INTERNAL RISK FACTORS

- 1. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations**

We require several statutory and regulatory permits, licenses and approvals to operate our business some of which our Company has either received, applied for or is in the process of application. Many

of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals.

Further, our Company requires statutory and regulatory registration / permits for our business, which have not been obtained by us, as on date of this Draft Red Herring Prospectus. Details of the approvals for which applications are yet to be made or which are pending before the appropriate authorities are more particularly mentioned in the chapter titled "Government and Other Approvals" beginning on page 271 of this Draft Red Herring Prospectus. In particular, our Company has recently made application for the purpose of obtaining Exemption for Ground Water Withdrawal, for its manufacturing unit located at located at Plot No.1, Survey No.2/1 P4/P2, National Highway-27 Gondal Highway, Village Bhojpara, Rajkot, Gondal, Gujarat-360311. Further, we will require to obtain factory license and other applicable registrations/ licence/ consent/ permission/ approval, in respect of the display cum assembly unit proposed to be set-up at Lucknow, Uttar Pradesh, at time of setting-up of the same. Furthermore, the necessary registrations and licences would be required in respect of the showroom proposed to be setup at Gondal. We cannot assure you that we may be in a position to obtain the requisite permissions / consents / licenses / approvals in a timely manner or at all. In the event we are unable obtain the requisite permissions / consents / licenses / approvals, we may have to we may be penalized for any non-compliance with the aforementioned laws. Further if there is any delay in receipt of requisite permissions / consents / licenses / approvals for the proposed manufacturing unit to be set-up at Lucknow, Uttar Pradesh, and/or for the purpose of proposed showroom at the current manufacturing facility at registered office, our future business plans would be adversely effected owing to which we might not be in a position to derive the benefits anticipated by us from the proposed expansion plans in the expected timelines. For further details, kindly refer chapters titled "Key Industry Regulations and Policies" and "Government and Other Approvals" beginning on pages 162 and 271 respectively of this Draft Red Herring Prospectus.

2. The Manufacturing Unit proposed to be set up in Lucknow, Uttar Pradesh, is on premises taken on lease.

We have taken ground floor/godown/shop of a building premises admeasuring 16008 square feet, bearing Gata No. 923 and 990, Mouza, situated at Goila, Pargana Mahona, Tehsil BKT, District Lucknow, Uttar Pradesh on which the second manufacturing unit of our Company is proposed to set up. The said land has been taken on tenancy in terms of Registered "Deed of Agreement for Tenancy on Godown Premises" dated November 27, 2024, for a fixed period of two years w.e.f. January 01, 2025 till December 31, 2026. In terms of the said Deed, the tenancy shall be automatically terminated/cancelled and the tenant shall handover the vacant possession of the premises to the landlord. Although the Company has entered into Supplemental Tenancy Agreement/Deed, the clause pertaining to automatic termination of the Deed has been amended to permit the extension of the tenure of the tenancy for such period, as may be mutually agreed to by and between the tenant and the landlord. Furthermore, the Supplemental Tenancy Agreement/Deed, also provides for provision for providing grace period of 1 year from the date of termination of the deed, i.e. from December 31, 2026, during which the tenant is permitted to continue with the possession of the premises, in the event the landlord does not assent to the extension of the tenancy. However, the said Supplemental Tenancy Agreement is not Registered with the appropriate authority and is only Notarized.

If this tenancy deed is terminated or not renewed on terms acceptable to us, it could have a material adverse effect on our business, financial condition and results of operations. Further, in the event of termination/non-renewal of said tenancy deed, we may be required to vacate such premises which may cause disruption in our corporate affairs and business. There can be no assurance that we will, in the future, be able to renew the tenancy deed for our new manufacturing unit on same or similar terms, or will be able to find alternate locations for our business operation on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our tenancy deed for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the Lease Deed is terminated or they are not renewed on commercially acceptable terms and conditions, we may suffer a disruption in our operations which could materially and adversely affect our business, financial condition and results of operations.

For further information on the premises occupied by us refer to chapter “Business Overview” beginning on page 132.

3. We have only one Manufacturing Facility, continued operations of our manufacturing facility is critical to our business and any disruption in the operation of our manufacturing facility may have a material adverse effect on our business, results of operations and financial condition.

As on the date of this Draft Red Herring Prospectus, we have only one manufacturing facility situated at Plot No.1, Survey No.2/1 P4/P2, National Highway-27 Gondal Highway, Village Hojpara, Rajkot, Gondal, Gujarat-360311. Our manufacturing facility is subject to operating risks, such as unavailability of spare parts of the machinery, break- down, obsolescence or failure of machinery, disruption in power supply or processes, performance below expected levels of efficiency, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. In the event, we are forced to shut down our manufacturing unit for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Spiralling cost of living around our unit may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness. In addition to the above if our manufacturing unit suffers losses as a result of any industrial accident, we may be forced to shut down our manufacturing unit which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our manufacturing unit may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities.

Although we have not experienced any such issues in the past, however we cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labour involved in our manufacturing unit, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

4. Our business is subject to a variety of safety, health and environmental laws, labour, and workplace related laws and regulations. Any failure on our part to comply with these applicable laws and regulations could have an adverse effect on our operations and financial condition.

Our company is subject to various central, state, and local environmental and safety laws. These include the No Objection Certificate (NOC) issued by the fire department, as well as the Consent for Establishment under the Water (Prevention and Control of Pollution) Act, 1974, and the Air

(Prevention and Control of Pollution) Act, 1981. Additionally, the Consent to Operate under these same acts, along with the Exemption for Ground Water Withdrawal, are applicable to our operations. However, we have not yet obtained these approvals. As a result, we may be subject to additional scrutiny by the relevant regulators. Each of these delays represents a potential lapse that could expose the company to regulatory scrutiny and penalties, which may adversely impact our financial stability and reputation. Although, we believe that we have complied with all the applicable laws and regulations, in the event of any breach of such laws and regulations, we may be subject to penal consequences which would adversely affect our operations and financial condition. For further details, kindly refer to the chapter 'Government and Other Approvals' beginning on page 271 of this Draft Red Herring Prospectus. Further, any changes in the applicable laws and regulations in the future may require us to deploy our resources for monitoring the compliance of various applicable legislations, breach of which may entail liabilities and costs, including monetary fines, criminal penalties on our Company's officers for violation of applicable laws, or imposition of restrictions on our Company's operations (which may include temporary suspension or closure of its operations). Since we need labour to run our manufacturing unit, our Company is subject to variety of workplace related laws and regulations. We are required to maintain records and also file periodic returns in relation to the same. Although, we believe that we have complied with all the applicable laws and regulations, in the event of any breach of such laws and regulations, we may be subject to penal consequences which would adversely affect our operations and financial condition.

5. We generate a significant percentage of our revenue from few clients. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability.

We depend on certain customers who have contributed a substantial portion of our total revenues.

The details of the revenue accounted for cumulatively by our top 1, 5 and 10 customers for the seven months period ended October 31, 2024, and for the financial years ended March 31, 2024, March 31, 2023, and March 31, 2022, is provided hereunder:

We have not entered into long term agreements with majority of these customers and the success of our business is accordingly significantly dependent on maintaining good relationship with them. The loss of a significant client or clients may have a material adverse effect on our results of

operations/cash flow.

We cannot assure you that we will be able to maintain the historical levels of business from these clients or that we will be able to substitute the revenues lost by way of termination of work with these clients. Our dependence on these clients also exposes us to risks associated with their internal management, financial condition and creditworthiness, and major events affecting these clients such as bankruptcy, change of management, mergers and acquisitions, reduction in growth or a slow-down in the business of our clients, could adversely impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivables from that client may have to be written off, adversely impacting our results of operations and financial condition.

6. Our top ten suppliers contribute majority of our purchases. Any loss of business with one or more of them may adversely affect our business operations and profitability.

The details of the purchases accounted for cumulatively by our top 1, 5 and 10 suppliers for the seven months period ended October 31, 2024, and for the financial years ended March 31, 2024, March 31, 2023, and March 31, 2022, is provided hereunder:

However, our top suppliers may vary from period to period depending on the demand-supply mechanism and thus the supply process from these suppliers might change as we continue to seek more cost-effective suppliers in the normal course of business. Since our business is concentrated among relatively few significant suppliers, we could experience a reduction in our purchases and business operations if we lose one or more of these suppliers, including but not limited on account of any dispute or disqualification. While we believe we have maintained good and long-term relationships with our other suppliers too, there can be no assurance that we will continue to have such a long-term relationship with them. We cannot be assured that we shall do the same quantum of business, or any business at all, with these customers, and loss of business with one or more of them may adversely affect our purchases and business operations.

7. There have been instances of incorrect filing and delays in filing of certain e-forms of our Company in compliance with the Companies Act, 2013. Consequently, we may be subject to regulatory actions and penalties for such delays which may adversely impact our business and financial condition.

There have been instances of delayed and/or incorrect filing of certain e-forms by our Company. Further the bank account statements and Letter of Offer w.r.t. the Rights Issues done by the Company are not available.

There was an error in e-form MGT-14 filed by the Company w.r.t. approval of the current IPO, wherein the nature of resolution was erroneously mentioned as "Private Placement". Although, our Company has now made the correct filings along with the required fee, in order to rectify errors made in Form MGT-14, we cannot assure you that the RoC will not issue a notice or take any other regulatory action against our Company and its officers in this regard.

Further, in the erstwhile Form 2 and/or e-Form PAS-3, filed w.r.t. allotment of equity shares pursuant to Rights Issue made by the Company on July 18, 2007, February 03, 2010, January 31, 2012, September 10, 2014 and December 31, 2014, the Company had not filed certain attachment viz. Board Resolution for allotment of Equity Shares, Letter of Offer. Furthermore, the Bank Account Statements and Letter of Offer w.r.t. the rights issues made by the Company on July 18, 2007, February 03, 2010, January 31, 2012, September 10, 2014 and December 31, 2014, are not available.

We cannot assure you that such instances will not happen in the future and that our Company will not be subject to any action, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in, or non-availability of, or delays in filing of, any of its secretarial records and filings, which may adversely affect our reputation.

8. Our business operations are concentrated in the Gujarat, any adverse developments affecting our operations in this region could have a significant impact on our revenue and results of operations.

We generate substantial portion of revenue through our customers situated in the Gujarat, India. During the period ended October 31, 2024 and the financial year ended March 31, 2024, our 46.41% and 35.46% revenues were generated solely from Gujarat, India. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations.

Further, as we enter into new markets and geographical areas, we are likely to compete with not only national players, but also the local players, who might have an established local presence, and are more familiar with local business practices and have stronger relationships with local clients, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

9. We have in the past, and may in the future, experience losses.

We have experienced losses in the Financial Years 2021-22, as set forth in the table below: During the Financial Year of 2022 the company has incurred loss of (13.87) lakhs as per Restated Financial Statement is owing to increase in advertisement as well rent incurred for premises

These losses have primarily arisen due to higher finance cost and increase in advertisement as well rent incurred for premises. For further details, see "Management's Discussion and Analysis of

Financial Condition and Results of Operations” beginning on page 250.

There is no assurance that we will be able to improve our procurement efficiency or increase the margin that we apply on the selling prices to our customers. Further, increases in the other costs forming a part of our total expenses in the future may also lead to losses in the future. If we are unable to generate adequate revenue growth and manage our expenses, we may continue to incur losses in the future.

10. We do not have long-term agreements with most of our customers and the loss of one or more of them or a reduction in their demand for our products could adversely affect our business, results of operations, financial condition and cash flows.

Our business relies heavily on maintaining strong, ongoing relationships with our customers. Currently, we do not have long-term contracts with our clients, which makes us vulnerable to changes in their buying preferences. Any shifts in these preferences could negatively impact our business. The loss or disruption of work from a key customer or several significant customers, or the inability to secure new orders regularly, could adversely affect our revenue, cash flow, and overall operations.

The continuity of our customer relationships is crucial to our success. However, there is no guarantee that we will be able to maintain or expand these relationships. If we fail to sustain our existing customer base, develop new relationships, or deliver services that meet customer expectations in a timely manner, we could face a decline in customers. This could have a detrimental effect on our business, future prospects, financial performance, and overall condition.

11. We do not have long-term agreements with most of our suppliers and the loss of one or more of them could adversely affect our business, results of operations, financial condition and cash flows. Further, our inability to accurately forecast demand for our products or manage our inventory or working capital requirements may have an adverse effect on our business, results of operations and financial condition.

The primary raw materials used by us in our manufacturing unit is Steel, Glass, Compressor and its accessories, Solid Surface, Aluminium, Casting Plate, Burner, and Caster Wheel. The cost of these raw materials is susceptible to fluctuations owing to various factors viz. availability of components like iron ore, coal, dolomite, and limestone etc., market demand, global economic conditions, trade policies of the government etc. We generally pass the fluctuations in costs of raw materials to our customers the.

The prices of the various raw material used in our manufacturing process is subject to fluctuations due to various reasons such as price of crude oil, increase in transportation costs, government polices including taxes and duties etc. We may be unable to make adequate provisions for the price fluctuations and, consequently, any adverse fluctuations that we have not factored in or provided for may adversely affect the results of our operations and our financial conditions.

The raw materials used by us in our manufacturing process is purchased by us from third parties. We typically do not enter into long-term supply contracts with any of our suppliers with respect to our raw material requirements and typically place orders with them in advance of our anticipated requirements. An efficient inventory management is a key component of the success of our business, results of operations and profitability and to that end we maintain a reasonable level of inventory of raw materials, work in progress and finished goods at our manufacturing facility. While we forecast the demand and price for our products and accordingly, plan our production volumes, any error in our forecast due to inter alia the domestic scale of our operations and demand for our products, could result in a reduction in our profit margins and surplus stock, which may result in additional storage

cost and such surplus stock may not be sold in a timely manner, or at all.

12. Our Company procures majority of its raw material for its manufacturing activity from the state of Gujarat any adverse developments affecting operations in this region could have a significant impact on our business, and results of operations.

We procure majority of raw materials for manufacturing of our products from the suppliers located in the state of Gujarat. During the seven months period ended October 31, 2024, our Company had sourced approximately 90 % of the raw materials required by us from the state of Gujarat itself. And 10% from others state such as Delhi, Dadar and Nagar Haveli, Madhya Pradesh, Maharashtra, Rajasthan and Uttar Pradesh. For detail breakup of raw material procured by us kindly refer to business chapter starting [•] This reliance on specific sourcing locations heightens our exposure to adverse developments related to economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations. While we strive to maintain a stable supply chain, various factors—such as economic fluctuations, regulatory changes, or natural disruptions impacting the state of Gujarat, could impact our procurement process. As such, there may be potential risks that could affect availability and pricing of the raw materials required by us.

Economic downturns in these regions may affect suppliers' ability to deliver consistent quality and quantity of materials. Regulatory changes, whether at the state or national level, can alter compliance requirements, impacting availability and potentially increasing costs. Natural disruptions, such as floods or earthquakes, could lead to significant delays in the supply chain, while geopolitical tensions might affect trade relations and logistics. In the event of any adverse factors effecting the region from where we procure raw material, we may have to look for alternate source for procuring the raw material, which would be a time consuming process as the quality of our products is directly dependent upon the quality of raw material procured by us. Furthermore we cannot assure you that we may be in a position to procure raw material from other regions in a cost effective and timely manner, which may impact our business and results of operations. While our management has owing to their long standing presence in the market, established connections with the suppliers and customers, to ensure that the business is carried on without interruptions, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

13. Our inability to collect receivables and instances of payment default by our clients could result in the reduction of our profits and affect our cash flows, adversely affecting business, results of operations, financial condition and cash flows.

Our ability to collect receivables and the occurrence of payment defaults by clients could negatively impact our profitability and cash flow. We offer specific credit periods as part of our standard payment terms. While we evaluate and limit the credit extended to clients based on their financial stability and payment history, there is still a risk that some clients may encounter financial difficulties, which could prevent them from meeting their payment obligations. As a result, our credit assessments may turn out to be inaccurate, potentially leading to financial challenges. As of October 31, 2024 and as of March 31, 2024, our trade receivables amounted to Rs. 825.69 Lakhs and Rs. 640.17 Lakhs, respectively, representing 52.80% and 33.88% of the revenue generated by the Company during the respective periods. For more details, refer to the “Restated Financial Statements” on page 206.

Any increase in our receivable turnover days, instances of write-offs, or insufficient provisions for doubtful receivables could adversely affect our business, financial performance, condition, and cash flow.

14. If we fail to adapt to technological advancements, shifting market conditions, or evolving customer demands and requirements, or if we are unable to identify and respond to changing industry trends and develop new products that meet these needs, it could negatively impact our business and operational performance.

Our future success will, in part, depend on our ability to effectively respond to technological advancements, changes in market conditions, and evolving customer demands, as well as adjustments in the industry in which we operate. Such changes must be addressed in a cost-effective and timely manner. If the technology we currently use becomes obsolete, we may be required to make significant capital investments to upgrade our facilities and equipment to stay competitive globally. To remain competitive within the industry, it is crucial that we develop new products that meet customer demands promptly. Failure to adapt to technological changes or customer demands in a timely manner could reduce our competitiveness, thereby negatively impacting our business, operational performance, and financial health.

15. Our Company has reported certain negative cash flows from its Operating activity, investing activity and financing activity, details of which are given below. Sustained negative cash flows could impact our growth and business.

Our Company had reported certain negative cash flows from its operating activity, investing activity and financing activity in the previous years as per the restated financial statements and the same are summarized as under

Amount in Rs. Lakhs

Particulars	For the period ended October 31, 2024	For the year ended March 31		
		2024	2023	2022
Net cash flow generated from/ (utilised in) operating activities	4.20	-27.04	115.96	75.54
Net cash flow utilised in investing activities	-29.16	-11.02	-17.05	-3.25
Net cash flow generated from/ (utilised in) financing activities	34.72	74.84	-87.40	-66.73

The negative cash flows from our operating activities during the for financial year ended 31st March 2024, is owing to the following reasons:

Negative trade payables arise because the company has improved its purchasing policy to avail better quantity discounts on steel, glass, and compressors. As a result, the company has paid its creditors to secure new credit terms in line with the updated policies.

Considering the sales projections and orders in hand for the financial year 2024-25, the company has procured excess raw materials to ensure a smooth flow of production in the upcoming year. Consequently, payments have been made for these materials, resulting in a negative cash flow related to inventory.

The negative cash flows from our investing activities for the period ended October 31, 2024 is owing to acquisition of assets resulted in a higher cash outflow, leading to a negative cash flow.

The negative cash flows from our financing activities for the financial year ended 31st March 2023 is owing to payment of Interest Expenses and repayment of Long term borrowings including Loans.

16. Product reliability, safety and effectiveness concerns can have significant negative impacts on sales and results of operations, lead to litigation and cause reputational damage.

Concerns about product safety, whether arising internally or from external parties such as litigants, regulators, or consumer advocates—regardless of their scientific foundation—can result in safety alerts, product recalls, government inquiries, regulatory actions, lawsuits, fines, settlements, and diminished sales. These issues can also harm the company's reputation, brand image, brand equity, and consumer confidence in our products. Product recalls, which have occurred in the past and could happen again, may trigger investigations, inspections, suspension of manufacturing, sales declines, substantial remediation expenses, reputational damage, and the potential for civil or criminal penalties.

Furthermore, delays in GSTR filings could negatively affect stakeholder confidence in the Company.

Although the Company has on boarded professional for ensuring that such delays or defaults are not repeated in future. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI. In light of these factors, we may not be able to undertake variation of

objects of the Issue to use any unutilized proceeds of the Issue, if any, or vary the terms of any contract referred to in the Draft Red Herring Prospectus and the Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, or varying the terms of the contract, which may adversely affect our business and results of operations.

23. We have incurred indebtedness and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition.

As of October 31, 2024, we had total outstanding borrowings of Rs. 848.95 Lakhs secured borrowings and Rs.24.18 Lakhs unsecured borrowings. As a part of financing agreements and/or arrangements, we are obligated to adhere to the repayment and other covenants.

While we have not defaulted on any covenants in financing agreements in the past, we cannot assure you that this will continue to be the case in the future. A failure to observe the covenants under our financing arrangements or to obtain necessary waivers, constitute defaults under the relevant financing agreements and will entitle the respective lenders to declare a default against us and enforce remedies under the terms of the financing agreements. If the obligations under any of our financing documents are accelerated, we may have to dedicate a portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. In addition, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. For details of our borrowings, see "Statement of Financial Indebtedness" on page 261.

Further, we are susceptible to changes in interest rates and the risks arising there from. Under certain of our financing agreements, the lenders are entitled to charge the applicable rate of interest, which is a combination of a base rate/MCLR rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. Further, in recent years, the GoI has taken measures to control inflation, which included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows, and financial condition.

24. Our Promoters does not have adequate educational qualifications.

One of our individual Promoters and Managing Directors, namely, Shaileshbhai Ratibhai Pipaliya and Whole Time Director Ms. Hansaben Shaileshbhai Pipaliya has not received a formal educational degree. Mr. Shaileshbhai Ratibhai Pipaliya has completed his 9th Standard from Shri Bhadhur Shastri Vidyalaya, and Ms. Hansaben Shaileshbhai Pipaliya has completed her 9th Standard however, we cannot assure you that the inadequacy of formal higher educational qualification of of Mr. Shaileshbhai Ratibhai Pipaliya and Ms. Hansaben Shaileshbhai Pipaliya will not have any adverse impact on the management and/ or operations of the Company. For details, see "Our Management – Brief Biographies of Directors" beginning on page 176.

25. Any failure in our quality control processes may adversely affect our business, results of operations and financial condition.

We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations. Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of internal quality standards. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence and human error or

otherwise, may damage our products and result in deficient products. It is imperative for us to meet the quality standards set by our customers and agencies as deviation from the same can cause them to reject our products and can also cause damage to our reputation, market standing and brand value. In the event the quality of our products is sub-standard, or our products suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the substandard products and reimburse the cost paid by our customers. Such quality lapses could strain our longstanding relationship with our customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

26. The Company operates in B2C market owing to which it requires to maintain high working capital turnover ratio and a high debtor turnover ratio

The Company caters to B2C market as it supplies its products to the ultimate customers through its dealer and distributor network. Accordingly, our Company has high working capital requirements and it is also required to maintain high inventory level to meet the market demands and sustain growth. Accordingly, the Company has to consistently maintain a high level of working capital and debtor turnover ratio. In the event the Company is not able to maintain the optimum level of inventory and/or is not able to realize its debtors to meet its working capital requirements, its business operations and profitability would be adversely impacted.

27. Our Promoters and some of our Directors have interests in our Company other than the reimbursement of expenses and normal remuneration or benefits. Any such interests may result in a conflict of interest, which may have an adverse effect on our business.

Our Promoters and Directors being Mr. Shaileshbhai Ratibhai Pipaliya , Ms. Hansaben Shaileshbhai Pipaliya and Mr. Jay Shaileshkumar Pipaliya, may be deemed to be interested in our Company, in addition to regular remuneration or benefits and reimbursements of expenses, to the extent of Equity Shares held by them, their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company, and to the extent of sitting fees, if any, payable to them for attending each of our Board and Committee meetings. Some of the above interests may conflict with the duties of these persons as Promoters / Directors of the Company. For further details, kindly refer the chapters titled “Our Management” and “Our Promoters and Promoter Group” beginning on pages 176 and 198, respectively of this Draft Red Herring Prospectus.

28. The Company’s businesses operate in highly competitive product markets and competitive pressures could adversely affect the Company’s earnings.

The Company’s businesses compete with companies of all sizes on the basis of cost-effectiveness, technological innovations, intellectual property rights, product performance, real or perceived product advantages, pricing and availability. The Company also competes with other market participants in securing rights to acquisitions, collaborations and licensing agreements with third parties. Competition for rights to product candidates and technologies may result in significant investment and acquisition costs and onerous agreement terms for the Company. Competitors’ development of more effective or less costly products, and/or their ability to secure patent and other intellectual property rights and successfully market products ahead of the Company, could negatively

impact sales of the Company's existing products as well as its ability to bring new products to market despite significant prior investment in the related product development.

Development by other companies of new or improved products, processes and technologies could threaten to make the Company's products or technologies less desirable, less economical or obsolete. The Company's business and operations will be negatively impacted if we are unable to introduce new products or technological advances that are safe, more effective, more effectively marketed or otherwise outperform those of our competitors.

29. We have in the past entered into related party transactions and may continue to do so in the future

We have entered into transactions with our Promoter and other related parties. For a list of related parties, please see Annexure V of the Chapter titled "Financial and other Information" beginning on page 240 of this Draft Red Herring Prospectus. While we believe that all such transactions have been conducted on an arm's length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise.

30. Our success depends largely upon the knowledge and experience of our Promoters, other Key Managerial Personnel and Senior Management. Any loss of our key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.

Our Promoters, Mr. Shaileshbhai Ratibhai Pipaliya, Ms. Hansaben Shaileshbhai Pipaliya and Mr. Jay Shaileshkumar Pipaliya, have collective experience of more than 5 decades in the manufacture of Kitchen Equipment, Display Counters and Refrigerator. They have been crucial to the growth of our business and we are highly dependent on our Promoters to manage our current operations and to meet future business challenges. Our Promoters, along with our Key Managerial Personnel and Senior Management, who form an integral part of our Company, have over the years built relations with suppliers, customers and other key stakeholders associated with our Company. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our key managerial personnel or Senior Management are unable or unwilling to continue in his / her present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected. Further, since the demand for the key managerial personnel/Senior Management is very robust, in order to retain them, our Company may be required to offer them higher compensation packages by way of higher pay and more perquisites. This may adversely affect our business, financial condition and results of operations.

31. Our Company has availed unsecured loans from promoters/directors and their relatives, which are repayable on demand.

Our Company has availed unsecured loans from directors and its Relatives, which are repayable on demand. As on October 31, 2024, the balance of the said unsecured loans is Rs. 24.18 Lakhs. Any demand for repayment may adversely affect our cash flow. In the event that the person from whom we have availed unsecured borrowings, call in such loans in future, we would need to find alternative sources of financing, which may not be available on commercially reasonable terms or at all. For further details please refer to Chapter titled "Statement of Financial Indebtedness" beginning on page

261 of this Draft Red Herring Prospectus.

32. We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on our results of operations and financial conditions.

Our company's 100% of the revenue is not derived from India. We export our products to geographies outside of India. We receive revenue in foreign currency from such operations. Any changes in value of currencies with respect to the rupee may cause fluctuations in our operating results expressed in rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Fluctuations in the exchange rates may affect our company to the extent of cost of services sold in foreign currency terms. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company's results of operations

33. Expanding into new markets carries inherent risks.

Our expansion into new markets, both domestically and internationally, presents several challenges. These include unfamiliarity with local culture, legal regulations, economic conditions, language barriers, staffing and management difficulties, and a lack of brand recognition. The risks associated with entering new geographic regions might be higher than anticipated, and we could face intense competition. Operating in new markets subjects us to additional risks such as complying with a wide array of local laws, regulations, and practices, which may change unpredictably. We may encounter challenges like fluctuating currency exchange rates, difficulties in enforcing legal rights, adverse tax implications, different accounting standards, stringent labour and other regulations, varying customs, tariffs, and taxes, and potential government actions like expropriation. Political, economic, and social instability in these new markets could also pose significant challenges.

34. All of our product verticals are extremely competitive segments and we face risk of competition affecting our margins and profitability as we scale our operations.

Our purchase and sales models include various intermediaries who may connect with our competitors and share details of the specialities of our products or our sourcing processes etc. We may not be able to protect our trade secrets and may not be able to detect the same as well. We have not entered into any non-disclosure agreements with our intermediaries and thus our efforts towards marketing of our products may be leaked to other players in the market. This may affect the demand and exclusivity of our products and make us subject to fierce competition thereby adversely affecting our business, financial condition and results of operations.

35. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since the Issue size is less than Rs. 10,000.00 Lakh there is no mandatory requirement of appointing an independent monitoring agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

36. We have not made any alternate arrangements for meeting our regular working capital requirements. If our operations do not generate the necessary cash flow, our working capital requirements may negatively affect our operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our working capital requirements. We meet our working capital requirements through internal accruals. Any shortfall in internal accruals and our inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations.

37. Our lenders have charge over our movable and Immovable properties in respect of finance availed by us.

We have secured our lenders by creating charge over our immovable properties and movable properties. In the event of our default in repayment of the loans availed by us and any interest thereon, our properties may be forfeited by our lenders. For further information on the financing and loan agreements along with the total amounts outstanding, kindly refer the section titled “Statement of Financial Indebtedness” beginning on page 261 of this Draft Red Herring Prospectus.

38. We could be exposed to risks arising from misconduct, fraud and trading errors by our employees and Business Associates.

Frauds or other delinquencies by employees could include indulging in transactions that exceed authorized limits or present unacceptable risks to us; hiding unauthorized or unsuccessful trading activities from us; or the improper use of confidential information. Such misconduct could result in unacceptable business risks, losses, invite regulatory sanctions and seriously harm our reputation and could even lead to litigation. The precautions we take to prevent and detect these activities may not be effective. Any delinquencies or trading errors on the part of our employees could materially affect our business operations, financial position and/or reputation.

39. Our Company may not have adequate insurance coverage and we are not protected against all material hazards, which may adversely affect our business, results of operations and financial condition.

Our Company does not have adequate insurance cover for the premises where our registered office cum manufacturing unit is located nor for the plant and machinery installed at our manufacturing unit. Our business and assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be compensated by insurance as our Company does not have adequate insurance coverage. If our Company suffers a large uninsured loss, our business, financial condition and results of operations may be adversely affected. For the details of the insurance policies of our Company please refer to the Chapter “Business Overview” beginning on page 132 of the Draft Red Herring Prospectus.

40. Delays or defaults in customer payments could result in a reduction of our profits and cash flows.

We often commit resources to orders prior to receiving advances or other payments from customers in amounts sufficient to cover expenditures on orders as they are incurred. We may be subject to working capital shortages due to delays in customer payments. If the customer defaults in their payments on an order, or cancels their orders for which we have devoted significant resources or incurred expenditure, it could have a material adverse effect on our business, financial condition, results of operations and cash flows and could cause the price of our equity shares to decline. Hence, any last minute cancellations would also run the risk of not being able to sell those products to another customer. These events could have a material adverse effect on our revenues, results of operations and cash flows.

41. Any disproportionate increase in labour costs including increase in wage/salary demand, labour unrest or labour claims arising from accidents may adversely affect our business operations and financial conditions.

Our increasing business operations may require our employee strength to increase in the future. In the past our business has not experienced any labour unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

42. Operational Disruptions Due to Lack of Backup Power Supply

Our company has availed a power connection from Paschim Gujarat Vij Company Limited for our manufacturing unit premises. However, this system does not include an integrated backup power source. As a result, any failure or disruption in the electricity supply could lead to immediate operational downtime. The absence of a secondary power solution increases the risk of interrupted business activities, which could impede critical processes, impact data management, and affect our ability to meet client expectations. Such disruptions could negatively influence our overall business performance and client satisfaction.

43. The funds proposed to be utilised for general corporate purposes constitute [●] % of the Net Issue Proceeds

The Company intends to use the Net Issue Proceeds for the purposes described in the section titled “Objects of the Issue” beginning on page 98 of this Draft Red Herring Prospectus. Our Company intends to utilise Rs. [●] lakhs constituting [●] % of the aggregate of the gross proceeds towards general corporate purposes. The Objects for which we will be using this amount would be determined by the Board at its discretion, in keeping with the interest of the Company. As of date, our Board has not yet authorised any specific commitments or acts, with respect to utilisation of the portion of the Net Issue Proceeds which will be used for general corporate purposes.

44. Our Promoters and Promoter Group will continue to retain majority control over the Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval

After the completion of the Issue, our Promoters and Promoter Group will continue to hold a significant portion of the post-Issue equity share capital of our Company. This will allow our Promoters to exert considerable influence over matters that require shareholder approval. As a result, they will retain substantial control, including the ability to influence the composition of our Board of Directors, determine decisions requiring simple or special majority votes, such as those related to the sale of all or most of our assets, the timing and distribution of dividends, and the appointment or termination of our officers. Other shareholders may have limited ability to impact the outcome of such decisions. There is no guarantee that our Promoters will exercise their shareholder rights in a manner that benefits the Company or aligns with its best interests. Furthermore, this control could delay, prevent, or obstruct a change in control of our Company, hinder mergers, consolidations, takeovers, or other business combinations, or deter potential acquirers from making an offer—even if it would be in the Company's best interest. The interests of our Promoters may conflict with those of other shareholders, and decisions made by the Promoters could materially and adversely affect your investment in the Company's equity shares.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

45. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “Objects of the Issue” beginning on page 98 of this Draft Red Herring Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

46. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public-listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which requires us to file unaudited financial results on a half-yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

47. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.

The Issue price is based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

48. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. [●] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the

Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the section titled “General Information” on page 65 of this Draft Red Herring Prospectus.

49. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

50. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor’s demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchange, we are required to refund all the monies collected to investors.

51. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of sale of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

52. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange will be subject to capital gains tax in India and also would also be subject to Securities Transaction Tax (“STT”). STT will be levied on and collected by a domestic stock exchange

on which the Equity Shares are sold.

For more details, please refer to “Statement of Possible Tax Benefits” beginning on page 122 of this Draft Red Herring Prospectus.

53. Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

54. Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend upon a variety of factors such as future earnings, financial condition, cash flows, working capital requirements, and restrictive covenants in our financing arrangements.

Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend on our earnings, financial condition and capital requirements. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all. Our ability to pay dividends could also be restricted under the existing or certain financing arrangements that we may enter into.

55. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.

In accordance with the Companies Act, 2013, read with SEBI ICDR Regulations, and various circulars issued by SEBI, and in line with the extant requirements for listing as provided by BSE, permission for listing and trading of the Equity Shares issued pursuant to the Issue is subject to issue and allotment of the Equity Shares under the present Issue. Further, in order to obtain listing and trading approval of BSE, certain activities, including execution of corporate actions, and submission of documents with the stock exchange, are to be completed in time bound manner. Accordingly, there may arise certain circumstances, owing to which the listing and trading in equity shares on the SME Platform of the BSE Limited may be delayed or denied all together. Any delay or failure in obtaining the requisite approvals would restrict your ability to dispose of your Equity Shares.

EXTERNAL RISK FACTORS

56. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the

discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

57. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, financial condition, results of operations, cash flows and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For instance, the Companies Act 2013, several provisions of which (including rules issued thereunder) contain significant changes to Indian company law, including in relation to the issue of capital by companies, related party transactions, corporate governance, audit matters, shareholder class actions, restrictions on the number of layers of subsidiaries and corporate social responsibility. Compliance with such requirements may require significant financial and administrative resources, and any failure to comply may adversely affect our business and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. If a determination is made that we were in violation of such laws, rules or regulations, including conditions in the permits required for our operations, we may have to pay fines, modify or discontinue our operations, incur additional operating costs or make capital expenditures and our business, financial positions, results of operations or cash flows could be adversely affected. For details on the laws currently applicable to the Company kindly refer the chapter titled “Key Industry Regulations and Policies” beginning on page 162 of this Draft Red Herring Prospectus.

58. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India affect the cost and prices of the products we trade in and therefore demand for such product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

60. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in a developing phase, as compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

61. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

62. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

63. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

64. A slowdown in economic growth in India and globally could cause our business to suffer.

We are highly dependent on prevailing economic conditions in India and globally and our results of

operations are significantly affected by factors influencing the Indian and global economy. A slowdown in the economy and per capita income could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy. Factors that may adversely affect the Indian and global economy and per capita income, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing;
- prevailing income conditions among Indian and global consumers and corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India and other countries.

Any slowdown in the Indian or global economy and per capita income or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. Specifically, it has been seen that in our industry, that general correlation exists between demand for pharmaceuticals and per capita income, and therefore any slowdown in per capita income would adversely affect the Indian pharmaceutical market, as well as our business. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

65. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

66. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

67. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighbouring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

68. The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires and pandemic disease may adversely affect our financial condition or results of operations. The potential impact of a natural disaster on our results of operations and financial position is speculative, and would depend on numerous factor The extent and severity of these natural disasters determines their effect on the Indian economy. An outbreak of a communicable disease in India would adversely affect our business and financial conditions and results of operations. We cannot assure you that such events will not occur in the future or that our business, financial condition and results of operations will not be adversely affected.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

Global Outlook

Global growth is projected to remain stable, though somewhat disappointing. With a forecast of 3.2 percent for both 2024 and 2025, the outlook has not changed significantly since the July and April 2024. However, underlying revisions are notable, with upgrades to the U.S. growth forecast balancing downgrades for other advanced economies, particularly in major European nations. In emerging markets and developing economies, challenges such as disruptions in commodity production and shipping—especially oil—along with conflicts, civil unrest, and extreme weather events, have led to reduced growth projections for the Middle East, Central Asia, and sub-Saharan Africa. Conversely, upgrades in emerging Asia's forecast are driven by surging demand for semiconductors and electronics, bolstered by significant investments in artificial intelligence.

The global growth projection for five years from now is 3.1 percent, still underwhelming compared to pre-pandemic levels. Structural obstacles, including aging populations and low productivity, continue to suppress potential growth across many economies.

Cyclical imbalances have eased since the start of the year, aligning economic activity with potential output in major economies. This adjustment has helped bring inflation rates closer together globally, contributing to lower overall inflation. Global headline inflation is expected to drop from an average of 6.7 percent in 2023 to 5.8 percent in 2024 and 4.3 percent in 2025. Advanced economies are expected to meet their inflation targets sooner than emerging markets. Despite progress in global disinflation, challenges remain—while goods prices have stabilized, services inflation remains high in many regions.

Risks to the global outlook are tilted to the downside, exacerbated by high policy uncertainty. Sudden surges in financial market volatility, as seen in August, could tighten financial conditions, impacting investment and growth, particularly in developing economies with large external financing needs. Geopolitical tensions and commodity price spikes could disrupt disinflation, making it difficult for

central banks to ease monetary policy, posing challenges to fiscal policy and financial stability. A deeper or prolonged downturn in China's property sector, potentially leading to financial instability, could dampen consumer sentiment and have negative global spillovers, given China's significant role in global trade. Rising protectionism could heighten trade tensions, hinder market efficiency, and further disrupt supply chains. Increased social tensions could lead to unrest, undermining consumer and investor confidence and delaying vital structural reforms.

As global cyclical imbalances diminish, near-term policy priorities should be carefully calibrated for a smooth economic landing. In many countries, fiscal policy needs to be adjusted to ensure public debt sustainability and rebuild fiscal buffers, with adjustments tailored to each country's circumstances. Structural reforms are necessary to boost medium-term growth prospects, but it is crucial to maintain support for the most vulnerable. Chapter 3 explores strategies to increase the social acceptability of these reforms, an essential factor for their successful implementation. Multilateral cooperation remains critical to accelerate the green transition and support debt-restructuring efforts. Mitigating risks of geo economic fragmentation and strengthening rules-based multilateral frameworks are vital to ensuring that all economies can share in the benefits of future growth.

Global Prospectus

Global growth is projected to align closely with the April 2024 World Economic Outlook (WEO) forecast, at 3.2 percent in 2024 and 3.3 percent in 2025. However, varying momentum across economies as the year progresses has narrowed output divergences, with cyclical factors waning and economic activity becoming better aligned with potential. Services price inflation continues to hinder disinflation progress, complicating the normalization of monetary policy. This has led to increased upside risks to inflation, raising the likelihood of prolonged higher interest rates amid growing trade tensions and policy uncertainty. To manage these risks and sustain growth, a carefully sequenced policy mix is necessary to achieve price stability and rebuild weakened fiscal buffers.

Global activity and world trade picked up at the start of the year, driven by strong exports from Asia, particularly in the technology sector. Compared to the April 2024 WEO, first-quarter growth surprised positively in many countries, although notable downturns were observed in Japan and the United States. In the U.S., a sharper-than-expected slowdown in growth followed a period of strong performance, due to moderating consumption and a negative contribution from net trade. In Japan, the surprise negative growth stemmed from temporary supply disruptions caused by the closure of a major automobile plant. Conversely, Europe saw signs of recovery, led by a rebound in services activity. In China, a surge in domestic consumption fueled positive first-quarter growth, aided by a temporary rise in exports reconnecting with last year's global demand recovery. These developments have reduced output divergences across economies as cyclical factors ease and activity aligns more closely with potential.

The IMF's updated projections incorporate upward revisions to commodity prices, including a 5 percent increase in non-fuel commodity prices for 2024. Energy commodity prices are expected to fall by around 4.6 percent in 2024, a smaller decline than previously projected in the April WEO, reflecting sustained high oil prices due to OPEC+ production cuts and ongoing price pressures from the Middle East conflict. Major central banks are still expected to lower monetary policy rates in the latter half of 2024, although the pace of normalization will vary depending on the inflation situation in each economy.

Global growth is expected to remain stable, with the forecast unchanged at 3.2 percent in 2024 and 3.3 percent in 2025. However, revisions beneath the surface have shifted the growth composition. Among advanced economies, growth is expected to converge in the coming quarters. The U.S. growth

forecast is revised down to 2.6 percent in 2024 (0.1 percentage point lower than previously projected), reflecting a slower-than-expected start to the year. Growth is expected to slow further to 1.9 percent in 2025, as the labor market cools, consumption moderates, and fiscal policy begins to tighten. By the end of 2025, growth is projected to return to potential, closing the positive output gap.

The growth forecast for emerging markets and developing economies has been revised upward, driven primarily by stronger activity in Asia, particularly in China and India. For China, the growth projection is revised up to 5 percent in 2024, mainly due to a rebound in private consumption and strong exports in the first quarter. In 2025, growth is expected to slow to 4.5 percent, continuing to decelerate over the medium term to 3.3 percent by 2029, due to aging-related challenges and slower productivity growth. Similarly, India’s growth forecast has been revised upward to 7.0 percent for this year, reflecting the carryover from 2023’s upward revisions and improved prospects for private consumption, especially in rural areas.

Industry Scenario:

The Capital Goods sector contributes to 12% of India’s manufacturing output and 1.8% of GDP. Market valuation of the capital goods industry was US\$ 43.2 billion in FY22.

The quick estimates of Index of Industrial Production (IIP) for FY24 came at 156.2, improving from 146.7 in FY23.

The market share in India is expected to increase from US\$ 52.98 billion in 2022 to US\$ 125 billion by 2027, implying a robust CAGR of 11.68%. The domestic electrical equipment market is expected to grow at an annual rate of 12% to reach US\$ 72 billion by 2025. In FY23, India's heavy electrical equipment production stood at Rs. 2,44,300 crore (US\$ 29.38 billion). The electrical machinery segment grew nearly 13% with shipments jumping to US\$ 10.19 billion in the April-December 2023 from US\$ 9.06 billion in the year-ago period. The Indian textile machinery industry was expected to touch the US\$ 6 billion mark by 2022.

In FY23, India's heavy electrical equipment production stood at Rs. 2,44,300 crore (US\$ 29.38 billion).

Growth Drivers:

- 1. Privatisation of capital goods industry in major countries have improved competitiveness.**
The capital goods industry in India is largely dominated by public sector enterprises (PSEs), which has to a large extent, affected the development of this industry. Even though PSEs market share has dipped over the last decade, they command a large market share due to preferential purchase policies of the government.
- 2. Focussed product approach improves competitiveness:**
The Indian capital goods industry includes a wide range of products but lacks depth due to low demand sophistication of the local market, which in turn leads to low competitiveness of its products in the global market. On the other hand, major advanced countries generally do not produce entire range of products rather focus on select segments where they are most competitive.
- 3. Strong government focus imminent for development of capital goods industry:**
The growth of capital goods sector can also be attributed to the overall industrial policy and support measures provided by the government to the companies in this sector. Germany is essentially an industrial economy and its economic policies are geared towards strengthening of the industry. However several issues in Indian capital goods industry like inverted duty structure, high export transaction costs, and lack of strong institutional mechanisms for export

credit and promotion etc. hint towards lack of government focus for development of the industry.

4. Better investment climate in competing countries gives them a competitive edge

In contrast, India has not been able to attract huge FDI despite liberal investment policies and low labor costs, primarily due to poor physical infrastructure that affects the supply chain and hence adds to the costs. According to industry estimates, infrastructure inadequacies translate into 5 per cent cost disadvantage for the Indian capital goods manufacturers vis-à-vis foreign manufacturers.

5. State subsidies and incentives have played a key role in industry's development:

The overall average corporate tax burden has sunk to just below 30%, with a number of federal states providing even more competitive tax rates. Standard corporate income tax has also been reduced by 10% to just 15% on all corporate taxable earnings.

The capital goods sector can be broadly classified into following major segments: Machine tools, Process plant machinery, Electrical machinery, Textile machinery and Earth Moving, Construction & Mining machinery.

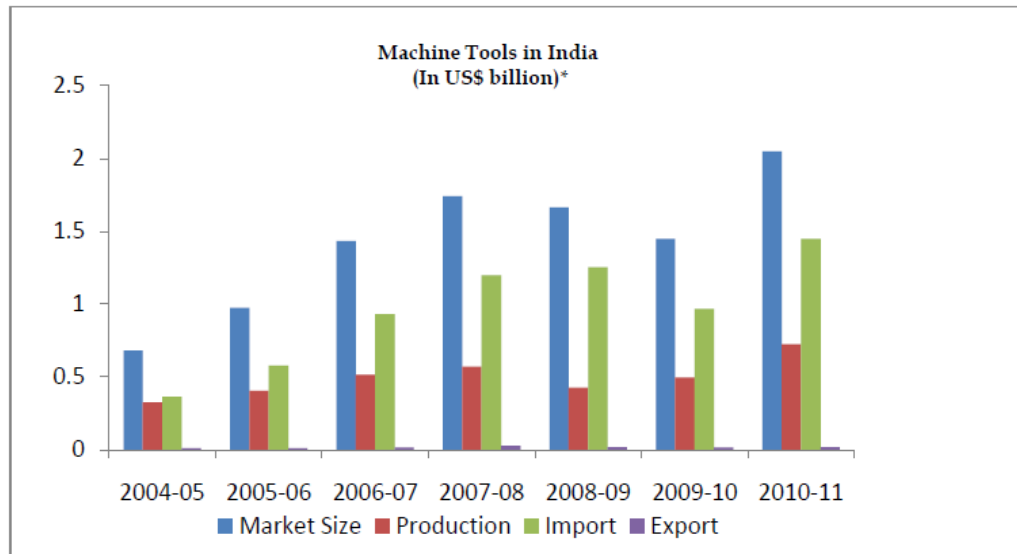

A brief analysis of major segments has been done hereunder The capital goods sector can be broadly classified into following major segments: Machine tools, Process plant machinery, Electrical machinery, Textile machinery and Earth Moving, Construction & Mining machinery. A brief analysis of major segments has been done hereunder

1. Machine Tools

Machine tool industry is considered as mother industry for capital goods sector as it supplies machinery for the entire manufacturing sector. The industry constitutes almost 800 manufacturers, largely SMEs.

Various types of machine tools currently manufactured in India include General/Special Purpose

Machines, Standards CNC machines, Gear cutting, Grinding, Medium sized machines, EDM, Presses, Press Brakes, Pipe Bending, Rolling, Bending, Measuring, metrology and gauging, etc. The demand for machine tools has been growing at a fast pace (nearly 16% per annum) but the domestic supply is not sufficient to meet the same. Consequently, India is highly dependent upon imports of machine tools.

Heavy Electrical and power plant equipment

There are about 675 manufacturers of electrical machinery in India including Heavy electrical power generation Equipment like Boiler, Turbine & Generator sets. BHEL, a public sector undertaking, is the major manufacturer of electrical and power equipment and nearly 90% of other manufacturers are SMEs.

Various products manufactured under this category include Transmission Line Towers, HT Switchgear, Transformers, Motors (FHP, LT, HT& DC), AC Generators, Conductors, Capacitors, Cables, Energy Meters, etc.

Process Plant Equipment

There are over 200 units engaged in the manufacturer of process plant machinery in the country out of which 65% are SMEs. Major process plant machineries include tanks, pressure vessels, evaporators, stirrers, heat exchangers, towers & columns, crystallizer, furnace, etc. are used in energy sector, gas, oil,

refinery, chemical & petrochemical, fertilizer, paper & pulp, sugar, cement, dairy industry, etc.

The Indian capital goods industry has been historically dominated by PSEs in segments like heavy engineering, machine tools and boiler manufacturing while private players are predominant in manufacture of industrial machinery such as cement, sugar, textile and other machinery. In terms of the market share and output concentration, there are a few companies at the top (primarily PSEs), followed by some large private companies and MNCs, and finally a large number of SMEs at the bottom.

Over the years, Indian capital goods manufacturers have improved in terms of technology utilisation and quality control (though it is still lower in comparison to major competing countries). Several players in the industry possess state-of-the art technology and have added significant capacities to increase the plant size at par with global companies. Further, the manufacturers have shifted focus from mere fabrication and are present across the value chain, from design and engineering at the back-end to erection and commissioning at the front end. However, the industry lacks the know-how on process technology, which has made it dependent on Overseas process Licensors.

3. Preparation of Job Card

Once the request is received by us from the customer, a job card is prepared to document the details of the task, job, or project. This job card includes customer-specific information such as their requirements, design preferences, quality specifications, and any special instructions, ensuring that all aspects of the order are clearly outlined and can be accurately executed.

4. Issue of Purchase Order for Raw Material

After the job card is prepared based on the customer's specifications, we then place a purchase order with our supplier, ensuring that the materials and products ordered align with the customer's project requirements. This process ensures that the necessary components are sourced to meet the specific needs outlined in the job card.

5. Receipt of Raw Material from Suppliers

After placing the purchase order, we receive the raw materials from our supplier that are required to manufacture the product. These materials are then further sent to our quality control department for inspection and quality check.

6. Raw Material Inspection

At our company, we have a dedicated **Quality Control (QC) department** that plays a critical role in ensuring that all incoming raw materials meet the required specifications and quality standards. Upon receipt of materials, the QC team thoroughly inspects them for any **defects or discrepancies**. This process includes verifying that the raw materials conform to the **quality, quantity, and technical specifications** outlined in the purchase order or contract.

If the materials do not meet the required standards or specifications, the QC department rejects them. These **non-conforming materials** are then documented and sent back to the supplier for **replacement or refund**. If the raw material received conform to the standard/specification, sent to the manufacturing area for further processing.

7. Design

After inspecting the raw materials received from the supplier, the process begins by conceptualizing the product based on the customer's specific requirements, such as dimensions, material preferences, and functionality. The design team then creates detailed drawings and blueprints, carefully planning the internal layout, shelf configurations, door mechanisms, lighting arrangements, and storage options to ensure the final product meets the customer's expectations.

8. Cutting

Once product design is finalized, raw materials such as steel, stainless steel, or aluminum sheets are shaped using Laser Cutting Machines and CNC Machines for production of the product.

9. Bending

Once the material is cut, the sheet is bent according to the customer's specifications. In the manufacturing of display counters, metal sheets are bent to facilitate fabrication, enhance structural strength, and allow for design versatility. Glass and wood laminates are typically not used for bending.

10. Welding

Once the design, cutting, and bending of the material are completed according to the customer's specifications, the metal sheets are joined through welding to form the structure of the product. In the preparation of display counters, metal sheets or tubes are welded, bent, or pressed into the required shape.

11. Finishing

Once the structure is prepared through designing, cutting, bending, and welding, the next steps involve deburring, polishing, and coating, all are done according to the customer's specifications.

12. Electrical Fitting

Once the Structure is completed and finished, then electrical components like motors, wires, thermostats, lights, control board etc. are installed in the structure.

13. Refrigerator Fitting

After the electrical components are installed, the refrigeration system components, including the compressor, evaporator, condenser, and others, installed in the product to ensure the required temperature for perishable goods is maintained.

14. Glass Fitting

Once the refrigerator and electrical fittings are installed, the glass is molded according to the product design. To secure the glass, a metal and aluminum frame is placed around it, with gaskets and brackets used to fit the frames, ensuring a stable and visually appealing display Elevation Design.

15. Elevation (Designs)

Elevation design in the manufacturing of display counters refers to the vertical layout or appearance of the counter, focusing on how it looks from different viewing angles (usually front and sides) and

how the components are arranged. The elevation design impacts both the functionality and aesthetic appeal of the display counter. This differs customer to customer based on the requirement.

16. Final Quality Check

Once the product is fully completed, it undergoes a final quality check to ensure it meets the required standards of safety, functionality, and aesthetic appeal. This final inspection involves evaluating various aspects of the display counter, from structural integrity to finish, ensuring that the product performs well in its intended environment and is free of defects.

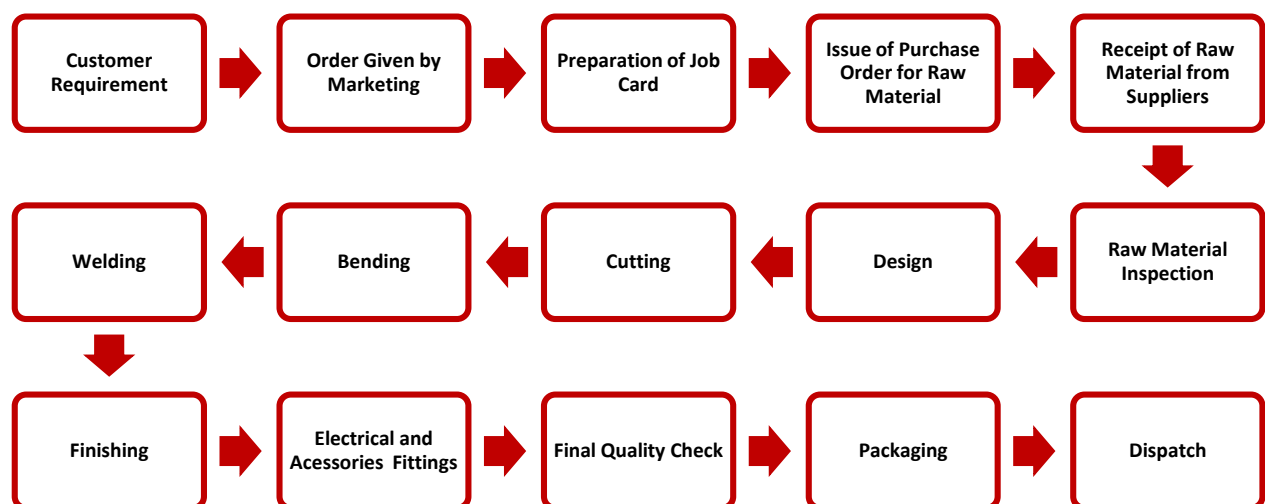

17. Packaging

Once the product passes the final quality check, it is packaged with protective materials such as bubble wrap, foam sheets, cardboard boxes, wooden crates, corner protectors, and stretch wrap to prevent damage during shipping

18. Dispatch

Once the Product is properly packed, and documented, it is shipped to the customer.

Then CNC machines are used to precisely cut insulation panels into shapes that fit the interior of the refrigerator.

9. Bending

Once the material is cut, the sheet is bent according to the customer's specifications. In the manufacturing of Refrigerator, Press Brake bending is used for creating the bends in the outer casing and doors of the refrigerator.

10. Assembly and Integration

Once all the Cutting and Bending are completed, then all separate part of the products are assembled and Integrated. It typically involves mounting the compressor, evaporator, coils electrical components and refrigerant lines.

11. PUFF Foaming

Once assembling of the part are completed then PUFF Foaming should be done and it is most important part of the process for the manufacturing of Refrigerator. This foaming process involves injecting a mixture of polyurethane chemicals into the cavities of the refrigerator or freezer, where it expands and solidifies to form a rigid foam. The foam has excellent insulating properties and contributes significantly to the overall performance and energy efficiency of the refrigeration system

12. Electrical Fitting

Once the structure is completed, electrical components such as motors, wires, thermostats, lighting, and control boards are installed to establish the electrical connections. The compressor, condenser fan motor, evaporator fan motor, thermostat, and temperature sensor are also electrified. Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs (and subsequently, all UPI Bidders) through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required

for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.

Phase III: SEBI vide press release bearing number 12/2023 announced approval of proposal for reducing the time period for listing of shares in public issue from existing six working days to three working days and pursuant to SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"), this phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023. In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue will be made under UPI Phase III as notified in the T+3 Notification, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law.

Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the BRLM responsible for post-offer activities will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. The issuers will be required to appoint one of the SCSBs as a sponsor bank(s) to act as conduits between the Stock Exchanges and NPCI in order to facilitate collection of requests and /or payment instructions of the UPI Bidders using the UPI.

- (d) Illustration of the Book Building and Price Discovery Process

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the price band. For instance, assume a price band of Rs. 20 to Rs. 24 per share, issue size of 3,000 equity shares and receipt of five bids from Bidders,

details of which are shown in the table below. The illustrative book given below shows the demand for the equity shares of the issuer at various prices and is collated from bids received from various bidders.

Bid Quantity	Bid Amount (in Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to offer the desired number of equity shares is the price at which the book cuts off, i.e., Rs. 22 in the above example. The issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such cut-off price, i.e., at or below Rs. 22. All bids at or above this Issue Price and cut-off bids are valid bids and are considered for allocation in the respective categories.

The below outline summarizes the steps followed from the receipt of applications to the final allotment:

Allotment Process Methodology

1. Post-Approval of Basis of Allotment from the Exchange

Once the basis of allotment is approved by the stock exchange, the following steps are initiated:

- **Random Allocation:** The basis of allotment is based on a reverse application number to ensure a random lottery system, eliminating any discretion in the allotment process.
- **Sharing of Lucky Numbers:** The Exchange provides the lucky numbers based on the ratio determined for each investor category.

2. Reversal of Application Numbers

- **Reversal Process:** For each valid application, the application number is reversed. For example, an application number of 12345678 becomes 87654321 after reversal.
- **Arrangement:** All reversed application numbers are arranged in ascending order for each investor category.

3. Segregation into Buckets

- **Bucket Creation:** If the ratio for allotment is determined to be 2:5, the applications are segregated into buckets of five. This allows for a structured allocation approach.
- **Selection of Lucky Numbers:** The Exchange assigns lucky numbers (e.g., 3 and 4) to determine which applications will receive shares from each bucket.

4. Allotment Determination

- Allocating Shares: For every bucket of applications:

Applications numbered 3 and 4 in each bucket will be selected for allotment.

This process is repeated for all categories that require allotment via the lottery system.

Note on Allotment Process

1. Receipt & Validation of Bid Data

- Data Download: Bid data is downloaded from the stock exchanges through SFTP (Secure File Transfer Protocol).
- Validation Checks: The data is validated against depository records to check for:
 - Invalid demat accounts

Invalid client status

PAN mismatch records

- Error Marking: Any errors identified are marked with the corresponding rejection criteria.

2. Collection of Final Certificates (FCs) and Schedule Data

- Follow-Up: The RTA follows up with Self-Certified Syndicate Banks (SCSBs) to collect Final Certificates confirming:
 - the total amount blocked.
 - the number of applications.

- Reconciliation Process:

A reconciliation is performed between bid data and bank schedule data. Applications without funds blocked are removed from the master list.

Post-reconciliation, a valid dataset of applications is prepared for the allotment process.

3. Technical Rejection Process

- Identification of Valid Applications: The technical rejection process as per the terms outlined in the letter of offer is executed, which identifies valid applications eligible for the basis of allotment.

4. Basis of Allotment

- Category-wise Allocation: The basis of allotment is prepared for different categories:
 - Market Makers, Eligible Employees
 - Retail Individual Investors (RII) (applications under ₹2 lakhs)
 - High Net worth Individual Investors (HNI) (applications over ₹2 lakhs)
- Tagging Applications: Applications are tagged according to the above categories for allotment processing.
- Allocable Shares Calculation: Allocable shares for each category are determined as per the RHP and in proportion to subscriptions among each category.

Assuming the following:

- Lot Size: 1,000 shares
- Allocable Shares as per RHP: 75,000 shares

Allotment Process

1. Submission to Stock Exchange: The basis of allotment is submitted to the stock exchange for approval.
2. Draw of Lucky Numbers: The exchange assigns lucky numbers to each application category.
3. Application Number Reversal: Valid application numbers are reversed and sorted in ascending order.
4. Allocation Process: Based on the lucky numbers and the sorted application numbers, allotment is determined according to the previously defined ratio. For example, in the first category of 1000 lot, the 30 application numbers will be reversed and arranged in ascending order. They will be assigned numbers from 1 to 3 repeatedly in loop. If the lucky numbers chosen by stock exchange is 1 & 3 for this category, then those applications which were assigned with numbers 1 & 3 will be allottee applications and the applications assigned with number 2 will be non-allottee application.
5. Final Confirmation: Successful applicants are notified, and shares are credited to their demat accounts. Refunds for unsuccessful applications are processed accordingly.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.

Any equity holding by a person resident outside India resulting from conversion of any debt instrument under any arrangement shall be reckoned as foreign investment under the composite cap.
