INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. In past, Enforcement directorate had issued search and seizure memo to our company and Company's Promoters, for assisting the investigation authority in investigations under Prevention of Money laundering act related matter in which Company and promoter are defendant.***

An investigation under the Prevention of Money-laundering Act, 2002 (PMLA) was initiated following the registration of FIR No. RC2312023S0002, dated 04.07.2023, by the CBI, IOD, Delhi, against Mr. Prafful Gupta and others for fraud. Based on the said FIR, a case under PMLA, 2002, bearing case No. ECIR/DLZ0-1150/2023, was registered on 04.12.2023 against Mr. Prafful Gupta and others. The company is Defendant No. 5 in this matter. We have filed detailed reply on 15.08.2024, asserting that it has not committed any scheduled offence nor the offence of money laundering, as alleged or otherwise and has further contended that the seizures made are not involved in money laundering and are not required for adjudication under Section 8 of PMLA. The matter is currently pending.

We may be subject to legal action by the investigating authority in the same or other similar matters in future. We cannot assure you that these legal proceedings will be decided in favour of our Company, Promoter, and Directors, as the case may be, or that no further liability will arise out of these proceedings. Further, there is no assurance that legal proceedings will not be initiated against our Company, its directors, Promoters in future. For details kindly refer the chapter titled "Outstanding Litigation and Material Developments" beginning on page no. 278 of this Draft Red Herring Prospectus.

- 2. We have filed compounding application for offences in relation to non-compliance with certain corporate law-related requirement.***

Company has done the consolidated of Equity Shares in the Financial Year 2021-22, for which company haven't file the E-form SH-7 with the ROC for intimating of Consolidation of Shares. However, Company had filed the compounding application before the National Company law tribunal dated August 24, 2024 for, inter-alia, failure to comply with the requirements of the Companies Act, 2013, in relation to

- E-form SH-7 was not filed for the consolidation of share capital,
- In Fiscal Year 2022 face value of shares was incorrectly mentioned in annual return in Form MGT-07 at Rs. 1000 instead of Rs 10 due to a typographical error and also did not capture the date of increase in authorized share capital.
- Further in 2022 incorrect demarcation was mentioned in documents attached in Form SH-7, filed for subdivision of share capital of the Company

We cannot assure you that we will be able to comply with relevant regulatory requirements, including with respect to making corporate filing, in the future within the prescribed timeframe, or at all. We also cannot assure you that that no penal action will be taken against us by the relevant regulators with respect to such non-compliance. Our company had filed certain forms with delayed fees with ROC. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent. We would like to inform you that these are the certain forms with the company has filed with delayed fees with ROC:

- MGT-14 for issue of sweat equity shares
- MGT-14 for Private Placement
- PAS-3 for Private Placement
- PAS-3 for issue of sweat equity shares
- GNL-2 for Private Placement
- MGT-14 for Appointment of MD
- MGT-14 for Allotment of securities

4. *A significant portion of our revenue is in the form of the commission and fees charged for the services provided. Currently our revenue is generated by our retailer/agents who are located in PAN India. Any material impact on the revenue from these agents will impact our business, prospects, financial condition and results of operations significantly. The loss of any one or more of our major agent would have a material adverse effect on our business, cash flows, results of operations and financial condition.*

Even though we generate our revenue from whole of India a majority of our revenue is generated from specific states. Additionally, the majority of revenue is in the form of fees and commissions charged from the end consumer on transactional basis. Due to this concentration of our revenue and dependence on agents, a number of factors could cause material fluctuations or decline in our revenue, and could reduce our operating margins, as a result of which there could be a material adverse impact on our business, prospects, financial condition and results of operations.

These factors could inter alia, include:

- decrease in the number of new customers and agents;
- loss of market share;
- decline in volume of transactions;
- adverse publicity and loss of reputation;
- regulatory changes;
- changes in technological and power infrastructure;
- decrease in profitability;
- increase in competition;
- liabilities on account of cyber fraud/ cybercrime; and / or loss due to natural calamities.

A substantial portion of our revenue has been dependent upon major retailers. A break up of the revenue earned by our Company from the top ten Agents during the period ended June 30, 2024 and Financial Years ended March 31, 2024, March 31, 2023 and March 31, 2022:

5. *A few of our properties including Registered Office of our Company, are not owned by us. In the event, we are unable to renew the lease/rent agreements, or if such agreements are terminated, we may suffer a disruption in our operations.*

Some of our business premises which include Registered Office of our Company, are taken on lease of varying tenures. These leases are renewable on mutually agreed terms. Upon termination of the lease, we are required to return the said business premises to the Lessor/Licensor, unless renewed. There can be no assurance that the term of the agreements will be renewed and in the event the Lessor/Licensor terminates or does not renew the agreements on commercially acceptable terms, or at all, and we are required to vacate our offices, we may be required to identify alternative premises and enter into fresh lease or leave and license agreement. Such a situation could result in loss of business, time overruns and may adversely affect our operations and profitability. 6. *There have been instances of delay in filing of GST returns of the Company. We may be subject to regulatory actions and penalties for any such delays and our business, financial condition and reputation may be adversely affected*

We have made delay in certain payment and filing of GST Returns in past years due to some reasons beyond the control of management of the Company. Any demand or penalty imposed by the concerned authority in future for late payments or non-payments, both for any previous year and current year, will have an impact on the financial position of the Company For instance, our company has previously experienced delayed filing of GST Returns due to shortage of funds and operational reasons, leading to the payment of late fees and penalties. Any demands or penalties raised by the concerned GST authority for such late filings may affect the company's financial position.

7. *We are significantly dependent on our agreements with service providers, Airtel Payments Bank, Paytm, Cashfree, Razorpay & PayU, and any breach or termination of the agreement or services could adversely affect our business and results of operations.*

In order to provide uninterrupted services, we have entered into agreements with various market players and these agreements assist our agents in rendering our services. Any material changes in the agreement with any of our service providers such as termination or breach of agreement may affect provision of our services. Apart from our reliance on service providers for their assistance in our services, we are also significantly dependent on their policies for setting our strategic direction and managing our business affairs. Accordingly, if these service providers are unable, or unwilling to be associated with us, our business and prospects could be severely impaired, and it would be difficult for us to find a suitable replacement. This could have an adverse impact on our future performance and results of operations. For details, please refer to the chapter titled “*Our History and certain other corporate matters*” on page 174 of this Draft Red Herring Prospectus.

Additionally, our merchant partners are subject to certain regulations by various government authorities, including the RBI. Introduction of new laws or regulations by the RBI in respect of our arrangement with our banking partners, if promulgated, could adversely affect our business, financial condition and results of operations. Compliance with new regulations governing our banking partners could also result in significant expenditure for them that could cause them to renegotiate or terminate existing agreements, or curtail their operations, which could adversely affect our business and financial performance. Furthermore, any adverse regulatory action that changes a banking partner’s business or adversely affects its financial condition or results of operations, may adversely affect our partnership with such banking partner thereby adversely affecting our business, financial condition and results of operations.

8. *We require working capital for our smooth day-to-day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.*

Our business operations are heavily dependent on the adequate and timely availability of working capital. Over the last three fiscal years, we have observed fluctuations in our working capital requirements due to variations in our operational scale, procurement cycles, and market conditions. Any discontinuance, delay, or inability to secure sufficient working capital, whether due to inadequate cash flows, delays in disbursement of arranged funds, or unfavorable borrowing terms, could adversely impact our ability to meet day-to-day operational needs. This, in turn, may hinder our operational efficiency, profitability, and growth prospects.

To date, we have successfully met our working capital requirements through internal accruals and unsecured loans from directors. As we plan to expand our business operations, the demand for working capital is expected to increase correspondingly. If we fail to maintain adequate cash flow, secure necessary

credit facilities, or arrange for other sources of funding in a timely and favorable manner, our financial condition and operational results may be negatively impacted.

For more detailed information regarding our working capital requirements, please refer to the chapter titled “Objects of the Issue” beginning on page no. 103 of this Draft Red Herring Prospectus.

9. *Non-Maintenance of balance by our agents in their virtual account may affect our cash flows, which may, in turn affect our financial condition and results of operations.*

Our agents maintain a virtual account with our company and they themselves are mandated to maintain the pre-requisite balance for the transactions to be completed. We are dependent on the amount so deposited by the agent in the account. If agents do not maintain the amount then transactions cannot be performed which may lead to low revenue generation or higher burden on the cash flows, this could in turn, materially and adversely affect our financial condition and results of operations.

10. *We are a company with limited operating history, and therefore investors may not be able to assess our prospects on the basis of historical results.*

Our Company was originally incorporated as “Ikeda Private Limited”, a private limited company under the Companies Act, 2013, pursuant to a certificate of incorporation dated September 02, 2019. As we do not have significant operating and financial history, it may be difficult to evaluate our current or future prospects on the basis of historical results and performance. To ensure continuous growth, we must improve our technical and managerial teams and also ensure continuous implementation and updated of information technology management systems. There can be no assurance that we will not suffer from operational or managerial risks in effective implementation and updation of such systems in our company. Past performance of our Company should not be construed as an indication of our future performance. For details regarding business and financial Information, please refer chapter titled “*Our Business*” and “*Restated Financial Statements*” on page 138 and 210 respectively of this Draft Red Herring Prospectus.

11. *Our agents are not the exclusive agents of our company, therefore the revenue generated by them may not be the revenue generated from our services, which may lead to the decline in transactions and can materially impact our financials and business.*

Although, we appoint the agents by agreement but there is no non-competence agreement or arrangement with our agents in providing services to the customer. Therefore, our agent may shift or use the services of our competitor in rendering the similar services to the consumer. Further, we do not have any control over the working of the agent and the revenue generated by them. Any better incentive or commission offered by our competitor to our agent may cause the agent to do transactions on their platform which may result materially on our revenue.

12. *The confidential information or data of our clients, customers and users of our services may be misappropriated by our merchants or employees and as a result, cause us to breach our contractual obligations in relation to such confidential information.*

We store confidential information and data of our clients, customers and the users of our services. We cannot assure you that the steps taken by us to protect such data will adequately prevent the disclosure of confidential information by our merchants or an employee and we may not have internal controls and processes to ensure that our merchants or employees do not misappropriate or unlawfully distribute such information. If the confidential information is disclosed by us or is misappropriated by our merchants or employees, our customers or clients may raise claims against us for breach of our contractual obligations.

The successful assertion of any claim may have an adverse effect on our business, financial condition and results of operations.

13. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

We have experienced negative cash flows in the past which have been set out below:

(₹ in Lakhs)

Particulars	June 30, 2024	March 31, 2024	March 31, 2023	March 31, 2022
Net Cash Flow from/ (used in) Operating Activities (A)	461.55	(405.3)	(134.27)	89.57
Net Cash Flow used in Investing Activities (B)	(92.8)	(64.29)	(337.15)	(20.44)
Net Cash Flow used in Financing Activities (C)	(266.93)	881.45	436.99	16.59
Net increase / (Decrease) in Cash & Cash Equivalents (A+B+C)	101.83	411.83	(34.43)	85.71
Cash and cash equivalents at the beginning of the year/period	507.09	95.26	129.69	43.98
Cash and cash equivalents at year/ period end	608.92	507.09	95.26	129.69

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. Such negative cash flows lead to a net decrease in cash and cash equivalents. Any negative cash flow in future could adversely affect our operations and financial conditions and the trading price of our Equity Shares. For further details, please refer “Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 210 and 266 respectively.

14. We face competition from other fintech and rural unorganised banking facilities. If we are unable to compete effectively, our business and results of operations may be materially and adversely affected.

We compete with other fintech of varying sizes with the ability to perform different kinds of services, some or all of which we may or may not be able to offer. Our competitors also include rural and unorganised banking facilities owned or managed by government agencies and trusts, which may be able to obtain financing or make expenditure on more favourable terms than private fintech services such as us. Our ability to compete in a given market is driven significantly by the extent and depth of diagnosis and procedural capabilities of our competitors and the complexities involved. We are constantly required to evaluate and increase our competitive position in the markets we cater to, including meeting industry standards with regards to offering our agents competitive rates for bringing volume of transactions to company. Some of our competitors may be more established and may have greater financial resources, personnel and other resources than us. Existing or new competitors may also price their services at a significant discount to ours or offer greater convenience or better services or amenities than we provide. Our competitors may compete with us for agents and other fintech professionals. Fintech will probably not replace traditional banking entirely. Instead, it will likely compel traditional banks to offer features that compete with the best fintech services.

15. We rely extensively on our information technology systems and on our ability to innovate, upgrade and adapt to new technological advances. and any failure, disruption or weakness in such systems, breach of data, or lack of technological upgradation could adversely affect our operations and reputation.

Digital transformation is imperative for fintech companies seeking to stay ahead and remain competitive in an increasingly technology-driven industry. We are extensively dependent on the information technology systems (“IT Systems”) provided by various Payment Aggregators for operating our business. Further, we are dependent on our IT Systems for operating our assisted e-services business and our ability to efficiently and reliably process volume of transactions across various locations and delivery channels, as well as for certain critical functions including financial controls, risk management and transaction processing. Any disruption to our IT Systems or our ability to process our transactions efficiently and reliably, including disruptions to our web applications and digital mobile applications, may adversely affect our operations, reputation and our financial position. In addition, our success depends, in part, on our ability to respond to and keep pace with new technological advances and emerging payments and consumer trends and other financial services industry standards and practices in a cost-effective and timely basis. The development and implementation of such technology, including with respect to new mobile operating systems, entails significant technical and business risks. There can be no assurance that we will successfully implement new technologies or adapt our transaction processing systems to customer requirements or improving market standards. Weakness, disruption, breach or failure in our IT Systems may have significant consequences on our business, financial condition and results of operations, including disabling or malfunctioning of financial, accounting or data processing systems; inability to or a deterioration in servicing our customers on a timely basis or at all. Identify emerging market opportunities, and deliver personalized experiences therefore become key factors for remaining competitive in this market.

16. Our Company, our Subsidiaries, our Promoters and our Directors are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.

Our Company, our Subsidiaries, our Promoters and Directors are party to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and legal forums. 17. We are bound by specific obligations and restrictive covenants outlined in the business agreements we have entered with third parties. Failing to adhere to these obligations and covenants could potentially result in a significant negative impact on our business, prospects, cashflows, and financial condition.

There can be no assurance that litigations involving our Company, our Promoters and our Directors will be decided in favour of our Company, our Promoters and our Directors and consequently it may divert the attention of our management and our Promoters and consume our corporate resources and we may incur significant expenses in such proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against our Company, our Promoters and our Directors, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

Furthermore, we may not be able to quantify all the claims in which we are involved. Failure to successfully defend these or other claims or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subjected to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure that similar proceedings will not be initiated in the future. This could adversely affect our business, cash flows, financial condition, and results of operation. For further details, pertaining to material outstanding litigations involving our Company, our Promoters and our Directors, see “*Outstanding Litigations and Material Developments*” on page 278

18. We have and will continue to introduce new services and we cannot assure you that such products and services will be profitable now or in the future.

We have and will incur significant costs to expand our range of services and we cannot assure you that such services will be successful, whether due to factors within or outside of our control, such as general economic conditions, a failure to accurately understand customer demand and distribution and market requirements or insufficient focus by management on these new services. As a result, we may not be able to accurately assess and manage all of the opportunities and risks associated with some of these new services, which may lead to an increase in expenses and/or a decrease in revenue. Further, these operations may be accompanied by operating and marketing challenges that may be different from those we have previously encountered.

19. We may not be able to successfully manage the growth of our operations and execute our growth strategies which may have an adverse effect on our business, financial condition, results of operations and future prospects.

As we continue to grow, we must continue to improve our managerial, technical and operational knowledge and allocation of resources, and implement an effective information technology and management system. In order to fund our ongoing operations and future growth, we need to have sufficient internal sources of liquidity or access to additional financing from external sources, including debt or equity. Further, we will be required to manage relationships with a greater number of clients, network partners, lenders and other third parties. We will need to further strengthen our internal control and

compliance functions to ensure that we will be able to comply with our legal and contractual obligations and minimize our operational and compliance risks. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business and operations and training an increasing number of personnel to manage and operate the expanded business. There can be no assurance that we will be able to successfully manage our growth, strategies or that our expansion plans will not adversely affect our existing operations and thereby have an adverse effect on our business, financial condition, results of operations and prospects.

20. *We have not obtained credit ratings and may not be able to access capital to finance our operations and future growth of our business, which could have a material adverse effect on our business, results of operations, financial condition, cash flows, and future prospects.*

The cost and availability of capital, among other factors, depends on our credit rating. We have not received any credit ratings, as of the date of this Draft Red Herring Prospectus. Credit ratings typically reflect, amongst other things, the rating agency's opinion of the financial strength, operating performance, strategic position, and ability to meet obligations of a company. The non-availability of credit ratings may increase borrowing costs and constrain our access to capital and lending markets and, as a result, could adversely affect our business and results of operations. In addition, non-availability of credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement financing arrangements.

21. *We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.*

As on date of this Draft Red Herring Prospectus, we have registered the trademark “**FINKEDA**” and “**FINKEDA**” under different classes, for further details, see “**Government and Other Statutory Approvals**” on page 284. The said trademarks are required to be renewed from time to time. Any failure to renew registration of our registered trademark may affect our right to use such trademark in future. Further, our efforts to protect our intellectual property in India and abroad may not be adequate and any third-party claim on any of our unprotected intellectual property may affect our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered brand name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India and abroad.

22. *The average cost of acquisition of Equity Shares by our Promoter could be lower than the Issue Price*

Our Promoter's average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price. For further details regarding average cost of acquisition of Equity Shares by our Promoter in our Company and build-up of Equity Shares by our Promoter in our Company, please refer to the chapters “Capital Structure” beginning on page 77

23. *Cybersecurity threats continue to increase in frequency and sophistication. A successful cybersecurity attack could interrupt or disrupt our information technology systems or cause the loss of confidential or protected data, which could disrupt our business, force us to incur excessive costs or cause reputational harm.*

We interact with our agents and facilitate them with a one-stop digital online platform for all of our offerings. Accordingly, through the ordinary course of business, we collect, store, process, transfer, and use a wide range of confidential information, including personally identifiable information, for various

purposes, including to follow government regulations and to provide services to our customers and counterparties. The information we collect may be sensitive in nature and subject to a variety of privacy, data protection, cybersecurity, and other laws and regulations. Data Breaches pose a severe threat due to the sensitive nature of financial data. Hackers may exploit weaknesses in security protocols to gain unauthorized access to user information. Phishing attacks and DDoS Attacks also poses significant risk leading to financial losses and reputational damage. Mobile applications are also susceptible to security vulnerabilities due to their widespread usage. Application Programming Interfaces (APIs) are crucial for data sharing and integration in the FinTech ecosystem. However, they introduce vulnerabilities that cybercriminals exploit.

While there have been no instances of cybersecurity breaches in the past years However, our business could be materially and adversely impacted by security breaches of the data and information of agent and customer data and information, either by unauthorized access, theft, destruction, loss of information or misappropriation or release of confidential data. Cybersecurity risks for technology-focused companies have significantly increased in recent years in part because of the proliferation of new technologies, increased digitization of our products and services and the use of the internet and telecommunications technologies to conduct financial transactions and in part due to the increased sophistication and activities of organized crime affiliates, terrorist organizations, hostile foreign governments, disgruntled employees or vendors, activists and other external parties, including those involved in corporate espionage.

Even the most advanced internal control environment may be vulnerable to compromise. Targeted social engineering attacks and “spear phishing” attacks are becoming more sophisticated and are extremely difficult to prevent. Persistent attackers may succeed in penetrating defences given enough resources, time, and motive. The techniques used by cyber criminals change frequently, may not be recognized until launched and may not be recognized until well after a breach has occurred. The risk of a security breach caused by a cyber-attack via a merchant, or by unauthorized merchant access has also increased in recent years. We may also incur significant costs and loss of operational resources in connection with remediating, investigating, mitigating, or eliminating the causes of security breaches, cyberattacks, or similar disruptions after they have occurred, and particularly given the evolving nature of these risks, our incident response, disaster recovery, and business continuity planning may not sufficiently address all of these eventualities.

24. *If we are unable to increase our agent network, we may not be able to generate adequate returns on our capital expenditure.*

We have invested and continue to invest a significant amount of capital expenditure in expanding our agent network. Technology is a critical part of onboarding process. However, sometimes technology can seem to cause more problems than it avoids if agents are unaware of the usage of technology of our company or the upgradation process.

If we fail to improve our occupancy rates, but continue to incur significant expenditure in the future, this could materially adversely affect our operating efficiencies and our profitability.

This can only be remedied by effective training modules and timely updations in these modules to the agents. Although our company provide training modules to the agents for usage of systems and for timely information to the Company about any lack in software or hardware or antivirus or malware attacks, we cannot ensure that all agents will find it convenient to understand the frequent updates in the usage of systems and therefore there may be difficulties to expand the existing agent networks since the already expanded network needs continuous updation and trainings.

25. *Stringent and changing laws and regulations relating to privacy and data protection could result in claims, harm our results of operations, financial condition, and prospects, or otherwise harm our business.*

We are subject to a numerous laws, rules, directives, and regulations, as well as contractual obligations, relating to the processing privacy and the collection, storing, sharing, use, disclosure, and protection of certain types of data, including personal information.

As part of our operations, we are required to comply with the Information Technology Act, 2000 and the rules thereof, which provides for civil and criminal liability including compensation to persons affected, penalties and imprisonment for various cyber related offenses, including unauthorized disclosure of confidential information and failure to protect sensitive personal data. India has already implemented certain privacy laws, including the Information Technology (Reasonable Security Practices and Procedures and or Information) Rules, 2011, which impose limitations and restrictions on the collection, use, disclosure and transfer of personal information.

Our failure to adhere to or successfully implement processes in response to changing regulatory requirements in this area could result in legal liability or impairment to our reputation in the marketplace, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Compliance with data protection laws (including those regarding security breach notification) affecting personal information to which we are subject could result in higher compliance and technology costs and could restrict our ability to provide certain products and services (such as products or services that involve us sharing personal information with third parties or storing personal information), which could materially and adversely affect our financial position and could reduce income from certain business initiatives.

Complying with privacy and data protection laws and regulations may cause us to incur substantial operational costs or require us to change our business or privacy and security practices. We may not be successful in our efforts to achieve compliance either due to internal or external factors, such as resource allocation limitations or a lack of cooperation from third parties. Although we have not received complaints or notifications from third parties, alleging that we have violated applicable privacy and data protection laws and regulations, we cannot assure you that this will not occur in the future.

Non-compliance could result in proceedings against us by governmental entities, customers, or others. We may also experience difficulty retaining or obtaining new customers in these jurisdictions due to the legal requirements, compliance cost, potential risk exposure, and uncertainty for these entities.

26. *Any downtime for maintenance and repair of our Mobile App, Website, Software, Hardware and technologies could lead to business interruptions that could be expensive and harmful to our reputation and to our business.*

Our hardware and software systems require constant maintenance. Mobile application maintenance refers to optimizing the existing features, functionalities, and services, and updating them as per the user's expectations. ISt integrates maintaining the application's compatibility with the changing operating systems and devices. Maintenance work on most equipment can be performed only by the manufacturer or a designated service provider and it involves significant downtime to complete maintenance.

During such times, we may not be able to put the equipment to use for a specific period of time, further if we need to integrate more extensive and advanced features in the app, the upkeep costs will increase. This in turn can lead to adverse effect on our reputation and to our business.

27. *We depend on a number of key personnel and the loss of or our inability to attract or retain such persons with specialized technical know-how could adversely affect our business, results of operations, cash flows and financial condition.*

Our performance depends largely on the efforts and abilities of our key personnel, including our present officers who have specialized technical know-how. The inputs and experience of our senior management and key managerial personnel are valuable for the development of our business and operations strategy. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when skilled personnel terminate their employment with us. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining skilled employees that our business requires. For the period ended June 30, 2024, and financial years 2024, 2023 and 2022, our attrition rate was 10%, 422%, 218% and 51%.

The continued operations and growth of our business depends upon our ability to attract and retain personnel who have the necessary and required experience and expertise. We cannot assure that our business will not be adversely affected by the loss of such personnel in the future. A loss of the services of our key personnel could adversely affect our business, results of operations, cash flows and financial condition.

28. *Our Company has unsecured loans with a total outstanding amount of ₹ 74.15 lakhs as of June 30, 2024, that may be recalled by the lenders at any time.*

Our Company has currently availed certain unsecured loans. The total outstanding amount of the unsecured loan as of June 30, 2024, was ₹ 74.15 lakhs. These loans may be recalled by the lenders at any time. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all and this may affect our Company's liquidity. If we are unable to procure such financing, we may not have adequate working capital to maintain the desired inventory level. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations. For further details of these unsecured loans, please refer to Chapter titled "Restated Financial Information" beginning on page 210 this Draft Red Herring Prospectus.

29. *We have not independently verified certain data in this Draft Red Herring Prospectus*

We have not independently verified data from the industry and related data contained in this Draft Red Herring Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled. Therefore, discussions of matters relating to Indian economy or the industry in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, or as the case may be, elsewhere.

30. *Our inability to cater to unanticipated surges or increases in transaction volumes may adversely impact our financial performance.*

Continued rise in transaction volumes may require us to expand our network and technology infrastructure to avoid interruptions and disruptions to our systems and technology. Any unanticipated surges or increases in transaction volumes across any or all of our products may cause disruptions to our systems and technology, reduce the number of completed transactions, increase expenses, and impact the level of customer service, and could adversely impact our reputation and, thus, diminish consumer confidence in our systems, which may result in a material adverse effect on our business, results of operations and financial condition.

Although such kind of interruptions and disruptions have not occurred till date but we cannot assure you that such kind of disruptions will not occur in future.

31. *Our business requires us to obtain and renew certain registrations, licenses, approvals, NoCs and permits in the ordinary course of our business. Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business, financial condition and results of operations.*

We are required to obtain and maintain a number of statutory and regulatory licences, registrations, permits and approvals, generally for carrying out our business. In addition, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek new approvals, licenses, registrations and permits from time to time, as and when required in the ordinary course of our business. Obtaining licences, registrations, permits and approvals or their renewals are time consuming processes and are subject to frequent delays. We have obtained licenses, registrations, permits and approvals from the relevant authorities and are renewing such statutory approvals periodically for our business. There can be no assurance that the relevant authorities will renew or issue any of such permits or approvals in the timeframe anticipated by us or at all.

Any failure to apply for, renew and obtain the required approvals, licenses, registrations or permits in a timely manner, or any suspension or revocation of any of the approvals, licenses, registrations and permits would result in a delay in our business operations which could otherwise adversely affect our financial condition, results of operations and future prospects of the Company. We cannot assure you that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. In addition to the same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business and results of operations. For further details regarding the material approvals, licenses, registrations and permits, please see “Government and other approvals” on page 284 of this Draft Red Herring Prospectus.

32. *We may be subject to unrest, slowdowns and work stoppage by employees, which could affect our reputation, business, financial condition and results of operations.*

FinTech is a technology-intensive sector, and to provide the technological services we employ Engineers, Technicians, other professional and other people for maintaining the servers, technological support to our agents. Furthermore, India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal, and legislation that imposes certain financial obligations on employers upon retrenchment. Presently, none of our employees are unionized. In the event that employees seek to unionize, it may become difficult for us to maintain flexible labour policies and may increase our costs and adversely affect our business. While we have not experienced any major instance of labour unrest, slowdowns or work stoppages that has had a material adverse impact on our operations, results of operations and financial conditions in the last three financial years, there is no assurance such instances will not occur in the future and any disruption in services due to any potential strikes (including those by

the contract labour employed through third-party contractors), may affect our reputation, business, financial condition and results of operations.

33. *Our Promoter, Directors and Key Managerial Personnel may have interest in our Company, other than reimbursement of expenses incurred, remuneration or other benefits received.*

Our Promoter, Directors and Key Managerial Personnel may be deemed to be interested to the extent of the Equity Shares held by them and benefits deriving from their shareholding in our Company. Our Promoters are interested in the transactions entered into between our company and themselves as well as between our company and our group entities. For further details, please refer to the chapters titled “*Our Business*” and “*Our Promoters and Promoter Group*”, beginning on page 128 and 223 respectively and the *Related Party Transactions* of restated financials statements under chapter titled “*Restated Financial Statements*” beginning on page 210 of this Draft Red Herring Prospectus.

34. *We have not identified any alternate source of financing the ‘Objects of the Issue’. If we fail to mobilize resources as per our plans, our growth plans may be affected.*

We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue may delay in the implementation schedule and could adversely affect our growth plans. For further details of object of Issue and schedule of implementation please refer to the chapter titled “*Objects of the Issue*” on page 103 of this Draft Red Herring Prospectus.

35. *The directors of our company don’t have the experience of the listed company and the requirements of being a listed company may strain our resources.*

The Directors of the company don’t have the experience of the listed Company; however, the Promoters have the experience of the fintech Industry. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulator and the public at large that is associated with being a listed company. We will be subject to the equity listing agreement with the Stock Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition.

Further, as a listed company, Directors and the Company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management’s attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

36. *Our Company’s management will have flexibility in utilizing the net proceeds from the issue and the deployment of the net proceeds from the issue is not subject to any monitoring by any independent agency.*

Our Company intends to primarily use the net proceeds towards working capital and for general corporate purposes as mentioned in “*Objects of the Issue*” on page 103 of this Draft Red Herring Prospectus. In terms of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the issue size is not in excess of ₹ 10,000 lakhs. The management of our company will have discretion to use the

net proceeds from the issue, and investors will be relying on the judgment of our Company's management regarding the application of the net proceeds from the issue. Our company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, and other applicable laws as the case may be, any variation in the objects would require a special resolution of the shareholders and our promoters or controlling shareholders will be required to provide an exit opportunity to the shareholders of our company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the issue will need to rely upon our management's judgment with respect to the use of net proceeds. If we are unable to enter into arrangements for utilization of net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the issue and our business and financial results may suffer.

37. *We have entered into and may continue to enter into related party transactions and there can be no assurance that such transactions have been on favourable terms.*

We have entered into certain transactions with related parties may continue to do so in future. While our Company believes that all such transactions have been conducted on arms-length basis and is in compliance with the Companies Act, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our company will enter into related party transactions also in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to "Annexure - Related Party Transactions" of restated financials statements under section titled "Financial Information" on page 210 of this Draft Red Herring Prospectus.

38. *We may not be able to implement our business strategies or sustain and manage our growth*

In recent years, we have experienced significant growth, with revenue from operations of ₹ 4118.58 lakhs, ₹ 5038.8 lakhs, ₹ 2510.61 lakhs and ₹ 10408.07 lakhs for the period ended June 30, 2024 and the financial years 2024, 2023 and 2022, respectively. The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

39. *The objects of the issue have not been appraised by any bank or financial institution. Our funding requirements and proposed deployment of the net proceeds are based on management estimates and may be subject to change based on various factors, some of which are beyond our control. Any variation in the utilization of the net proceeds or in the terms or conditions as disclosed in this Draft Red Herring Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.*

Our funding requirements and deployment of the net proceeds are based on internal management estimates and current market conditions and have not been appraised by any bank or financial institution or other independent agency. It is subject to change in light of changes in external circumstances, costs, other financial condition or business strategies. Furthermore, the deployment of the net proceeds is at our

discretion. We operate in a highly competitive and dynamic industry and may need to revise our estimates from time to time based on changes in external circumstances or costs, or changes in other financial conditions, business or strategy.

In terms of Section 27 of the Companies Act, 2013 and other applicable laws as the case may be, we cannot undertake any variation in the utilization of the Net Proceeds or in the terms of any contract as disclosed in the Draft Red Herring Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances requiring us to undertake variation in the utilization of the Net Proceeds disclosed in the Draft Red Herring Prospectus, we cannot assure that we will be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

40. *We have certain contingent liabilities that may adversely affect our business, financial condition and results of operations.*

Our contingent liabilities that have not been provided for are as set out in the table below :-

(Rs. In Lakhs)

Sr. no.	Particular	Amount as of			
		June 30, 2024	March 31, 2024	March 31, 2023	March 31, 2022
1.	Claims arising from disputes not acknowledged as debts - indirect taxes	28.14	28.14	28.14	28.14
2.	Claims arising from disputes not acknowledged as debts - direct taxes	54.36	54.36	54.36	54.36

if a significant portion of these liabilities materialise, it could have an adverse effect on our business, financial condition and results of operations. See "Financial Statements "Annexure V, Note-K, Statement of Contingent liabilities," on page 260 of this Draft Red herring Prospectus.

41. *The requirements of being a listed company may strain our resources.*

We are not a listed company. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the equity listing agreement with the Stock Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management's attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire

additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

42. *We will not receive any proceeds from the Offer for Sale. The Selling Shareholder will receive the entire proceeds from the Offer for Sale*

The Offer includes a Fresh Issue and an Offer for Sale of Equity Shares by the Selling Shareholder. While our Company will receive the entire proceeds from the Fresh Issue, the entire proceeds from the Offer for Sale will only be paid to the Selling Shareholder and we will not receive any such proceeds. For further details, see “The Issue” and “Objects of the Issue” on pages 55 and 103 of this Draft Red Herring Prospectus.

43. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

Our future ability to pay dividends will depend on our earnings, financial condition and capital requirements of our company. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

44. *The Equity Shares have never been publicly traded, and, after the issue, the equity shares may experience price and volume fluctuations, and an active trading market for the equity shares may not develop. Further, the price of the equity shares may be volatile, and you may be unable to resell the equity shares at or above the issue price, or at all.*

Prior to the issue, there has been no public market for the equity shares, and an active trading market on the stock exchange may not develop or be sustained after the issue. Listing and quotation does not guarantee that a market for the equity shares will develop. The issue price of the equity shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the equity shares at the time of commencement of trading of the equity shares or at any time thereafter. The market price of the equity shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

45. *The trading volume and market price of the equity shares may be volatile following the issue.*

The market price of the equity shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- half yearly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts’ recommendations;

- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties / governmental entities of significant claims/ proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

46. *There are restrictions on daily, weekly, monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

47. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “*Financial Indebtedness*” on page 263 of this Draft Red Herring Prospectus.

External Risk Factors

48. *Any adverse revision to India's debt rating by a domestic or international rating agency could adversely affect our business.*

India's sovereign debt rating could be adversely affected due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

49. *Challenges that affect the fintech industry will have an effect on our operations.*

As a provider of fintech services, we are impacted by challenges that affect the industry in general. These include general economic conditions and outlook, improvements in technologies, increase in operating costs, government regulation and policy and importantly, our competitive position in the market in general. These factors will impact us and our business on an ongoing basis. We will be constrained to respond to changes adequately to remain profitable, including bringing about changes to operations, cutting down on costs, and reassessing growth plans and strategies. Fintech business area is in transition and we have now not absolutely embraced digital solutions for our economic needs, credibility issue for fintech companies also remains an issue. We are unable to predict these challenges and cannot assure you that we will continue to maintain our current levels of financial performance.

50. *Our Company has obtained insurance coverage which may not adequately cover all potential losses to which we may be subject to, and this may have a material adverse effect on our business, result of operations and financial conditions.*

Our insurance coverage may not adequately protect us and this may have a material adverse effect on our business. There can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time. Accordingly, to the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our results of operations or cash flows may be affected. There is a risk that our insurance policies may not be sufficient in covering all losses in which we or any third parties may suffer. If we suffer in an event for which we are not adequately insured, there is a risk that it could have a material adverse effect on our business, results of operations and financial condition.

In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected.

51. *Compliance with applicable health, safety, environmental and other governmental regulations may be costly and adversely affect our results of operations.*

Regulations applicable to fintech businesses in India are complex and evolving. Possible restrictions or prohibitions on a fintech company may depend on the regulations that apply to the business being undertaken by that entity. Compliance with applicable health, safety, environmental and other governmental regulations is time consuming, costly and requires a number of dedicated personnel. We are subjected to payment of fees and levies on an ongoing basis with respect to a number of licences, approvals, consents and permissions we are required to obtain from governmental authorities. We are required to periodically maintain a number of records and registers and file a number of returns. Ensuring

compliance requires that we hire trained personnel across our locations. Our compliance costs may adversely affect our revenue.

52. *QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within six working days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

53. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military unrest, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding economic stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

54. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholder's rights may differ from those that would apply to a company in another jurisdiction. Shareholder's rights including in relation to class actions, under Indian law may not be as extensive as shareholder's rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

55. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding ₹ 1 lakh, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a

recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The Finance Act, 2020, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows.

56. *Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the issue.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchange. The Allotment of Equity Shares in the issue and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately five working days from the Bid/ Issue Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchange is expected to commence within six working days of the Bid/ issue Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchange. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

57. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions specified by the RBI, then the prior approval of RBI will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further details, please refer to section titled “*Restrictions on Foreign Ownership of Indian Securities*” beginning on page 363. of this Draft Red Herring Prospectus.

58. *Any sale of Equity Shares by our Promoters or future issuance of Equity Shares, or convertible securities or other equity-linked securities by us may dilute your shareholding and adversely affect the trading price of the Equity Shares.*

We may be required to finance our growth through future equity offerings. Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in our Company. Any sale of the Equity Shares by our Promoters or future equity issuances by us may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of the Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of the Equity Shares.

We cannot assure you that we will not issue additional Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

- Check eligibility for making a Bid (see section titled “**Issue Procedure**” on page 318 of this Draft Red

- Herring Prospectus);

Any time mentioned in this Draft Red Herring Prospectus is IST. Bidders are cautioned that, in the event a large number of Bid Cum Application Forms are received on the Bid/Issue Closing Date, as is typically experienced in public Issue, some Bid Cum Application Forms may not get uploaded due to the lack of sufficient time. Such Bid Cum Application Forms that cannot be uploaded will not be considered for allocation under this Issue. Applications will be accepted only on Working Days, i.e., Monday to Friday (excluding any public holidays). Neither our Company nor the BRLM is liable for any failure in uploading the Bid Cum Application Forms due to faults in any software/hardware system or otherwise.

In accordance with SEBI ICDR Regulations, QIBs and Non-Institutional Applicants are not allowed to withdraw or lower the size of their application (in terms of the quantity of the Equity Shares or the Application amount) at any stage. Retail Individual Applicants can revise or withdraw their Bid Cum Application Forms prior to the Bid/ Issue Closing Date. Rationale for Increase in working capital gap from financial year 2023-24 to financial year 2024-25:

The Company's business is in Fintech sector that helps to revolutionize payment systems and transaction processing. We specialize and operate in last mile consumers which are often deprived of basic financial services.

Company have tie-ups with multiple Nationalized Private and Public Sector Banks as business correspondents, and for providing Kiosk Banking services, Micro ATM, Direct Money transfer (DMT), Aadhar enabled payment system (Aeps), Utility Payments delinquent loans collection services, EMI collection services and we also provide utilities payment and travel bookings across India. For EMI Collection apart from tie ups with banks we are having additional tie ups with Non-Banking Financial Company and Micro Finance Institutions as well. Over the years, it believe that company have pioneered in providing modern financial technology solutions in the B2B and B2B2C financial technology arena through an integrated business model via online portal and digital application.

In the past, Company has funded a majority of working capital requirements through internal accruals and financing from banks. Company’s estimated increased working capital requirement is on account of the following factors.

In order to carry out various business services, our network partners are required to maintain deposits with us to pre-fund their e-ledgers accounts. This is reflected under portal balance of network partners under the head sundry creditors in our books of accounts. This amount is repayable on demand.

As a prudent business practice, Company should maintain equivalent cash and cash equivalents against outstanding portal balance at any point of time.

The Company plans to maintain adequate cash and cash equivalents against the portal balance of network partners to meet any unforeseen demand of the network partners. This will lead to increased working capital requirement.

The Company expects its business to grow rapidly through deployment of Micro ATMs and expansion of network partners’ network due to which it foresees increased requirement of working capital to fund business advances to its network partners.

Like most businesses, Company needs to focus on this evolving landscape and build on it to improve their service offerings across a broader spectrum.

The Company’s working capital has increased from ₹1411.05 lakhs for the Financial Year ended 2024 to Rs. 6,342.16 lakhs for the Financial Year ended 2025. This was mainly on account of increase in cash and cash equivalents amounting to Rs. 5198.13/- The Company proposes to utilise 1921.27 Lakhs from the Net Proceeds to fund the working capital requirements in financial year 2024-25 and the balance of Rs. 3009.84 lakhs will be funded through Internal accruals/Net worth.

On the other hand, the Company will need to maintain shorter credit period from its suppliers to source the materials at better prices. This will lead to decrease in trade payable days from 40 days in financial year 2023-24 to 16 days in FY 2024-25. All these factors in totality will lead to increase in working capital requirement from financial year 2023-24 to financial year 2024-25.

Basis Of Estimation of Working Capital Requirement

The table below sets forth the details of holding levels (in days) for FY2021-22, FY2022-23, FY2023-24, as well as projections for FY 2024-25 and FY 2025-26:

(in days)

Particulars	2021-22	2022-23	2023-24	2024-25	2025-26
No. of Days for Trade Payables	2	17	1	1	1
No. of Days for Trade Receivables	8	12	40	16	5
No. of Days for Inventories	N.A.	N.A.	83	92	85

Justification

Trade Payable Days	Combination of lesser credit terms and increased business volume to product suppliers will help us to get better price from them. This would enable us to offer competitive price to our customers. The Trade payables in financial year 2023-24 was average 40 days and expecting to keep payables as low as 16 days by financial year 2024-25 & 5 days by 2025-26 to negotiate better rates with the supplier. Company expects ease in working Capital funding problems, better deals in negotiations. With improved cash flow, the Company can settle our trade payables more promptly.
Trade Receivable Days	Trade receivable holding periods depends on lots of factor like prevailing market condition, customers demand, our thrust to capture market etc. Going forward, the Company are estimating to maintain the same level of Debtor holding periods. As per our affordability to increase the top line as well to retain present & future customers as per the demand and market practice.
Inventory	The Company has inventory days of around 83 days in financial year 2023-24. From financial year 2024-25 the Company has estimated Inventory to be the same level around 92 days as per the prevailing market condition. In monetary terms company's inventory is of negligible value as per the volume of transactions and revenue from operations.
Short term loans and advances	This includes mostly advance to suppliers/employees etc., the Company does not foresee any major change and expected to get proportionally increased due to increase in operations and turnover.
Other Current Liabilities	Other current liabilities include advance from customers, provisions, statutory dues, expenses payable, etc. However, going forward, the Company does not foresee any major change and expected to get proportionally increased due to increase in operations and turnover
Cash and Cash Equivalents	In order to carry out various business services, our network partners are required to maintain deposits with us to pre-fund their e-ledgers accounts. This is reflected under portal balance of network partners under the head sundry creditors in our books of accounts. This amount is repayable on demand. Our Company plans to maintain adequate cash and cash equivalents against our portal balance of network partners to meet any unforeseen demand of the network partners. This will lead to increased working capital requirement.

OVERVIEW

About Indian Economy Growth Rate & Statistics

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 295.36 lakh crores (US\$ 3.54 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-June 2025, India's exports stood at US\$ 109.11 billion, with Engineering Goods (25.35%), Petroleum Products (18.33%) and electronic goods (7.73%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- As of July 5, 2024, India's foreign exchange reserves stood at US\$ 657.15 billion.
- In May 2024, India saw a total of US\$ 6.9 billion in PE-VC investments.
- Merchandise exports in June 2024 stood at US\$ 35.20 billion, with total merchandise exports of US\$ 109.96 billion during the period of April 2024 to June 2024.
- India was also named as the 48th most innovative country among the top 50 countries, securing 40th position out of 132 economies in the Global Innovation Index 2023. India rose from 81st position in 2015 to 40th position in 2023. India ranks 3rd position in the global number of scientific publications.
- In June 2024, the gross Goods and Services Tax (GST) stood at highest monthly revenue collection at Rs. 1.74 lakh crore (US\$ 20.83 billion) vs Rs. 1.73 lakh crore (US\$ 20.71 billion)
- Between April 2000–March 2024, cumulative FDI equity inflows to India stood at US\$ 97 billion.
- In May 2024, the overall IIP (Index of Industrial Production) stood at 154.2. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 136.5, 149.7 and 229.3, respectively, in May 2024.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 5.08% (Provisional) for June 2024.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 13.89 billion) in India during January- (up to 15th July) 2024.

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates.

India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23.

The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Financial Sector

India's economic progress, which is largely dependent on the Financial Sector, is not only a key factor of stability in the global economy, but also a source of immense economic opportunity for the world. The far-reaching changes in the Indian economy since liberalization in the early 1990s have had a deep impact on the Indian financial sector. India's financial sector has been one of the fastest growing sectors in the economy.

The economy has witnessed increased private sector activity including an explosion of foreign banks, insurance companies, mutual funds, venture capital and investment institutions. The various steps taken by the government and the regulators since liberalization to meet the challenges of a complex financial architecture have ensured that a new face of the Indian financial sector is emerging to culminate into a strong, transparent and resilient system.

Several new instruments and products have been introduced. Existing sectors have been opened to new private players. The entry of new players has led to existing players upgrading their product offerings and distribution channels. Financial intermediaries too have gradually moved to internationally acceptable norms for income recognition, asset classification, provisioning and capital adequacy. This has given a strong impetus to the development and modernization of the financial sector. Going forward the aim would be to achieve international standards in this area within the shortest possible time frame.

Over the past decade, technological progress and innovation have catapulted the fintech sector from the fringes to the forefront of financial services and the growth has been fast and furious, buoyed by the robust growth of the banking sector, rapid digitization, changing customer preferences, and increasing support of investors and regulators. During this decade, fintechs have profoundly reshaped certain areas of financial services with their innovative, differentiated, and customer-centric value propositions, collaborative business models, and cross-skilled and agile teams.

Fintech-short for financial technology are companies that rely primarily on technology to conduct fundamental functions provided by financial services, affecting how users store, save, borrow, invest, move, pay, and protect money.

They make it not only possible but also easy to move money between accounts, people, countries, and organizations. There's no typical fintech company: fintechs include start-ups, growth companies, banks, nonbank financial institutions, and even cross-sector firms.

FINTECH INDUSTRY-INDIAN PERSPECTIVE

India is hailed as the third largest FinTech economy in the world and is expected to drive \$150 billion by FY 2025. Various factors act as key enablers in making India one of the hotspots for FinTech expansion. India has favorable demography of people below the age of 35 having an appetite for innovative technology in the financial sector. There is a huge availability of capital, government initiatives and regulatory forbearance for the FinTech sector. India has also seen tremendous growth in terms of internet access and mobile access due to advancements in technology.

Over the years, new trends have taken shape in the FinTech sector and new terminologies have been added to our day-to-day vocabulary like Universal Payments Interface, Buy Now Pay Later (BNPL) model, Digital Banking, Neo Banking, Open Banking, and so much more. New-age FinTech companies have started transforming the face of India into a more digitized country through deeper penetration. It is evident

that now tier 2 and tier 3 cities are also becoming attracted to the FinTech revolution, driving the future of financial services in India.

India has emerged as one of the robust FinTech economies in the world with landmark innovations like paperless lending, mobile banking, secure payment gateways, mobile wallets and other concepts that are already shaping a new and digitized India. Here are the main game-changer innovation categories in FinTech that have seen substantial growth over the past few years.

Financial Inclusion

Financial inclusion startups help in building revolutionary, innovative products around FinTech that are affordable, accessible and convenient for underserved customers. The Indian FinTech startups' efforts in this direction have manifested in many ways, like innovative solutions around low-cost technology, strategic partnerships between incumbents and FinTechs, the launch of digital-only banks and much more.

Financial Literacy

From financial education to smarter sales, startups in the financial literacy sector aim to educate users to learn finance by doing. Understanding accounting terminologies, preparing financial statements, cash flow statement preparation and analysis, and ratio comparison are some of the topics where the FinTech startups are proving to be revolutionary.

Insurance

The rise of FinTech startups in the insurance category is working towards changing consumer behaviour and introducing advanced technologies to disrupt the insurance industry. Insure Tech startups have become a major attraction for investors and have received an unprecedented amount of funding leading the wave.

GLOBAL FINTECH MARKET

The global fintech market remains a hotbed of innovation and growth, despite sobering few years in funding and valuation terms. And there is so much more room for growth. With the advent of game-changing technologies such as GenAI and with still billions of unbanked and underbanked individuals worldwide, fintech has vast potential. The evolution of fintech has led to a moment in which prudence—the ability to avoid adding risk to the financial system—will be as important as the ability to generate profitable growth. The prize, and the rewards for customers, will be as significant as ever, but the path to success will be more difficult.

²Average based on market capitalization and LTM revenue for the second quarter of each year.

The last couple of years may have brought the high-flying fintech sector back to earth. However, a streamlined and newly focused set of companies will now emerge, and they and incumbents will confront four major themes:

- **Embedded finance will be a \$320 billion market by 2030.** The small and medium-size business (SMB) segment will account for about half (\$150 billion); the consumer segment already humming with activity and adoption in payments, lending, and insurance will be worth \$120 billion in revenue by 2030; and the enterprise segment will reach \$50 billion in revenue.

Established fintechs will continue to reap the lion's share of the near-term benefits, while larger, more established banks will claim a growing share over time.

- **Connected commerce is poised for liftoff.** Connected commerce is emerging as a long-awaited killer app for banks, creating a new revenue stream, increasing customer loyalty, and enabling banks to offer a marketing channel for their SMB and enterprise customers. Using granular customer data, banks surface hypertailored ads to their customers; merchants then pay the bank based on either attributable sales or traffic. As core revenue streams continue to come under pressure, and as deposits risk becoming commoditized in a higher-yield environment, connected commerce hints at a future model for banks.
- **Open banking will have a modest impact on banking but a greater one on advertising.** Open banking will continue to be relevant but is unlikely to change the basis of competition in consumer banking. In countries where open banking has had significant time to mature, no killer use case has emerged to drive customer switching. Of course, this is not to say that open banking will have no impact.

But revenue pools in the connectivity layer will remain modest, with value accruing to the ultimate use case providers that leverage open banking infrastructure. In advertising, access to transaction-level data will enable more timely and targeted personal offers.

- **GenAI will be a game-changer now for productivity, with product innovation to follow.** GenAI is already delivering tangible productivity gains in financial services. For GenAI in fintech, given that its digital-first cost structures are heavily weighted toward areas where the technology is delivering huge gains coding, customer support, and digital marketing the impact is likely to be even more pronounced in the near term. The use of GenAI in product innovation will lag its uses for productivity but we expect it to follow.

GOVERNMENT INITIATIVES TO BOOST FINTECH ECOSYSTEM

Government has taken several measures to increase investment inflows in Fintech sector. The Pradhan Mantri Jan Dhan Yojana (PMJDY) has been targeted at increasing financial inclusion in India by helping in new bank account enrollment of beneficiaries for direct benefits transfer and accessibility to a host of financial services applications. This has enabled Fintech startups to build technology products to penetrate the large consumer base in India.

Aadhar, the unique biometric identification system, allows the public to access government digital services thereby improving the availability and transparency for social payments including financial assistance to those in need.

Unified Payments Interface is single platform that merges various banking services and features under one umbrella and has been built as a scalable payments platform supporting digital payments in India.

Jan Dhan Yojana, Aadhar and Mobile (JAM trinity) alongwith Unified Payments Interface have been instrumental in bringing in transparency, integrity and timely delivery of financial benefits and services to the public.

Key initiatives undertaken by the Government for the Fintech ecosystem in India are listed below:

a. Jan Dhan Yojana has been targeted at increasing financial inclusion in India by helping in new bank account enrollment of beneficiaries for direct benefits transfer and accessibility to a host of financial services applications. This has enabled Fintech startups to build technology products to penetrate the large consumer base in India

b. India Stack is a societal initiative aimed at building public digital infrastructure to promote public and private digital initiatives including accelerated adoption of technology in finance

c. Aadhar, the unique biometric identification system, has allowed Aadhar Enabled Payment System and Aadhar Payment Bridge System:

- Aadhar Enabled Payment System allows individuals to conduct financial transactions on a Micro-ATM by furnishing their Aadhaar number and verifying it with the help of their fingerprint/iris scan.

- Aadhar Payment Bridge System allows ease in bulk and recurring Government benefits and subsidy payments, facilitating operations from Aadhaar-linked bank accounts, using the biometric authentication

d. Development and roll-out of authentication solutions including digital KYC, video-based customer identification process, and digital signature on documents has created various safeguards and a hassle-free system for Fintech startups and customers to leverage the technology-enabled solutions in the sector

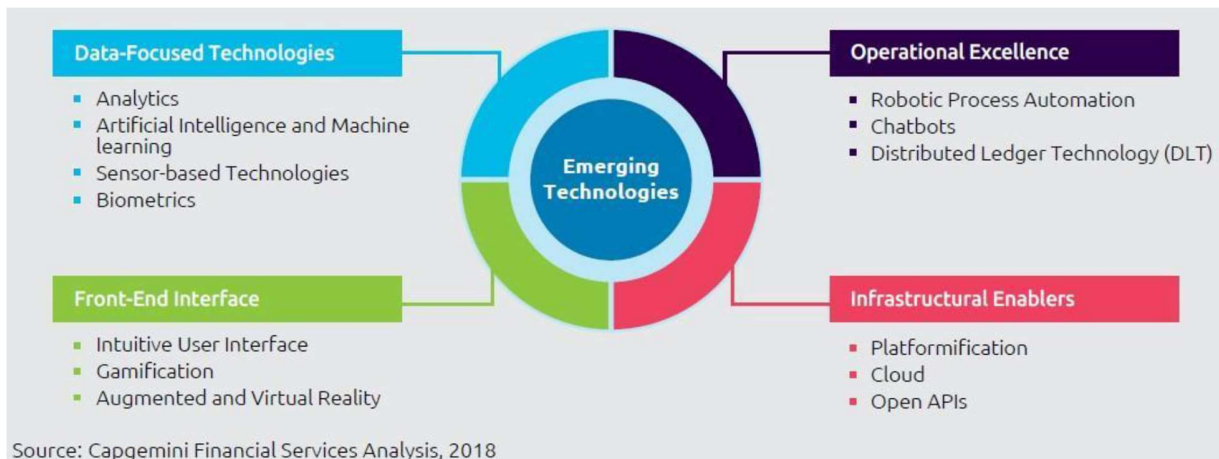

- A central repository, Central KYC, has been developed for reducing the hassle of undergoing multiple KYCs for different financial institutions. This allows the KYC process of consumers to be conducted only once unless there are any changes in consumer details
- KYC and customer onboarding costs have been reduced significantly enabling expansion of financial services to rural India and opening their accounts
- e. Unified Payments Interface has been built as a scalable payments platform supporting digital payments in India
- f. License for Payments Banks has further helped in enhancing the financial inclusion drive in the country by allowing the setting-up of payments banks and expanding the access to payments/remittance services. In a bid to promote digital payments banks in the country, RBI has announced an increase to the maximum end of day balance for payment banks to Rs. 2 lakh
- g. National Automated Clearing House System has been successfully used for making bulk transactions
- h. Bharat Bill Payment System has helped in enhancing consumer convenience to pay bills across utilities and other segments and has been expanded to include all categories of billers who raise recurring bills (except prepaid recharges) as eligible participants, voluntarily
- i. RBI has also developed a Payments Infrastructure Development Fund (PIDF) scheme to subsidise deployment of payment acceptance infrastructure in tier-3 to tier-6 centres
- j. The RBI has created a regulatory framework around Peer-to-Peer (P2P) lending by recognising P2P lenders as Non-Banking Financial Companies (NBFCs), thus providing alternative credit access to the unbanked
- k. IRDAI has undertaken various initiatives towards boosting the insurance penetration, such as permitting insurers to conduct video-based KYC, launching standardized insurance products and allowing insurers to offer rewards for low-risk behaviour.
- l. Government institutions such as the Health ministry and the NITI Aayog are also supporting the transformation in the insurance industry through the National Digital Health Mission (NDHM), the Digital Information Security in Healthcare Act (DISHA) and the National Health Stack.
- m. A world-class Fintech hub has been developed at the International Financial Services Centre (IFSC), GIFT City in Gandhinagar, Gujarat to further strengthen the vision of making India a global Fintech hub.

Technology enablers

At the core of the rapid growth of fintech are new technologies that have revolutionised ways in which financial products and services are created, provided and managed. Some of these technological developments enable creation of entirely new products. Some of the key developments in technology underpinning in fintech are:

(a) Data focused technologies such as analytics, sensor-based technologies, Biometrics, Artificial Intelligence or Machine Learning, etc., provide insights on customers making it relevant through personalized offerings.

(b) Infrastructure-based technology, through platformification and open APIs, is reshaping the future of the financial services industry

(c) Operational excellence aspects of RPA, chatbots, and DLT are enabling greater agility, efficiency and accuracy.

(d) Front-end Interfaces: Design-based thinking and simple-to-follow user-interfaces are making the customer journey quick, convenient, and seamless. Augmented and virtual reality and gamification are helping customers interact with their firms in innovative ways

Encryption and cryptography

Cryptography refers to the writing of codes that allow information to be kept secret. Encryption is the process by which information is made unreadable for unauthorized users using algorithmic tools. Developments in encryption and cryptography have enabled a wide variety of financial services to disrupt existing service delivery methods in recent years.

Cryptography, as an instrument for fintech, has four key benefits for financial firms:

- (a) confidentiality,
- (b) privacy,
- (c) non-repudiation, and
- (d) integrity

Financial services companies are deploying encryption as an industry standard, as well as a best practice. The Payment Card Industry Security Standards (PCSS) for example, require the protection of cardholder payment data be done by encrypting “transmission of cardholder data across open, public networks

Smartphones

The evolution of smartphones has acted as a big catalyst for the fintech industry. Smartphones are now equipped with technologies that enable tokenisation of card details, a measure that can go a long way towards reducing fraud; biometric enabled multi-factor authentication, which can enable ease of access; Near-Field Communication capable readers at merchant stores, which make carrying cash unnecessary.

The quality of smartphones is a major factor in the overall digital payments experience. Payment apps are increasingly relying on technologies like biometric enabled multi-factor authentication (to do away the need of typing password over and over again), barcode scanners and other payment friendly technology to expand their business and making the customer reliant on the application, resulting in an expansion of the mobile payments industry.

Artificial intelligence

Artificial intelligence is the ability of computer systems to process information and outcomes similar to the human thought process i.e. learning, decision-making, and coming up with solutions for specific challenges. Artificial Intelligence (AI) is expected to have a major impact on diverse fields ranging from health services to business analytics and financial services.

IoT, Big data and Predictive analytics

Internet of Things (IoT) has made possible use of sensors connected to the internet to collect personalised data for a variety of uses. For example, insurance companies can affix GPS tagged speed sensors in insured cars to track driving behaviour. Such applications have resulted in explosion of data availability calling for a higher order of computation and storage capacities.

Big data analytics involves processing and analysing large amounts of complex data. The aim of analysis is to find out hidden patterns, correlation between data and other useful insights. With the onset of Big Data and analytics, financial firms have now realised that analysis of data generated during the course of their operations can add significant value. Data analytics is especially critical for fintech companies. Since fintech companies operate almost exclusively on the internet, they generate large volumes of financial information and user data. Fintech companies are increasingly analysing this data to get insights into their operations. Analysis is also used to enable development of new products, increase efficiency and access to consumer.

Big Data combined with analytics have helped with recalculating risk portfolios, analysing customer habits, identifying fraudulent behaviour, determining causes of failures in businesses or processes, its defects and issues, and spotting business trends.

Fintech companies can get insights for immediate decisions. This ability to analyse faster gives fintech companies a competitive edge over traditional financial service providers.

Fintech in MSME sector

MSMEs contribute nearly 8 percent of the country's GDP, 45 percent of the manufacturing output, 40 percent of exports and provide the largest share of employment after agriculture. MSMEs have been underserved or unserved by the traditional financial institutions. Small businesses have limited financial history and might not have detailed documentation of credit history which makes disbursement of loans by banks challenging. Some fintech firms have designated their business models to cater to this unserved section. Based on innovative methods of credit scoring, risk assessment and disbursement, the fintech firms have the potential to meet the needs of start-up SMEs. Peer-to-peer lending and crowd funding have the potential to improve access to finance to small and medium enterprises who are otherwise declined credit from banks due to their risk portfolio.

Agriculture: lending and insurance

A significant portion of the agricultural households rely on non-institutional sources of funding. NSSO reported that for the period July 2012 to June 2013, nearly 52% of the agricultural households in India are indebted.

The survey revealed high levels of dependence on non-institutional channels. Nearly 40% of all loans came from informal sources with 26% advanced by moneylenders. Only 15% of households with marginal land holding get credit from institutional sources such as the government, cooperatives and banks.

In the agricultural sector, fintech companies are primarily working in two areas:

(i) Credit: Fintech firms and technology led NBFCs are playing a crucial role in providing access to finance for small and marginal farmers. The key areas where fintech firms are innovating or bringing efficiencies in the system are:

(a) Customer discovery and onboarding: Fintech firms have pioneered partnership models to discover customers. Fintech firms work with organisations with rural presence such as Farmer Producer Organisations, cooperatives, micro-finance institutions and other aggregators.

(b) Credit underwriting models: Fintech firms are moving away from the collateralised lending model to extending credit based on flow data such as sale of produce, cash flows and history of business dealings. This enables extension of credit to tenant farmers. Fintech firms are also using innovative collection mechanisms such as deduction at source and escrow accounts and leveraging the India Stack (eNach).

(c) Monitoring: Post-sanction monitoring by lenders is further improved by the use of weather data, crop specific advisories and digital imaging of sown crops.

(ii) Insurance: Fintech firms can potentially play a crucial role in increasing the penetration of crop insurance and other forms of rural insurance.

To enable fast and accurate claims settlement, fintech firms are using a combination of satellite imaging and drones for crop monitoring along with weather and yield data sets.

OUR BUSINESS MODEL

Ikeda Limited offers its services through a countrywide network of over 30000 Retailers We have developed an integrated platform accessible via web at <https://finkeda.com/> and through a mobile app. This platform allows onboard agents/retailors and provide them access to pre fund portal through transfer funds to Virtual Accounts given by Finkeda which will directly reflect in their respective wallet. By serving as a mediator between service providers, our agents, and customers, we facilitate seamless transactions. In return, we receive a commission from the service providers, which we then share with our agents based on mutually agreed terms.

All such retailers who are onboarded with the our company undergo a strict Know Your Retailer (“KYC”) procedure.

The KYC procedure is divided into two stages.

Stage 1 entails a physical verification of the retailer sought to be onboarded.

Stage 2 entails a digital verification of all physical details obtained from the Retailer.

The Retailer sought to be onboarded is visited by the Ikeda Sales Team holding jurisdiction in the given area. The system allows KYC to be done in an assisted model wherein the salesperson onboards each new retailer from the new “Finkeda Salesforce App” (Android). Web functionality is provided for retailers to use the services of the company and the same can be accessed at the company’s domain at <http://www.finkeda.com>. The Retailer’s verification is first conducted to ascertain his mobile number as the retailer inputs his User ID and password to sign in to avail services. Thereafter, the Retailers’ Aadhar & PAN data is verified online from the DigiLocker database, bears the “Verified by DigiLocker” logo &

is digitally signed. The system automatically does a penny drop transaction, in the bank account, to match the username in the bank account with the name received from PAN.

Further, it is mandatory for the Ikeda salesperson uploading the KYC data of the prospective retailer to additionally upload his own “live” selfie image along with the live selfie image of the prospective Retailer sought to be onboarded. This is a security measure to ensure there is complete traceability on the Ikeda end of both the retailer and the salesperson tasked with completing the physical verification of the Retailer. Additionally, the KYC team at the Ikeda backend has to mandatorily verify the salesperson’s image with his image stored in the company’s Human Resource (HR) database. In case of any discrepancy, the image is liable to be rejected and the salesperson is disqualified from submitting the KYC data.

➤ ***WEAKNESSES***

I. Navigating complex regulations

Navigating complex RBI regulations can indeed be a significant hurdle for any company, especially in the fintech sector. Adhering to compliance requirements is essential for ensuring that companies operate within legal and regulatory boundaries, avoiding hefty legal penalties and fines. Compliance with financial and data privacy regulations is crucial. Ikeda Limited has invested in legal expertise to ensure it adheres to all relevant laws and guidelines.

II. Trust and Security Concerns

Data breaches in the FinTech industry pose a severe threat due to the sensitive nature of financial data. Weaknesses in security protocol can be exploited to gain unauthorized access to user information, leading to financial fraud, identity theft, and reputational damage. Phishing attacks continue to be a prevalent threat in the FinTech sector, leveraging deceptive tactics to trick individuals into divulging sensitive information

As a digital company, Ikeda Limited has prioritized cybersecurity. Threats like data breaches, phishing attacks, and ransomware can harm both the company and its users. To tackle this weakness implementing robust security measures, regular audits, and employee trainings are crucial. Regularly backing up critical data and implementing robust network segmentation limits the impact of ransomware attacks, furthermore, employing robust email filtering systems and regularly updating security protocols help detect and block phishing attempts.

III. Limited Market Penetration

Despite their rapid growth, fintech companies still face challenges in penetrating traditional markets dominated by established financial institutions, particularly in regions with low digital adoption and infrastructure.

Established brands do have an advantage due to their recognition and trust among consumers. For Ikeda Limited, building brand awareness is essential. This can be achieved through strategic marketing, partnerships, and consistent messaging across channels.

IV. Dependency on Infrastructure

Fintech companies rely heavily on technological infrastructure and partnerships with third-party providers, making them vulnerable to disruptions in services and technical failures.

➤ ***OPPORTUNITIES***

I. Untapped Market

One of the biggest opportunities is tapping into huge markets that traditional banks neglected or could not serve. The opportunity to target underserved markets such as the unbanked and underbanked populations, as well as small and medium-sized enterprises (SMEs) that may not have access to traditional financial services can be a huge opportunity area.

II. Collaboration with Traditional Institutions

Fintech companies can collaborate with traditional financial institutions to leverage their customer base, expertise, and regulatory compliance, creating mutually beneficial partnerships that drive innovation and growth.

These partnerships help drive down the costs of financial services with improved efficiencies, better and faster decision-making with data analytics, and expanded access to banking and financial offerings.

III. Global Expansion

Fintech companies have the potential to expand globally and reach new markets through digital platforms and cross-border partnerships, especially in emerging economies with growing internet penetration and smartphone usage.

Collaborating with foreign entities already involved in creating innovative solutions can prove to be incredibly successful for Fintech organizations. Exploring global expansion is not just beneficial, but almost essential in today's hyper-competitive and globalized world economy.

IV. Diversification of Services

Fintech companies can diversify their offerings beyond core financial services, such as wealth management, insurance, and lending, to capture additional revenue streams and increase customer engagement.

Ikeda Limited, known for its innovative services, plans to introduce a pre-approved eligibility line; this line of credit will be available to eligible customers without the need for extensive documentation.

Ikeda is also in the process of exploring the Insurance products & services and Neo banking services through conducting market research to understand consumer needs and exploring partnerships with banks and other digital platforms for efficient distribution and implementation of strong security protocols to protect customer data.

➤ THREATS

I. Economic and regulatory uncertainty

Economic downturns, geopolitical instability, and regulatory changes can create uncertainty and volatility in the fintech industry, affecting investment decisions, consumer behavior, and market dynamics.

Companies and regulators may have difficulty determining the risks a new technology may create before it is launched. This regulatory uncertainty can negatively affect many stakeholders.

II. Cybersecurity Risks

As Fintech continues to revolutionize the financial industry, it also brings new challenges & risks in terms of cybersecurity. Fintech companies are prime targets for cyber-attacks and data breaches, which can result in financial losses, reputational damage, and regulatory penalties. Technological innovations in the Fintech industry, such as artificial intelligence, blockchain & cloud computing, introduce new vulnerabilities & risks. These technologies may have potential

security flaws or be targeted by sophisticated cyber attacks.

Some common vulnerabilities in fintech system can be payment fraud & unauthorized transactions, where cybercriminals exploit weaknesses in security controls to initiate fraudulent transfers or manipulate transactions. Data Breaches pose a significant threat to Fintech systems, as they can result in the exposure of sensitive customer information, leading to identity theft & financial fraud. Other threat's includes malware attacks and insider threats which can be tackled through regular audits and robust control measures .

III. Disruption from Emerging Technologies

The use of emerging technologies such as blockchain, AI, and machine learning has the potential to transform the banking industry and the world as a whole. However, this disruption also comes with drawbacks such as increased reliance on technology, high costs, and security risks. Remaining updated with emerging technologies and top trends can help tackle this threat and to sustain a competitive position in the market.

COMPETITION

As one of the world's fastest-growing economies, India has certainly emerged as one of the fastest-growing Fintech hotspots as well. Paperless transactions, mobile banking, secure payment gateways, mobile wallets, and other such ideas are already being adopted in India whereas many countries are yet to follow. Over the last two years, there has been a substantial acceptance of digital payment systems in India, making it a lot easier to use and access basic financial services. This rapid expansion of the Fintech ecosystem in India has been supported by many factors, including the rising accessibility of smartphones, better internet access, and even high-speed connectivity.

On the other hand, traditional financial institutions have realised the importance of adopting technology and have begun to see the value of partnering with these FinTechs in a more collective approach. FinTech businesses are conveying advancement that was deemed hard to accomplish.

KEY REGULATIONS AND POLICIES

The business of our Company requires, at various stages, the sanction of the concerned authorities under the relevant Central, State legislation and local laws. The following description is an overview of certain laws and regulations in India, which are relevant to our Company. Certain information detailed in this chapter has been obtained from publications available in the public domain. The regulations set out below are not exhaustive and are only intended to provide general information to Applicants and is neither designed nor intended to be a substitute for professional legal advice.

The statements below are based on current provisions of Indian law, and the judicial and administrative interpretations thereof, which are subject to change or modification by subsequent legislative, regulatory, administrative or judicial decisions.

RELATED TO THE BUSINESS OF THE COMPANY

THE MICRO, SMALL AND MEDIUM ENTERPRISES DEVELOPMENT ACT, 2006

The Micro, Small, and Medium Enterprises Development (MSMED) Act, 2006, is a pivotal legislation in India designed to foster the growth and development of micro, small, and medium enterprises (MSMEs). The Act classifies enterprises into micro, small, and medium categories based on their investment in plant and machinery or equipment, and turnover. This classification determines the level of benefits and support an enterprise can access. The MSMED Act aims to provide a conducive environment for the growth of MSMEs by offering a range of support mechanisms, including easier access to credit, subsidies, and incentives. It also establishes a framework for the registration of MSMEs, which can help them avail themselves of government schemes and financial assistance.

Additionally, the MSMED Act includes provisions for the development of the MSME sector through the establishment of a National Board for Micro, Small, and Medium Enterprises. This board is tasked with formulating policies, providing guidance, and monitoring the implementation of schemes related to MSMEs. The Act also addresses issues such as delayed payments from buyers, offering a mechanism for resolving disputes and ensuring timely settlement of dues. By supporting the growth and sustainability of MSMEs, the MSMED Act plays a crucial role in enhancing economic development and creating employment opportunities across various sectors.

THE INFORMATION TECHNOLOGY (“IT”) ACT, 2000

The IT Act was enacted with the purpose of providing legal recognition to transactions carried out by various means of electronic data exchange involving alternatives to paper-based methods of communication and storage of information. The IT Act also seeks to facilitate electronic filing of documents and create a mechanism for the authentication of electronic records through digital signatures. The IT Act prescribes punishment for publishing and transmitting obscene material in electronic form.

It provides for extraterritorial jurisdiction over any offence or contravention under the IT Act committed outside India by any person, irrespective of their nationality, if the act or conduct constituting the offence or contravention involves a computer, computer system or computer network

located in India. The Information Technology (Procedure and Safeguards for Blocking for Access of Information by Public) Rules, 2009 specifically permit the Government of India to block access of any information Generated, transmitted, received, stored or hosted in any computer resource by the public, the reasons for which are required to be recorded by it in writing.

DATA PROTECTION AND PRIVACY LAWS

Data protection and privacy laws are critical in safeguarding individuals' personal information in an increasingly digital world. These laws ensure that personal data is collected, processed, stored, and shared in a manner that respects privacy and security.

In India, the Personal Data Protection Bill, 2019, is a key legislative effort aimed at providing a comprehensive framework for data protection. The bill proposes stringent guidelines on the processing of personal data by both government and private entities, emphasizing the need for consent, purpose limitation, and data minimization. It also mandates the appointment of data protection officers, conducting data protection impact assessments, and reporting data breaches to the authorities.

Globally, the General Data Protection Regulation (GDPR) set by the European Union is a benchmark for data protection laws, influencing regulations worldwide. The GDPR enforces robust data protection principles, including the right to access, rectify, erase, and restrict processing of personal data. It also introduces the concept of data portability and mandates transparency in data processing activities. Organizations are required to implement technical and organizational measures to ensure data security and are subject to significant penalties for non-compliance. These laws not only protect individuals' privacy but also foster trust in digital services, encouraging responsible data handling practices and enhancing overall cybersecurity.

RESERVE BANK OF INDIA GUIDELINES & REGULATIONS

The Reserve Bank of India (RBI) plays a pivotal role in maintaining the financial stability of the country through its comprehensive guidelines and regulations. These guidelines cover a broad spectrum of areas, including banking operations, monetary policy, and financial market supervision. The RBI's regulatory framework ensures that banks operate in a sound and prudent manner, safeguarding depositors' interests and maintaining public confidence in the financial system. Key areas of focus include capital adequacy, asset quality, risk management, and corporate governance. By setting stringent norms for these areas, the RBI aims to enhance the resilience and efficiency of the banking sector.

In addition to overseeing traditional banking operations, the RBI also regulates emerging areas such as digital payments, fintech, and non-banking financial companies (NBFCs). The RBI has introduced specific guidelines for payment banks and small finance banks to promote financial inclusion and support underserved sectors of the economy. It also issues directives to prevent money laundering and combat the financing of terrorism, ensuring that the financial system remains robust against illicit activities. Through continuous monitoring and timely interventions, the RBI's guidelines and regulations not only foster a stable financial environment but also adapt to the dynamic needs of the economy, promoting sustainable growth and innovation.

THE PREVENTION OF MONEY LAUNDERING ACT, 2002

The Prevention of Money Laundering Act, 2002 (PMLA) is a significant legislative measure in India designed to combat the menace of money laundering. Enacted with the primary objective of preventing and controlling money laundering activities, the PMLA provides a robust legal framework for the confiscation and seizure of property derived from laundered money. It mandates that financial institutions, intermediaries, and banks maintain records of their transactions and report any suspicious activities to the Financial Intelligence Unit-India (FIU-IND). By doing so, the act aims to prevent the infusion of illicit money into the formal financial system and curb the funding of unlawful activities, including terrorism.

The PMLA also empowers authorities with extensive investigative and enforcement powers to track and prosecute offenders. Special courts are established to adjudicate cases under this act, ensuring swift and effective justice. The act's provisions extend to cover a wide range of predicate offences listed under the Indian Penal Code and other laws, thus widening its scope to tackle various forms of financial crimes. Amendments to the PMLA have further strengthened its provisions, aligning it with international standards and enhancing India's ability to cooperate with global efforts in fighting money laundering and terrorist financing. Overall, the PMLA plays a crucial role in maintaining the integrity of the financial system and ensuring economic stability.

ELECTRONIC PAYMENT SYSTEMS – SECURITY AND AUTHENTICATION MEASURES

Electronic payment systems have become integral to modern commerce, necessitating robust security and authentication measures to protect users from fraud and cyber threats. Security measures in electronic payment systems typically include encryption, tokenization, and secure socket layer (SSL) protocols. Encryption ensures that sensitive data, such as credit card numbers and personal information, is transformed into unreadable code during transmission, making it difficult for unauthorized parties to intercept and decipher. Tokenization replaces sensitive data with unique

identification symbols that retain essential information without compromising security. SSL protocols create a secure connection between the user's browser and the server, ensuring that data transferred remains private and integral.

Authentication measures are crucial for verifying the identity of users and authorizing transactions. Multi-factor authentication (MFA) is widely used, requiring users to provide two or more verification factors, such as a password, a one-time password (OTP) sent to their mobile device, or biometric verification like fingerprint or facial recognition. MFA significantly reduces the risk of unauthorized access by adding layers of security. Additionally, advanced authentication technologies, such as behavioral biometrics and risk-based authentication, analyze user behavior patterns and contextual information to detect and prevent fraudulent activities. These combined security and authentication measures ensure that electronic payment systems remain resilient against evolving cyber threats, fostering user trust and facilitating the growth of digital transactions.

THE BHARAT BILL PAYMENT SYSTEM (BBPS)

The Bharat Bill Payment System (BBPS) is a Reserve Bank of India (RBI) initiative designed to offer an integrated, interoperable bill payment service to customers across India. Governed by the BBPS Regulations, this system streamlines the bill payment process, allowing customers to pay various bills such as electricity, water, gas, DTH, and telecom services through a single platform. The regulations mandate that all entities participating in the BBPS ecosystem, including banks, non-banking financial companies (NBFCs), and payment service providers, adhere to strict standards of security, customer service, and operational efficiency. This ensures a seamless, reliable, and secure bill payment experience for users.

The BBPS regulations also emphasize the roles and responsibilities of the system's participants. The Bharat Bill Payment Central Unit (BBPCU), operated by the National Payments Corporation of India (NPCI), acts as the central regulatory body overseeing the system's operations. It ensures compliance with guidelines related to transaction processing, settlement, dispute resolution, and risk management. Furthermore, the regulations promote financial inclusion by extending bill payment services to the unbanked and underbanked segments of the population, leveraging the extensive network of agents and digital channels. By fostering transparency and accountability, the BBPS regulations aim to build consumer trust and drive the adoption of digital payment solutions across India.

TAXATION LAWS

INCOME-TAX ACT, 1961

The government of India imposes an income tax on taxable income of all persons including individuals, Hindu Undivided Families (HUFs), companies, firms, association of persons, and body of individuals, local authority and any other artificial judicial person. Levy of tax is separate on each of the persons. The levy is governed by the Indian Income Tax Act, 1961. The Indian Income Tax Department is governed by CBDT and is part of the Department of Revenue under the Ministry of Finance, Govt. of India. Income tax is a key source of funds that the government uses to fund its activities and serve the public. The quantum of tax determined as per the statutory provisions is payable as: a) Advance Tax; b) Self-Assessment Tax; c) Tax Deducted at Source (TDS); d) Tax Collected at Source (TCS); e) Tax on Regular Assessment.

THE GOODS AND SERVICE TAX ACT, 2017

The Goods and Services Tax (“GST”) is levied on supply of goods or services or both jointly by the Central Government and State Governments. GST provides for imposition of tax on the supply of goods or services and will be levied by the Central Government and by the state government including union territories on intra-state supply of goods or services. Further, Central Government levies GST on the inter-state supply of goods or services. The GST is enforced through various acts viz. Central Goods and Services Act, 2017 (“CGST”), relevant state’s Goods and Services Act, 2017 (“SGST”), Union Territory Goods and Services Act, 2017 (“UTGST”), Integrated Goods and Services Act, 2017 (“IGST”), Goods and Services (Compensation to States) Act, 2017 and various rules made thereunder.

INTELLECTUAL PROPERTY LAWS

TRADEMARKS ACT, 1999 (TM ACT)

A trademark is used in relation to goods so as to indicate a connection in the course of trade between the goods and a person having the right as proprietor or user to use the mark. The Trademarks Act, 1999, (Trademarks Act) governs the registration, acquisition, transfer and infringement of trademarks and remedies available to a registered proprietor or user of a trademark. Registration is valid for a period of 10 years but can be renewed in accordance with the specified procedure. As per the Trademarks (Amendment) Bill, 2009, Registrar of Trade Marks is empowered to deal with international applications originating from India as well as those received from the International Bureau and maintain a record of international registrations. It also removes the discretion of the Registrar to extend the time.

COPYRIGHTS ACT, 1957

The Copyrights Act governs copyright protection in India. Under the Copyright Act, copyright may subsist in original literary, dramatic, musical or artistic works, cinematograph films, and sound recordings. Following the issuance of the International Copyright Order, 1999, subject to certain exceptions, the provisions of the Copyright Act apply to nationals of all member states of the World Trade Organization.

While copyright registration is not a prerequisite for acquiring or enforcing a copyright, registration creates a presumption favoring ownership of the copyright by the registered owner. Copyright registration may expedite infringement proceedings and reduce delay caused due to evidentiary considerations. Once registered, the copyright protection of a work lasts for 60 years.

The remedies available in the event of infringement of a copyright under the Copyright Act include civil proceedings for damages, account of profits, injunction and the delivery of the infringing copies to the copyright owner. The Copyright Act also provides for criminal remedies, including imprisonment of the accused, imposition of fines and seizure of infringing copies.

PATENTS ACT, 1970 (PATENT ACT)

The purpose of the Patent Act in India is to protect inventions. Patents provide the exclusive rights for the owner of a patent to make, use, exercise, distribute and ECL a patented invention. The patent registration confers on the patentee the exclusive right to use, manufacture and ECL his invention for the term of the patent. An application for a patent can be made by (a) person claiming to be the true and first inventor of the invention; (b) person being the assignee of the person claiming to be the true and first invention in respect of the right to make such an application; and (c) legal representative of any deceased person who immediately before his death was entitled to make such an application. Penalty for the contravention of the provisions of the Patents Act include imposition of fines or imprisonment or both.

PROPERTY RELATED LAWS

TRANSFER OF PROPERTY ACT, 1882

The transfer of property, including immovable property, between living persons, as opposed to the transfer of property by operation of law, is governed by the Transfer of Property Act, 1882. This Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. The Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- Sale: the transfer of ownership in property for a price paid or promised to be paid.
- Mortgage: the transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The Act recognizes several forms of mortgages over a property.
- Charges: transactions including the creation of security over property for payment of money to another which are not classifiable as a mortgage. Charges can be created either by operation of law, e.g. decree of the court attaching to specified immovable property, or by an act of the parties.
- Leases: the transfer of a right to enjoy property for consideration paid or rendered periodically or on specified occasions.

REGISTRATION ACT, 1908 (THE “REGISTRATION ACT”)

The Registration Act has been enacted with the objective of providing public notice of the execution of documents affecting, inter alia, the transfer of interest in immovable property. The purpose of the Registration Act is the conservation of evidence, assurances, title and publication of documents and prevention of fraud. It details the formalities for registering an instrument. Section 17 of the Registration Act identifies documents for which registration is compulsory and includes, among other things, any non-testamentary instrument which purports or operates to create, declare, assign, limit or extinguish, whether in present or in future, any right, title or interest, whether vested or contingent, in any immovable property of the value of one hundred rupees or more, and a lease of immovable property for any term exceeding one year or reserving a yearly rent. A document will not affect the property comprised in it, nor be treated as evidence of any transaction affecting such property (except as evidence of a contract in a suit for specific performance or as evidence of part performance under the TP Act or as collateral), unless it has been registered. NATIONAL ENVIRONMENTAL POLICY, 2006

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace, but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 a (g), and strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of National Environmental Policy:

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
- Inter-generational Equity
- Integration of Environmental Concerns in Economic and Social Development
- Efficiency in Environmental Resource Use
- Environmental Governance
- Enhancement of resources for Environmental Conservation

COMPANIES ACT, 2013

The Companies Act, 2013, is a comprehensive piece of legislation that governs corporate entities in India. The Act covers various aspects of company formation, administration, and dissolution, providing a regulatory framework for the incorporation of companies, their management, and their financial disclosures. It introduces provisions for corporate social responsibility (CSR), requiring certain companies to allocate a portion of their profits towards social causes. The Act also emphasizes transparency and accountability through stringent disclosure norms, ensuring that companies maintain accurate records and submit regular financial reports to the Registrar of Companies (RoC).

Additionally, the Companies Act, 2013, establishes mechanisms for the protection of shareholders and creditors, including the appointment of independent directors and the formation of audit committees. It also streamlines the processes for mergers, demergers, and acquisitions, and provides a more

efficient framework for the resolution of corporate disputes. The Act enhances regulatory oversight by granting the Ministry of Corporate Affairs broader powers to enforce compliance and penalize violations. By promoting good governance practices and accountability, the Companies Act, 2013, aims to foster a robust corporate environment that supports sustainable economic growth and investor confidence.

THE COMPETITION ACT, 2002

The Act empowers the CCI to investigate and take action against practices that restrict or distort competition, such as cartels, monopolistic behaviors, and unfair trade practices.

The Competition Act, 2002, also emphasizes the importance of fostering a competitive market environment to benefit consumers and promote economic efficiency. It includes provisions for the assessment of mergers and acquisitions to prevent the creation of monopolies or significant market distortions. Additionally, the Act promotes transparency and accountability by mandating that businesses operate in a manner that does not hinder competition. CONSUMER PROTECTION ACT, 2019 (“COPRA, 2019”)

COPRA, 2019 came into force on August 9, 2019, replacing the Consumer Protection Act, 1986. It has been enacted with an intent to protect the interests of consumers and to establish competent

authorities in order to timely and effectively administer and settle consumer disputes. COPRA, 2019 provides for establishment of a Central Consumer Protection Authority to regulate, among other things, matters relating to violation of rights of consumers, unfair trade practices and false or misleading advertisements which are prejudicial to the interests of public and consumers. In order to address the consumer disputes' redressed mechanism, it provides a mechanism (three tire consumer redressed mechanism at national, state and district levels) for the consumers to file a complaint against a trader or service provider.

This hierarchical structure allows consumers to seek remedies for disputes and obtain compensation for losses due to defective goods or deficient services. Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a. Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual applicant, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b. Phase II: This phase commenced on completion of Phase I i.e. with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.
- c. Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering the facility of making applications in public issues are required to provide a facility to make applications using the UPI Mechanism. Further, in accordance with the UPI Circulars, our Company has appointed ICICI Bank Limited as the Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Investors into the UPI mechanism.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all

individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹ 500,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.
