SECTION II - RISK FACTORS

An investment in the Equity Shares involves a high degree of financial risk. Investors should carefully consider all the information in this Draft Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. If any of the following risks, as well as other risks and uncertainty discussed in this Draft Red Herring Prospectus, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flow and financial condition could suffer, the price of the Equity Shares could decline, and you may lose all or part of your investment. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. Investors should consult their tax, financial and legal advisors about particular consequences to them of an investment in the Issue. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate, and specific risk associated with our Company. However, there are certain risk factors where the financial impact is not quantifiable and therefore, such financial impact cannot be disclosed in such risk factors. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section.

To obtain a better understanding of our business, you should read this chapter in conjunction with other sections of this Draft Red Herring Prospectus, including the chapters titled “Our Business”, “Management’s Discussion and Analysis of Financial Condition and Results of Operation”, “Industry Overview” and “Financial Statements” on pages 111, 179, 93 and 150, respectively of this Draft Red Herring Prospectus. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus.

This Draft Red Herring Prospectus also contains forward-looking statements, s that involves risks, uncertainties and other factors. Our actual results could differ materially from those anticipated in these forward-looking statements, which may cause the actual results to be materially different from those expressed or implied by the forward-looking statements. For further details, see “Forward-Looking Statements” on page 22 of this Draft Red Herring Prospectus.

Unless otherwise stated, the financial information in this chapter is derived from our Restated Financial Statements for the financial years ended March 31, 2024, 2023 and 2022 as included in “Restated Financial Statements” on page 150 of this Draft Red Herring Prospectus.

MATERIALITY

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality:

- Some events may have material impact quantitatively;
- Some events may have material impact qualitatively instead of quantitatively;
- Some events may not be materiality individually but may be found material collectively;
- Some events may not be material at present but may not be having material impact in future.

BUSINESS RELATED RISKS

I. Internal Risks

1. ***We derive a significant part of our revenue from a group of select products. If we fail to offer any of these products, our business, financial condition and results of operations may be adversely affected.***

We are primarily in the business of importing and distribution of hydrocarbon-based chemicals of the product family viz. Acetyls, Alcohol, Aromatics, Nitriles, Monomers, Glycols Phenolic, Ketones, and Isocyanates, which are critical raw materials and inputs for manufacturing of paints and coatings, printing inks, agro-chemical products, specialty polymers, pharmaceuticals products and specialty industrial chemicals. Over the past three Fiscals, we have expanded our product portfolio from offering 21 products in Fiscal 2022 to

39 products by Fiscal 2024. The contribution of top 5 and top 10 products in our total revenue from operations is as under:

Sr. No.	Particulars	Revenue Contribution (₹ in lakhs)	Total Revenue (₹ in lakhs)	Percentage of the revenue contribution
1.	Fiscal 2024			
	Top 5 Products	74,073.80	1,53,490.41	48.26%
	Top 10 Products	1,13,734.76	1,53,490.41	74.10%
2.	Fiscal 2023			
	Top 5 Products	64,286.44	1,11,759.06	57.52%
	Top 10 Products	91,686.70	1,11,759.06	82.04%
3.	Fiscal 2022			
	Top 5 Products	69,082.49	85,865.83	80.45%
	Top 10 Products	82,636.54	85,865.83	96.24%

While we have reduced our dependency on selected products by expanding our products portfolio, we expect that we will continue to derive a significant portion of our revenue from the group of selected products. Accordingly, any failure on our part to procure and deliver these products efficiently to our customers as per their requirements or not deliver at all, could adversely affect our business, financial condition, reputation and results of operations.

2. ***Our operations are heavily dependent on industries where products are supplied, which includes paints and coatings, printing inks, agro-chemical products, specialty polymers, pharmaceuticals products, specialty industrial chemicals, etc..***

We are primarily engaged in the business of importing and distribution of hydrocarbon-based chemicals of the product family viz. Acetyls, Alcohol, Aromatics, Nitriles, Monomers, Glycols Phenolic, Ketones, and Isocyanates, which are critical raw materials and inputs and have application across wide spectrum of industries like paints and coatings, printing inks, agro-chemical products, specialty polymers, pharmaceuticals products and specialty industrial chemicals. Our revenue from operations is directly linked to the performance of the industries in which our products finds application.

A slowdown in growth of end-use industry customer may adversely affect our revenue from operations. While we believe we are adequately diversified in order to reduce our dependency on selected industries, we cannot assure you that our results of operations and financial conditions would not be adversely impacted in case of any slowdown in the industries in which our products are used.

Our future performance will depend to a significant extent on the overall performance of the industries in which our products are used, which may get affected by a number of macro and micro economic conditions, and other factors including (i) government policies; (ii) disruption/ disturbance in shipping channels; and (iii) prevailing regulatory environment.

In relation to other end-use industries, the demand for our products and margin of our products is dependent on and directly affected by factors affecting such industries. Accordingly, our failure to effectively adapt to such end-use industry related disruptions, could adversely affect our business, results of operations and financial condition.

3. ***We do not have long term agreements with our customers and rely on purchase orders for delivery of our products. Loss of one or more of our customers or a reduction in their demand for our products could adversely affect our business, results of operations and financial condition.***

We do not enter into long-term agreements with our customers. We rely on purchase orders to govern the volume and other terms of our sale of products to our customers. Many of the purchase orders we receive from our customers specify a price per unit and the delivery schedule. While we believe that our relationship with our customers has been built over time and few of our customers have conferred the status of a preferred

supplier on us, resulting in repeat orders from such customers, our relationship with our customers is on a non-exclusive basis and accordingly, our customers may choose to cease sourcing our products and source alternative options which exposes us to a significant increased risk of customer attrition. Absence of any long-term contracts or contractual exclusivity with respect to our business arrangements with such customers poses a challenge on our ability to continue to supply our products to these customers in future. Further, the number of purchase orders that our customers place with us differ from quarter to quarter, which has caused our revenues, results of operations and cash flows to fluctuate in the past and we expect this trend to occasionally continue in the future.

Additionally, our customers have high and stringent standards for product quantity and quality as well as delivery schedules and any failure to meet our customers' expectations and specifications could result in cancellation of orders or the risk of the customer not placing any subsequent orders or might place orders for lesser quantity. There are also a number of factors, other than our performance, that could cause the loss of a customer such as, (a) increase in prices of chemicals and other costs resulting in an increase in the price of our products; (b) changes in customer requirements and preferences; (c) changes in governmental or regulatory policy; (d) slowdown in the customer's industry due to any reasons; and (e) change in technology. Any of these factors may have an adverse effect on our business, results of operations and financial condition.

4. *Our business is working capital intensive involving high level of inventories and trade receivables. We require substantial financing for our business operations. Our indebtedness and the conditions and restrictions imposed on by our financing arrangements could adversely affect our ability to conduct our business.*

We operate on high volume and low margin business model which require us to invest substantial sum in working capital requirements of the Company. Majority of the working capital funds of our Company are blocked due to high inventories and trade receivable level in line with high revenue from operations. As on March 31, 2024, our Company's net working capital (total current assets less total current liabilities) amounted to ₹ 25,800.88 Lakhs as against ₹ 18,120.80 lakhs as on March 31, 2023, and ₹ 16,427.34 lakhs as on March 31, 2022. As on the date of this Draft Red Herring Prospectus, we meet our working capital requirements in the ordinary course of its business from capital, internal accruals, unsecured loans, working capital loans from the Banks etc. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and investors interest in the Company and could adversely impact our Equity Share price.

Our working capital requirements may be affected due to factors beyond our control including force majeure conditions, delay or default of payment by our clients, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised not to place undue reliance on such estimates of future working capital requirements. In the last three (3) financial years, our Company has been able to raise funding from bank as and when the need has arisen and has never delayed and defaulted its financial commitments. However, any failure to service our indebtedness, perform any condition or covenant or comply with the restrictive covenants could lead to a termination of one or more of our credits which may adversely affect our ability to conduct our business and have a material adverse effect on our financial condition and results of operations. We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to renew arrangements for existing funding or to obtain additional financing on acceptable terms and in a timely manner could adversely impact our planned capital expenditure, our business, results of operations and financial condition.

5. *There are pending litigations against our Company, certain of our Promoters, and our Directors. Any adverse decision in such proceedings may render us/them liable to liabilities/penalties and may adversely affect our business, results of operations and financial condition.*

Our Company is involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals or other governmental authorities. The amounts claimed

in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally from us and other parties. Should any new developments arise, such as any change in applicable Indian law or any rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase expenses and current liabilities. Any adverse decision in such legal proceedings may have a material adverse effect on our business, financial condition, results of operations and cash flows.

A summary of outstanding litigation proceedings involving our Company, our Promoters, our Directors and our Group Company as on the date of this Draft Red Herring Prospectus and as disclosed in the section titled “*Outstanding Litigation and Other Material Developments*” in terms of the requirements under the SEBI ICDR Regulations is provided below:

Name of Entity	Criminal Proceedings	Tax Proceeding	Statutory or Regulatory Proceedings	Material Civil Litigation	Aggregate amount involved

By our Company	1	N.A.	N.A.	Nil	₹1,59,74,562
Directors (Other than Promoters)					
Against our Director	Nil	2	Nil	Nil	₹7,44,095
By our Director	Nil	N.A.	N.A.	Nil	Nil
Promoters					
Against our Promoters	Nil	2	Nil	Nil	₹1,96,868
By our Promoters	Nil	Nil	Nil	1	Not Quantifiable
Subsidiaries					
By our Subsidiaries	N.A.	N.A.	N.A.	N.A.	N.A.
Against our Subsidiaries	N.A.	N.A.	N.A.	N.A.	N.A.

Further, except as disclosed in “*Outstanding Litigation and Other Material Developments*” on page 195. We do not have any subsidiaries, due to which the litigations with respect to our subsidiaries have not been included.

If any of these outstanding litigations are decided against our Company, Promoters, Directors or Group Companies, as the case may be, we may need to make provisions in our financial statements that could increase our expenses and current liabilities. In this regard, we may be subject to penalties and regulatory actions including the suspension of our business. There can be no assurance that these litigations will be decided in favor of our Company or in the favor of our Promoter, Directors or Group Company, and such proceedings may divert management time and attention and consume financial resources in their defense or prosecution. An adverse outcome in any of these proceedings may affect our reputation, standing and future business, and could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows.

6. *Our inability to accurately forecast demand or price for our products and to manage our inventory may adversely affect our business, results of operations and financial condition.*

While we forecast the demand and price for our products and accordingly, plan our purchase volumes, any error in our forecast could result in a reduction in our profit margins and surplus inventory, which may result in additional storage cost and such surplus inventory may not be sold in a timely manner, or at all.

If we overestimate our demand, we may incur costs to build storage capacity or purchase more products than required. Our inability to accurately forecast demand for our products and manage our inventory may have an adverse effect on our business, and financial condition. Our ability to maintain as well as expand our international operations is dependent on us providing our products at prices competitive with international as well as local traders.

Further, our business is dependent on robust supply chain management. To that extent, if any of our competitors are able to garner a better and more cost-efficient supply network, they may be able to provide their products at competitive prices as compared to us. Our inability to price our products correctly at the applicable prices may affect the demand for our products and consequently have a material adverse effect on the results of operations and financial condition.

7. *We have partially hedged or in some cases not hedged our foreign currency exposure, which may cause a negative impact to our business and financial conditions in case of fluctuations of foreign currency.*

We have partially hedged or, in some cases, not hedged our exposure to foreign currency fluctuations, related to our import of chemicals for sale in the Indian market. As a result, fluctuations in exchange rates may adversely impact our business and financial condition. Unfavorable movements in foreign exchange rates could lead to increased costs for imported raw materials, thereby reducing our profit margins and affecting our competitiveness. Moreover, inadequate hedging against currency risks exposes us to potential financial losses, which could negatively impact our cash flow, liquidity position, and overall financial performance.

8. *We are dependent on third party transportation providers for the supply and distribution of our products. Any failure or delay in such transportation and logistics arrangements could materially affect our business, our operations and financial condition*

Our business requires smooth supply and transportation of the products which we import and supply to our customers. We are dependent on third-party transportation and logistics providers for various forms of transportation such as sea borne and roads.

For imports, our Company uses services of vessel owners globally for loading of bulk liquid chemical from various major ports and unloading of bulk liquids in our storage tank which are subject to various bottlenecks and evaporation loss beyond our control. We may experience disruption in the transportation of products by ship and delivery of the products to our customers due to bad weather conditions.

We do not have formal contractual relationships with such transportation or logistic companies and freight forwarders. Transportation strikes may also have an adverse effect on supplies and deliveries to and from our customers and suppliers. In addition, products may be lost or damaged in transit for various reasons including theft, occurrence of accidents or natural disasters. This may lead to a delay in delivery of our products which may also affect our business and the results of our operations negatively. A failure to maintain a continuous supply of chemicals or to deliver our products to our customers in an efficient, timely and reliable manner could have a material and adverse effect on our business, financial condition and results of operations. Though such material events have not taken place in the past, any recompense received from insurers or third-party transportation providers may be time consuming and insufficient to cover the cost of any delays and further may not be able to repair our relationships with our affected customers. We may also be affected by an increase in fuel costs, as it will have a corresponding impact on freight charges levied by our third-party transportation providers. This could require us to expend considerable resources in addressing our distribution requirements, including by way of absorbing these excess freight charges to maintain our selling price, which could adversely affect our results of operations, or passing these charges on to our customers, which could adversely affect demand for our products.

9. *Any positive development in import substitution policies may lead to decrease in our import capabilities, decreasing our business opportunity and impacting our cash flow*

We face potential risks associated with import substitution policies in India. These policies aim to promote

domestic production by reducing reliance on imported goods through various incentives and regulations. The implementation of such policies could adversely affect our business model, as they may encourage local manufacturers to produce substitutes for the products we import. This could lead to increased competition from domestic suppliers offering lower prices or better terms, thereby affecting our market share and profitability.

Furthermore, sudden shifts in government policies towards import substitution could disrupt our supply chain and procurement strategies, leading to uncertainties in sourcing products at competitive prices. In addition, increased bureaucratic procedures or trade barriers aimed at promoting domestic manufacturing could lead to delays or additional costs in importing goods, further impacting our operational efficiency and financial performance.

As we navigate the dynamic regulatory environment in India, we remain vigilant in assessing and mitigating the risks associated with import substitution policies to sustain our competitive edge and ensure continued growth in the Indian market.

As such, any import substitution policy, may decrease our imports capabilities which in turn may limit our business opportunities and decrease our cash flow.

10. *Quality of product is very important in our industry and the success of our Company is dependent on the quality of our product and any failure to source products with desired quality may have an adverse effect on our reputation and business.*

We believe that our success is dependent on the sourcing quality products which suit the requirements of our customers. We endeavour to source the products which have desired and superior quality to meet the customers expectation. We believe that we have built strong relationships with our suppliers to ensure to provide the products with consistent specification. In case there are any instances of receiving deteriorated products, for any reason whatsoever, our business, reputation and results of operations and our long-standing relationships with our customers would be affected adversely.

11. *Our insurance coverage may not be adequate to protect us against certain operating and financial loss and this may have a material adverse effect on our business and cash flow.*

Our company has obtained insurance coverage in respect of certain risks which consists of Marine Export Import Insurance Open Policy, Marine Inland (Open) Insurance Policy and Marine Sales Turnover Policy/EXIM Policy. Notwithstanding the insurance coverage that we carry, we may not be fully insured against certain business risks. There are many events that could significantly impact our operations, or expose us to third-party liabilities, for which we may not be adequately insured. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part, or on time. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business, financial condition and results of operations could be adversely affected.

We have obtained insurance coverage for our inventory, and while we are satisfied that our insurance coverage is consistent with industry norms, if any or all of our inventory are damaged in whole or in part and/or its operations are interrupted for a sustained period, there can be no assurance that its insurance policies will be adequate to cover the losses that may be incurred as a result of such events. If we suffer a large uninsured loss, or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition, cash flows and results of operations may be adversely affected.

In addition, our insurance coverage is generally subject to periodic renewal. In the event that premium levels increase, we may not be able to obtain the same levels of coverage in the future as we currently have or we may only be able to obtain such coverage at substantially higher cost. If we are unable to pass these costs on to our customers, the costs of higher insurance premiums could adversely affect our financial condition, cash flows and results of operations. Alternatively, we may choose not to insure, which, in the event of any damage or destruction to our facilities or defects to our products, could adversely affect our business, financial

condition, cash flows and results of operations.

12. ***We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. Although such instances have not happened in the past, there can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

13. ***Our Company's logo is not registered as on date of Draft Red Herring Prospectus. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third-party intellectual property rights.***

As on date of Draft Red Herring Prospectus, we have not registered our logo  under the Trademarks Act, 1999, hence, we do not enjoy the statutory protections accorded to a registered logo. We cannot assure you that any application for registration of our logo in future by our Company will be granted by the relevant authorities in a timely manner or at all. Further, there can be no assurance that third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. We may not be able to detect any unauthorized use or our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly, and the outcome cannot be guaranteed. For further details of our logo. Please refer to chapter "Government Approvals- Intellectual Property" on page 199 of this Draft Red Herring Prospectus.

14. ***Our success depends in large part upon our management team and skilled personnel and our ability to attract and retain such people. The loss of key personnel may have an adverse effect on our business, results of operations, financial condition, cash flow and growth prospects.***

Our Company's performance heavily relies on the expertise and services of our Directors and Key Managerial Personnel (KMP). Their role in shaping our strategic direction and managing operations is crucial for our future growth. The loss of these key individuals and challenges in recruiting suitable replacements could significantly impact our customer relationships, technical expertise, and operational efficiency. The competitive job market in India, especially in our industry, makes it difficult to attract and retain skilled personnel. Even with higher compensation, we may struggle to compete for talent, affecting our ability to carry out our operations smoothly and maintain customer satisfaction.

Moreover, keeping pace with evolving standards and changing customer preferences requires continuous redeployment and retraining of employees. Our inability to do so, or a high attrition rate among our employees, including management and operational staff, could lead to decreased productivity, loss of market knowledge, and increased operational costs. Further, if we are unable to retain or attract such personnel or are unable to locate suitable or qualified replacements, our results of operations may be adversely affected. We may require a long period of time to hire and train replacement personnel when qualified personnel resign from their employment with our Company. These factors could materially and adversely affect our business prospects, financial condition, cash flows, and operational results. For detailed information about our management, refer to the chapter "Our Management" on page 129 of this Draft Red Herring Prospectus.

15. ***Our registered office and storage facilities premises are being utilised by us on leasehold basis and we are subject to terms and conditions imposed on us by the lessor. In any event we are unable to renew such leasehold rights, our business, financial condition and results of operations may be adversely affected.***

Our registered office in Mumbai is taken on leasehold basis from the Mrs. Manjudevi Shyamsundar Chokhani

vide a lease and license agreement executed on April 1, 2021, for a term of 60 months, ending on March 30, 2026. In the event that we are required to vacate our current premises, we would be required to make alternative arrangements and we cannot assure that we will be able to identify and move to new premises within a reasonable period of time and/ or that new arrangements will be on commercially acceptable terms.

Further, we have entered into agreement with certain third parties for storage and handling of certain our products. The use of the storage facility is, therefore, subject to terms and conditions imposed on us by the counterparty, which may be unilaterally amended and our ability to negotiate terms may be limited. We will be required to obtain the consent / approval for any future construction or modification of any structure or building other than the existing storage facility. In any case, if the agreement is not renewed or is terminated, we may be required to relocate or curtail our business and suffer a significant disruption in our operations or have to pay increased charges, which could have an adverse effect on our business, prospects, results of operations, cash flows and financial condition.

16. *Our business operates on a high volume, low margin model, which may impact our profit margins and affect our cashflows.*

Our business operates under a high volume, low margin model, which exposes us to specific risks inherent in this strategy. This model relies on generating significant sales volumes to offset lower per-unit profit margins. While this approach can enhance market penetration and revenue generation, it also entails several inherent challenges.

Firstly, maintaining consistent sales volumes is crucial to achieving profitability. Any fluctuations in demand or disruptions in supply chain logistics could adversely affect our ability to sustain sufficient revenue levels to cover operating costs and achieve profitability targets. Moreover, intense competition within our industry may exert pressure on pricing, potentially leading to margin compression and reduced profitability margins.

Additionally, economic downturns or market shifts could exacerbate these challenges, as consumers and businesses may reduce spending or seek lower-cost alternatives. Such conditions could adversely impact our sales volumes and operational efficiency, thereby posing a risk to our financial health and sustainability.

17. *We are required to obtain, renew or maintain statutory and regulatory permits, licenses and approvals to operate our business operations, and any delay or inability in obtaining, renewing or maintaining such permits, licenses and approvals could result in an adverse effect on our results of operations. We are also required to be in compliance with various laws that are applicable to us, and any non-compliance may have a material adverse effect on our business, financial condition or results of operation.*

Our operations are subject to extensive government regulations, and we are required to obtain and maintain a number of statutory and regulatory permits and approvals under central, state and local government rules in the geographies in which we operate, generally for carrying out our business.

The approvals required by us are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Some of our licenses and approvals are also subject to timely renewal. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business. In addition, these registrations, approvals or licenses are liable to be cancelled or sale of products may be restricted. In case any of these registrations, approvals or licenses are cancelled, or its use is restricted, or are not renewed within the stipulated time-frame, then it could adversely affect our results of operations or growth prospects.

For detailed information about permits and approvals, refer to the chapter “*Government and Other Approvals*” on page 199 of this Draft Red Herring Prospectus.

18. *Any penalty or demand raised by statutory authorities in future will affect our financial position of our Company.*

Our Company is primarily engaged in the business of import and distribution hydrocarbon chemicals which attracts tax liability such as Customs duty, GST, Income Tax, as per the applicable provisions of Law. We are also subject to labour laws and depositing contributions with Provident Fund, etc. Though we have deposited the required returns under various applicable Acts, any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of our Company.

19. *We are dependent on credit facilities from banks, to fund our business operations. Any event where we are unable to obtain, renew or enhance credit limits from the banks, or repay such facilities obtained, would affect our financial position and credit standing.*

We rely on various credit facilities from banks to finance our operations, including working capital requirements. The inability to renew existing credit facilities, obtain additional financing, or enhance current credit facilities due to changes in banking regulations, adverse economic conditions, or our financial performance could adversely affect our cash flow, operations, and overall financial condition. A failure to secure necessary financing could constrain our ability to meet our financial obligations, fund future growth initiatives, and manage day-to-day operations effectively.

As on March 31, 2024, our total indebtedness (short-term as well as long-term) from 13 banks stood at ₹ 29,665.25 lakhs. We may need to avail further loans in the future and if we are unable to do so, or unable to repay the loans, it could potentially impact on our financial stability, operational capabilities and credit standing. For further information, please refer section titled “*Financial Indebtedness*” on page 189 of this Draft Red Herring Prospectus.

20. *We have presented certain supplemental information of our performance and liquidity which is not prepared under or required under Indian GAAP*

We have included certain financial and operational measures in this Draft Red Herring Prospectus, which we believe to be non-GAAP financial measures (“**Non-GAAP Measures**”) and KPIs, in accordance with the SEBI ICDR Regulations. We compute and disclose such KPIs relating to our operations and financial performance as we consider such information to be useful measures of our business and financial performance, and because such measures are frequently used by securities analysts, investors and others to evaluate the operational performance of companies such as us. These KPIs may not be computed on the basis of any standard methodology that is applicable across the industry and therefore may not be comparable to financial and operational measures, and industry-related statistical information of similar nomenclature that may be computed and presented by other companies pursuing similar business.

Further, while after listing of the Equity Shares, we will continue to disclose the KPIs in accordance with the applicable laws, however, as the industry in which we operate continues to evolve, the measures by which we evaluate our business may change. Our internal systems and tools have a number of limitations, and our methodologies or assumptions that we rely on for tracking these metrics may also change over time, which could result in unexpected changes to our metrics, including the metrics we publicly disclose, or our estimates of our category position. In addition, if the internal tools we use to track these measures under-count or over-count performance or contain algorithmic or other technical errors, the data and/or reports we generate may not be accurate. We calculate measures using internal tools, which are not independently verified by a third party. Any real or perceived inaccuracies in such metrics may harm our reputation and adversely affect our stock price, business, results of operations, and financial condition. Further, Non-GAAP measures presented in this Draft Red Herring Prospectus is a supplemental measure of our performance and liquidity that is not required by, or presented in accordance with, Ind AS, Indian GAAP, IFRS, U.S. GAAP or any other GAAP. Further, these Non-GAAP Measures are not a measurement of our financial performance or liquidity and should not be considered in isolation or construed as an alternative to cash flows, profit for the years or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability

or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS, Indian GAAP, IFRS, U.S. GAAP or any other GAAP. In addition, these Non-GAAP Measures are not standardized terms, hence a direct comparison of these Non-GAAP Measures between companies may not be possible. Other companies may calculate these Non-GAAP Measures differently from us, limiting its usefulness as a comparative measure. Although such Non-GAAP Measures are not a measure of performance calculated in accordance with applicable accounting standards, our Company's management believes that they are useful to an investor in evaluating us as they are widely used measures to evaluate a company's operating performance.

21. *Certain sections of this Draft Red Herring Prospectus disclose information from the industry report which has been commissioned and paid for by us exclusively in connection with the Issue and any reliance on such information for making an investment decision in the Issue is subject to inherent risk.*

We have availed the services of an independent third-party research agency, Dun & Bradstreet Information Services India Private Limited ("**D&B**"), appointed by us to prepare an industry report on "Petrochemicals" ("**D&B Report**"), that has been exclusively commissioned and paid for by us, for purposes of inclusion in this Draft Red Herring Prospectus. The Industry Report is available on the website of our Company at www.shivtexchem.com. Our Company, our Promoters and our Directors are not related to D&B.

Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. While we have assumed responsibility for the contents of the report and have taken reasonable care in the reproduction of the information, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Further, the Industry Report is not a recommendation to invest/ disinvest in any company covered in the Industry Report. Accordingly, prospective investors should not place undue reliance on, or base their investment decision solely on this information.

In view of the foregoing, you may not be able to seek legal recourse for any losses resulting from undertaking any investment in the Issue pursuant to reliance on the information in this Draft Red Herring Prospectus based on, or derived from, the Industry Report. You should consult your own advisors and undertake an independent assessment of information in this Draft Red Herring Prospectus based on, or derived from, the Industry Report before making any investment decision regarding the Issue. For further details, kindly refer "*Industry Overview*" on page 93 of this Draft Red Herring Prospectus.

22. *Our funding requirements and the proposed deployment of Net Proceeds are not appraised by any independent agency and are based on management estimates and may be subject to change based on various factors, some of which beyond our control. Any changes in the estimated funding requirements could affect our business and results of operations.*

We intend to use the Net Issue Proceeds towards long term working capital requirements of the company and general corporate purposes. Our funding requirements are based on management estimates and our current business plans and has not been appraised by any bank or financial institution. We intend to deploy the Net Issue Proceeds in financial year 2024-25 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. Whilst a monitoring agency will be appointed for monitoring the utilization of the Gross Proceeds, the proposed utilization of the Gross Proceeds is based on current conditions, internal management estimates and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc. Based on the competitive nature of our industry, we may have to revise our business plan and/ or management estimates from time to time and consequently our funding requirements may also change. Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of the Gross Proceeds. For further details on the use of the Issue Proceeds, please refer chapter titled "*Objects of the Issue*" on page 79 of this Draft Red Herring Prospectus.

23. *Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders' approval.*

We intend to use Net Proceeds from the Issue towards meeting long-term working capital requirements and General Corporate Purposes. For further details of the proposed objects of the Issue, see “*Objects of the Issue*” on page 79 of this Draft Red Herring Prospectus. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 13(8) and 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds without obtaining the shareholders' approval by way of a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, or vary the terms of any contract referred to in this Draft Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

Further, our Promoters would be required to provide an exit opportunity to the Shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI. In light of these factors, we may not be able to undertake variation of objects of the Issue to any unutilized proceeds of the Issue, if any, or vary the terms of any contract referred to in this Draft Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

24. *Some of our loan agreements contain restrictive covenants which may adversely affect our business, results of operations and financial condition.*

As on March 31, 2024, our indebtedness (long term and short term) was ₹ 29,665.25 lakhs. The terms of sanction of such borrowings and certain terms of the financing agreements include covenants, such as requirement to maintain certain security, margins, financial ratios and other restrictive covenants relating to issuance of new shares, changes in capital structure, making material changes to constitutional documents, implementing any expansion scheme, incurring further indebtedness, encumbrances on, or disposal of, assets and paying dividends. There can be no assurance that maintaining or adhering to such covenants will not hinder business development and growth. There can be no assurance that we will be able to comply with these financial or other covenants, or that we will be able to obtain the consents necessary to proceed with the actions which we believe are necessary to operate and grow our business, which may in turn have a material adverse effect on our business and operations. We cannot assure you that we have complied with all such restrictive covenants in a timely manner, or at all, or that we will be able to comply with all such restrictive covenants in the future. Further, during any period in which we are in default, we may not be able to raise, or may face difficulties raising, further financing. For details, see “*Financial Indebtedness*” on page 189 of this Draft Red Herring Prospectus.

25. *As of March 31, 2024, our total borrowings amounted to ₹ 29,665.25 lakhs which also included unsecured loans aggregating to ₹ 3,990.71 lakhs from related parties, which may be recalled at any time and our Company may not have adequate funds to make timely payments or at all.*

As of March 31, 2024, our total borrowings amounted to ₹ 29,665.25 lakhs which also included unsecured loans aggregating to ₹ 3,990.71 lakhs from related parties, which may be recalled at any time. The table below sets out the details of our total borrowings outstanding as on March 31, 2024:

Some of our borrowings are secured, among others, through a charge by way of hypothecation on our assets and personal/corporate guarantee of our promoters / promoter group. As these assets are hypothecated or marked as lien, our rights in respect of transferring or disposing of these assets may be restricted except in the normal course of business. Further, in the event we fail to service our debt obligations, the lenders have the right to enforce the security created in respect of our secured borrowings. If the lenders choose to enforce security and dispose our assets to recover the amounts due from us, our business, results of operations, financial condition and cash flows may be adversely affected.

In addition, certain unsecured borrowings availed by us from related parties may be recalled at any time. In the event that the related parties seek repayment of any such unsecured loan, our Company may need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially and adversely affect our business, results of operations, financial condition and cash flows. For further details, see “*Financial Indebtedness*” on page 189 of this Draft Red Herring Prospectus.

26. ***Our ability to pay dividends in the future will depend on a number of factors, including our profit after tax for the respective fiscal year, our capital requirements, our financial condition, our cash flows and applicable taxes, including payment of dividend distribution tax.***

Our Company has not declared any dividend since incorporation. Our ability to pay dividends in the future will depend on a number of factors, including our profit after tax for the fiscal year, our capital requirements, our financial condition, our cash flows and applicable taxes, including payment of dividend distribution tax. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and subsequent approval of our Shareholders and will depend on factors that our Board and Shareholders deem relevant. We may decide to retain all our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. We cannot assure you that we will be able to pay dividends in the future.

27. ***We have certain contingent liabilities which may adversely affect our financial condition.***

As on March 31, 2024, our Company had the following contingent liabilities:

Particulars	(₹ in lakhs)	
	As at 31.03.2024	
Bills Payables (Letter of Credit & Buyer's Credit) with Bank	10,465.74	

In the event that any of these contingent liabilities materialize, our financial condition may be adversely affected. For further information, please refer chapter titled “*Restated Financial Information – Contingent liabilities*” on page 170 of this Draft Red Herring Prospectus.

28. ***We have experienced negative cash flows from operation activities in the prior periods.***

Following is the summary of cash flow statement for fiscal 2022, fiscal 2023 and fiscal 2024:

Net increase / (decrease) in cash & cash equivalents	8,849.69	3,016.87	4,688.40

For further details, see “*Management's Discussion and Analysis of Financial condition and Results of Operations*” and “*Restated Financial Information*” on pages 179 and 150 respectively of this Draft Red Herring Prospectus. Any negative cash flows in the future could adversely affect our business, results of operations and financial condition.

29. ***Our Promoters and their relatives have provided personal and/or corporate guarantees for loan facilities obtained by our Company, and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters/Directors and thereby, impact our business and operations.***

Our individual promoters and their relatives viz., Hemanshu S. Chokhani, Shyamsundar Chokhani, Vikas Pavankumar, Manju Devi Chokhani and Neha Hemanshu Chokhani and our corporate promoters viz., Pavan Kumar Sanwaria Realty Private Limited and Hemanshu Syntex Private Limited have provided personal and/or corporate guarantees towards certain financing facilities taken by our Company. Any default or failure by us to repay the indebtedness in a timely manner, or at all, could trigger repayment obligations of our guarantors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoters or Promoter Group of our Company, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that these individuals withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details, please refer the chapter titled “*Financial Indebtedness*” on page 189 of this Draft Red Herring Prospectus.

II. External Risks

30. ***The business segment in which we operate is highly competitive, loss of market share to our competitors may adversely affect our business operation and financial condition.***

Players in chemical business generally compete with each other on attributes such as quality of product,

pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Growing competition or loss of customers to these competitors may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

31. ***Price of our product is not controllable and determined based on multiple uncontrollable factors such as crude oil and other fossil fuels, shipping cost, technology of manufacturers, foreign trade relations, product availability, geopolitical situation, etc. This may impact our ability to set a price which is advantageous to our business.***

The pricing of our products is subject to significant volatility influenced by multiple external factors beyond our control. Factors such as fluctuations in crude oil and other fossil fuel prices, varying shipping costs, technological advancements affecting manufacturing efficiencies, foreign trade relations impacting tariffs or duties, product availability dynamics, and geopolitical tensions can collectively impact the cost structure of our imported products.

These uncontrollable variables pose challenges in maintaining stable pricing strategies that are advantageous to our business. Sudden spikes in raw material costs or disruptions in supply chains due to geopolitical events or regulatory changes can lead to increased procurement expenses. Conversely, competitive pressures or economic downturns may necessitate strategic pricing adjustments to sustain market competitiveness and profitability.

As a result, our ability to effectively set and maintain optimal pricing levels may be compromised, potentially affecting our margins, revenue streams, and overall financial performance. We continually monitor and assess these external factors, employing proactive strategies to mitigate risks and optimize pricing strategies amidst a volatile global economic landscape.

32. ***Any fluctuations in prices of our materials or shortage in supply of chemicals for trading in our products, could adversely impact our business and our profitability.***

Our Company is dependent on the various chemicals and packaging materials required for the trading of our products. Thus, we are exposed to risk of upward fluctuations in the prices of various chemicals and packing materials and their availability. Also, we have not entered into any supply agreements with our suppliers and all chemicals are bought by our Company from various suppliers on order to order basis. Any upward fluctuation in the prices of the major chemical or shortage in supply of any major chemical would result in increase of cost price which may adversely impact the business and profitability of the Company. In case we are not able to pass on any such increase to the consumers because of competition or otherwise, it may affect the profitability of the Company.

33. ***Our business and activities may be affected by the competition law in India.***

On March 4, 2011, the Government of India notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. The combination regulation provisions require that acquisition of shares, voting rights, assets or control or mergers or amalgamations which cross the prescribed asset and turnover based thresholds shall be mandatorily notified to and pre-approved by the CCI. In addition, on May 11, 2011, the CCI issued the Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011 which sets out the mechanism for implementation of the combination regulation provisions under the Competition Act.

If we are adversely impacted, directly or indirectly, by any provision of the Competition Act, or its application or interpretation, generally or specifically in relation to any merger, amalgamation or acquisition proposed by us, or any enforcement proceedings initiated by the CCI, either suo moto or pursuant to any complaint, for alleged violation of any provisions of the Competition Act it may have a material adverse effect on our

business, financial condition and results of operations.

- 34. *We are subject to risks arising from interest rate fluctuations, which could reduce our profitability and adversely affect our business, financial condition and results of operations.***

Interest rates for borrowings have been increasing in recent times. We are availing term loan and working capital loan facilities from our bankers and any increase in interest rate and a consequent increase in the cost of servicing such debt may have an adverse effect on our results of operations and financial condition. Changes in prevailing interest rates affect our interest expenses in respect of our borrowings and our interest income in respect of our interest on our deposits with banks. Upward fluctuations in interest rates may increase our borrowing costs, which could impair our ability to compete effectively in our business relative to competitors with lower levels of indebtedness. As a result, our business, financial condition, cash flows and results of operations may be adversely affected. In addition, we cannot assure you that difficult conditions in the global credit markets will not negatively impact the cost or other terms of our existing financing as well as our ability to obtain new credit facilities or access the capital markets on favorable terms.

- 35. *The demand for our products is dependent on the performance of chemical industry as a whole, any downturn or cyclical fluctuation in the chemical sector could materially affect our business and financial performance.***

Our Company is primarily engaged in the trade of hydro-carbon based chemicals, which finds their applications in varied range of industries. Consequently, our business is dependent on the performance of the chemical industry. In the event of any downturn or cyclical fluctuation in the chemical sector or any developments that make our products less economically beneficial, may have adverse effects on our financial condition and results of operations. Our business, financial condition and results of operations have been and will continue to be largely dependent on the performance of, and the prevailing conditions affecting the Textile & chemical industry.

- 36. *Technology failures or Cyber-attacks or other security breaches could have a material adverse effect on our business, results of operation or financial condition.***

IT systems are critical to our ability to manage our operations. Our IT systems enable us to coordinate our operations, from planning, product ordering, invoicing, delivery, customer relationship, management and decision support. If we do not allocate and effectively manage the resources necessary to build and sustain the proper IT infrastructure, we could be subject to transaction errors, processing inefficiencies, customer service disruptions and, in some instances, loss of customers. We face cyber threats, threats to the physical security of our facilities and employees, the potential for business disruptions associated with IT failures, natural disasters, or public health crises. We have installed anti-virus software to prevent our systems and infrastructure from being infected and crippled by computer viruses. All our internet facing servers installed at all our data centres as well as at all our offices are also secured with firewalls and intrusion preventions systems to prevent hacking. If we are unable to protect sensitive information, our customers could question the adequacy of our threat mitigation and detection processes and procedures. Due to the evolving nature of these security threats, the impact of any future incident cannot be predicted.

- 37. *COVID-19 or the outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.***

COVID-19 or the outbreak of any other severe communicable disease could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. A rapid increase in severe cases of infections and subsequent deaths where measures taken by governments fail or

are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. The spread of COVID- 19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or steps on what we believe would be in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which the COVID- 19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of COVID-19 and the actions taken globally to contain COVID-19 or treat its impact, among others.

ISSUE RELATED RISKS

38. ***After this Issue, the price of the Equity Shares may be volatile, or an active trading market for the Equity Shares may not develop.***

Prior to this Issue, there has been no public market for the Equity Shares. The trading price of the Equity Shares may fluctuate after this Issue due to a variety of factors, including the results of operations and the performance of our business, competitive conditions, general economic, political and social factors, volatility in the Indian and global securities markets, the performance of the Indian economy and significant developments in India's the financial year regime. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue, or that the price at which the Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

39. ***Future issuances or sales of the equity shares could significantly affect the trading price of the Equity Shares and the grant of stock options under our employee stock option schemes may result in a charge to our profit and loss account and adversely impact our results of operations.***

Any future issuance of equity shares by us, the disposal of our equity shares by any of our major shareholders or our issuance of stock options under our existing or future employee stock options schemes (ESOPs) could dilute your shareholding, adversely affect the trading price of our Equity Shares or impact our ability to raise capital through another offering of securities. In addition, any perception by investors that such issuance or sales of equity shares by our major shareholders may occur may significantly affect the trading price of our Equity Shares.

40. ***There are restrictions on daily movements in the price of Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Subsequent to listing, we will be subject to a daily circuit breaker imposed on listed companies by all stock exchanges in India which does not allow transactions beyond certain volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on the Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The Indian stock exchanges are not required to inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the price of Equity Shares. As a result of this circuit breaker, there can be no

assurance regarding the ability of shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

- 41. *There is no guarantee that the Equity Shares will be listed on stock exchange in a timely manner or at all, and any trading closures at stock exchange may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, permission for listing of the Equity Shares will not be granted until after those Equity Shares have been issued and allotted. Approval for listing and trading requires all other relevant documents authorizing the issuing of the Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares.

- 42. *A third party could be prevented from acquiring control of us because of the anti-takeover provisions under Indian law.***

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the takeover regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that the interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Indian takeover regulations.

- 43. *You will not be able to sell immediately on an Indian stock exchange any of the Equity Shares you purchase in the Issue.***

The Equity Shares will be listed on the SME platform of BSE. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Investors' book entry, or demat accounts with depository participants in India are expected to be credited within two working Days of the date on which the basis of allotment is approved by Designated Stock Exchange. Thereafter, upon receipt of final approval from the Designated Stock Exchange, trading in the Equity Shares is expected to commence within seven Working Days of the date on which the basis of allotment is approved by the Designated Stock Exchange. We cannot assure you that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence within the time periods specified above.

- 44. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.***

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India, if securities transaction tax has been paid on the transaction. Any gain realized on the sale of shares held for more than 36 months to an Indian resident, which are sold other than on a recognized stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of unlisted equity shares held for a period of 24 months or less which are sold other than on a recognized stock exchange and on which no STT has been paid, may be subject to short term capital gains tax at relatively higher rate as compared to the transaction where STT has been paid in India.

- 45. *QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Issue Closing Date.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Issue within six (6) Working Days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing.

46. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. There can be no assurances that investors who are allotted Equity Shares through the Issue will be able to resell their Equity Shares at or above the Issue Price.

47. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between nonresidents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI, or any other government agency, can be obtained on any particular terms or at all.

48. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

49. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

50. ***Our Company's revenues and profits are difficult to predict and can vary significantly from quarter to quarter. This could cause our share price to fluctuate.***

Our Company's quarterly operating results may fluctuate from quarter to quarter depending upon the seasonality of export and import shipments. Therefore, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as an indication of our Company's future performance. It is possible that in the future some of our Company's quarterly results of operations may be below the expectations of market analysts and our investors, which could lead to a significant decline of the share price of the Equity Shares.

51. ***Our assets and operations are located in India, and we are subject to regulatory, economic and political uncertainties in India and a significant change in the central and state governments' economic liberalization and deregulation policies could disrupt our business.***

Under the foreign exchange regulations currently in force in India, transfers of shares between nonresidents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI, or any other government agency, can be obtained on any particular terms or at all.

52. ***Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.***

Our Articles of Association and applicable law govern our corporate affairs. Legal principles related to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company incorporated under the laws of another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Consequently, investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation incorporated under the laws of another jurisdiction.

Global Macroeconomic Scenario¹

Global economic activity is expected to clock a growth of 3.2% in 2024, which is identical to the estimated growth recorded during 2023. Although this represents a modest growth outlook, the one positive factor is the balancing out of the risks to global growth, compared to previous years. In addition to the softening of risks, the global economy appears to have staved off any imminent risk of recession.

Global economic growth will be headlined by emerging markets & developing economies (largely dominated by India, China, Brazil, Russia). Asian economies within the bloc is expected to grow by 5.2% in 2024 and further by 4.9% in 2025. Although China is expected to witness sluggish growth during the period, Indian economy is showing signs of strong growth. Continued strengthening of domestic demand and a rising working age population are two of the key factors that would be driving the growth in India.

The emerging markets & developing economies bloc is expected to grow by 4.2% in 2024 and 2025. Meanwhile the economic growth in advanced economies is expected to rise from 1.6% in 2023 to 1.7% in 2024 and 1.8% in 2025.

Economic growth in the US and European area is expected to be marginally better in 2024. Although Europe experienced a less robust performance in 2023, the recovery in 2024 is expected to be driven by increased household consumption as the impact of energy price shocks diminishes and inflation decreases, thereby bolstering real income growth.

India Economic Growth Scenario

¹ Note: Advanced Economies and Emerging & Developing Economies are as per the classification of the World Economic Outlook (WEO). This classification is not based on strict criteria, economic or otherwise, and it has evolved over time. It comprises of 40 countries under the Advanced Economies including the G7 (the United States, Japan, Germany, France, Italy, the United Kingdom, and Canada) and selected countries from the Euro Zone (Germany, Italy, France etc.). The group of emerging market and developing economies (156) includes all those that are not classified as Advanced Economies (India, China, Brazil, Malaysia etc.). Realizing the need to impart external stimuli, the Government stepped up its spending on infrastructure projects which in turn had a positive impact on economic growth. The capital expenditure of central government increased by 37.4% increase in capital expenditure (budget estimates), to the tune of Rs 10 trillion in the Union Budget 2023-2024. The announcement also included 30% increase in financial assistance to states at Rs 1.3 trillion for capex. The improvement was accentuated further as the Interim Budget 2024-2025 announced an 11.1% increase in the capital expenditure outlay at Rs 11.11trillion, constituting 3.4% of the GDP. This has provided the much-needed confidence to private sector, and in turn attracted private investment.

Economic Growth Outlook

Looking ahead to 2024, India's projected GDP growth of 6.8% in 2024 stands out as the fastest among major emerging markets, significantly outpacing China's 4.6% and Brazil's 2.2%. This robust growth trajectory is expected to sustain at 6.5% annually from 2025 to 2029, reflecting strong economic fundamentals and continued momentum.

This decent growth momentum in near term (2024) is accompanied by a slowdown in inflation, as well as various other factors in the medium to long term that will support the economy. These include enhancements in physical infrastructure, advancements in digital and payment technology, improvements in the ease of doing business and a higher quality of fiscal expenditure to foster sustained growth.

On the demand side, improving employment conditions and moderating inflation are expected to stimulate household consumption. Further, the investment cycle is gaining traction, propelled by sustained government capital expenditure, increased capacity utilisation and rising credit flow. Additionally, there are positive signs of improvement in net external demand, as reflected in the narrowing merchandise trade deficit. Despite the supply disruptions, exports clocked positive y-o-y growth in December 2023 and January 2024.

From uplifting the underprivileged to energizing the nation's infrastructure development, the Government has outlined its vision to propel India's advancement and achieve a 'Viksit Bharat' by 2047 in the interim budget announced on 1st Feb 2024. Noteworthy positives in the budget include achieving a lower-than-targeted fiscal deficit for FY24 and setting a lower-than expected fiscal deficit target for FY25, proposing dedicated commodity corridors and port connectivity corridors, providing long-term financing at low or nil interest rates to the private sector to step up R&D in the sunrise sectors.

Achieving a reduced fiscal deficit of 5.8% in FY24 and projecting a lower than-anticipated fiscal deficit of 5.1% are positive credit outcomes for India. This showcases the country's capability to pursue a high-growth trajectory while adhering to the fiscal glide path. There has been a significant boost to capital expenditure for two consecutive years; capital expenditure – which is budgeted at 3.4% of GDP (INR 11.1 trillion/USD 134 bn) for 2024/25 – is at a 21-year high (3.3% of GDP in 2023/24). The enhancement of port connectivity, coupled with the establishment of dedicated commodity corridors (energy, mineral and cement), is poised to enhance manufacturing competitiveness. This strategic move aims to fulfil India's export targets and reduce logistics costs.

The push to position India as a global manufacturing hub through Make in India and PLI schemes is further boosting industrial output, exports, and domestic production capabilities. Compared to other major emerging markets facing demographic and economic challenges, India's combination of demographic strengths, policy reforms, and strategic initiatives positions it as a standout performer and a significant driver of global economic growth in the foreseeable future.

Petrochemical Consumption in India

Annual Consumption Volume

India has been one of the largest consumers of chemicals & petrochemical products in Asia Pacific region for the bulk of the last 10 – 15 years. The rapid growth in India’s manufacturing infrastructure during this time period have created strong demand for a wide range of chemical & petrochemical input materials and intermediates. As India became one of the fastest growing economies in the world, the annual growth in demand for chemical & petrochemical input materials and intermediates too increased at a fast clip.

The spread of Covid-19 pandemic impacted the petrochemical demand in India in FY 2021 – like it did across the globe. Subsequently the annual consumption of petrochemicals dropped to 43 million tons per annum (MTPA) in FY 2021, as against 48.3 MTPA in the previous year. However, the resumption in economic activity in FY 2022 and subsequent years – as the impact of Covid pandemic wore off – have helped the industry recoup its growth.

Annual consumption volume rose to 48.2 MTPA in FY 2022 and further to approximately 57 MTPA in FY 2024³.

India v/s Global Consumption Pattern

Despite the strong growth in petrochemical consumption in the recent years, per capita petrochemical consumption in India remains low when compared to both global average as well as other fast growing developing economies. For example, the per capital consumption of polyester in India is only 1.4 kgs as against 6.6 kg for China and 3.3 kg for world. Similarly, the per capital consumption of polymer in India is estimated to be 4 kg as compared to global average of 20 kg⁴. These disparities highlight the significant potential for growth in India's petrochemical consumption as the country continues to develop its industrial base and expand its production capacities to meet both domestic and global demand.

³ Annual production data for FY 2023 and FY 2024 is yet to be released by the Government of India. In the absence of this data D&B have estimated the production volumes for FY 2023 and 2024 using the IIP growth in chemicals, chemical products & refined petroleum products during those two years as proxy. Basis this proxy growth rate, D&B have estimated the production volume for FY 2023 and 24. These estimates together with import and export data has been used to arrive at the estimated consumption volume for FY 2023 and 24.

⁴ Demand and Availability of Petrochemicals Including Import and Exports, Lok Sabha Secretariat, December 2020

Several factors contribute to the lower per capita consumption of petrochemicals in India. The country's large population, coupled with lower levels of industrialization and urbanization compared to developed nations, results in relatively modest consumption levels. However, with ongoing industrialization, urbanization, and rising income levels, the demand for petrochemical products is expected to grow significantly.

While India's current per capita consumption of petrochemicals is significantly lower than the global average, the country's economic growth, government initiatives, and rising domestic and export demand present substantial opportunities for the petrochemical industry. As India continues to industrialize and urbanize, the demand for petrochemical products will likely surge, supporting the country's economic expansion and enabling it to address the needs of its diverse end-use sectors.

Feedstock Scenario

India's crude oil imports decreased by 0.2% in FY 2024, yet import dependency remains high, with over 85% of crude oil being imported and refined into fuels like petrol and diesel. Despite importing a similar quantity of crude oil as compared to last year, India spent Rs 1,101 thousand crores in FY 2024 due to falling international crude oil prices. Petroleum products consumption in India increased by 4.6% to 233.3 million metric tonnes (MMT) in FY 2024, while domestic production remained steady.

A report from the oil ministry indicates that the growth in petroleum product consumption—an indicator of oil demand—in FY 2024 was driven by a 6.4% increase in motor spirit (MS) or petrol, 4.4% in high-speed diesel (HSD), 11.8% in aviation turbine fuel (ATF), and 14.3% in naphtha consumption, alongside increases in LPG, lubes, bitumen, petcoke, and light diesel oil (LDO). In comparison, product consumption in the previous year was 223 MMT. Domestic crude oil production in FY 2024 was 29.4 MMT, nearly unchanged from 29.2 MMT in the previous year. Consequently, India's crude oil imports were at their highest, meeting 87.7% of its oil requirements from foreign supplies. This dependency was 87.4% in FY 2023 and 85.5% in FY 2022.

India's high import dependency poses challenges amid rising oil prices due to geopolitical tensions in the Middle East and controlled supply from OPEC+. To mitigate the impact of rising oil prices, the Indian government has urged oil explorers ONGC and Oil India Limited (OIL) to boost production. ONGC aims to reverse years of declining production by FY 2025, targeting new output from its Krishna Godavari (KG) basin to gradually raise overall oil production by 11% and gas production by 15%.

On the trade front, India has diversified its sources of crude oil, now purchasing from 37 countries, up from 29 countries previously. This strategy ensures energy availability at affordable prices. Notably, Russia, which accounted for only 0.2% of India's total crude requirements before 2022, now supplies around 30% of total crude imports.

Demand Drivers

India's petrochemical industry is experiencing a significant growth surge, fuelled by a confluence of economic, social, and infrastructural factors. The key drivers propelling this demand:

Strong Industrial Growth

Industrial activity in India has been growing at a rapid pace. A supportive policy environment enabled by the Government, attractive investment scenario, and strong demand for industrial products have all led to this rapid growth. Subsequently, the demand for input material and intermediate products required by the industrial segment has gone up. Since chemicals & petrochemicals form one of the key input material used by the industrial segment, the strong growth in industrial product naturally translated into a strong demand for chemical and petrochemical products.

Infrastructure Development

The Indian government's focus on infrastructure development creates a massive demand for construction materials with significant petrochemical content.

Petrochemical Applications:

Pipes and Insulation: Petrochemical-based plastics are used for manufacturing durable and lightweight pipes for water supply, sewage systems, and electrical cables. Similarly, petrochemical-derived insulation materials like foam help regulate temperature in buildings.

Coatings and Sealants: Petrochemical-based paints, coatings, and sealants are essential for protecting bridges, buildings, and other infrastructure from harsh weather conditions and corrosion.

Rapid Urbanization

Rapid urbanization fuels a construction boom, leading to a surge in demand for building materials with significant petrochemical content.

Petrochemical Consumption in Urbanization:

Building Materials: Construction utilizes a variety of petrochemical products like PVC pipes, electrical wires with plastic insulation, and flooring materials like vinyl tiles.

Paints and Coatings: As mentioned earlier, paints and coatings are crucial for protecting buildings and enhancing aesthetics, further driving demand for petrochemicals.

Furniture: Modern furniture often incorporates petrochemical-based plastics, laminates, and synthetic fibers, impacting consumption.

Strong demand from Automobile industry

India's booming automotive sector is a major consumer of petrochemicals for various car components.

Petrochemicals in Automobiles:

Essential Components: Tires, hoses, belts, and various interior parts like dashboards and seats rely heavily on different types of petrochemicals like rubber, synthetic polymers, and plastics.

Lightweighting Trend: The automotive industry's focus on lightweight materials for fuel efficiency is driving demand for advanced petrochemical-based composites that offer strength and weight reduction.

Packaging Revolution:

The rise of e-commerce and convenience food options has led to a significant increase in the use of plastic packaging. This trend is expected to continue, further boosting demand for polymers used in packaging materials.

Limited Alternatives and Affordability:

Compared to traditional materials like metal or wood, petrochemical-based products often offer advantages in terms of cost-effectiveness, ease of use, and versatility. This makes them a preferred choice for many applications, especially in a price-sensitive market like India.

Demand from Paints & Coatings Industry

The annual turnover in Indian paint industry is estimated to be INR 746 Bn in FY 2024, growing by a CAGR of nearly 15% during the last four years. Approximately 809 thousand tons of paint & varnish was consumed in India in FY 2024, out of which nearly 96% was domestically produced. India is one of the leading manufacturers of paints & coatings in the world and is counted as one of its largest consumers. The annual production of paints & varnish in India stood at nearly 779 thousand tons in FY 2024.

Indian paint industry is witnessing strong demand, mainly from a robust construction sector which is one of the leading consumers of paints & coatings in India. It is estimated that nearly two third of demand for paints in India comes from the real estate sector. Hence a growth in real estate construction commensurately translates into a strong demand for paints.

Indian real estate sector has been witnessing rapid growth in the recent years on the back of urbanization, Government focus on housing development, increasing income levels, and ease of access to mortgage products. Moreover, improvement in business sentiment and a supportive policy environment has triggered expansion in construction in commercial real estate too. All these factors are expected to remain positive in the long term, and this points to a continued growth in real estate industry in India.

On the back of this optimistic demand scenario, the Indian paint industry is expected to increase reach approximately INR 1,000 Bn in turnover by FY 2027⁵. Assuming the growth rate till FY 2027 continues, the industry is expected to touch an annual revenue of INR 1,341 Bn by FY 2030. The strong demand is expected to prompt paint manufacturers to expand their capacity. By the end of this decade the domestic production of paints in India is expected to reach approximately 1,105 thousand tons.

Impact on Petrochemical Demand

A wide range of chemicals & petrochemicals are used in paint manufacturing where it serves the purpose of binders, solvents, additives to name a few. Some of the commonly used binders in paint manufacturing include acrylic polymers, alkyd polymers, epoxy polymers, latex, and phenolic resins. Meanwhile petrochemical compounds like Xylene, Toluene, Alcohols (n-butanol, isopropanol), and ketones are used as solvents in paint manufacturing. In addition, a wide range of chemicals & petrochemicals are used as additives and pigments in paints.

The demand for these petrochemicals from paint industry is tied to the production of paints & coatings. India has emerged as one of the leading manufacturers of paints, producing nearly 779 thousand tons of paints & varnishes in FY 2024. The strong growth in real estate construction in the country points to continued strong demand for paints in India. As a result, the domestic production volume of paints & varnishes is expected to cross 1000 thousand tons per annum by FY 2030. This strong growth in domestic paint production would in turn create a strong demand for all the chemicals & petrochemical input materials and intermediates used by the paint industry.

Demand from Printing Ink Industry

Growth in Printing Ink Industry

Globally, the printing ink industry is estimated to be worth USD 15 Bn while Indian printing ink market is estimated to be around USD 1 Bn⁶. Meanwhile the domestic consumption of printing ink is estimated to be over 400,000 tons and has been increasing steadily. The demand for printing ink is fuelled by strong demand coming from packaging industry. Going ahead, the Indian printing ink market is expected to grow by a CAGR of nearly 8% over the next few years⁷. Assuming this growth rate, the turnover in Indian printing ink industry would hit nearly USD 1.7 Bn by the end of this decade.

Expansion of the Packaging Industry

One of the primary drivers of the printing ink industry in India is the rapid expansion of the packaging industry. Packaging is the fifth largest economic sector in the country, and India is one of the fastest growing packaging markets in the world. According to Indian Institute of Packaging (IIP), the per capita consumption of packaging products in India has increased by nearly 200% during 2010 -2020 period, increasing from nearly 4.3 kg per person per annum in FY 2010 to nearly 8.6 per person per annum in FY 2020.

The Indian market for packaging products was worth nearly USD 50 Bn in 2019 and is expected to reach USD 204 Bn in 2025. According to Packaging Industry Association of India (PIAI), the industry is growing by a CAGR of 22 – 25%. Considering this growth forecast, the Indian market for packaging products is expected to reach approximately USD 552 Bn by the end of this decade.

Source: Packaging Industry Association of India, Invest India, D&B Estimates

With increasing urbanization and changes in consumer lifestyles, there is a heightened demand for packaged goods. This surge necessitates the use of high-quality printing inks for various packaging materials such as flexible packaging, labels, and corrugated boxes. These materials require specialized inks to meet aesthetic and functional needs, thereby driving the growth of the printing ink market. This growth is significantly supported by the printed packaging segment, which accounts for about 27% of the total demand for printing inks. Newspapers contribute 20%, while commercial printing, promotional materials, and printed advertising together make up around 19%.

The packaging industry's growth is expected to continue, given the rising demand for consumer goods, thus sustaining the demand for printing inks.

Growth of the E-commerce Sector

The booming e-commerce sector in India is another significant demand driver for printing inks. The Indian e-commerce industry is projected to reach USD 300 billion by 2030, experiencing significant growth. The rise of online shopping has led to an increased need for printed packaging materials, as e-commerce companies strive to enhance the unboxing experience for consumers. Vibrant and high-performance printing inks are essential for creating attractive and durable packaging. As more consumers shift towards online shopping, the demand for quality printed packaging is expected to grow, further boosting the printing ink market. This trend underscores the critical role of e-commerce in driving the demand for printing inks in India.

Advertising and Promotional Activities

Advertising and promotional activities significantly contribute to the demand for printing inks in India. Businesses are increasingly investing in marketing efforts to attract and retain customers, leading to a heightened need for high-quality printed materials such as banners, posters, flyers, and brochures. Printing inks play a crucial role in achieving vivid colors and sharp images, making promotional materials more appealing and effective. Commercial printing, promotional materials, and printed advertising together make up around 19% of the total demand for printing inks. The growing emphasis on advertising and promotional campaigns drives the demand for printing inks, as companies seek to differentiate their products and services in a competitive market.

Technological Advancements and Innovations

Technological advancements and innovations in the printing ink industry are also key demand drivers. The development of eco-friendly and high-performance inks has opened new market opportunities and catered to the evolving needs of various sectors. Innovations such as UV-curable inks, water-based inks, and other specialized formulations have enhanced the quality and sustainability of printed materials. These advancements not only improve the performance and appeal of printed products but also meet regulatory requirements and consumer preferences for environmentally friendly options. As a result, technological progress continues to drive the demand for advanced printing inks in India.

Petrochemical feedstock used by printing ink industry.

The printing ink industry in India is a significant consumer of petrochemical feedstocks, crucial for producing the various pigments and resins used in inks. This demand is driven by several key factors that interlink the growth of the printing ink sector with the consumption of petrochemicals. Firstly, the need for pigments, essential inputs for printing inks, is on the rise. Petrochemical-based pigments such as carbon black, Victoria blue, and phthalocyanine blue are extensively used.

As the printing industry expands, particularly in sectors like packaging, newsprint, publishing, and commercial printing, the demand for these pigments grows correspondingly. The vibrant and varied colors required in modern printing processes depend heavily on these specialized pigments, making petrochemicals a backbone of the industry. In addition to pigments, resins like phenolic resins, which provide the necessary adhesive properties for inks, are in high demand. These resins are also derived from petrochemicals and are indispensable for producing high-quality printing inks. As the printing ink industry continues to grow, the requirement for these resins increases, further driving the demand for petrochemical feedstocks.

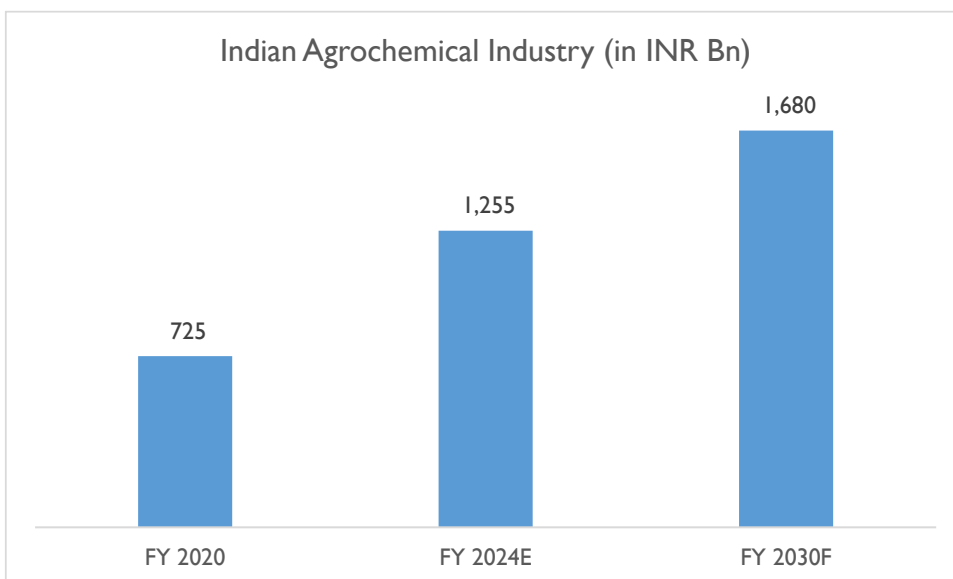

The ongoing trend towards high-performance and eco-friendly inks also stimulates demand for advanced petrochemical feedstocks. As the industry seeks to develop inks with lower environmental impact and better performance characteristics, the requirement for specialized petrochemical products, including high-purity solvents and advanced polymer resins, increases. This, in turn, drives innovation and demand in the petrochemical industry, highlighting the interconnected nature of these sectors.

In conclusion, the expansion of the printing ink industry significantly boosts the demand for petrochemical feedstocks. As the industry grows and evolves towards more advanced and sustainable products, the need for

specialized petrochemical inputs will continue to rise, fostering further development and innovation within the petrochemical sector.

Demand from Agrochemical Industry

India is the fourth-largest producer of agrochemicals globally, following the United States, Japan, and China, and is also the fourth net exporter of agrochemicals and the thirteenth-largest exporter of pesticides and disinfectants. Indian agrochemical industry is estimated to be worth INR 1,255 Bn in FY 2024, and it is expected to reach a turnover of INR 1,680 Bn by FY 2030. The rising demand in the agricultural segment is driving the growth of agrochemicals in India.

Source: CMIE Industry Outlook, D&B Estimates

Agrochemicals, which include insecticides, herbicides, fungicides, and other plant-protection chemicals, rely heavily on petrochemical feedstocks for their production. Organic chemicals derived from petrochemicals are crucial in synthesizing these agrochemicals. According to the Ministry of Chemicals' India's installed capacity for insecticide and pesticide manufacturing stands at approximately 324 thousand MT, with annual production reaching 138 thousand MT in FY 2023 (up to September 2022). The industry encompasses around 280 molecules and 800 agrochemical formulations registered in India, underscoring the significant dependency on petrochemical-derived raw materials.

Key factors driving demand for agrochemicals

The demand for agrochemicals in India is rising rapidly, driven by the need to enhance crop productivity and protect against pests and diseases. As the agricultural sector expands to feed a growing population, farmers are increasingly adopting insecticides, herbicides, and fungicides. This growing reliance on agrochemicals is essential for improving yields and ensuring food security. Consequently, the agrochemical market in India is experiencing robust growth, supported by both domestic consumption and export opportunities.

Impact of Agrochemical Industry on petrochemical feedstock

Agrochemicals play a pivotal role in driving agricultural productivity and ensuring food security for India's population. The government's fast-tracking of agrochemical projects suggests a positive trajectory for the industry, with export revenues projected to reach USD10 billion in the coming years. The future of India's agrochemical industry looks promising, with revenues expected to grow significantly, driven by favourable government initiatives, increased exports, and stable domestic and global demand.

The growth of the agrochemical industry in India is set to significantly impact the market for petrochemical feedstocks. As the demand for agrochemicals, including insecticides, herbicides, and fungicides, continues to rise domestically, there is also a notable increase in exports. Annual exports of agrochemicals reached INR 432 billion in FY 2023, with a CAGR of 18% between FY 2019 and FY 2023. This export growth is driven by competitive costing, superior product quality, and favourable export promotion measures. The increasing domestic demand combined with robust export performance underscores a rising need for petrochemical-derived raw materials.

Organic chemicals such as methanol, acetic acid, phenol, and acetone, essential for synthesizing agrochemicals, will see heightened demand. Additionally, polymers and synthetic fibers used in packaging agrochemical products will further drive the need for petrochemical feedstocks. This surge in demand is likely to prompt the petrochemical industry to expand production capacities, optimize operations, and invest in new technologies to meet the growing requirements of the agrochemical sector. Overall, the robust growth of the agrochemical industry, both in terms of domestic consumption and exports, will be a crucial factor in shaping the future dynamics of the petrochemical feedstock market in India.

Demand from Pharmaceutical Industry

India's robust position in generic drug manufacturing has been a significant driver of growth for the pharmaceutical industry, which in turn boosts demand for the petrochemical sector. With numerous blockbuster drug patents expiring globally, Indian pharmaceutical companies have seized the opportunity to produce and export cost-effective generic alternatives, bolstering their turnover. This surge has a cascading effect on the petrochemical industry, as the production of these drugs requires substantial quantities of petrochemical-derived raw materials.

Source: Annual Report, Department of Pharmaceuticals, Dun & Bradstreet Estimates

From FY 2019 to FY 2024, the annual turnover of the Indian Pharmaceutical Industry increased at a CAGR of 9.9%, rising from INR 2,585 billion in FY 2019 to an estimated INR 4,142 billion in FY 2024. Additionally, Indian pharma companies have been expanding their global footprint through strategic acquisitions, partnerships, and compliance with international quality standards, enhancing their exports and revenue streams. Increased investment in research and development (R&D), innovation in drug formulations, and the development of new therapeutic segments have also driven industry growth. The focus on biopharmaceuticals, vaccines, and biosimilars has opened new revenue channels, further increasing the demand for petrochemical inputs.

The domestic demand for drugs & pharmaceuticals is driven by increasing number of old populations, higher spending on healthcare, penetration of health insurance products, as well as rise in incidence of diseases. Exports also plays a large part in shaping the demand scenario in the industry, as India is the largest exporter of generic medicines in the world.

Impact of pharmaceutical Industry on petrochemical feedstock

The growth of the pharmaceutical industry is expected to significantly impact the petrochemical feedstock market. Pharmaceuticals rely heavily on petrochemical-derived intermediates and raw materials for the production of various drugs and medical products. As the pharmaceutical sector expands, driven by increasing healthcare demands, advancements in medical research, and rising investments, the demand for these petrochemical feedstocks will also increase. This heightened demand will likely necessitate an increase in the production capacity of essential feedstocks such as ethylene, propylene, benzene, and toluene, which are crucial in the production of pharmaceutical intermediates and active pharmaceutical ingredients (APIs).

Furthermore, the increasing demand from the pharmaceutical industry will likely drive greater investment in refining and petrochemical infrastructure to ensure a steady and reliable supply of high-quality feedstocks. This could lead to technological advancements and enhanced efficiency within the petrochemical sector. However, the growing demand may also strain existing supply chains, potentially driving up the prices of feedstocks and impacting the cost structure of both the pharmaceutical and petrochemical industries. Overall, the symbiotic relationship between the pharmaceutical industry's growth and the petrochemical feedstock market will play a crucial role in shaping the future dynamics of both sectors.

Demand from Specialty Polymer Industry

The demand for specialty polymers significantly influences the petrochemical feedstock market. Specialty polymers, with their unique and advanced properties, require specific feedstocks derived from petrochemicals to achieve their performance characteristics. As the market for specialty polymers grows, driven by sectors such as automotive, electronics, and healthcare, the demand for these specific petrochemical feedstocks will increase. This shift emphasizes the need for high-quality raw materials, pushing petrochemical industries to innovate and enhance their production capabilities to meet the stringent requirements of specialty polymer manufacturing.

India's polymer demand, which stagnated at around 14.7 million tonnes during the pandemic years (2019-20 and 2020-21), is expected to rise as industries recover and expand. The Indian polymer industry, with a production capacity of 14.2 million tonnes, has seen its production remain flat at around 12.4 million tonnes during FY 2019-20 and FY 2020-21. The significant demand-supply gap, with domestic production meeting only 50% of the demand, highlights the potential for growth and the opportunities for foreign manufacturers and technology providers.

The specialty polymer market is a niche polymer additives segment in the polymer industry and is witnessing robust growth due to advancements in technology and increased application across various industries. Innovations in polymer chemistry have led to the development of materials with enhanced properties, such as higher heat resistance, greater tensile strength, and improved chemical inertness. These advancements are fuelling the adoption of specialty polymers in sectors requiring high-performance materials. For instance, the automotive industry's move towards electric vehicles and the need for lightweight materials is significantly boosting the specialty polymers market. Similarly, the growing electronics industry, with its demand for high-performance components, further propels market growth.

Impact of specialty polymer Industry on petrochemical feedstock

The rising demand for specialty polymers has a profound impact on the petrochemical industry. As specialty polymers require specific and often higher-grade petrochemical feedstocks, the demand for these raw materials is expected to rise. This shift is likely to lead to increased investment in the production of high-quality petrochemical feedstocks. Additionally, the petrochemical industry might see a transformation with a greater focus on sustainability and efficiency, driven by the need to support the production of eco-friendly and high-performance specialty polymers. The move towards bio-based specialty polymers also indicates a potential shift in feedstock sources, further impacting the petrochemical industry.

In summary, the growth of the specialty polymers market directly influences the petrochemical feedstock demand, driven by advancements in automotive, electronics, and healthcare industries. As specialty polymers become

integral to various high-performance applications, the petrochemical industry will adapt to meet the evolving requirements, focusing on producing higher-quality and potentially bio-based feedstocks.

Demand from Industrial Chemicals

The country's utilization of chemicals encompasses a broad spectrum of products, including fertilizers, pesticides, industrial chemicals, pharmaceuticals, and consumer goods. This consumption is influenced by population growth, urbanization, industrial development, and agricultural practices. The industry's growth trajectory is notable, with projections suggesting that by 2025, the sector will reach a value of USD 304 billion, from USD 220 billion in FY 2022. This growth is underpinned by the government's strategic initiatives to transform India into a global manufacturing hub for chemicals and petrochemicals, aligning with the vision of making India a USD 5 trillion economy.

In the chemical industry, Industrial chemicals are essential to various sectors, ranging from manufacturing to agriculture. They encompass a vast array of substances such as acids, bases, salts, solvents, and more specialized compounds like polymers, resins, and surfactants. These chemicals are fundamental in creating products and materials used daily, including plastics, fertilizers, pharmaceuticals, and consumer goods. One of the critical dependencies in the production of industrial chemicals is on petrochemical feedstocks. Petrochemical feedstocks, derived from petroleum and natural gas, serve as the raw materials for producing a wide range of industrial chemicals. For instance, ethylene is a key feedstock for producing polyethylene, ethylene oxide, and ethylene glycol. The transformation of several feedstocks into valuable industrial chemicals is facilitated by processes such as cracking, reforming, and polymerization. As the demand for industrial chemicals grows, so does the demand for these critical petrochemical feedstocks.

Key factors driving demand for industrial chemicals.

Agriculture Practices

India's large and growing population continually drives the demand for various chemicals, particularly in agriculture (fertilizers, pesticides) to ensure food security. The need to feed over 1.3 billion people necessitates significant use of agricultural chemicals to enhance productivity and crop yield. The Indian fertilizer industry is on a robust growth trajectory, expected to reach a market size of INR 1.38 lakh crore by 2032, with a (CAGR) of 4.2 per year.

Urbanization

Rapid urbanization leads to increased construction activities, boosting the demand for construction chemicals, paints, coatings, and polymers. As cities expand and infrastructure projects proliferate, the consumption of industrial chemicals in construction materials and maintenance products rises correspondingly. Urban development not only necessitates the construction of residential and commercial buildings but also requires extensive infrastructure projects like roads, bridges, and public transportation systems. This results in a heightened demand for materials that ensure durability, safety, and aesthetics, further driving the consumption of industrial chemicals.

Industrial Development

The expansion of industries such as automotive, textiles, electronics, and consumer goods increases the consumption of industrial chemicals for manufacturing processes and product development. The growth of these sectors relies on a steady supply of chemicals for processes like coating, treatment, and fabrication. As these industries innovate and expand, they demand more sophisticated and high-quality chemical inputs to improve efficiency, product quality, and sustainability. This industrial growth is a critical driver of chemical demand, reflecting the interconnected nature of modern manufacturing and industrial chemical usage.

Pharmaceutical Industry

India's growing pharmaceutical industry demands a variety of specialty chemicals for drug production, contributing significantly to overall chemical consumption. The market size of India's pharmaceutical industry is

expected to reach USD 65 billion by 2024, approximately USD 130 billion by 2030, and USD 450 billion by 2047. This exponential growth will significantly drive the demand for pharmaceutical-grade chemicals and raw materials. As the global demand for affordable and high-quality medications rises, India's pharmaceutical sector continues to expand, necessitating a consistent supply of chemicals for research, development, and manufacturing of a wide array of pharmaceutical products.

The industrial chemicals sector in India is intricately linked to the petrochemical industry, relying on key petrochemical feedstocks to produce a vast array of essential products. As India continues to grow and urbanize, the demand for industrial chemicals is set to rise, driven by factors such as population growth, industrial development, and government policies. The burgeoning pharmaceutical industry, in particular, underscores the importance of the petrochemical industry as a backbone of the chemical sector, fueling the transformation of raw materials into valuable industrial chemicals that support a wide range of industries across the country.

Impact of industrial chemical industry on petrochemical feedstock

The Indian chemical industry is poised to reach USD 300 billion by 2025, significantly impacting every chemical segment, including the industrial chemical segment. The rising demand for industrial chemicals in India has a profound effect on the petrochemical feedstock market. As the industrial sector expands, driven by robust economic growth and increasing manufacturing activities, the demand for both basic and specialty chemicals surges. This heightened demand necessitates a proportional increase in the production of petrochemical feedstocks, such as naphtha and natural gas liquids, which are essential raw materials for industrial chemicals.

Consequently, the petrochemical industry is expected to ramp up capacity and optimize operations to meet this growing need. This increased demand will likely lead to greater investment in refining and petrochemical infrastructure, fostering advancements in technology and efficiency. However, it could also strain the supply chain, driving up feedstock prices and potentially affecting the cost structure of downstream products. Overall, the interplay between the demand for industrial chemicals and the supply of petrochemical feedstocks will be a critical factor shaping market dynamics in India, influencing investment strategies, production capacities, and pricing in the petrochemical sector.

Petrochemical Imports to India

India is a net importer of petrochemical products, importing nearly 12.7 million tons of petrochemical products in FY 2024. Petrochemical import volumes have witnessed a significant rise, jumping from 8,776 thousand tonnes in FY 2021 to 13,020 thousand tonnes in FY 2023, reflecting a growth of nearly 48%. Even FY 2024, despite a slight dip, remains considerably higher than FY 2021.

Source: DGFT, D&B Estimates

The value of petrochemical imports has also seen a sharp increase, soaring from INR 60,941 crore in FY 2021 to INR 138,344 crore in FY 2023, a staggering growth of over 127%. This trend continued in FY 2024, albeit with a slight decrease.

India's domestic petrochemical production capacity is unable to keep pace with the growing demand from various sectors like paints, construction, and textiles. Domestic production is concentrated on certain petrochemical segments, leading to import reliance for others. Imported petrochemicals are more cost-competitive compared to domestically produced ones due to factors like economies of scale or lower feedstock costs in exporting countries.

Role of Import in Meeting Domestic Demand

In FY'23, India witnessed a 48% surge in imports in volume and staggering growth of 127% in value for petrochemical products. This uptick in demand stems from various factors. A growing economy and population are driving increased spending, expanding the consumer base for goods dependent on petrochemicals. Urbanization is also contributing significantly as cities require more housing and infrastructure, both major consumers of these materials. Furthermore, India's expanding manufacturing sector, including industries such as automobiles and electronics, is another primary catalyst due to their heavy reliance on petrochemical products. Petrochemical intermediates are crucial for the Indian chemical industry, serving as primary feedstock for specialty chemicals. Indian refineries have added capacities to produce polymer building blocks, managing pressure from flat gross refining margins and creating more resilient income sources. By 2035, India could support around 20 refinery-cum-petrochemical integrated plants to meet the plastic consumption demands of its growing population.

These configurations may include co-located or integrated facilities, or standalone NGL feedstock crackers with varied operational integration levels. Even with different ownerships, co-locating steam crackers with refineries in industrial zones such as SEZs can save on intermediate product transfer costs, corporate overheads, staff costs, and leverage synergies in utility supply and logistics infrastructure. Despite India's self-reliance on basic petrochemical products and promising export figures, there is a significant scarcity of petrochemical intermediates or derivatives, resulting in a 50% import dependency.

Regulatory Framework Surrounding Petrochemical Imports to India

Regulatory Agencies Involved

The import of petrochemical products into India is regulated by several key authorities. The Directorate General of Foreign Trade (DGFT) under the Ministry of Commerce and Industry plays a pivotal role in formulating and implementing import policies. DGFT issues Import Policy notifications, Export Policy, and Control Orders that govern the importation of goods, including petrochemical products. Importers must adhere to these policies and obtain necessary licenses or permissions as per the Import Policy.

Customs authorities oversee the physical movement of goods into the country and enforce tariff classifications and duty payments. They operate under the Central Board of Indirect Taxes and Customs (CBIC), which administers the Customs Tariff Act to determine duties applicable to petrochemical imports. Compliance with customs regulations is essential for proper clearance and entry into India.

The Ministry of Environment, Forest and Climate Change regulates environmental aspects related to the importation and handling of petrochemical products. Importers must comply with environmental norms to ensure the safe storage, handling, and transport of hazardous chemicals, thereby mitigating environmental risks and ensuring public safety.

Standards and Compliance Requirements

Bureau of Indian Standards (BIS) sets forth standards for petrochemical products to ensure quality, safety, and reliability. Compliance with BIS standards is mandatory for imported petrochemicals to ensure they meet Indian regulatory requirements. This includes specifications for product quality, packaging, labeling, and conformity assessment procedures.

Petroleum and Natural Gas Regulatory Board (PNGRB) regulates downstream activities in the petroleum sector, including refining and distribution. While primarily focused on petroleum products, its regulations may also impact certain petrochemical imports, especially those closely related to the petroleum industry.

Taxation and Duties

Currently, the customs duties on these products are approximately 7.5%. Imported petrochemical products are subject to multiple taxes and duties. The Goods and Services Tax (GST) applies to the value of imported goods, while Customs Duties—including Basic Customs Duty (BCD), Countervailing Duty (CVD), and Special Additional Duty (SAD)—are imposed based on the classification and value of the products. Importers must accurately declare the value and classification of their goods to ensure correct assessment and payment of these duties.

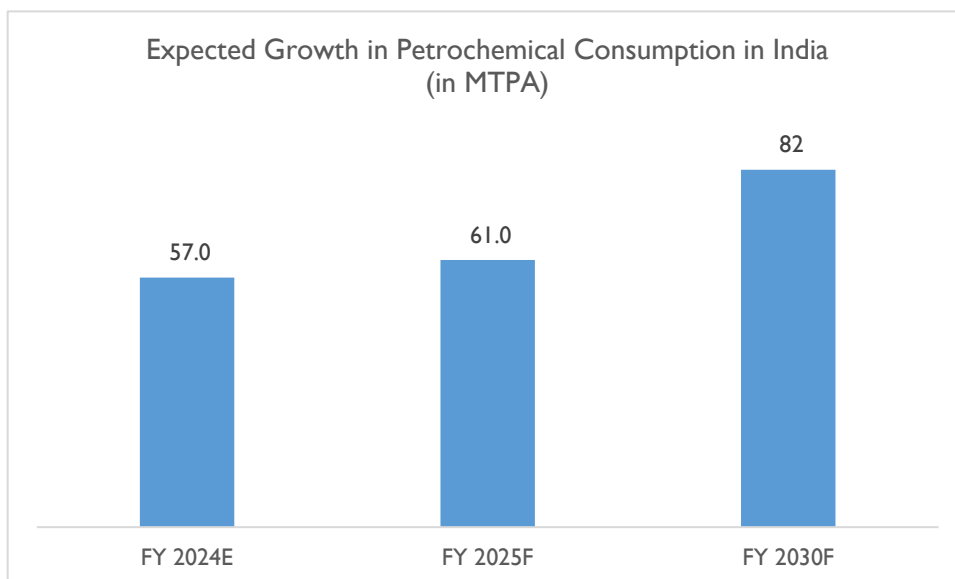

Trade Agreements and Preferences

India participates in several bilateral and multilateral trade agreements that may offer preferential tariff rates or exemptions for certain petrochemical products. Importers can benefit from these agreements by meeting specific rules of origin and compliance criteria outlined in each agreement. Leveraging these agreements can reduce import costs and facilitate smoother trade relations with partner countries.

Growth Forecast

While the historical performance of Indian chemical industry has been exemplary, the future holds even better growth opportunities. Domestic chemical consumption is rising steadily, and the country is expected to account for more than 20% of the incremental global consumption of chemicals that would happen globally in near future. The steady growth in industrial production is a key demand enabler.

The annual consumption of petrochemicals in India is estimated to be 57 million tons in FY 2024, and it is expected to reach nearly 61 million tons per annum by the next year (FY 2025). Petrochemical demand is closely linked to the overall economic growth, due to the widespread usage across various industry. With Indian economy poised to maintain its strong growth, the demand for petrochemicals too is expected to remain strong. Going ahead, assuming the strong economic growth in Indian continues, the annual consumption of petrochemicals in India has the potential to reach nearly 82 million tons per annum by the end of this decade⁸.

Source: D&B Estimates

⁸ D&B has estimated a stable forecast of 6% for the remaining period of this decade (FY 2030). The rate assumed mirrors India's long term economic growth rate.

Role of Imports

Imports have played a major role in meeting the domestic demand for petrochemicals. Although petrochemical refining sector in India have witnessed capacity addition, it was mainly focused on adding capacity on fuel products and products like polymers and olefins.

India's vibrant manufacturing sector – comprising of thousands of companies manufacturing numerous products – require a wide range of petrochemical components as input materials as well as intermediates. Despite the advances made in domestic petrochemical manufacturing, India still do not produce the entire range of petrochemical products.

Given the wide range of petrochemical products needed by the industry, together with the limitations in domestic petrochemical production scenario import of petrochemical is expected to continue to play a key role in meeting the input /intermediate product demand coming from the manufacturing sector.

Moreover, the usage of petrochemical input / intermediates products is not only limited to large players, but also include smaller players with limited production scale. This has created a large pool of consumers for petrochemical compounds who are spread across the country, with demand varying from few tons to thousand of tons. The demand for this vibrant consumer base – for a wide range of petrochemical products – would be met through a combination of domestic production and imports.

OUR STRATEGIES

Further penetrate hydrocarbon and petrochemical market in India

India has been one of the largest consumers of chemicals & petrochemical products in the Asia Pacific region for most of the last 10 to 15 years. The rapid growth in India's manufacturing infrastructure during this time period has created strong demand for a wide range of chemical & petrochemical input materials and intermediates. As India became one of the fastest growing economies in the world, the annual growth in demand for chemical & petrochemical input materials and intermediates too increased at a fast pace. Focusing on optimizing supplier network to enable procurement at competitive pricing, lead to an overall efficient cycle. While India's current per capita consumption of petrochemicals is significantly lower than the global average, the country's economic growth, government initiatives, and rising domestic and export demand present substantial opportunities for the petrochemical industry. These disparities highlight the significant potential for growth in India's petrochemical consumption as the country continues to develop its industrial base and expand its production capacities to meet both, domestic and global demand. As India continues to industrialize and urbanize, the demand for petrochemical products will likely surge, supporting the country's economic expansion and enabling it to address the needs of its diverse end-use sectors (*Source: Dun & Bradstreet Report*)

With our diversified product portfolio, wide customer base and extensive supplier network, we intend to capture the growing market opportunity and further penetrate our market presence. We believe that due to our flexible business model, we can offer a competitive advantage to our customers.

Strengthening existing customer relationships and build new customer relationship through our product portfolio

BUSINESS PROCESS

Our business process primarily involves the followings steps:

a) Study the global production data and consumption needs of our customers:

We employ in-house tools and industry database to study the global production and consumption of hydrocarbon chemicals, analyse the pricing trends, assess the acceptability of the products in Indian market and project the demand of domestic consumers. We then generate leads and inquiries from new as well as existing customers and liaise with them to receive confirmed purchase orders.

On the basis of our internal assessment of availability of the products in the international markets and price movement, we assist the customers in their purchase plans for the required quantity and schedule of delivery.

b) Aggregating orders from the customers:

For a particular product or products under the family, we aggregate the orders from multiple customers in order to ensure to place order as per our customers' requirements. Depending upon the requirements and the nature of the product, we may make orders which are economically viable for our business.

c) Liaise with suppliers to arrange the requisite supply of products:

On receipt of confirmed purchase orders from the customers, we approach the suppliers of the particular product and negotiate the commercial and delivery terms to match the expected delivery schedule of our customers. After considering various critical factors such as expected price movement, further expected demands from other customers and delivery schedules, we place confirmed purchase orders with the suppliers.

d) Manage supply chain including storage facilities:

Based on the confirmed purchase orders, the supplier despatches the required products as per the negotiated delivery terms and schedule. On receipt of products at the place of delivery, we store the same

at the storage facility to further dispatch the products to pre-ordered deliveries placed by our customers and store the balance quantity to fulfil any spot demand. We generally arrange to liquidate the inventories based on schedules given by the customers and also on the basis of spot orders.

Goods and Services Tax Act, 2017

The Central Goods and Services Tax Act, 2017 is an Act to make a provision for levy and collection of tax on intra-State supply of goods or services or both by the Central Government and for matters connected therewith or incidental thereto. In line with CGST Act, each state Government has enacted State Goods and Service Tax Act for respective states. Goods and Services Tax (GST) is a comprehensive indirect tax on manufacture, sale and consumption of goods and services throughout India to replace taxes levied by the central and state governments on goods as services. This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services or both as part of their normal commercial activity. The mechanism provides for two levels of taxation of interstate and intra state transactions. When the supply of goods or services happens within a state called intra-state transactions, then both the CGST and SGST will be collected. Whereas if the

supply of goods or services happens between the states called interstate transactions and IGST will be collected. Exports are considered as zero-rated supply and imports are levied the same taxes as domestic goods and services adhering to the destination-based taxation principle in addition to the Customs Duty which has not been subsumed in the GST.

Imported goods in India attract basic customs duty, additional customs duty and cesses in terms of the provisions of the Customs Act, 1962, Customs Tariff Act, 1975 and the relevant provisions made thereunder. The rates of basic customs duty are specified under the Customs Tariff Act 1975. Customs duty is calculated on the assessable value of the goods. Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk of loss related to adverse changes in market prices, including interest rates. In the normal course of business, we are exposed to certain market risks including interest risk.

Interest rate risk

Interest rate risk results from changes in prevailing market interest rates, which can cause a change in the fair value of fixed-rate instruments and changes in the interest payments of the variable-rate instruments. Our operations are funded to a certain extent by borrowings. Our current loan facilities carry interest at variable rates as well as fixed rates. We mitigate risk by structuring our borrowings to achieve a reasonable, competitive cost of funding. There can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us adequately against interest rate risks.

Liquidity risk

Adequate and timely cash availability for our operations is the liquidity risk associated with our operations. Our Company's objective is to all time maintain optimum levels of liquidity to meet its cash and collateral requirements. We employee prudent liquidity risk management practices which inter-alia means maintaining

sufficient cash and the availability of funding through an adequate amount of committed credit facilities.

Credit Risk

We are exposed to the risk that our counterparties may not comply with their obligations under a financial instrument or customer contract, leading to a financial loss. We are exposed to credit risk from our operating activities, primarily from trade receivables.

We consider our customers to be creditworthy counterparties, which limits the credit risk, however, there can be no assurance that our counterparties may not default on their obligations, which may adversely affect our business and financial condition.

Material Frauds

There are no material frauds committed against our Company in the last three financials year.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase is applicable from January 1, 2019, and will continue up to June 30, 2019. Under this phase, a Retail Individual Investor would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019, and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular No. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular No. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount will be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is notified pursuant to SEBI press release bearing number 12/2023 and as per the SEBI Circular No. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023, where the revised timeline of T+3 days shall be made applicable in two phases i.e. (i) voluntary for all public issues opening on or after September 01, 2023; and (ii) mandatory on or after December 01, 2023. The issue will be made under UPI Phase III of the UPI Circulars.

All SCSBs offering the facility of making applications in public issues are required to provide a facility to make applications using the UPI Mechanism. Further, in accordance with the UPI Circulars, our Company has appointed [●] as the Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Investors into the UPI mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs

to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the Book Running Lead Manager will be required to compensate the concerned investor.

SEBI through its circular SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 05, 2022, has prescribed. that all individual investors applying in initial public offerings opening on or after May 01, 2022, where the application amount is up to ₹ 5,00,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 2,00,000 and up to ₹ 5,00,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 02, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made. The RBI and the concerned ministries/ departments are responsible for granting approval for foreign investment.

The Government of India makes policy announcements on FDI through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“DPIIT”) issued the Consolidated FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press note, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Issue shall be on the basis of the FEMA rules. Further in terms of Press Note 3 of 2020, dated April 17, 2020 (“**Press Note**”), issued by the DPIIT, the FDI Policy and the FEMA NDI Rules has been amended to state that all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Further, in accordance with the amendment to the Companies (Share Capital and Debentures) Rules, 2014 vide notification dated May 4, 2022 issued by Ministry of Corporate Affairs, a declaration shall be inserted in the share transfer form stipulating whether government approval shall be required to be obtained under Foreign Exchange Management (Non-debt Instruments) Rules, 2019 prior to transfer of shares, as applicable. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Issuer in writing about such approval along with a copy thereof within the Issue Period.

In accordance with the FEMA Non-debt Instruments Rules and FDI Policy read with Press Note, 100% foreign direct investment is permitted under the automatic route for companies in the “manufacturing” sector. Further, transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

For details of the aggregate limit for investments by NRIs and FPIs in our Company, see “*Issue Procedure – Bids by Eligible NRIs and Category III FPIs*” on page 237.

In accordance with the existing policy of the Government of India, OCBs cannot participate in this Issue.
