking clarity from various ministers and tribunals both at the centre and the state level. Another risk that the company and the overall sector faces is the fear of anti-dumping duty and safeguard duties on solar imports.

Additionally, the company continuously monitors business and operational risks through an efficient risk management system. All key functions and divisions are independently responsible to monitor risks associated within their respective areas of operations such as production, insurance, legal and other issues like health, safety and environment.

d) INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

The Company has an effective internal control and risk mitigation system, which is constantly assessed and strengthened with new/revised standard operating procedures. The Company's internal control system is commensurate with its size, scale and complexities of its operations. The internal audit is entrusted to **Messrs S.K. Malani & Co. (FRN: 159090W)**, a reputed firm of Chartered Accountants. The main thrust of internal audit is to test and review controls, appraisal of risks and business processes, besides benchmarking controls with best practices in the industry. The Audit Committee of the Board of Directors actively reviews the adequacy and effectiveness of the internal control systems and suggests improvements to strengthen the same. The Company has a robust Management Information System, which is an integral part of the control mechanism. The Audit

Committee of the Board of Directors, Statutory Auditors and the Business Heads are periodically apprised of the internal audit findings and corrective actions taken. To maintain its objectivity and independence, the Internal Audit function reports to the Chairman of the Audit Committee.

e) QUALITY MANAGEMENT SYSTEMS

Your company has successfully implemented SAP Business solution as an accounting software. Company has installed different modules of SAP like FI (Finance), MM (Material Management), SD (Sales & Distribution), PS (Project System), QC (Quality Control), and HR (Human Resource). Further the company continued to be certified under ISO: 9001:2008 by International Organization for Standardization. The Quality Management System in the Company is well defined and is well in place. This will enable your company to meet the challenges related with Information systems, Controls, Planning and Quality.

f) CAUTIONARY STATEMENT

Statement made in the management discussion and analysis report as regards the expectations or predictions are forward looking statements within the meaning of applicable Laws and Regulations. Actual performance may deviate from the explicit or implicit expectations.

g) DISCUSSION ON FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

h) Material developments in Human Resources / Industrial Relations front, including number of people employed:

Ujaas Energy has a very strong board, first line management and second line management, comprising of various

Business Heads, GM and Vice Presidents and below them we have an effective team of managers. The company will have huge openings in the coming years as the company is expecting enormous growth and will need supporting hands for proper management. The total number of people employed in our Company are 441 as on 31st March, 2018.

CORPORATE GOVERNANCE REPORT

“Corporate governance is not just a Destination, but a journey to constantly improve Sustainable Value”

COMPANY’S PHILOSOPHY ON CORPORATE GOVERNANCE

We at **UJAAS**, believe that Corporate Governance encompasses not only regulatory & legal requirements, but is a blend of laws, regulations & voluntary practices which enables an organization to attract Financial, Human Capital, perform efficiently & thereby builds up a strong base for trusteeship, transparency, accountability & creation of long term Economic Value for our Stakeholders.

Our Corporate Governance philosophy is all entrusting to adopt “Best practices” that are followed in the area of Corporate geographies for the welfare & best interest for our stakeholders & society at large. Our energy efficient solutions enable people to save money and protect their capital investment while also lowering their energy usage and protecting the environment.

We commit to be transparent in business dealings & to make adherence of the highest standards of Ethical business practices, Integrity & regulatory compliance with statutory and legal requirements. We continuously focus on our resources, strengths, & strategies to achieve the vision of becoming a

global leader in Solar Energy. We believe in compliance of all statutes not only in letter but also to the spirit of the statutes.

- c) Assess the quality, quantity and timeliness of flow of information between the Company management and the Board that is necessary for the Board to effectively and reasonably perform their duties.

All the independent directors were present at the meeting.

BOARD EVALUATION

The Nomination and Remuneration Committee lays down the criteria for performance evaluation of Independent Directors and other Directors, the Board of Directors and Committees of the Board of Directors.

Pursuant to the provisions of the Companies Act, 2013 and Regulation 17 of Listing Regulations, the Board has carried out an Annual Performance Evaluation of its own performance, the Directors individually as well as the evaluation of the working of its Committees.

Performance Evaluation of the Independent Directors was carried out by the entire Board excluding the Director being evaluated whereas evaluation of Executive Directors was done by the Independent Directors in a separate meeting in which only Independent Directors were present. Feedback was sought from each Director about their views on the performance of the Board covering various criteria such as degree of fulfillment of key responsibilities, Board structure and composition, establishment and delineation of responsibilities to various Committees, effectiveness of Board processes, information and functioning, Board culture and dynamics, quality of relationship between the Board and the Management and efficacy of communication with external stakeholders and performance of specific duties, obligations and governance, compliance, oversight of Company’s subsidiaries, etc. Feedback was also taken from every director on his assessment of the performance of each of the other Directors.

The Nomination and Remuneration Committee (NRC) then discussed the above feedback received from all the Directors. Based on the inputs received, the Chairman of the NRC also made a presentation to the Independent Directors at their meeting, summarizing the inputs received from the Directors as regards to Board performance as a whole, and of the Chairman. The performance evaluation of the Chairman and the Non-Independent Directors was carried out by the Independent Directors. Qualitative comments and suggestions of Directors were taken into consideration by the Chairman of the Board and the Chairman of the Nomination and Remuneration Committee. The Directors have expressed their satisfaction with the evaluation process.

Some of the performance indicators on the basis of which the evaluation of Independent Directors was done are as follows:

- a) Active participation in Long-term Strategic Planning.
- b) Ability to contribute good practices internationally
- c) To deal with top management issues.
- d) Fulfillment of Director’s responsibilities as prescribed under the Act.
- e) Commitment to attend meetings of board and committees.
- f) Ability to monitor corporate governance of Company and effective suggestions for improvement if any required.

INDEPENDENT AUDITOR'S REPORT

To

The Members of

UJAAS ENERGY LIMITED

Report on the Standalone Financial Statements

We have audited the accompanying standalone Ind AS financial statements of UJAAS ENERGY LIMITED ("the Company"), which comprise the Balance Sheet as at March 31, 2018, and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended and a summary of the significant accounting policies and other explanatory information.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Indian Accounting Standards (Ind AS) prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these standalone Ind AS financial statements based on our audit.

In conducting our audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the standalone Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the standalone Ind AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the standalone Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the standalone Ind AS financial statements.

We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone Ind AS financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2018, and its profit, total comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Other Matter

The comparative financial information of the Company for the year ended 31st March 2017 and transition date opening balance sheet as at 1st April 2016 included in these standalone Ind AS financial statements are based on the statutory financial statements prepared in accordance with the Companies (Accounting Standards) Rules, 2006 audited by the predecessor auditor whose report for the year ended 31st March, 2017 and 31st March, 2016 dated 29.05.2017 and 21.05.2016 respectively expressed an unmodified opinion on those financial statements and have been restated to comply with Ind AS. Adjustments made to the previously issued said financial information, prepared in accordance with the Companies (Accounting Standards) Rules, 2006, to comply with Ind AS have been audited by us.

Our opinion on the standalone financial statements and our report on Other Legal and Regulatory Requirements below is not modified in respect of these matter.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government of India in terms of sub section (11) of section 143 of the Act, we give in the Annexure A statement on the matters specified in the paragraph 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, based on our audit we report that:
- a. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b. In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - c. The Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), Statement of Changes in Equity and the Statement of Cash Flow dealt with by this Report are in agreement with the books of account.
 - d. In our opinion, the aforesaid standalone Ind AS financial statements comply with the Indian Accounting Standards prescribed under section 133 of the Act, read with relevant Rule issued thereunder.
 - e. On the basis of the written representations received from the directors of the Company as on March 31, 2018 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2018 from being appointed as a director in terms of Section 164(2) of the Act.
 - f. With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in “Annexure B”.
 - g. With respect to the other matters to be included in the Auditor’s Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, (as amended) in our opinion and to the best of our information and according to the explanations given to us:
 - a. The company has disclosed the impact of pending litigations on its financial position in its financial statement – refer note 34 to the financial statements;
 - b. The Company did not have any long term contracts including derivative contracts for which there were any material foreseeable losses.
 - c. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the company.

ANNEXURE ‘A’ TO THE INDEPENDENT AUDITOR’S REPORT

Referred to in paragraph (1) under the heading of “Report on Other Legal and Regulatory Requirements” of our report of even date to the members of Ujaas Energy Limited on the Standalone Ind AS financial statements for the year ended 31st March, 2018.

- i. In respect of the Company’s fixed assets:
 - a. The Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment.
 - b. As explained to us, the property, plant and equipment of the Company have been physically verified by the management during the year, which in our opinion is reasonable, having regard to the size of the Company and the nature of its assets. No material discrepancies between the book records and the physical inventory have been noticed. In our opinion, the frequency of verification is reasonable.
 - c. According to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties are held in the name of the Company.
- ii. In respect of its Inventories:

The inventories have been physically verified by the Management during the year. In our opinion, the frequency of verification is reasonable and no material discrepancies were noticed.
- iii. According to the information and explanations given to us, the Company has granted unsecured loans to one company covered in the register maintained under section 189 of the Companies Act, 2013. The company has not granted any loans secured or unsecured to firms, LLPs or other parties covered in the register maintained under section 189 of the Companies Act, 2013. In respect of the aforesaid loans granted :
 - a. The terms and conditions of the grant of such loans are, in our opinion, prima facie, not prejudicial to the Company’s interest.
 - b. There is no stipulation of schedule of repayment of principal and payment of interest. We are unable to make specific comment on the regularity of repayment of principal and payment of interest.
- iv. In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of Sections 185 and 186 of the Act, with respect to grant of loans and investments made. The company has not given any guarantee and provided any security in terms of section 185 and 186 of the Act.
- v. In our opinion and according to the information and

explanations given to us, the Company has not accepted deposits from the public within the meaning of Section 73 to 76 or any other relevant provisions of the Companies Act, 2013 and the Rules, framed there under. As informed to us no Order has been passed by the Company Law Board or National Company Law Tribunal or Reserve Bank of India or any court or any other Tribunal.

- vi. We have broadly reviewed the cost records maintained by the Company pursuant to the rules made by the Central Government under sub-section (1) of Section 148 of the Companies Act, 2013 and are of the opinion that prima facie the prescribed records have been maintained. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.
- vii. According to the information and explanations given to us, in respect of statutory dues:
- The Company has generally been regular in depositing undisputed statutory dues, including Provident Fund, Employees' State Insurance, Income Tax, Sales Tax, Service Tax, Goods and Service Tax, Value Added Tax, Customs Duty, Excise Duty, Cess and other material statutory dues applicable to it with the appropriate authorities. There were no undisputed statutory dues in arrears as at March 31, 2018 for a period of more than six months from the date they became payable.
 - Details of dues of Income Tax, Sales Tax, Service Tax, Excise Duty or Value Added Tax which have not been deposited as at March 31, 2018 on account of dispute are given below:

ANNEXURE “B” TO THE INDEPENDENT AUDITOR’S REPORT

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of Ujaas Energy Limited (“the Company”) as of March 31, 2018 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor’s Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained, is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control

over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Notes forming part of Standalone Financial Statements for the year ended 31st March 2018

(All amounts are in Indian Rupees in Lakhs unless otherwise stated)

A. Corporate Information

Ujaas Energy Limited (UEL) (“the company”) was incorporated in the year 1999 having its registered office Survey No.211/1, Opp. Sector-C & Metalman Sanwer Road Industrial Area, Indore-452015 (Madhya Pradesh) is engaged in manufacturing / servicing of transformer, Generation of solar power and manufacturing, sales and services of solar power plants / projects. Company has setup solar parks at Ichhawar Dist. sehore-gagorni at dist. rajgarh, susner-barod-rojhani at dist. agar, and bercha at dist. shajapur in the state of madhya pradesh. The company is a public limited company and its shares are listed on bombay stock exchange (BSE) and national stock exchange (NSE).

B. Significant accounting policies

a. Statement of compliance

The financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) as notified under the Companies (Indian Accounting Standards) Rules, 2015, read with section 133 of the Companies Act, 2013.

Upto the year ended 31st March 2017, the company prepared its financial statements in accordance with the requirement of previous GAAP, which included Standards notified under the Companies (Accounting Standards) Rules, 2006. These financial statements are the first financial statements of the company under Ind AS. The date of transition to Ind AS is 1st April 2016.

Refer Note 51 for details of first-time adoption exemptions availed by the company.

b. Basis of Preparation:

The financial statements have been prepared on accrual basis and under the historical cost convention except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the accounting policies mentioned below.

All assets and liabilities have been classified as current or non-current as per the Company’s normal operating cycle and other criteria set out in Schedule III to the Companies Act, 2013. The Company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

The financial statements including notes thereon are presented in Indian Rupees (“Rupees” or “INR”), which is the Company’s functional and presentation

currency. All amounts disclosed in the financial statements including notes thereon have been rounded off to the nearest lacs as per the requirement of Schedule III to the Act, unless stated otherwise.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The company has identified twelve months as its operating cycle.

c. Inventories

Inventories are valued at lower of cost and net realisable value, except scrap are valued at net realisable value. Cost of inventory is arrived at by using Moving Average Price Method. Cost of inventory generally comprises of cost of purchase, cost of conversion and other cost incurred in bringing the inventory to their present location and condition.

d. Revenue Recognition

Revenue is recognised to the extent it is probable that the economic benefits will flow to the Company and that the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government. The Company assesses its revenue arrangements against specific criteria, i.e., whether it has exposure to the significant risks and rewards associated with the sale of goods or the rendering of services, in order to determine if it is acting as a principal or as an agent. Revenue is recognised, net of trade discounts, and taxes, as applicable.

(i) Revenue recognition Sale of Power

Revenue from Power Supply is recognized for on acceptance by Electricity Distribution Company/ Consumers of units generated and after giving allowance for wheeling and transmission loss.

(ii) Operation and Maintenance Income

Income from services is recognized as they are rendered (based on arrangement / agreement with the concern customers).

(iii) Renewable Energy Certificate (REC) Income

Income arising from REC is initially recognised in respect of the number of units of power exported at the minimum expected realisable value, determined based on the rates specified under the relevant regulations duly considering the entitlements as per the policy, industry specific developments, Management assessment etc. and when there is no uncertainty in realising

the same. The difference between the amount recognised initially and the amount realised on sale of such REC's at the Power Exchange are accounted for as and when such sale happens.

(iv) Construction Contracts

When the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that the amount can be measured reliably and its receipt is considered probable.

The outcome of a construction contract is considered as estimated reliably when (a) all critical approvals necessary for commencement of the project have been obtained; (b) the stage of completion of the project reaches a reasonable level of development (i.e. 25% at least).

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

When contract costs incurred to date plus recognised profits less recognised losses exceed progress billings, the surplus is shown as amounts due from customers for contract work. Amounts received before the related work is performed are included in the balance sheet, as a liability, as advances received. Amounts billed for work performed but not yet paid by the customer are included in the balance sheet under trade receivables.

(v) Dividend and Interest income

Dividend income from investments is recognised when the right to receive dividend has been established.

Interest income recognised on accrual basis. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

e. Property, Plant and Equipment

(i) Property, plant and equipment

The Company has applied Ind AS 16 with retrospective effect for all of its property, plant and equipment, except for Free hold land which is accounted at deemed cost. i.e. fair valued on transition date, as at the transition date, viz., 1st April 2016.

Property, Plant and Equipment are stated at cost less accumulated depreciation and accumulated impairment losses, if any, Free hold land is measured at cost.

The cost of property plant and equipment comprises its purchase price net of any trade discount and rebates, any import duties and other taxes, any directly attributable expenditure on the asset ready for its intended use including relevant borrowing cost.

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the company.

(ii) Capital work in progress

Assets under erection/installation are shown as "Capital work in progress", Expenditure during construction period are shown as "pre-operative expenses" to be capitalized on erection/installations of the assets.

(iii) Depreciation

Depreciation on fixed assets is provided in the manner specified in Schedule II to the Companies Act, 2013 except based on technical evaluation the useful life of Solar power generation plant is considered 25 years which is different from that prescribed in schedule II of the Act. Depreciation of an asset is the difference between Original cost / revalued amount and the estimated residual value and is charged to the statement of profit and loss over the useful life of an asset on straight line basis. The estimated useful life of assets and estimated residual value is taken as prescribed under Schedule II to the Companies Act, 2013.

Depreciation on additions during the year is provided on pro rata basis with reference to date of addition/installation. Depreciation on assets disposed /discarded is charged up to the date on which such asset is sold. Freehold land and Assets held for sale are not depreciated.

f. Intangible assets

Intangible assets are held at cost less accumulated amortisation and impairment losses. Intangible assets developed or acquired with finite useful life are amortised on straight line basis over the useful life of asset.

The useful lives of intangible assets are assessed as either finite or indefinite. The Company currently does not have any intangible assets with indefinite useful life. Intangible assets are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

Intangible assets - Computer software are amortized over a period of 3 years.

g. Impairment of non-current asset

An asset is considered as impaired when at the date of Balance Sheet there are indications of impairment and the carrying amount of the asset, or where applicable the cash generating unit to which the asset belongs exceeds its recoverable amount (i.e. the higher of the net asset selling price and value in use).

The carrying amount is reduced to the recoverable amount and the reduction is recognized as an impairment loss in the Statement of Profit and Loss. The impairment loss recognized in the prior accounting period is reversed if there has been a change in the estimate of recoverable amount. Post impairment, depreciation is provided on the revised carrying value of the impaired asset over its remaining useful life.

h. Foreign currency transactions and translations

- (i) All transactions in foreign currency are recorded at the rates of the exchange prevailing on the dates when the relevant transactions took place; any gain/ loss on account of the fluctuations in the rate of exchange is recognized in the statement of Profit and Loss.
- (ii) Monetary items in the form of loans, current assets and current liabilities in foreign currencies at the close of the year are converted in the Indian currency at the appropriate rate of exchange prevailing on the dates of the Balance Sheet. Resultant gain or loss on account of fluctuation in the rate of exchange is recognized in the statement of Profit and Loss.
- (iii) Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated in to functional currency at the exchange rate when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not translated.

i. Government grants

Government grants are recognised where there is reasonable assurance that the grant will be received, and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates

to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When the Company receives grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments. When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favorable interest is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to financial liabilities.

The Company has chosen to present grants related to an asset item as other income in the statement of profit and loss.

j. Employee benefits

Defined Contribution plan

Provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as an expense when an employee renders the related service.

Defined benefit plan

The company pays gratuity to the employees who have completed 5 Yrs of service with company at the time when the employee leaves the company as per the payment of gratuity act 1972.

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method.

Premeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur.

The Company recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- Service costs comprising current service costs, past-service costs; and
- Net interest expense or income

Short term employee benefits

The undiscounted amount of short term employee benefits expected to be paid in exchange for services rendered by employees is recognized during the period when the employees renders the services. These benefits include compensated absence also.

Long term employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as a liability at the present value of the defined benefit obligation at the balance sheet date.

Share based payments

Share based compensation benefits are provided to employees under the Employee Stock Option Scheme 2015.

The fair value of options granted under the Employee Stock Option Scheme 2015 is recognised as an employee benefits expense with a corresponding increase in equity. The total amount to be recognised is determined by reference to the fair value of the options granted:

- including any market performance conditions (e.g., the entity's share price)
- excluding the impact of any service and non-market performance vesting conditions (e.g. profitability, sales growth targets and remaining an employee of the entity over a specified time period), and
- including the impact of any non-vesting conditions (e.g. the requirement for employees to save or holdings shares for a specific period of time).

The total expenses are amortised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied.

At the end of each period, the entity revises its estimates of the number of options that are expected to vest based on the service and non-market performance vesting conditions. It recognises the impact of the revision to original estimates, if any, in the statement of profit and loss, with a corresponding adjustment to equity.

In case of share based payments to employees of the parent company and its subsidiaries, in the separate financial statements, the parent company records a debit, recognising an increase in the investment in the subsidiaries and a credit to equity.

k. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying asset that

necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

l. Segment Accounting Policies

- (i) The company has disclosed business segment as the primary segment. Based on the criteria mentioned in Ind AS 108 "Operating Segment" the company has identified its reportable segments.

The Chief Operating Decision Maker (CODM) evaluates the company's performance and allocates resources based on an analysis of various performance indicators by operating segments. The CODM reviews revenue and gross profit as performance indicator for all of the operating segments. The various segment identified by the company comprised as under: -

Name of Segment	Comprised of
Solar Power Generation and Maintenance	Generation and distribution of Power Units, Operation and Maintenance of solar Power Plants
Manufacturing and Sale of Solar	Manufacturing and sales of Solar Power System Power Plant

- (ii) Segment revenue, segment results, segment assets and segment liabilities include respective amounts directly identified with the segment and also an allocation on reasonable basis of amounts not directly identified. The expenses which are not directly relatable to the business segment are shown as unallocated corporate cost. Assets and liabilities that cannot be allocated between the segments are shown as un-allocable corporate assets and liabilities respectively.
- (iii) The Company has identified geographical segments as the secondary segment. Secondary segments comprise of domestic and export markets. However, company has no export sales.

m. Leases

Company as a lessee

Leases are classified as finance lease whenever the terms of the lease transfer substantially all the risk and rewards of ownership of the asset to the company. All the other leases are classified as operating leases.

Operating lease

Operating lease payments are recognized as expenditure in the Statement of Profit and Loss on a straight-line basis, unless another basis is more representative of the time pattern of benefits received from the use of the assets taken on lease or the payments of lease rentals are in line with the expected general inflation compensating the lessor for expected inflationary cost. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

n. Tax Expenses

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible.

The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

For operations carried out under tax holiday period (80IA benefits of Income Tax Act, 1961), deferred tax assets or liabilities, if any, have been established for the tax consequences of those temporary differences between the carrying values of assets and liabilities

and their respective tax bases that reverse after the tax holiday ends.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the relevant entity intends to settle its current tax assets and liabilities on a net basis.

Deferred tax assets include Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. Accordingly, MAT is recognised as deferred tax asset in the balance sheet when the asset can be measured reliably, and it is probable that the future economic benefit associated with the asset will be realised.

o. Provisions, contingent liabilities and contingent assets

Provisions are recognised when there is a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation, or the amount of the obligation cannot be measured with sufficient reliability. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are not recognized, but its existence is disclosed in the financial statements.

p. Financial Instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair

value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in statement of profit and loss.

(i) Financial Assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place. All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

(ii) Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

(iii) Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. On initial recognition, the company makes an irrevocable election on an instrument-by-instrument basis to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments, other than equity investment which are held for trading. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments.

(iv) Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading. Other financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in profit or loss.

(v) Impairment of financial assets (other than at fair value)

The company assesses at each date of balance sheet whether a financial asset or a company of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

Financial liabilities and equity instruments Classification as debt or equity Debt and equity instruments issued by a Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

(vi) Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a Company entity are recognised at the proceeds received, net of direct issue costs. Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in statement of profit and loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

(vii) Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method.

(viii) Derivative financial instruments

The Company enters into a variety of derivative financial instruments to manage its exposure to foreign exchange rate risks, including foreign exchange forward contracts.

(ix) Offsetting

Financial assets and financial liabilities are offset and the net amount is presented in balance sheet when and only when, the group has a legally enforceable right to set off the amount and it intends, either to settle them on net basis or to realise the asset and settle the liability simultaneously.

q. Investment in Subsidiaries

Investment in subsidiaries are measured at cost as per Ind AS 27 - Separate Financial Statements.

r. Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

s. Cash Flow Statement

Cash flows are reported using the indirect method, where by profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

t. Earnings per equity share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

u. Use of critical estimates, judgements and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

(i) Property, plant and equipment

On transition to IND AS, the Company has adopted optional exemption under IND AS 101. For land i.e. fair valuation as on transition date and for remaining assets of property, plant and equipment and intangible assets at cost with retrospective application of Ind AS 16, impact of fair valuation and retrospective application is provided in Note no 51, subsequent to fair valuation no depreciation has been charged on free hold land, however remaining assets of property, plant and equipment depreciation charged on cost amount less estimated salvage value.

Property, plant and equipment also represent a significant proportion of the asset base of the Company. Therefore, the estimates and assumptions made to determine their carrying value and related depreciation are critical to the Company's financial position and performance.

(ii) Intangibles

Internal technical or user team assess the remaining useful lives of Intangible assets. Management believes that assigned useful lives are reasonable.

(iii) Income taxes

Management judgment is required for the calculation of provision for income taxes and deferred tax assets and liabilities.

The Company reviews at each balance sheet date the carrying amount of deferred tax assets. The factors used in estimates may differ from actual outcome which could lead to significant adjustment to the amounts reported in the standalone financial statements.

(iv) Contingencies

Management judgement is required for estimating the possible outflow of resources, if any, in respect of contingencies/claim/litigations against the Company as it is not possible to predict the outcome of pending matters with accuracy.

(v) Allowance for uncollected accounts receivable and advances

Trade receivables do not carry any interest and are stated at their normal value as reduced by appropriate allowances for estimated irrecoverable amounts. Individual trade receivables are written off when management deems them not to be collectible. Impairment is made on the expected credit losses, which are the present value of the cash shortfall over the expected life of the financial assets.

(vi) Fair value of land on transition date

The Company measures Free hold land classified as property, plant and equipment at revalued amounts with changes in fair value being recognised in Equity. The Company engaged an independent valuation specialist to assess fair value at 01 April 2016 for revalued Free hold land.

v. Mandatory exceptions applied Standards issued but not yet effective
Ind AS 115 Revenue from Contracts with Customers

Ind AS 115 was issued in February 2015 and establishes a five-step model to account for revenue arising from contracts with customers. Under Ind AS 115 revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The new revenue standard will supersede all current revenue recognition requirements under Ind AS. This standard will come into force from accounting period commencing on or after 1st April 2018. The company will adopt the new standard on the required effective date. During the current year, the company performed a preliminary assessment of Ind AS 115

Amendments to Ind AS 12 Recognition of Deferred Tax Assets for Unrealised Losses

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount.

Entities are required to apply the amendments retrospectively. However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognised in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Entities applying this relief must disclose that fact.

However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognised in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Ind AS 21, Foreign currency transactions

On March 28, 2018, Ministry of Corporate Affairs (“MCA”) has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 effective from April 1, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency.

These amendments are effective for annual periods beginning on or after 1 April 2018.

Note-49: Financial risk management objectives and policies

In its ordinary operations, the companies activities expose it to the various types of risks, which are associated with the financial instruments and markets in which it operates. The company has a risk management policy which covers the foreign exchanges risks and other risks associated with the financial assets and liabilities such as interest rate risks and credit risks. The risk management policy is approved by the board of directors. The following is the summary of the main risks:

a) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates (currency risk) and interest rates (interest rate risk), will affect the companies income or value of it's holding of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

i) Interest rate risk

Interest rate risk is the risk the the fair value or future cash flow of a financial instrument will fluctuate because of changes in market interest rate. Fair value interest rate risk is the risk of changes in fair value of fixed interest bearing financial instrument because of fluctuations in the interest rates. Cash flow interest rate risk is the risk that the future cash flows of floating interest bearing financial instrument will fluctuate because of fluctuations in the interest rates.

The Company's exposure to the risk of changes in market interest rates relates primarily to the borrowing from banks. Currently company is not using any mitigating factor to cover the interest rate risk.

Particulars	For the Year ended 31 st March, 2018	For the Year Ended 31 st March, 2017	For the Year Ended 1 st April, 2016
Interest rate risk exposure

Total borrowings	10,840.06	8,988.33	10,361.87

Interest rate sensitivity

The sensitivity analysis below have been determined based on exposure to interest rates for borrowing at the end of the reporting period and the stipulated change taking place at the beginning of the financial year and held constant throughout the reporting period in case of term loans that have floating rates. If the interest rates had been 1% higher or lower and all the other variables were held constant, the effect on Interest expense for the respective financial years and consequent effect on companies profit in that financial year would have been as below:

Particulars	For the	For the
	Year ended 31 st March, 2018	Year Ended 31 st March, 2017
Impact on Profit or Loss for the year decrease	108.40	89.88
Impact on Profit or Loss for the year Increase	-108.40	-89.88

ii) Foreign currency risk

The Company enters into transactions in currency other than its functional currency and is therefore exposed to foreign currency risk. The Company analyses currency risk as to which balances outstanding in currency other than the functional currency of that Company. The company enters in to derivative financial instrument such foreign currency forward contract and option contracts to mitigate the risk of changes in exchange rate on foreign currency exposure.

Following table analysis foreign currency assets and liabilities on balance sheet date.

	USD	USD	USD	USD
	Increase	Decrease	Increase	Decrease
Sensitivity to foreign currency risk	-16.96	16.96	-41.95	41.95

(b) Credit risk

Credit risk is the risk that arises from the possibility that the counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss.

Financial assets that are subject to such risk, principally consist of trade receivables, Investments and loans and advances. None of the financial instruments of the company results in material concentration of credit risk. Financial assets are written off when there is no reasonable expectation of recovery, however, the Company continues to attempt to recover the receivables. Where recoveries are made, these are recognised in the Statement of Profit and Loss.

The impairment for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Company's past history, existing market conditions as well as forward looking estimates at the end of each balance sheet date.

Trade and other receivables

To Manage trade and other receivables, the company periodically assesses the financial reliability of customers, taking into account the financial conditions, economic trends, analysis to historical bad debts and ageing of such receivables.

The ageing analysis of the trade receivables has been considered from the date the invoice falls due

Investments

The Company limits its exposure to credit risk by generally investing in liquid securities and only with counter-parties that have a good credit rating. The Company does not expect any losses from non-performance by these counter-parties apart from those already given in financials, and does not have any significant concentration of exposures to specific industry sectors or specific country risks.

(c) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company has obtained fund and non-fund based working capital lines from various banks. The company's treasury department is responsible for liquidity, funding as well as settlement management. In addition, process and policies related to such risk are overseen by senior management. Management monitors the company's net liquidity position through rolling forecasts on the basis of expected cash flows.

To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into three levels prescribed under the Ind AS. An explanation for each level is given below.

Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Note-51: First time adoption of Ind AS

First Ind AS financial statements

These are the Company's first separate financial statements prepared in accordance with Ind AS applicable as at 31 March 2018.

The accounting policies set out in note B have been applied in preparing the financial statements for the year ended 31 March 2018, the comparative information presented in these financial statements for the year ended 31 March 2017 and in the preparation of an opening Ind AS balance sheet as at 1 April 2016 (the date of transition). In preparing its opening Ind AS balance sheet, the Company has restated the amounts reported previously in financial statements prepared in accordance with the accounting standards notified under Companies (Accounting Standards) Rules, 2014 and other relevant provisions of the Act (previous GAAP or Indian GAAP) so as to comply in all material respects with Ind AS.

An explanation of how the transition from previous GAAP to Ind AS has affected the Company's financial position, financial performance and cash flows is as follows:

First-time adoption

Following are the applicable Ind AS 101 optional exemptions and exceptions to retrospective application of Ind AS applied in the transition from previous GAAP to Ind AS as per Appendix D of IND AS 101.1.

I) Optional exemptions

a) Property, plant and equipment and intangible assets

The Company has applied Ind AS 16 with retrospective effect for all of its property, plant and equipment, except for Free hold land which is accounted at deemed cost. i.e. fair valued on transition date, as at the transition date, viz., 1st April 2016.

b) Investment in subsidiaries

Ind AS 101 permits a first-time adopter to elect to continue with the carrying value for all of its investment in subsidiaries as recognised in the financial statements at the date of transition to Ind AS, measured as per the previous GAAP and use that as its deemed cost as at the date of transition.

Accordingly, the Company has elected to measure all of its investments in subsidiaries at their previous GAAP carrying value.

II) Exceptions to retrospective application of Ind AS

a) Estimates

An entity's estimates in accordance with Ind ASs at the date of transition to Ind AS shall be consistent with estimates made for the same date in accordance with previous GAAP (after adjustments to reflect any difference in accounting policies), unless there is objective evidence that those estimates were in error.

Ind AS estimates as at 1 April 2016 are consistent with the estimates as at the same date made in conformity with previous GAAP except where Ind AS required a different basis for estimates as compared to the previous GAAP.

De-recognition of financial assets and liabilities

Ind AS 101 requires a first-time adopter to apply the de-recognition provisions of Ind AS 109 prospectively for transactions occurring on or after the date of transition to Ind AS. However, Ind AS 101 allows a first-time adopter to apply the de-recognition requirements in Ind AS 109 retrospectively from a date of the entity's choosing, provided that the information needed to apply Ind AS 109 to financial assets and financial Liabilities derecognised as a result of past transactions was obtained at the time of initially accounting for those transactions.

The company has applied the de-recognition provisions of Ind AS 109 prospectively from the date of transition to Ind AS.

III) Classification and measurement of financial assets

Ind AS 101 requires an entity to assess classification and measurement of financial instrument meet the condition of Ind AS 109 on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

51.6 Notes to Reconciliation

- Freehold land (property) are carried in the balance sheet on the basis of fair valuations performed on transition date, and all other property, plant and equipment are measured as per Ind AS 16 with the date of its acquisition.
- The company had evaluated and considered life time impairment on one of its financial asset i.e. renewable energy certificates, on transition date considering then market trend & scenerio and resultant change is adjusted in retained earnings.
- Under Previous GAAP, the company made investment made in mutual fund and are recorded at lower of cost or net realisable value. Under Ind AS the investment in mutual fund has been fair valued through profit and loss.
- Certain security deposits given were recorded at discounted value and classified at amortised cost, Difference between the discounted value and transaction value of the security deposits has been recognised as prepaid expenses.

- 5 Under the previous GAAP, the premium or discount arising at the inception of foreign exchange forward contracts entered into to hedge an existing asset / liability, were amortised as expense or income over the life of the contract. Exchange differences on such contracts were recognized in the statement of profit and loss in the reporting period in which the exchange rate changes. Under the IND AS 109, foreign exchange forward contracts are carried at fair value and the resultant gains /(losses) are recorded in the statement of profit and loss.
 - 6 Under Previous GAAP, the transaction cost (i.e. Processing Cost) incurred towards borrowings was capitalised with Property, Plant and Equipment. Upon transition to Ind AS, the transaction cost has been amortized over the loan period with interests as per effective interest rate method.
 - 7 Upon transition to Ind AS, Company has elected to apply Ind AS 16, Property, Plant and Equipment from date of acquisition of property, plant and equipment and accordingly as a change in estimate has been applied retrospectively and resultant change is adjusted in retained earnings.
 - 8 Under Previous GAAP, the cost relating to post employment benefit obligation including actuarial gain/losses were recognised in profit and loss. Under the Ind AS, actuarial gain/losses on the net defined liability are recognised in the comprehensive income instead of profit and loss
 - 9 Tax adjustments include deferred tax impact on account of differences between previous GAAP and Ind AS.
- 52. Previous year's figures are regrouped or rearranged wherever considered necessary, to make them comparable with current year's figure.**

INDEPENDENT AUDITOR'S REPORT

To
The Members of
UJAAS ENERGY LIMITED

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated Ind AS financial statements of **Ujaas Energy Limited** (hereinafter referred to as "the Holding Company") and its subsidiary (the Holding and its subsidiary together referred to as "the Group") comprising the Consolidated Balance Sheet as at 31st March, 2018, the Consolidated Statement of Profit and Loss (including other comprehensive income), the Consolidated Statement of Changes in Equity and the Consolidated Cash Flow Statement for the year then ended, and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated Ind AS financial statements").

Management's Responsibility for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these consolidated Ind AS financial statements in terms of the requirements of the Companies Act, 2013 (hereinafter referred to as "the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, the Consolidated Statement of Changes in Equity and consolidated cash flows of the Group, in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. The respective Board of Directors of the companies included in the group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated Ind AS financial statements by the Directors of the Holding Company, as aforesaid.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated Ind AS financial statements based on our audit. While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements

and plan and perform the audit to obtain reasonable assurance about whether the consolidated Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated Ind AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation and presentation of the consolidated Ind AS financial statements that give a true and fair view, in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated Ind AS financial statements.

We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors' in terms of their reports referred to in the Other Matters Paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated Ind AS financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of reports of the other auditors on separate financial statements/ financial information of the subsidiaries referred to below in Other Matter paragraph, the aforesaid consolidated Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the consolidated state of affairs of the Group as at 31st March, 2018, and their consolidated profit, including consolidated other comprehensive income, consolidated statement of changes in equity and their consolidated cash flows for the year ended on that date.

Other Matter

- a. We did not audit the financial statements of one subsidiary whose financial statements reflect total assets of ` 38.79 lacs as at 31st March, 2018, total revenues of Nil and cash outflows amounting to Nil for the year ended on that date as considered in the consolidated Ind AS financial statements. These financial statements have been audited by other auditors whose reports have been furnished to us by the Management and our opinion on the consolidated Ind AS financial statements, in so far as it relates to the amount and disclosures included in respect of these subsidiaries and our report in terms of sub-section (3) and (11) of section 143 of the Act, insofar as it relates to the aforesaid subsidiary, is based solely on the reports of the other auditor.

Annexure A to the Independent Auditor’s Report of even date on the Consolidated Ind AS Financial Statements of Ujaas Energy Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

In conjunction with our audit of the consolidated Ind AS financial statements of the Company as of and for the year ended 31st March, 2018, we have audited the internal financial controls over financial reporting of Ujaas Energy Limited (“the Holding Company”).

Management’s Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding company

which is company incorporated in India are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Holding Company which is company incorporated in India, internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and obtained by other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company, which is company incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

B. Significant accounting policies

The Consolidated financial statements relate to Ujaas Energy Limited (the company) and its subsidiaries as under:

The consolidated Financial Statements have been prepared in accordance with the generally accepted accounting principles in India, including Indian Accounting Standards (Ind AS) notified under the relevant provisions of the Companies Act, 2013 as applicable on the following basis:

1. The financial statements of the holding company and its subsidiaries have been combined on a line to line basis by adding together like items of assets, liabilities, equity income, expenses and cash flows.
2. Intra group balances, intra group transactions and resulting unrealized profits/losses have been eliminated in full.
3. In case of foreign subsidiaries, revenue items are consolidated at the average rate prevailing during the year. All assets and liabilities are converted at rates prevailing at the end of the year. Any exchange difference arising on consolidation is recognized in the foreign currency translation reserve.

4. Figures pertaining to the subsidiaries have been reclassified to bring them in line with parent company’s financial statements.
5. The excess of / shortfall in the cost to the holding company of its investment over the company’s portion of equity as at the date of investment is recognized in the consolidated financial statements as goodwill / capital reserve.
6. The consolidated financial statement has been prepared using uniform accounting policy for like transaction and other events in similar circumstances.

Upto the year ended 31st March 2017, the group prepared its financial statements in accordance with the requirement of previous GAAP, which included Standards notified under the Companies (Accounting Standards) Rules, 2006. These financial statements are the first financial statements of the group under Ind AS. The date of transition to Ind AS is 1st April 2016.

Refer Note 47 for details of first-time adoption exemptions availed by the group.

a. Basis of Preparation:

The financial statements have been prepared on accrual basis and under the historical cost convention except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the accounting policies mentioned below.

All assets and liabilities have been classified as current or non-current as per the Group normal operating cycle and other criteria set out in Schedule III to the Companies Act, 2013. The Group has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

The financial statements including notes thereon are presented in Indian Rupees (“Rupees” or “INR”), which is the Group’s functional and presentation currency. All amounts disclosed in the financial statements including notes thereon have been rounded off to the nearest lacs as per the requirement of Schedule III to the Act, unless stated otherwise.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The group has identified twelve months as its operating cycle.

b. Inventories

Inventories are valued at lower of cost and net realisable value, except scrap are valued at net realisable value. Cost of inventory is arrived at by using Moving Average Price Method. Cost of inventory generally comprises of cost of purchase, cost of conversion and other cost incurred in bringing the inventory to their present location and condition.

c. Revenue Recognition

Revenue is recognised to the extent it is probable that the economic benefits will flow to the Group and that the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government. The Group assesses its revenue arrangements against specific criteria, i.e., whether it has exposure to the significant risks and rewards associated with the sale of goods or the rendering of services, in order to determine if it is acting as a principal or as an agent. Revenue is recognised, net of trade discounts, and taxes, as applicable.

(i) Revenue recognition Sale of Power

Revenue from Power Supply is recognized for on acceptance by Electricity Distribution Group/ Consumers of units generated and after giving allowance for wheeling and transmission loss.

(ii) Operation and Maintenance Income

Income from services is recognized as they are rendered (based on arrangement / agreement with the concern customers).

(iii) Renewable Energy Certificate (REC) Income

Income arising from REC is initially recognised in respect of the number of units of power exported at the minimum expected realisable value, determined based on the rates specified under the relevant regulations duly considering the entitlements as per the policy, industry specific developments, Management assessment etc. and when there is no uncertainty in realising the same. The difference between the amount recognised initially and the amount realised on sale of such REC's at the Power Exchange are accounted for as and when such sale happens.

(iv) Construction Contracts

When the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that the amount can be measured reliably and its receipt is considered probable.

The outcome of a construction contract is considered as estimated reliably when (a) all critical approvals necessary for commencement of the project have been obtained; (b) the stage

of completion of the project reaches a reasonable level of development (i.e. at least 25%).

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

When contract costs incurred to date plus recognised profits less recognised losses exceed progress billings, the surplus is shown as amounts due from customers for contract work. Amounts received before the related work is performed are included in the balance sheet, as a liability, as advances received. Amounts billed for work performed but not yet paid by the customer are included in the balance sheet under trade receivables.

(v) Dividend and Interest income

Dividend income from investments is recognised when the right to receive dividend has been established.

Interest income recognised on accrual basis. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

d. Property, Plant and Equipment

(i) Property, plant and equipment

The Group has applied Ind AS 16 with retrospective effect for all of its property, plant and equipment, except for Free hold land which is accounted at deemed cost. i.e. fair valued on transition date, as at the transition date, viz., 1st April 2016.

Property, Plant and Equipment are stated at cost less accumulated depreciation and accumulated impairment losses, if any, Free hold land is measured at cost.

The cost of property plant and equipment comprises its purchase price net of any trade discount and rebates, any import duties and other taxes, any directly attributable expenditure on the asset ready for its intended use including relevant borrowing cost.

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the group.

(ii) Capital work in progress

Assets under erection/installation are shown as “Capital work in progress”, Expenditure during construction period are shown as “pre-operative expenses” to be capitalized on erection/installations of the assets.

(iii) Depreciation

Depreciation on fixed assets is provided in the manner specified in Schedule II to the Companies Act, 2013 except based on technical evaluation the useful life of Solar power generation plant is considered 25 years which is different from that prescribed in schedule II of the Act. Depreciation of an asset is the difference between Original cost / revalued amount and the estimated residual value and is charged to the statement of profit and loss over the useful life of an asset on straight line basis. The estimated useful life of assets and estimated residual value is taken as prescribed under Schedule II to the Companies Act, 2013.

Depreciation on additions during the year is provided on pro rata basis with reference to date of addition/installation. Depreciation on assets disposed /discarded is charged up to the date on which such asset is sold. Freehold land and Assets held for sale are not depreciated.

e. Intangible assets

Intangible assets are held at cost less accumulated amortisation and impairment losses. Intangible assets developed or acquired with finite useful life are amortised on straight line basis over the useful life of asset

The useful lives of intangible assets are assessed as either finite or indefinite. The Group currently does not have any intangible assets with indefinite useful life. Intangible assets are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

Intangible assets - Computer software are amortized over a period of 3 years.

f. Impairment of non-current asset

An asset is considered as impaired when at the date of Balance Sheet there are indications of impairment and the carrying amount of the asset, or where applicable the cash generating unit to which the asset belongs exceeds its recoverable amount (i.e. the higher of the net asset selling price and value in use).

The carrying amount is reduced to the recoverable amount and the reduction is recognized as an impairment loss in the Statement of Profit and Loss. The impairment loss recognized in the prior accounting period is reversed if there has been a change in the

estimate of recoverable amount. Post impairment, depreciation is provided on the revised carrying value of the impaired asset over its remaining useful life.

g. Foreign currency transactions and translations

- (i) All transactions in foreign currency are recorded at the rates of the exchange prevailing on the dates when the relevant transactions took place; any gain/ loss on account of the fluctuations in the rate of exchange is recognized in the statement of Profit and Loss.
- (ii) Monetary items in the form of loans, current assets and current liabilities in foreign currencies at the close of the year are converted in the Indian currency at the appropriate rate of exchange prevailing on the dates of the Balance Sheet. Resultant gain or loss on account of fluctuation in the rate of exchange is recognized in the statement of Profit and Loss.
- (iii) Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated in to functional currency at the exchange rate when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not translated.

h. Government grants

Government grants are recognised where there is reasonable assurance that the grant will be received, and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When the Group receives grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments. When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favorable interest is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to financial liabilities.

The Group has chosen to present grants related to an asset item as other income in the statement of profit and loss.

i. Employee benefits

Defined Contribution plan

Provident fund is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund. The Group recognizes contribution payable to the provident fund scheme as an expense when an employee renders the related service.

Defined benefit plan

The group pays gratuity to the employees who have completed 5 Yrs of service with group at the time when the employee leaves the group as per the payment of gratuity act 1972

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method.

Premeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur.

The Group recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- Service costs comprising current service costs, past-service costs; and
- Net interest expense or income

Short term employee benefits

The undiscounted amount of short term employee benefits expected to be paid in exchange for services rendered by employees is recognized during the period when the employees renders the services. These benefits include compensated absence also.

Long term employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as a liability at the present value of the defined benefit obligation at the balance sheet date.

Share based payments

Share based compensation benefits are provided to employees under the Employee Stock Option Scheme 2015.

The fair value of options granted under the Employee Stock Option Scheme 2015 is recognised as an employee

benefits expense with a corresponding increase in equity. The total amount to be recognised is determined by reference to the fair value of the options granted:

- including any market performance conditions (e.g., the entity's share price)
- excluding the impact of any service and non-market performance vesting conditions (e.g. profitability, sales growth targets and remaining an employee of the entity over a specified time period), and
- including the impact of any non-vesting conditions (e.g. the requirement for employees to save or holdings shares for a specific period of time).

The total expenses are amortised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied.

At the end of each period, the entity revises its estimates of the number of options that are expected to vest based on the service and non-market performance vesting conditions. It recognises the impact of the revision to original estimates, if any, in the statement of profit and loss, with a corresponding adjustment to equity.

In case of share based payments to employees of the parent group and its subsidiaries, in the separate financial statements, the parent group records a debit, recognising an increase in the investment in the subsidiaries and a credit to equity.

j. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

k. Segment Accounting Policies

- (i) The group has disclosed business segment as the primary segment. Based on the criteria mentioned in Ind AS 108 "Operating Segment" the group has identified its reportable segments.

The Chief Operating Decision Maker (CODM) evaluates the group's performance and allocates resources based on an analysis of various performance indicators by operating segments. The CODM reviews revenue and gross profit as performance indicator for all of the operating segments. The various segment identified by the group comprised as under: -

Name of Segment	Comprised of
Solar Power Generation and Maintenance Operation	Generation and distribution of Power Units, and Maintenance of solar Power Plants
Manufacturing and Sale of Solar	Manufacturing and sales of Solar Power System Power Plant

- (ii) Segment revenue, segment results, segment assets and segment liabilities include respective amounts directly identified with the segment and also an allocation on reasonable basis of amounts not directly identified. The expenses which are not directly relatable to the business segment are shown as unallocated corporate cost. Assets and liabilities that cannot be allocated between the segments are shown as un-allocable corporate assets and liabilities respectively.
- (iii) The Group has identified geographical segments as the secondary segment. Secondary segments comprise of domestic and export markets. However, group has no export sales.

l. Leases

Group as a lessee

Leases are classified as finance lease whenever the terms of the lease transfer substantially all the risk and rewards of ownership of the asset to the group. All the other leases are classified as operating leases.

Operating lease

Operating lease payments are recognized as expenditure in the Statement of Profit and Loss on a straight-line basis, unless another basis is more representative of the time pattern of benefits received from the use of the assets taken on lease or the payments of lease rentals are in line with the expected general inflation compensating the lessor for expected inflationary cost. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

m. Tax Expenses

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible.

The Group's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities

in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

For operations carried out under tax holiday period (80IA benefits of Income Tax Act, 1961), deferred tax assets or liabilities, if any, have been established for the tax consequences of those temporary differences between the carrying values of assets and liabilities and their respective tax bases that reverse after the tax holiday ends.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the relevant entity intends to settle its current tax assets and liabilities on a net basis.

Deferred tax assets include Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. Accordingly, MAT is recognised as deferred tax asset in the balance sheet when the asset can be measured reliably, and it is probable that the future economic benefit associated with the asset will be realised.

n. Provisions, contingent liabilities and contingent assets

Provisions are recognised when there is a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that

reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation, or the amount of the obligation cannot be measured with sufficient reliability. The Group does not recognize a contingent liability but discloses its existence in the financial statements

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. Contingent assets are not recognized, but its existence is disclosed in the financial statements.

o. Financial Instruments

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in statement of profit and loss.

(i) Financial Assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place. All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

(ii) Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are

solely payments of principal and interest on the principal amount outstanding.

(iii) Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. On initial recognition, the group makes an irrevocable election on an instrument-by-instrument basis to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments, other than equity investment which are held for trading. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments.

(iv) Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the group irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading. Other financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in profit or loss.

(v) Impairment of financial assets (other than at fair value)

The group assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Group recognises lifetime expected losses for all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

Financial liabilities and equity instruments Classification as debt or equity Debt and equity instruments issued by a Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

(vi) Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a Group entity are recognised at the proceeds received, net of direct issue costs. Repurchase of the Group's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in statement of profit and loss on the purchase, sale, issue or cancellation of the Group's own equity instruments.

(vii) Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method.

(viii) Derivative financial instruments

The Group enters into a variety of derivative financial instruments to manage its exposure to foreign exchange rate risks, including foreign exchange forward contracts.

(ix) Offsetting

Financial assets and financial liabilities are offset and the net amount is presented in balance sheet when and only when, the group has a legally enforceable right to set off the amount and it intends, either to settle them on net basis or to realise the asset and settle the liability simultaneously.

p. Cash and cash equivalents

The Group considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

q. Cash Flow Statement

Cash flows are reported using the indirect method, where by profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Group are segregated.

r. Earnings per equity share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the group by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the group by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

s. Use of critical estimates, judgements and assumptions

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the grouping disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

(i) Property, plant and equipment

On transition to IND AS, the Group has adopted optional exemption under IND AS 101. For land i.e. fair valuation as on transition date and for remaining assets of property, plant and equipment and intangible assets at cost with retrospective application of Ind AS16, impact of fair valuation and retrospective application is provided in Note no. 47, subsequent to fair valuation no depreciation has been charged on free hold land, however remaining assets of property, plant and equipment depreciation charged on cost amount less estimated salvage value.

Property, plant and equipment also represent a significant proportion of the asset base of the Group. Therefore, the estimates and assumptions made to determine their carrying value and related depreciation are critical to the Group's financial position and performance.

(ii) Intangibles

Internal technical or user team assess the remaining useful lives of Intangible assets. Management believes that assigned useful lives are reasonable.

(iii) Income taxes

Management judgment is required for the calculation of provision for income taxes and deferred tax assets and liabilities.

The Group reviews at each balance sheet date the carrying amount of deferred tax assets. The factors used in estimates may differ from actual outcome which could lead to significant adjustment to the amounts reported in the consolidated financial statements.

(iv) Contingencies

Management judgement is required for estimating the possible outflow of resources, if any, in respect of contingencies/claim/litigations against the Group as it is not possible to predict the outcome of pending matters with accuracy.

(v) Allowance for uncollected accounts receivable and advances

Trade receivables do not carry any interest and are stated at their normal value as reduced by appropriate allowances for estimated irrecoverable amounts. Individual trade receivables are written off when management deems them not to be collectible. Impairment is made on the expected credit losses, which are the present value of the cash shortfall over the expected life of the financial assets.

(vi) Fair value of land on transition date

The Group measures Free hold land classified as property, plant and equipment at revalued amounts with changes in fair value being recognised in Equity. The Group engaged an independent valuation specialist to assess fair value at 01 April 2016 for revalued Free hold land.

t. Mandatory exceptions applied Standards issued but not yet effective
Ind AS 115 Revenue from Contracts with Customers

Ind AS 115 was issued in February 2015 and establishes a five-step model to account for revenue arising from contracts with customers. Under Ind AS 115 revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled

in exchange for transferring goods or services to a customer. The new revenue standard will supersede all current revenue recognition requirements under Ind AS. This standard will come into force from accounting period commencing on or after 1st April 2018. The group will adopt the new standard on the required effective date. During the current year, the group performed a preliminary assessment of Ind AS 115

Amendments to Ind AS 12 Recognition of Deferred Tax Assets for Unrealised Losses

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount.

Entities are required to apply the amendments retrospectively. However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognised in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Entities applying this relief must disclose that fact.

However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognised in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Ind AS 21, Foreign currency transactions

On March 28, 2018, Ministry of Corporate Affairs (“MCA”) has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 effective from April 1, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency.

These amendments are effective for annual periods beginning on or after 1 April 2018.

Note-45: 'Financial risk management objectives and policies

In its ordinary operations, the group activities expose it to the various types of risks, which are associated with the financial instruments and markets in which it operates. The group has a risk management policy which covers the foreign exchanges risks and other risks associated with the financial assets and liabilities such as interest rate risks and credit risks. The risk management policy is approved by the board of directors. The following is the summary of the main risks:

a) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates (currency risk) and interest rates (interest rate risk), will affect the companies income or value of it's holding of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

i) Interest rate risk

Interest rate risk is the risk the the fair value or future cash flow of a financial instrument will fluctuate because of changes in market interest rate. Fair value interest rate risk is the risk of changes in fair value of fixed interest bearing financial instrument because of fluctuations in the interest rates. Cash flow interest rate risk is the risk that the future cash flows of floating interest bearing financial instrument will fluctuate because of fluctuations in the interest rates.

The group exposure to the risk of changes in market interest rates relates primarily to the borrowing from banks. Currently group is not using any mitigating factor to cover the interest rate risk.

Particulars	For the Year ended 31 st March, 2018	For the Year Ended 31 st March, 2017	For the Year Ended 1 st April, 2016
Interest rate risk exposure			
Borrowings from banks	10,840.06	8,988.33	10,361.87
Total borrowings	10,840.06	8,988.33	10,361.87

Interest rate sensitivity

The sensitivity analysis below have been determined based on exposure to interest rates for borrowing at the end of the reporting period and the stipulated change taking place at the beginning of the financial year and held constant throughout the reporting period in case of term loans that have floating rates. If the interest rates had been 1% higher or lower and all the other variables were held constant, the effect on Interest expense for the respective financial years and consequent effect on companies profit in that financial year would have been as below:

Particulars	For the Year ended 31 st March, 2018	For the Year Ended 31 st March 2017
Impact on Profit or Loss for the year decrease	108.40	89.88
Impact on Profit or Loss for the year Increase	-108.40	-89.88

ii) Foreign currency risk

The group enters into transactions in currency other than its functional currency and is therefore exposed to foreign currency risk. The group analyses currency risk as to which balances outstanding in currency other than the functional currency of that group. The group enters in to derivative financial instrument such foreign currency forward contract and option contracts to mitigate the risk of changes in exchange rate on foreign currency exposure.

Following table analysis foreign currency assets and liabilities on balance sheet date.

	USD	USD	USD	USD
	Increase	Decrease	Increase	Decrease
Sensitivity to foreign currency risk	17.36	-17.36	42.30	-42.30

(b) Credit risk

Credit risk is the risk that arises from the possibility that the counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss.

Financial assets that are subject to such risk, principally consist of trade receivables, Investments and loans and advances. None of the financial instrumts of the group results in material concentration of credit risk.

Financial assets are written off when there is no reasonable expectation of recovery, however, the group continues to attempt to recover the receivables. Where recoveries are made, these are recognised in the Statement of Profit and Loss.

The impairment for financial assets are based on assumptions about risk of default and expected loss rates. The group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the group's past history, existing market conditions as well as forward looking estimates at the end of each balance sheet date.

Trade and other receivables

To Manage trade and other receivables, the group periodically assesses the financial reliability of customers, taking in to account the financial conditions, economic trends, analysis to historical bad debts and ageing of such receivables.

The ageing analysis of the trade receivables has been considered from the date the invoice falls due

Investments

The group limits its exposure to credit risk by generally investing in liquid securities and only with counter-parties that have a good credit rating. The group does not expect any losses from non-performance by these counter-parties apart from those already given in financials, and does not have any significant concentration of exposures to specific industry sectors or specific country risks.

(c) Liquidity risk

Liquidity risk is the risk that the group will not be able to meet its financial obligations as they become due.

The group has obtained fund and non-fund based working capital lines from various banks. The group's treasury department is responsible for liquidity, funding as well as settlement management. In addition, process and policies related to such risk are overseen by senior management. Management monitors the group's net liquidity position through rolling forecasts on the basis of expected cash flows.

Capital Management

For the purpose of the group's capital management, capital includes issued equity capital, securities premium and all other equity reserves attributable to the equity shareholders of the group. The group's objective when managing capital is to safeguard its ability to continue as a going concern so that it can continue to provide returns to shareholders and other stake holders.

The group manages its capital structure and makes adjustments in light of changes in the financial condition and the requirements of the financial covenants. To maintain or adjust the capital structure, the group may adjust the dividend payment to shareholders, return capital to shareholders (buy back its shares) or issue new shares.

No changes were made in the objectives, policies or processes for managing capital during the year ended 31st March, 2018 and 31st March, 2017."

Note-46: Financial Instruments by Category and fair value hierarchy

Set out below, is a comparison by class of the carrying amounts and fair value of the group financial instruments, other than those with carrying amounts that are reasonable approximations of fair values.

The fair values of the financial assets and financial liabilities included in the level 2 and level 3 categories above have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties.”

To provide an indication about the reliability of the inputs used in determining fair value, the group has classified its financial instruments into three levels prescribed under the Ind AS. An explanation for each level is given below.

Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.”

Note-47: First time adoption of Ind AS

First Ind AS financial statements

These are the Group first consolidated financial statements prepared in accordance with Ind AS applicable as at 31 March 2018.

The accounting policies set out in note B have been applied in preparing the financial statements for the year ended 31 March 2018, the comparative information presented in these financial statements for the year ended 31 March 2017 and in the preparation of an opening Ind AS balance sheet as at 1 April 2016 (the date of transition). In preparing its opening Ind AS balance sheet, the Group has restated the amounts reported previously in financial statements prepared in accordance with the accounting standards notified under Companies (Accounting Standards) Rules, 2014 and other relevant provisions of the Act (previous GAAP or Indian GAAP) so as to comply in all material respects with Ind AS.

An explanation of how the transition from previous GAAP to Ind AS has affected the group financial position, financial performance and cash flows is as follows:

First-time adoption

Following are the applicable Ind AS 101 optional exemptions and exceptions to retrospective application of Ind AS applied in the transition from previous GAAP to Ind AS.as per Appendix D of IND AS 101.1.

I) Optional exemptions

a) Property, plant and equipment and intangible assets

The Group has applied Ind AS 16 with retrospective effect for all of its property, plant and equipment, except for Free hold land which is accounted at deemed cost. i.e. fair valued on transition date, as at the transition date, viz., 1st April 2016.

II) Exceptions to retrospective application of Ind AS

a) Estimates

An entity's estimates in accordance with Ind ASs at the date of transition to Ind AS shall be consistent with estimates made for the same date in accordance with previous GAAP (after adjustments to reflect any difference in accounting policies), unless there is objective evidence that those estimates were in error.

Ind AS estimates as at 1 April 2016 are consistent with the estimates as at the same date made in conformity with previous GAAP except where Ind AS required a different basis for estimates as compared to the previous GAAP.

De-recognition of financial assets and liabilities

Ind AS 101 requires a first-time adopter to apply the de-recognition provisions of Ind AS 109 prospectively for transactions occurring on or after the date of transition to Ind AS. However, Ind AS 101 allows a first-time adopter to apply the de-recognition requirements in Ind AS 109 retrospectively from a date of the entity's choosing, provided that the information needed to apply Ind AS 109 to financial assets and financial Liabilities derecognised as a result of past transactions was obtained at the time of initially accounting for those transactions.

The group has applied the de-recognition provisions of Ind AS 109 prospectively from the date of transition to Ind AS.

D) Classification and measurement of financial assets

Ind AS 101 requires an entity to assess classification and measurement of financial instrument meet the condition of Ind AS 109 on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

Reconciliation of equity as at 1st April 2016 (date of transition)

47.6 Notes to Reconciliation

- Freehold land (property) are carried in the balance sheet on the basis of fair valuations performed on transition date, and all other property, plant and equipment are measured as per Ind AS 16 with the date of its acquisition.
- The company had evaluated and considered life time impairment on one of its financial asset .i.e. renewable energy certificates, on transition date considering then market trend & scenerio and resultant change is adjusted in retained earnings.
- Under Previous GAAP, the company made investment made in mutual fund and are recorded at lower of cost or net realisable value. Under Ind AS the investment in mutual fund has been fair valued through profit and loss.
- Certain security deposits given were recorded at discounted value and classified at amortised cost, Difference between the discounted value and transaction value of the security deposits has been recognised as prepaid expenses.
- Under the previous GAAP, the premium or discount arising at the inception of foreign exchange forward contracts entered into to hedge an existing asset / liability, were amortised as expense or income over the life of the contract. Exchange differences on such contracts were recognized in the statement of profit and loss in the reporting period in which the exchange rate changes. Under the IND AS 109, foreign exchange forward contracts are carried at fair value and the resultant gains /(losses) are recorded in the statement of profit and loss.
- Under Previous GAAP , the transaction cost (i.e. Processing Cost) incurred towards borrowings was capitalised with Property, Plant and Equipment. Upon transition to Ind AS, the transaction cost has been amortized over the loan period with interests as per effective interest rate method.
- Upon transition to Ind AS, Company has elected to apply Ind AS 16, Property, Plant and Equipment from date of acquisition of property, plant and equipment and accordingly as a change in estimate has been applied retrospectively and resultant change is adjusted in retained earnings.
- Under Previous GAAP, the cost relating to post employment benefit obligation including actuarial gain/losses were recognised in profit and loss. Under the Ind AS, actuarial gain/losses on the net defined liability are recognised in the comprehensive income instead of profit and loss
- Tax adjustments include deferred tax impact on account of differences between previous GAAP and Ind AS.
