3. Some risks may not be material at present but may have a material impact in the future.

INTERNAL RISK FACTORS:

1. **Majority of our revenues are generated from single customer Shopify Inc. Any adverse development affecting our operations in this region could have an adverse impact on our business, financial condition and results of operations.**

We derive 85.41 % of our revenue from single customer i.e., Shopify Inc. for the financial year ended March 31, 2024. Such customer concentration of our business heightens our exposure to adverse developments related to growth, as well as economic and demographic changes in relation to our customer which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience for other customers to retain and acquire new customers.

Revenue from operations generated from Shopify Inc. for the past three financial years based on the restated standalone financial information are provided below:

(₹ in lakhs, unless stated otherwise)

Particulars	For the Financial Year ended		
	March 31, 2024	March 31, 2023	March 31, 2022
Total Revenue from operations	540.55	399.14	304.34
Revenue from Shopify Inc	632.90	622.11	600.09
% of Total Revenue	85.41%	64.16%	50.72%

The concentration of our business in on single client is subjects us to various risks, including but not limited to:

- Financial Vulnerability;
- Limited Growth Opportunities;
- Reduced Negotiating Power; and

➤ Legal and Contractual Issues.

2. Our Promoters and Directors are involved in certain legal proceedings and potential litigations. Any adverse decision in such proceedings may render us/them liable to liabilities/penalties which may adversely affect our business, financial condition and results of operations.

A summary of outstanding matters set out below includes details of civil proceedings, tax proceedings, statutory and regulatory actions and other material pending litigation involving us, Directors and Promoters, as at the date of this Draft Red Herring Prospectus.

Cases against or by our Directors and / or Promoters

Nature of Cases	No of Outstanding Cases	Amount involved (In ₹ Lakhs)
Criminal Complaints	--	--
Statutory/ Regulatory Authorities	--	--
Taxation Matters	2	4.27
Other Litigation	1	unascertained

The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

For further details of certain material legal proceedings involving our Company, our Promoters, our directors, see “*Outstanding Litigations and Material Developments*” beginning on page 178 of this Draft Red Herring Prospectus.

3. If we are unable maintain our growth successfully, our results of operations and financial condition may be adversely affected.

Our revenue from operations on standalone basis has grown to Rs. 632.90 Lakhs in FY 2024 from Rs. 600.09 Lakhs in FY 2022. This growth has placed, and will continue to place, significant demands on our employees, operational and capital resources. While we intend to continue to expand our operations in other geographies, we may not be able to maintain this levels and may not be able to leverage our experience in our existing line of business in new markets. An inability to effectively manage our expanded operations or pursue our growth strategy may lead to operational and financial inefficiencies, which could have a material adverse effect on our business prospects, financial condition and results of operations.

Any investment, acquisition and new business initiative, could require our management to develop expertise in new areas, manage new business relationships and attract new types of customers, and divert their attention and resources, all of which could have a material impact on our ability to manage our existing business. These investments, acquisitions and new business initiatives may also expose us to risks associated with the integration of new business lines, operations and personnel, the diversion of resources from our existing business and technologies, the potential loss of, or harm to, relationships with employees and customers, as well as other unforeseen liabilities.

4. If we do not successfully anticipate market needs or develop and introduce new solutions that meet users’ needs on a timely basis, we may not be able to compete effectively and our revenue, reputation, financial conditions, results of operations and cash flows may be adversely affected.

We operate in a market defined by rapidly evolving technologies and business strategies, which compel users to adapt to increasingly complex IT infrastructures encompassing various software applications, operating systems, and network protocols. As these technologies and strategies become more intricate, our users are likely to encounter new and increasingly sophisticated risks and threats. While the market demands timely improvements from us to counter these emerging threats, developing such solutions can be both challenging and time-consuming. Delays in introducing new solutions, updates, enhancements, and features may occur. If we fail, or are perceived to fail, in swiftly meeting the changing needs of our users by delivering upgraded solutions promptly, our competitive position, reputation, and business prospects could be adversely affected.

5. The process of product development is expensive, time-consuming, and uncertain.

Our product development entails a costly, intricate, and time-consuming process, necessitating a prolonged period for the realization of the investment made. We primarily focus our investment and attention on product development and related opportunities. Investments in new technology and processes inherently involve uncertain outcomes, and the commercial success of our endeavors depends on various factors, including the level of innovation in the developed software products and services, as well as effective distribution and marketing strategies. The expenditure associated with these initiatives may

negatively impact our operating results if not balanced by corresponding and timely increases in revenue. To maintain our competitive position in the market, we must continue allocating a significant number of resources to our research and development department. However, substantial revenues from new product and service investments may not materialize for several years, if at all. Additionally, the profitability of new software products and services is not guaranteed, and even if achieved, their operating margins may not align with those we have experienced for our existing or historical offerings. The termination of a product in development, in which we have invested significant resources, may negatively impact our prospects, and fail to yield any return on investment. Consequently, this could adversely affect on our business operations and financial conditions.

6. *Undiscovered software design defects, errors, or failures may lead to a loss of or delay in the market acceptance of our products and services or give rise to liabilities that could significantly and adversely impact our business, financial health, and operational outcomes.*

We offer software development solutions that entail a high level of technological complexity and feature unique specifications, potentially containing design defects or software errors, including coding or configuration issues that may be challenging to identify and rectify. While our technical team diligently strives to prevent such errors, we cannot guarantee that, despite thorough testing by both us and our customers, new software product development solutions will be entirely free of errors. The discovery of bugs in our software could lead to litigation and other claims for damages against us, potentially causing significant adverse effect on our business operations and financial conditions.

7. *There may be potential conflict of interests between our Company and promoter group entities or enterprises promoted by our Promoters or directors or in which our promoters / directors may be interested.*

Our Company is engaged in the business involved in providing Software as a service (SAAS) - based digital product solutions. Our Company offers E-Commerce Store Development, Web App Development, UI/UX Design, Website development, Customize Software Development, support and maintenance with a primary focus on Shopify application development. Some, of our Promoter group entities are engaged in the similar/same line of business promoted by our Promoters or directors or in which our promoters / directors may be interested. Further, we have not executed any Non-Compete Agreement with such Group Entity undertaking not to engage in businesses similar to that of our Company. Any failure to adhere to the may have an adverse effect on our business operations and financial conditions.

8. *Any inability to license or incorporate software and technology rights held by third parties in our solutions may adversely impact our business, financial position, results of operations and cash flows*

Although the products and technologies are developed by our in-house team for and subsequently provided to our clients for which patent rights are held with third party/clients. Any inability to license or incorporate such product software and technology rights which are held by third parties/clients, our company may not be able to license or otherwise obtain rights to use and incorporate third party intellectual property in our services, such license or rights may only be available at a high cost. This may impact our ability to develop new services and/or our profitability.

9. *Our pricing structures do not accurately anticipate the cost and complexity of performing our work and if we are unable to manage costs successfully, then certain of our products could be or become unprofitable.*

We set our pricing terms for products/services utilising a range of pricing structures and conditions. Depending on the particular products/services, we may use time based / resource-based / subscription-based pricing, pursuant to which we typically invoice on a monthly/quarterly/yearly basis for the products/services that we provide to our clients. We also enter into fixed-price arrangements, pursuant to which we provide a defined scope of work over a fixed timeline for a capped fee. In certain instances, we enter into time based / resource-based / subscription-based pricing arrangements, but with the inclusion of fixed-price elements for certain specified services.

Our ability to improve or maintain our profitability is dependent on managing our costs successfully. Our cost management strategies include maintaining appropriate alignment between the demand for our services and our resource capacity, optimising the costs of service delivery through deployment of tools, and effectively leveraging our sales and marketing and general and administrative costs. We also have to incur additional costs to replace or upgrade our products/services in the event our clients / merchants are not satisfied in relation thereto and believe we have failed to properly understand their needs and develop solutions accordingly. Our pricing structure is highly dependent on our internal forecasts and predictions about our products/services and the potential demand for our products/services by our clients, which might be based on limited data and could be inaccurate. Although we use our internal processes and rely on our past project experience to reduce the risks associated with estimating, planning and performing fixed-price projects, we bear the risks of cost overruns, completion delays and wage inflation in connection with these projects. There is no guarantee that these, or other cost-management efforts, will be successful, that our efficiency will be enhanced, or that we will achieve desired levels of profitability.

If we do not accurately estimate the resources required, costs and timing for completing contracts, future rates of wage inflation and currency exchange rates, or if we fail to complete our contractual obligations within the contracted timeframe, our contracts could prove unprofitable for us or yield lower profit margins than anticipated. There is a risk that we will underprice our contracts, fail to accurately estimate the costs of performing the work or fail to accurately assess the risks associated with potential contracts. In particular, any increased or unexpected costs, or wide fluctuations compared to our original estimates or delays, or unexpected risks we encounter in connection with the performance of this work, including those caused by factors outside of our control, could make these contracts less profitable or unprofitable, which could adversely impact our profit margin.

10. The Company is dependent on few numbers of customers for sales. Loss of any of this large customer may affect our revenues and profitability.

Our top ten customers contribute 99.66%, 100.00%, and 100.00% of our total revenue from operations on standalone basis for financial year ended on March 31, 2024, 2023 and 2022, respectively. Our Company is engaged in the business involved in providing Software as a service (SAAS) - based digital product solutions. Our Company offers E-Commerce Store Development, Web App Development, UI/UX Design, Website development, Customize Software Development, support and maintenance with a primary focus on Shopify application development. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. The table set forth below states contribution of Top 1/3/5/10 customers in our total revenue from operations:

Particulars	% contribution to total revenue from operations		
	For the year ended March 31, 2024	For the year ended March 31, 2023	For the year ended March 31, 2022
Top 1 Customer	85.41%	64.16%	50.72%
Top 3 Customers	93.31%	99.51%	100.00%
Top 5 Customers	97.71%	100.00%	100.00%
Top 10 Customers	99.66%	100.00%	100.00%

The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Any decline in our quality standards, growing competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

However, the composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

11. Intense competition in the market for technology services could affect our pricing, which could reduce our share of business from clients and decrease our revenues and profitability.

We operate in an intensely competitive industry that experiences rapid technological developments, changes in industry standards, and changes in customer requirements. Our competitors include large IT consulting firms, captive divisions of large multinational technology firms, large Indian IT services firms, in-house IT departments of large corporations, in addition to numerous smaller local competitors in the various geographic markets in which we operate.

The technology services industry is experiencing rapid changes that are affecting the competitive landscape. We may face competition from companies that increase in size or scope as the result of strategic mergers or acquisitions, which may result in larger competitors with significant resources that benefit from economies of scale and scope. These transactions may include consolidation activity among global technology majors, hardware manufacturers, software companies and vendors, and service providers. The result of any such vertical integration may be the greater integration of services and a larger portfolio of services on offer, in each case, relative to what was previously offered by such independent vendors. Our access to such services may be reduced as a result of such an industry trend and we may otherwise become disadvantaged relative to our potentially more circumscribed service portfolio.

Such events could have a variety of negative effects on our competitive position and our financial results, including reducing our revenue, increasing our costs, lowering our gross margin percentage, and requiring us to recognise impairments on our assets.

If our competitors develop and implement methodologies that yield greater efficiency and productivity, they may be able to offer services similar to ours at lower prices without adversely affecting their profit margins. Even if our offerings address industry and client needs, our competitors may be more successful at selling their services. If we are unable to provide our clients with superior services and solutions at competitive prices or successfully market those services to current and prospective clients, our business, results of operations and financial condition may suffer. Further, a client may choose to use its own internal resources rather than engage an outside firm to perform the types of services we provide. We cannot be certain that we will be able to sustain our current levels of profitability or growth in the face of competitive pressures, including competition for skilled technology professionals and pricing pressure from competitors employing an on-site/ offshore business model.

We may face competition in countries where we currently operate, as well as in countries in which we expect to expand our operations and may have limited or no experience. Many of our competitors have significantly greater financial, technical and marketing resources, generate greater revenues, have more extensive existing client relationships and technology partners and have greater international brand recognition than we do. We may be unable to compete successfully against these competitors, or may lose clients to these competitors. There is a risk that increased competition could put downward pressure on the prices we can charge for our services and on our operating margins. Additionally, we believe that our ability to compete also depends in part on factors outside of our control, such as the price at which our competitors offer comparable services, and the extent of our competitors' responsiveness to their clients' needs.

12. We may need to change our pricing models to compete successfully.

The competition we face in the sales of our products and services and general economic and business conditions as well as changes in the IT industry standards and landscape, can put pressure on us to change our pricing models. If our competitors offer deep discounts on certain products or services or develop products that the marketplace considers more valuable, we may need to lower prices or offer other favourable terms in order to compete successfully. Any such changes may reduce our sales or margins and could adversely affect our business and operating results. Some of our competitors may bundle products for promotional purposes or as a long-term pricing strategy or provide guarantees of prices and product implementations. These practices could, over time, significantly constrain the prices that we can charge for some of our products. If we do not adapt our pricing models to reflect changes in customer use of our products or changes in customer demand, our revenues could decrease.

13. Failure to offer customer support in a timely and effective manner may adversely affect our relationships with our customers.

From time to time, our customers require our customer support team to assist them in using our services, help them in resolving post-deployment issues quickly and in providing ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our customers effectively, it could adversely affect our ability to retain existing customers and could prevent prospective customers from adopting our services. We may be unable to respond quickly enough to accommodate short-term increases in demand for customer support. We also may be unable to modify the nature, scope and delivery of our customer support to compete with changes in the support services provided by our competitors. Increased demand for customer support, without corresponding revenue, could increase costs and adversely affect our business, results of operations and financial condition.

Our sales are highly dependent on our business reputation and on positive recommendations from our customers. Any failure to maintain high-quality customer support, or a market perception that we do not maintain high-quality customer support, could adversely affect our reputation, business, results of operations and financial condition.

14. We are subject to risks associated with expansion into new markets.

Expansion into new markets, including in India and overseas, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions.

The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets.

By expanding into new markets, we could be subject to additional risks associated with establishing and conducting operations, including: compliance with a wide range of laws, regulations and practices, including uncertainties associated with changes in

- laws, regulations and practices and their interpretation; local preferences and service requirements;

- fluctuations in foreign currency exchange rates;
- inability to effectively enforce contractual or legal rights and adverse tax consequences;
- differing accounting standards and interpretations;
- stringent as well as differing labour and other regulations;
- differing domestic and foreign customs, tariffs and taxes;
- exposure to expropriation or other government actions; and
- political, economic and social instability.

Our Company intends to expand into existing markets. For further details, please refer to section titled *"Objects of the Issue"* beginning on page 72 of this Draft Red Herring Prospectus. By expanding, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

15. We may be liable to our clients, vendors and aggregator platforms for any breach of terms or conditions of agreement entered into by us with them, which could harm our reputation and cause us to lose clients

Many of our contracts involve contracts that are critical to the operations of our clients' businesses and provide benefits to our clients that may be difficult to quantify. We receive critical information of our vendors in relation to payment details, details of their customers, their demographics and other important information. If we are unable to protect this information or such information is leaked from our servers, intentionally or un-intentionally, could result in damages to such vendors and aggregator platform. We may face a number of threats to our data centres and networks such as unauthorised access, security breaches and other system disruptions. It is critical to our business that our infrastructure remains secure and is perceived by customers to be secure.

We seek to rely on encryption and authentication technology licensed from third parties to provide the security and authentication necessary to effect secure online transmission of confidential client information. Despite our security measures, advances in computer capabilities, new discoveries in the field of cryptography or other events or developments may result in a compromise or breach of the algorithms that we use to protect sensitive customer transaction data. Breaches of our security measures or the accidental loss, inadvertent disclosure or unapproved dissemination of confidential customer data could expose us, our customers or the individuals affected to a risk of loss or misuse of this information, or cause interruptions in our operations. We may be required to expend significant capital and other resources to protect against such security breaches, to alleviate problems caused by or to investigate such breaches, all of which could subject us to liability, damage our reputation and diminish the value of our brand name.

Although we attempt to limit our contractual liability for consequential damages in rendering our services, many of our client agreements do not limit our potential liability for breaches of confidentiality and we cannot be assured that such limitations on liability will be enforceable in all cases, or that they will otherwise protect us from liability for damages. Moreover, if any person, including any of our employees or former employees or subcontractors, penetrates our network security or misappropriates sensitive data, we could be subject to significant liability from our clients or from our clients' customers for breaching contractual confidentiality provisions or privacy laws. Unauthorised disclosure of sensitive or confidential client and customer data, whether through breach of our computer systems, systems failure, loss or theft of assets containing confidential information or otherwise, could render us liable to our clients for damages, damage our reputation and cause us to lose clients.

A successful assertion of one or more large claims against us could adversely affect our revenues and results of operations. We may also be liable to our clients for damages or termination of contract if we are unable to address disruption in services to them with adequate business continuity plans and/or for non-compliance with our clients' information security policies and procedures.

16. We have entered into a number of related party transactions and may continue to enter into such transactions under AS 18, in the future, and there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties.

We have, in the past, entered into related party transactions with various parties. A summary statement of the related party transactions is as follows:

17. We do not own the Registered office and other office premises. Any dispute in relation to lease of our premises would have an adverse effect on our business and results of operations.

We do not own the registered office and other office premises from which we operate. The said offices are taken on lease or license and in case of non-renewal or termination of such deed or renewal on such terms and conditions that are unfavourable to our Company, we may suffer disruption in our operations which may adversely affect our financial conditions. For further details regarding our properties, please refer to the Section titled "Business Overview" on page 120 of this Draft Red Herring Prospectus. Any dispute arise in future may affect our business relation and our results of operation.

Any failure to renew the said agreement could force us to procure new premises, including substantial time and cost of relocation or procure new premises. In addition, we may not be able to identify satisfactory new premises or may have to incur substantial additional costs towards those premises. Any of the aforesaid could have an adverse effect on our business, results of operation and financial condition.

18. Our insurance coverage may not adequately protect us against certain operating hazards and this may have a material adverse effect on our business.

We have not taken insurance cover in respect of our assets & leased premises. We have not taken any insurance for any claims arising out of client servicing that might occur in the normal course of business. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time by the insurers. To the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our business operations and cash flows may be affected. For details on Insurance cover, please see "Insurance" the chapter titled "Business Overview" beginning on page 120 of this Draft Red Herring Prospectus.

19. Changing regulations in India could lead to new compliance requirements that are uncertain. The regulatory environment in which we operate is evolving and is subject to change.

The Government of India may implement new laws or other regulations that could affect the manufacturing industry or the sectors we serve, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations. Any such changes and the related uncertainties with respect to the implementation or change in the legal framework may have a material adverse effect on our business, financial condition and results of operations.

20. We require certain approvals and licenses in the ordinary course of business, some of the approvals are required to be transferred in the name of 'Identixweb Private Limited', we are yet to update the some of the said registrations and the failure to successfully update such registrations would adversely affect our operations, results of operations and financial condition.

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be

onerous. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to conversion of company from private to public Company i.e., 'Identixweb Private Limited' to 'Identixweb Limited'.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, see "Government Approvals" on page 183 of this Draft Red Herring Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations. For further details, please see chapters titled "Key Industry Regulations and Policies" and "Government Approvals" at pages 137 and 183 respectively of this Draft Red Herring Prospectus.

Our Board of Directors will monitor the proceeds of this Issue.

22. We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled "Objects of the Issue".

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of Please refer chapter titled "Object for the Issue" beginning on page 72 of this Draft Red Herring Prospectus.

24. The average cost of acquisition of Equity shares by our Promoters is lower than the Issue price.

Our Promoter’s average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below:

Sr. No.	Name of Promoters	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹)*
1.	Mr. Priyankumar Jivrajbhai Savani	3230000	1.25
2.	Mr. Ankur Jagdishbhai Lakhani	3230000	1.25
3.	Mrs. Hiral Ankurbhai Lakhani	9025	49.92

*The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them to acquire Shares and Shares allotted to them and as reduced by amount received on sell of shares i.e. net of sale consideration is divided by net quantity of shares acquired.

25. Our success depends heavily upon our Promoters, Directors, Key Managerial Personnel and Senior Managerial Personnel for their continuing services, strategic guidance and financial support. Our success depends heavily upon the continuing services of Promoters, Directors, Key Managerial Personnel and Key Managerial Personnel who are the natural person in control of our Company.

Our Promoters and Directors have a vast experience in the business undertaken by our company. They have established cordial relations with various customers and suppliers over the past several years, which have immensely benefitted our Company’s current customer and supplier relations. We believe, our Promoters and Directors, who have rich experience in this industry, managing customers and handling overall businesses, has enabled us to experience growth and profitability.

We benefit from our relationship with our Promoters, Director, Key Managerial Personnel and Senior Managerial Personnel and our success depends upon their continuing services. We also depend significantly on our Directors, Key Managerial Persons and Senior Managerial Personnel for executing our day-to-day activities. The loss of any of our Promoters, Directors, Key Management Personnel and Senior Managerial Personnel or failure to retain, recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors, Key Managerial Personnel and Senior Managerial Personnel please refer to the chapter titled “Our Management” on page 144 of this Draft Red Herring Prospectus.

26. Our Promoters and Promoter group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this Issue, our Promoters and Promoter group will collectively owns majority of our post issue equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

27. We face competition from both domestic as well as international markets and our inability to compete effectively may have a material adverse impact on our business and results of operations.

Competition in our business is based on pricing, relationships with customers, product quality, customisation and innovation. We face pricing pressures from our customers who aim to produce their products at competitive costs and competitors who are able to source their raw materials at cheaper prices or are able to offer more favourable pricing terms to customers. We are unable to assure you that we shall be able to meet the pricing pressures imposed by such customers which would adversely affect our profitability. Additionally, some of our competitors may have greater financial, research and technological resources,

larger sales and marketing teams and more established reputation. They may also be in a better position to identify market trends, adapt to changes in industry, innovate new products, offer competitive prices due to economies of scale and also ensure product quality and compliance, which may adversely affect our business and financial condition.

28. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds and our company will have full discretion in respect of issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

29. *Industry information included in this Draft Red Herring Prospectus has been derived from industry sources There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed, and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

30. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, depending on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favorable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt-to-equity ratio to increase or require us to create charges or lines on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any issuance of Equity Shares by our Company may dilute the shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

31. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

32. Our inability to effectively implement our business and growth strategy may have an adverse effect on our operation and growth.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

EXTERNAL RISK FACTORS

1. The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing “shelter-in-place” rules and “stay-at-home” orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations after the introduction of the lockdown in India, subject to certain adjustments in working patterns.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased, it is not yet clear when the lockdown conditions will be fully lifted in India. Further, although we were declared an essential business and were able to adjust our business to continue operating during the lockdown, there can be no assurance that further restrictions will not be introduced or that we will continue to retain such essential status. Further, we may be required to quarantine employees that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees or shut down our manufacturing facilities as a health measure, which could have an adverse effect on our business operations or result in a delay in the production and supply of products to our customers in a timely manner. If any of our suppliers are affected by COVID-19 to the extent our supply chain is disrupted, this may affect our ability to meet the demand of our customers.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees’ and suppliers’ ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers’ business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

2. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager has appointed [●] as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global

economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

3. *Increase in competition in the Information Technology Sector may adversely affect our profitability.*

Our business faces competition from both national and local property developers with respect to factors such as location, facilities and supporting infrastructure, services and pricing. Intensified competition between property developers may result in increased land prices, oversupply of properties, lower real estate prices, lower sales at our properties, all of which may adversely affect our business. Moreover, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that increased competition will not have an adverse effect on our profitability.

4. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading on stock exchange. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, if the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

5. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of Bombay Stock Exchange Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of Bombay Stock Exchange limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

6. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.*

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

7. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

8. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

9. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

10. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

11. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

GLOBAL ECONOMIC OVERVIEW

Economic activity was surprisingly resilient during the global disinflation of 2022–23. Growth in employment and incomes has held steady as favorable demand and supply developments have supported major economies, despite rising central bank interest rates aimed at restoring price stability. As inflation converges toward target levels and central banks pivot toward policy easing, a tightening of fiscal policies aimed at curbing high government debt levels, with higher taxes and lower government spending, is expected to weigh on growth. The pace of expansion is also expected to remain low by historical standards as a result of factors including the long-term consequences of the COVID-19 pandemic, Russia's invasion of Ukraine, weak growth in productivity, and increasing geoeconomic fragmentation.

In late 2023, headline inflation neared its pre-pandemic level in most economies for the first time since the start of the global inflation surge. In the last quarter of 2023, headline inflation for advanced economies was 2.3 percent on a quarter-over-quarter annualized basis, down from a peak of 9.5 percent in the second quarter of 2022. For emerging market and developing economies, inflation was 9.9 percent in the last quarter of 2023, down from a peak of 13.7 percent in the first quarter of 2022, but this average was driven by high inflation in a few countries; for the median emerging market and developing economy, inflation declined to 3.9 percent. This progress notwithstanding, inflation is not yet at target in most economies.

As global inflation descended from its peak, economic activity grew steadily, defying warnings of stagflation and global recession. During 2022 and 2023, global real GDP rose by a cumulative 6.7 percent. That is 0.8 percentage point higher than the forecasts made at the time of the October 2022 World Economic Outlook (WEO). The United States and several large emerging market and middle-income economies displayed the greatest overperformance, with aggregate demand supported by stronger-than-expected private consumption amid still-tight—though easing—labour markets. Households in advanced economies supported their spending by drawing down accumulated pandemic-era savings. Larger-than-expected government spending further supported the expansion of aggregate demand in most regions. The overall budgetary stance—measured by the structural fiscal balance—was more expansionary than expected, on average. Among large economies, the additional budgetary support, compared with October 2022 WEO forecasts, was estimated at 2 percent of GDP in the United States and 0.2 percent of GDP in the euro area, whereas in China,¹ the fiscal stance was mildly tighter than expected, by 0.7 percent of GDP. The euro area also displayed the smallest upside growth surprise, reflecting weak consumer sentiment and the lingering effects of high energy prices. In parallel, global headline inflation declined broadly in line with expectations, averaging just 0.1 percentage point more than predicted in the October 2022 WEO for 2022 and 2023. However, in lower-income countries, inflation was on average higher than expected, reflecting cases in which pass-through into domestic prices from international food, fuel, and fertilizer costs, as well as from currency depreciation, was greater than expected. Price pressures in some lower-income countries were significant. These factors also caused these economies to grow more slowly than expected, suggesting a negative supply shock. In China, inflation fell unexpectedly, with the decrease reflecting sharply lower domestic food prices and pass-through effects on underlying (core) inflation.

The resilience in global economic activity was compatible with falling inflation thanks to a post pandemic expansion on the supply side. A greater-than-expected rise in the labour force amid robust employment growth supported activity and disinflation in advanced economies and several large emerging market and middle-income economies. The labour force expansion reflected, in some economies, increased inflows of migrants, with faster growth in the foreign-born than in the domestic-born labour force since 2021, as well as higher labour force participation rates. Exceptions to this pattern include China, where labour market weakness, in the context of subdued demand, was broad based across sectors, and lower-income countries, where supply-side challenges held job creation back. Greater-than-expected additions to the stock of physical capital, with business investment responding to the strength in product demand, further bolstered the supply side in most regions, with exceptions including the euro area, where interest-rate-sensitive business investment, particularly in manufacturing, was subdued. A resolution of pandemic-era supply-chain problems allowed delivery times to decline and transportation costs to decrease. After attacks on commercial shipping in the Red Sea—through which 11 percent of global trade flows—global transportation costs increased, reflecting the rerouting of cargo from the Suez Canal to the Cape of Good Hope and continued trade disruptions from climate extremes in the Panama Canal, but

remained well below their 2021–22 levels and have recently declined. The price of energy fell faster than expected from its peak, in part as a result of increased non-OPEC (Organization of the Petroleum Exporting Countries) oil production and increased natural gas output, most notably in the United States. Rising exports of Russian oil on account of the expanding non-Western-aligned oil tanker fleet carrying Russian oil and Russia’s setting up its own maritime insurance added further to the world energy supply

INFLATION (AND EXPECTATIONS) IN DECLINE

The fall in headline inflation since 2022 reflects the fading of relative price shocks—notably those to energy prices—as well as lower core inflation. The decline in energy prices reflects not only increased global energy supply, but also the effects of tight monetary policies. The monetary tightening by central banks in major advanced economies during 2022–23 may have contributed strongly to lowering energy prices owing to its high degree of synchronization and the associated effect on curbing world energy demand (as in the analysis of Auclert and others 2023).

Core inflation has declined as a result of the fading of effects of pass-through from past shocks to headline inflation, as well as because labour market pressures have eased. Pass-through effects include the effects of past relative price shocks—notably those to the price of energy and supply shifts in various industries—on prices and costs in other industries through supply-chain inputs and wage demands. Near-term inflation expectations are an important pass-through channel because of their implications for both wage and price setting (see Chapter 2 of the October 2023 WEO) and have declined toward target levels in both advanced economies and emerging market and developing economies, although measures of financial-market-based inflation expectations have recently shown signs of a pickup in the US.

Longer-term inflation expectations have remained anchored, despite the string of large shocks since 2020—with decisive communication and action by central banks safeguarding the credibility of their inflation targets—and contributed little to recent movements in core inflation. Labour markets remain tight, especially in the United States, but the recent decline in the ratio of vacancies to the number of unemployed people amid a rise in unemployment rates suggests an easing across several economies. Nominal wage growth has generally remained contained in advanced economies since 2022, especially in the euro area, implying a moderation in real (inflation-adjusted) wages. Real wages are now close to or slightly below the level they were on before the pandemic in these economies. Wage-price spirals—in which prices and wages accelerate together for a sustained period—have generally not taken hold. Nevertheless, wages at the bottom of the wage distribution have risen faster than the average since the start of the pandemic, compressing the distribution.

The roles of these factors in reducing core inflation have diverged across major economies. IMF staff analysis suggests that the rapid fading of pass-through from past relative price movements—in particular from energy price shocks—has played a larger role in the euro area and the United Kingdom than in the United States in reducing core inflation (the staff’s methodology was the same as that used in Dao and others 2023). In the United States, labour market tightness and, more broadly, strong macroeconomic conditions, which partly reflect the effects of earlier fiscal stimulus as well as strong private consumption, are the main source of remaining upward pressure on underlying inflation. In the United Kingdom, labour market tightness predating the pandemic may partly explain why inflation has been higher than in the US or euro area following the onset of the pandemic (see Haskel, Martin, and Brandt 2023). Accordingly, IMF staff estimates of the gap between actual and potential output levels in 2023 are positive for the United States, at 0.7 percent, and negative for the euro area and for the United Kingdom, at –0.3 percent.

ELEVATED DEBT BURDENS

Debt-to-GDP ratios, which increased sharply during the pandemic, remain elevated, and large budget deficits continue to raise the debt burden in many economies (see the April 2024 Fiscal Monitor). Interest payments on debt have also increased as a share of government revenues, crowding out necessary growth-enhancing budgetary investments. In low-income countries, interest payments are estimated to average 14.3 percent of general government revenues in 2024, about double the level 15 years ago. To rebuild budgetary room for maneuver and curb the rising path of debt, the fiscal policy stance is expected to tighten in 2024 and beyond, with higher taxes and lower government spending in several advanced and emerging market and developing economies. This shift is expected to weigh on near-term economic activity.

INDIAN ECONOMIC OVERVIEW

INDIA REMAINS A BRIGHT SPOT IN THE REVIVAL OF THE GLOBAL ECONOMY

In contrast to a cautious assessment of the global scenario, the Indian economy continues to exhibit strong economic performance with broad-based growth across sectors. Many international organisations assert India’s pivotal role in determining the growth path of Asia in the coming years. RBI also, in its latest MPC meeting, noted the strong growth momentum in the economy and projected real GDP growth for 2024-25 at 7 per cent, driven by a pickup in rural demand and sustained momentum in the manufacturing sector. The WEO has also forecasted India’s growth at a high of 6.8 per cent in 2024-25 and 6.5 per cent in 2025- 26, based on its assessment of continuing strength in domestic demand and a rising working age population. The optimism regarding growth prospects is also reflected in consumer and investor perceptions. As per the latest consumer confidence survey, households’ sentiments on the general economic situation and employment prospects recorded notable improvements for both the current period as well as the upcoming year. The manufacturing sector is also expected to maintain its momentum on the back of sustained profitability and pick-up in rural demand.

In March 2024, India witnessed a surge across multiple economic indicators, reflecting robust and resilient business activity. The month marked significant milestones, from record breaking performances in the stock market to remarkable advancements in tax revenue collection. The buoyancy extended to the manufacturing and services sectors, as evidenced by the soaring HSBC India Manufacturing PMI and Services PMI. Amidst strong demand and positive market conditions, both sectors experienced substantial growth in output, new orders, and employment.

Gross GST collection for March 2024 stood at a record high, marking the second highest collection ever recorded. The increase was primarily driven by domestic transactions that witnessed a huge surge. Collection from domestic transactions signifies a buoyant domestic economic landscape, instilling optimism and bolstering overall revenue accruals. Furthermore, the steady rise in average monthly collections by approximately ₹18,000 crore throughout the year underscores a compelling narrative of robust growth and economic recovery. As March concludes the fiscal year 2024, the uptick in GST collections not only reflects robust compliance but also signifies an expansion in the ambit of GST, covering a broader spectrum of economic activities within its purview.

In March 2024, the HSBC India Manufacturing PMI surged to an impressive 59.2, a notable increase from the final figure of 56.9 recorded in the previous month. This upswing was driven by robust demand, marking the fastest growth in factory activity since February 2008. Notably, both output and new orders experienced substantial growth, reaching the highest levels in nearly three-and-a-half years. Moreover, buying levels surged significantly, attaining their strongest position in nine months. This uptick facilitated firms' restocking endeavours, with input inventories expanding at an accelerated pace. Employment also witnessed a moderate increase during this period. Finally, business sentiment improved, reflecting growing optimism among manufacturing firms regarding future prospects.

In March, India's services sector hit a peak, with exports surging to a fiscal year high. The HSBC India Services PMI soared to 61.2, marking one of the sector's most significant expansions in sales and business activity in nearly 14 years. Employment in the sector continued to grow for the twenty-second consecutive month, driven by strong demand and rising new orders. Service providers capitalised on export opportunities and new business intakes, propelled by positive domestic and international demand trends. Combined with a 16-year high growth in India's manufacturing industry, the HSBC final India Composite PMI Index reached an eight-month high of 61.8, indicating bright growth prospects for the economy.

Consumer durables emerged as a standout performer, registering an impressive growth rate of 12.3 per cent. This significant increase contrasts sharply with the negative growth observed in the same period last year. However, consumer non-durables experienced a decline of 3.8 per cent in the latest period, explained by fluctuations in consumer demand patterns. Overall, the industrial landscape demonstrates resilience and adaptability, showcasing promising growth trends across various sectors. This reinforces confidence in the underlying strength of the Indian economy, poised for continued growth and development.

RETAIL INFLATION LOWEST SINCE THE COVID PANDEMIC

The government's efforts in managing retail inflation in FY2023-24 have been highly successful. Inflation measured by the Consumer Price Index declined from 6.7 per cent in FY2022-23 to 5.4 per cent in FY2023-24, which is within the upper tolerance level of the inflation-targeting framework. The government's positive action has also contributed to inflation control, such as a reduction in petrol, diesel and LPG prices.

RISING CAPITAL INFLOWS

India's FPI flows saw a significant turnaround in FY2023-24. Supported by rising economic growth, a favourable business environment, and strong macroeconomic fundamentals, India witnessed robust FPI inflows in FY2023-24. Net FPI inflows stood at USD 41 billion during FY2023-24, as against net outflows in the preceding two years. This is the second-highest level of FPI inflow after FY2014-15. India received the highest equity inflows among emerging market peers during FY2023-24. The imminent inclusion of India's sovereign bonds in global bond indices is likely to spur demand for exposure to India further.

Owing to a rise in repatriation/disinvestment, net FDI moderated to USD 25.5 billion in the first ten months of FY2023-24 from USD 36.8 billion a year ago. Despite global FDI flows remaining weak in 2023 with only a modest increase of 3 per cent over 2022, India fared better than its Asian peers did. India's foreign exchange reserves reached an all-time high

of USD 645.6 billion as of March 29, 2024, sufficient to cover 11 months of projected imports and more than 100 per cent of total external debt.

A SLIGHT MODERATION IN THE EXTERNAL DEBT-TO-GDP RATIO

The external debt to GDP ratio stood at 18.7 per cent as at end-December 2023, slightly lower from 18.8 per cent as at end-September 2023. While the share of long-term debt (with an original maturity of above one year) in total external debt increased slightly, there has been a decline in the share of short-term debt (with an original maturity of up to one year) in total external debt. The US dollar-denominated debt remained the largest component of India’s external debt in end-December 2023, followed by Indian Rupee, Japanese Yen, SDR, and Euro.

Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DIPP”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DIPP issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. For more details, please refer chapter titled “*Issue Procedure*” beginning on Page No. 211 of this Draft Red Herring Prospectus.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. For more details, please refer chapter titled “*Issue Procedure*” beginning on Page No. 211 of this Draft Red Herring Prospectus.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DIPP and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the

Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue Period.
