In the last two financial years our Company has positive cash flows from operating activities, however if we are unable to continue this trend in future, our Company may not be able to generate sufficient amounts of cash flow to finance our Company's working capital, make new capital expenditure, pay dividends, repay loans, make new investments or fund other liquidity needs which could have a material adverse effect on our business and results of operations.

7. Our Group Companies are engaged in the line of business similar to our Company. There are no non-competitve agreements between our Company and such Group Companies. Further, we have not entered into any non-competitve agreement with any of said entities. Further some of our Promoter Group entities running as proprietary or partnership firms have also been undertaking real estate activities. We cannot assure that our Promoters who have common interest in said entities will not favour the interest of the said entities. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our Group Companies in circumstances where our respective interests conflict. In cases of conflict, our Promoters may favour their companies in which our Promoters have interest. There can be no assurance that our Promoters or our Group Companies or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations. 9. *Our Company in the past has entered into Related Party Transactions and may continue to do so in future also, which may adversely affect our competitive edge and better bargaining power if entered with non-related parties resulting into relatively more favourable terms and conditions and better margins.*

Our Company has entered into related party transactions with our Promoter, Directors and the Promoter Group aggregating ₹ 1,837.75 lakhs for the last financial year ended March 31, 2017. While our Company believes that all such transactions have been conducted on the arms length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to “*Annexure XXV - Related Party Transactions*” under section titled “*Financial Statements*” on page no. 160 of this Draft Red Herring Prospectus.

6.	Sales tax for FY 2012-13	58.46
	Total	5,107.21

If any of these contingent liabilities materialize, we may have to fulfil our payment obligations, which may have an adverse impact on our cash flows, financial conditions and results of operations. For further details, see the section titled “*Financial Statements*” on page 143.

11. *The completion of our projects can be delayed on account of our dependency on our contracted labour force.*

Our projects require the services of third parties including architects, engineers, contractors and suppliers of labour and materials. The contractual construction work of our projects is performed by third party sub-contractors. The timely and quality construction of our projects depends on availability and skill of such third parties, as well as contingencies affecting them, including labour and raw material shortages. We may not be able to identify approximately experienced third parties and cannot assure you that skilled third parties will continue to be available at reasonable rate and in area in which we undertake our present and future projects. As a result we may be required to make additional investments or provide additional services to ensure adequate performance and delivery of contracted services. Any consequent delay in project execution could adversely affect our profitability. Further we cannot assure you that the services rendered by these contractors will be satisfactory or match our requirements for quality. Additionally our operations may be adversely affected by circumstances beyond our control such as work stoppages, labour disputes and shortage of qualified skilled labour or lack of availability of adequate infrastructure.

12. *We cannot assure you that the construction of our projects will be free from any and all defects.*

We cannot assure you that we will always finish the construction or development of our projects in accordance with the requisite specifications or that the construction of our projects will be free from any and all defects. If the work is unsatisfactory, the work has to be redone as per the instructions of Site in Charge without any extra cost. In the event of discovery of defects/faults in our work, or due to damages to our construction due to factors beyond our control, or any of the other reasons, we may incur significant contractual liabilities and losses under our projects contracts and such losses may materially and adversely affect our financial performance and results of operations.

Further, it may result in cancellation by customers of any commitment to purchase in our real estate projects and/ or refund of any advance deposited with us by any customer as a guarantee for purchase in our real estate projects, dissatisfaction among our customers, resulting in negative publicity, consumer litigation and lack of confidence among future buyers for our projects and all these factors could adversely affect our business, financial condition and results of operations. However, to safeguard the loss to an extent, majority of the contracts which we enter with our sub-contractees includes a clause relating to forfeiture of their security deposit in case of unsatisfactory work carried out by them.

13. *We do not own the registered office from which we operate. Any dispute in relation to use of the premises would have a material adverse effect on our business and results of operations.*

The registered office of our company is located at 2nd floor, Gulmohar Status, above Business Bank, Samarth Nagar Nashik – 422005. The said property is not owned by us and has been taken on lease. For further details regarding the terms and conditions of these properties refer “Property” on page 103 of this Draft Red Herring Prospectus. Any failure to renew the said agreement could force us to procure new premises, including substantial time and cost of relocation or procure new premises. In addition, we may not be able to identify satisfactory new premises or may have to incur substantial additional costs towards those premises. Any of the aforesaid could have a material adverse effect on our business, results of operation and financial condition.

14. *We operate from a premise for which we do not have any formal agreement. Any dispute in relation to use of the premises would have a material adverse effect on our business and results of operations.*

We operate from a premises namely, Sai Kripa Commercial Complex, Tilak Road, Opp Muktidham, Nasik Road, Nashik – 422 214, Maharashtra, which is owned and provided by the Promoter for our business purpose. We have not entered into any formal agreement with our promoter for this premise. However, we do have an oral agreement and we have been using this premise for a few years. We believe that our relation with our Promoter is cordial as of now, but in absence of the formal agreement, we may be asked to vacate the premises with a shorter notice, which will adversely affect our operations and financial condition. For more information, please refer chapter titled “Business Overview” on page no. 87 of this Draft Red Herring Prospectus.

15. *Any infringement of our registered corporate logos  and  or failure to protect it may adversely affect our business.*

Our corporate logos  and  are registered with the Registrar of Trademarks under Trademark Nos. 2329723 and 2329722. These corporate logos are also used by our group companies and the promoter group entities running as proprietorship and partnership concern. Given the nature of our business, we cannot assure you that our corporate logos will not be infringed by our competitors and third parties, which may expose us to expensive legal proceedings and the same can have an adverse effect on our business, results of operations and financial condition. Our Company also may not be able to take timely steps to curb such infringement or adequately protect our intellectual property data, trade secrets or proprietary technology from infringement by competitors. Any litigation undertaken to protect our intellectual property could be time consuming and costly and the outcome thereof cannot be guaranteed. Such infringement may also lead to our Company losing business to such competitors and might adversely affect our goodwill. For further details please refer to section titled “Government and Other Approvals” beginning on page 192 of this Draft Red Herring Prospectus.

16. *We have recently diversified our portfolio of business activities to include Construction Contracts.*

Since incorporation our Company has been engaged in the business of real estate development in Nashik and has proven its capabilities in this sector by successfully delivering significant amount of real estate. Recently in order to expand its portfolio of services and explore other business segments our Company ventured into Government as well as private sector Construction Contracts, leading to a conglomerate diversification. Our Company has not engaged itself in these business activities in the past and accordingly our experience in respect of these activities is limited.

17. *We have availed of certain loans from Banks and other lenders, pursuant to the Financing Arrangements that we have entered into with them. Pursuant to the terms of such arrangements, we require consents from the respective lenders for a number of corporate actions, including for undertaking this Issue, some of which have not been obtained as on date. Any failure to obtain such consents may result in a default under the terms of the Financing Arrangements.*

Pursuant to the Financing Arrangements entered into by us with the Lenders, we are required to obtain consents from the respective lenders to undertake certain actions, including this Issue and for completion of the requirements pertaining to this Issue. Though, we have informed our lenders orally of our intention to undertake this Issue, we have obtained consents from only one of our lenders till date for undertaking this Issue.

While our Company intends to obtain all other necessary consents in relation to this Issue from our lenders prior to the filing of the Prospectus with the RoC, undertaking this Issue without obtaining the Lender's consents, or in contravention of any conditions contained in such contents, may constitute a breach of the Financing Arrangements. Any default under the Financing Arrangements may enable our lenders to cancel any outstanding commitments, accelerate the repayment and enforce their security interests. If our obligations under the Financing Arrangements are accelerated, our financial condition and operations could materially and adversely be affected.

18. *We generate our entire sales from our operations in certain geographical regions of Nashik, Maharashtra and any adverse development affecting our operations in these regions could have an adverse impact on our revenue and results of operations.*

Our entire revenues have been derived from projects situated in Nashik, Maharashtra. Such geographical concentration of our real estate and construction business in Nashik, heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may affect our business prospects, financial conditions and results of operations. Also, any localized social unrest, natural disaster or breakdown of services and utilities in and around Nashik could have material adverse effect on our business, financial position and results of operations.

Further, we may not be able to leverage our experience in Nashik region to expand our operations in other parts of India. In addition as we enter new markets and geographical areas, we are likely to compete not only with national developers, but also local developers who have an established local presence, are more familiar with local regulations, business practices and customs, have stronger relationships with local contractors, suppliers, relevant government authorities and who are in a stronger financial position than us.

19. *Changes in market conditions between the time that we acquire land, enter into development agreements, construct and ultimately sale, may affect our ability to achieve the estimated profits out of our projects or at all, which could adversely affect our revenues and earnings.*

There is a time gap between our acquisition of land or development rights to the land and the development and sale of our projects, during which, we may be exposed to risks of fluctuation in market value of land. Any downward changes in the market value of land, could have a material adverse effect on our business. Our ability to mitigate the risk of any market value fluctuations is limited by the illiquid nature of real estate investments. We could be adversely affected if the market conditions deteriorate or if we purchase land at higher prices and the value of the land subsequently declines subsequently. As a result, we may experience fluctuations in property values and rental income over time which in turn may adversely affect our business, financial condition and results of operations.

20. *We have entered into joint development agreements with third parties to acquire construction and/or land development rights. Such agreements contain conditions and requirements, the non-fulfillment of which could result in delays or inability to implement and complete our projects as contemplated.*

Some of our On-going projects are in joint development agreement with third parties. The agreement confers rights on us to construct and develop the land. Such project involves working together with several third parties and our relationships are governed by such joint development agreement. Though we are generally empowered to make all operating decisions for development of the project, we may be required to make certain decisions in consultation with such parties. These arrangements may limit our flexibility to make certain decisions in relation to the projects. In the event of any delay in the completion of the project within the envisaged time frame, we may be required to indemnify and compensate land owners who are also party to the joint development agreement. Any disputes that may arise between us and our joint development agreement parties may cause delay in completion, suspension or complete abandonment of the project we undertake. This may have a material adverse effect on our business, financial condition and reputation.

21. *We face significant risk with regard to length of time needed to complete each project and there could be unscheduled delays and cost overruns in relation to our ongoing and future projects.*

There could be unscheduled delays and cost overruns in relation to our ongoing or forthcoming projects. The time it takes to complete a project generally ranges between 18 months to 60 months depending upon type of project. During this time there can be changes to the national, state and local business climate and regulatory environment, local real estate market conditions, perception of prospective customers with respect to the convenience and attractiveness of the project and changes with respect to competition from other property developments. Further, any changes to the business environment such as non availability of raw materials or increase in cost of construction materials during such time may affect the cost and revenues associated with the project and may ultimately affect the profitability of a project.

Additionally, there could be unscheduled delays and cost overruns in relation to ongoing and future projects and we cannot assure you that we will be able to complete these projects within the expected budgets and time schedules at all. Further, we may be penalized from our client for delay in completion of project.

22. *Increased raw material, labour and other costs, may adversely affect our results of operation and feasibility of our development plan.*

As our company is significantly into construction of residential and residential-cum-office space projects, our business would adversely be affected by availability cost and quality of raw materials and labour. The prices and supply of raw materials and labour depend on factors not under our control, including general economic conditions, competition, production levels, transportation costs etc. Additionally inflation would play a critical role in the cost of construction and could directly impact the profitability of the company. We cannot assure you that we will be able to procure raw material and labour at competitive prices. In addition, during the period of significant increases in prices of raw materials, we may not be able to pass price increases to our customers, which would reduce or eliminate our profits.

23. *Our business is subject to various operating risks at our construction sites, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.*

Our business operations are subject to operating risks, such as breakdown or failure of equipments used at the project sites, weather conditions, interruption in power supply, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes, accidents, our inability to respond to technological advancements and emerging realty industry standards and practices along with the need to comply with the directives of relevant government authorities. The occurrence of these risks, if any, could significantly affect our operating results, and the slowdown / shutdown of business operations may have a material adverse affect on our business operations and financial conditions.

24. *Our insurance coverage may be inadequate, as a result of which the loss or destruction of our assets could have a material adverse effect on our financial condition and results of operations.*

In relation to the projects under construction, we are required to obtain the insurance policies as per the terms of our lenders. Such insurance policy is taken on the basis of estimated period of completion of the project. In case, policy expires before completion of the project, we face risk of losses from a variety of sources, including, but not limited to, risks relating to construction, catastrophic events, terrorist risk, vandalism, theft of construction supplies. For instance, the policies for our ongoing projects, which are upon the stage of completion, have expired. Further, if we suffer any losses, damages and liabilities in the course of our operations and real estate development, we may not have sufficient insurance or funds to cover such losses. Any such uninsured losses or liabilities could result in a material adverse effect on our business operations, financial conditions and results of operations. In addition, any claim under the insurance policies maintained by us may not be honoured fully or on time.

25. *We may not be able to successfully identify and acquire suitable land for development, which may adversely affect our business and growth prospects.*

Our ability to identify suitable land for development is vital to our business. Once a potential development site has been identified, site visits and feasibility studies/surveys are undertaken, which include detailed analyses of factors such as regional demographics, gap analysis of current property development initiatives and market needs, and market trends. Our ability to acquire ownership or development rights over suitable sites is dependent on a number of factors that may be beyond our control. These factors include the availability of suitable land, market conditions, the willingness of land owners to sell or grant development rights over land on attractive terms, the availability and cost of any required financing, encumbrances on the land, government directives on land use, and the obtaining of permits and approvals for land development. However, conveyance of the land does not occur upon signing of the

memorandum of understanding and formal transfer of title to or interest in land by the seller (at which time stamp duty becomes payable) is generally completed only after all requisite governmental consents and approvals have been obtained. Our acquisition of interests in land are therefore also subject to the risk that sellers may during such time identify and transact with alternative purchasers or decide not to sell the land.

26. *The success of our residential real estate development business is dependent on our ability to anticipate and respond to consumer requirements.*

We depend on our ability to understand the preferences of our customers and to accordingly develop projects that suit their tastes and preferences. The growing disposable income of India's middle and upper income classes has led to a change in popular lifestyle resulting in substantial changes in the nature of their demands. The range of amenities now demanded by consumers include those that have historically been uncommon in India's residential real estate market such as gardens, community space, security systems, playgrounds, fitness centres, tennis courts, etc. As customers continue to seek better housing and better amenities as part of their residential needs, we are required to continue to focus on the development of quality residential accommodation with various amenities. We also intend to continue to provide quality facilities even in our middle-income housing projects. Our inability to provide customers with certain amenities or our failure to continually anticipate and respond to customer needs may affect our business and prospects.

27. *Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, formulate a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios.*

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans.

28. *We will continue to be controlled by our Promoters and Promoter Group after the listing of the Equity Shares in the Issue.*

Upon successful completion of the Issue, our Promoters and Promoter Group will collectively control, directly or indirectly, approximately 65.04 % of our outstanding Equity Shares (assuming full subscription to the Issue). As a result, our Promoters and Promoter Group will continue to have the ability to exercise significant control over our Company and all matters requiring shareholder approval, including election of directors, our business strategy and policies, and approval of significant corporate transactions such as mergers and business combinations. The extent of their shareholding in our Company may also have the effect of delaying, preventing or deterring a change in control of our Company, even if such a transaction may be beneficial to the other shareholders. The interests of our Promoters and Promoter Group as controlling shareholders of our Company could be in conflict with the interests of our other shareholders. We cannot assure you that our Promoters and Promoter Group will act to resolve any conflicts of interest in favour of our Company or the other shareholders. For details of our shareholding please refer section titled "Capital Structure" beginning on page 56 of this Draft Red Herring Prospectus.

29. *Certain of our Group Companies have incurred losses in the three fiscal years ended March 31, 2016.*

The details of the Group Companies which have incurred losses during the three fiscal years ended March 31, 2016 are provided in the following table:

(₹ in lakhs)

Sr. No.	Name of the Company	Profit/(Loss) after tax for the year ended March 31,		
		2016	2015	2014
1	Gurkar Hotels Private Limited	(2.13)	(1.61)	0.02
2	Shree Sainath Land & Development (India) Private Limited	(5.16)	0.19	0.18

30. *Our Company's activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel or occurrence of any work stoppages, our business operations could be affected.*

We operate in a labour intensive industry and our contractors hire casual labour to work on our projects. In the event of a labour dispute, if our contractors are unable to successfully negotiate with the workmen or sub-contractors, it would result in work stoppages or increased operating costs. It may also be difficult to procure the required skilled workers for existing or future projects. In addition we may also be liable for or exposed to sanctions, penalties or losses arising from accidents or damages caused by our workers or contractors. Though we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

31. *Quality concerns could adversely impact our business.*

The business of our Company is dependent on the trust of our customers they are having in the quality of our construction. Any flats sold to customers, which do not comply with the quality specifications or standards prevalent in the business or market segment, may result in customer dissatisfaction, which may have an adverse effect on our sales and profitability.

32. *We may not be able to manage our growth strategy effectively or it may change in the future.*

Our business strategy includes the development of residential and residential-sum-office space projects primarily in and around Nashik. Our developments have primarily focused on residential projects but, pursuant to this strategy, we currently have various real estate projects under development. In the future, we may decide to undertake projects in additional business lines of real estate development, such as IT parks, special economic zones and serviced apartments. As we grow and diversify, we may not be able to execute our projects efficiently on such an increased scale, which could result in delays, increased costs and diminished quality, each adversely affecting our reputation. This future growth may strain our managerial, operational, financial and other resources. If we are unable to manage our growth strategy effectively, our business, financial condition and results of operations may be adversely affected. In addition, depending on prevailing market conditions, regulatory changes and other commercial considerations, we may be required to change our business model and we may therefore decide not to continue to follow our business strategies described in this Draft Red Herring Prospectus.

33. *We may experience difficulties in expanding our business into additional geographical markets in India.*

While Nashik remains and is expected to remain our primary focus, we may evaluate growth opportunities in other parts of India on a case-by-case basis. However, we have limited experience in conducting business outside Nashik and have not previously completed any real estate development projects outside of Nashik. We may not be able to leverage our experience in Nashik to expand into other cities as a result of various features which may differ in other cities and with which we may be unfamiliar, such as:

- competition;
- regulatory and taxation regimes;
- business practices and customs;
- languages;
- customer tastes, preferences, behaviour and culture;
- construction methods because of different terrains; and
- land and related laws applicable in other states.

If we enter new markets and geographical areas in India, we are likely to compete not only with national developers, but also local developers who may have an established local presence, are more familiar with local regulations, business practices and customs, have stronger relationships with local contractors, suppliers, relevant government authorities, and who have access to existing land reserves, all of which may give them a competitive advantage over us. Our inability to expand into and compete successfully in areas outside the Nashik real estate market may adversely affect our business prospects.

34. *It is difficult to predict our future performance, or compare our historical performance between periods, as our revenue fluctuates significantly from period to period.*

Under the percentage of completion method of revenue recognition, our revenue from sales depends upon the volume of bookings that we are able to obtain in relation to our projects as well as the rate of progress of construction. Our bookings depend on our ability to market and pre-sell our projects and the willingness of our customers to pay for developments or enter into sale agreements well in advance of receiving possession of properties, which can be affected by prevailing market sentiment. Construction progress depends on various factors, including the availability of labour and raw materials, the timely receipt of regulatory clearances and the absence of contingencies such as litigation and adverse weather conditions. The occurrence of any such contingencies could cause our revenues to fluctuate significantly, which could in turn adversely affect our margins. We also cannot predict when and at what prices we may acquire the TDRs we require for a given project. In addition, we complete differing numbers of projects in each period, and cannot predict with certainty the rate of progress of construction or time of the completion of our real estate developments due to lags in development timetables occasionally caused by unforeseen circumstances.

Our results of operations may also fluctuate from period to period due to a combination of other factors beyond our control, including the timing during each year of the sale of properties that we have developed, and any volatility in expenses such as land and development right acquisition and construction costs. Depending on our operating results in one or more periods, we may experience cash flow problems, thereby resulting in our business, financial condition and results of operations being adversely affected. Such fluctuations may also adversely affect our ability to fund ongoing and future projects.

As a result of one or more of these factors, we may record significant turnover or profits during one accounting period and significantly lower turnover or profits during prior or subsequent accounting periods. Therefore, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indicative of our future performance.

35. *We have reversed some of the revenue recognised in prior periods as a result of cancelled bookings for certain of our projects and may be required to do so in the future.*

We and our customers have cancelled bookings for certain of our projects in recent years. For example, we have cancelled bookings where our customers have failed to make instalment payments. In addition, where projects are delayed beyond the scheduled completion date, our customers may have a right to cancel their bookings. For some of these projects, we had recognised all or a portion of the income from these bookings as revenue. We have consequently been required to reverse the revenue recognised from these bookings. If an increasing number of bookings are cancelled in respect of projects where we have recognised revenue, this could lead to a decline in our business prospects, financial position and results of operations.

36. *We may not be able to generate profits at the same rate of return that we earn from our historical projects.*

We acquired a substantial portion of the land for our currently completed, Ongoing and Planned projects when land prices were generally lower than prevailing market prices. The profits that we generate from our projects may not be utilised in our business at or above the rate of return that we earn from these projects and we may not utilise capital in the most efficient manner. For example, there may be periods during which we may deposit funds in fixed deposits or other short term investments that generate low post-tax returns. We may also invest in mutual funds which are exposed to market and credit risks and may not generate rates of return above the rates of return we earn on our other investments, or at all, or such investments may result in losses. Our failure to generate rates of return on our capital equal to or above the rate of return we earn on our projects may decrease our return on net worth and capital employed, which may in turn adversely affect our business prospects, financial condition and results of operation.

37. *We may be involved in legal and administrative proceedings arising from our operations from time to time.*

We may be involved from time to time in disputes with various parties involved in the development and sale of our properties, such as contractors, sub-contractors, suppliers and governmental authorities. These disputes may result in legal and/or administrative proceedings, and may cause us to suffer litigation costs and project delays. We may, for example, have disagreements over the application of law with regulatory bodies or third parties in the ordinary course of our business, which may subject us to administrative proceedings and unfavourable decisions, resulting in financial losses and the delay of commencement or completion of our projects.

38. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The market for our industry is competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as quality of construction, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

39. *We are dependent upon the experience and skills of our senior management team and skilled employees.*

We believe that our senior management team has contributed significantly to the development of our business. In particular, Mr. Naresh Karda, our Chairman and Managing Director, has been instrumental in the development and implementation of our business strategy. The loss or interruption of the continued services of any member of our senior management team, and Mr. Naresh Karda in particular, would disrupt our business and adversely affect our financial condition and results of operations.

We also believe that the success of our real estate development activities is dependent on our ability to attract, train, motivate, and retain highly skilled employees. Our professionally qualified staff members include site engineers, design consultants, marketing specialists, costing consultants, procurement officers and accountants. In the event we are unable to maintain or recruit a sufficient number of skilled employees, our business and results of operations may be adversely affected. Competition for senior management and skilled employees is intense and the pool of qualified candidates is limited. We may not therefore be able to attract and/or retain suitable senior management and skilled employees. In addition, if any member of our senior management team or any of our other key personnel joins a competitor or forms a competing company, we may lose key future development opportunities to our competitors, and our business prospects, financial condition and results of operations will be adversely affected.

40. *We benefit from our relationship with our Promoter and our business and growth prospects may decline if we cannot benefit from this relationship in the future.*

We benefit in many ways from our relationship with our Promoter, Mr. Naresh Karda, as a result of his reputation, experience and knowledge of the real estate and property development industry. Mr. Karda has been associated with the property development, real estate and construction sector in Nashik for over 20 years, has been primarily responsible for the direction and growth of our business and has been instrumental in our strategic planning, including identifying our current development projects.

Our growth and future success is influenced, in part, by our continued relationship with Mr. Naresh Karda. We cannot assure you that we will be able to continue to take advantage of the benefits from this relationship in the future. If we lose our relationship with Mr. Karda for any reason, our business and growth prospects may decline and our financial condition and results of operations may be adversely affected.

41. *The Company has made investments the same involves a substantial degree of liquidity risk.*

As of March 31, 2017, we have made investments in unquoted equity instruments, property, mutual funds, our Associates and partnership firms, of approximately ₹ 1,981.84 lakhs as per our restated financial statements. These investments may be illiquid and we may not be able to realise any benefits or may have to defer their realisation potentially for a considerable period of time.

Further, we may incur additional costs or be unable to participate in other opportunities which could have been more lucrative and thereby adversely affecting our financial condition and results of operations.

42. *The leave and license agreement executed for the Registered Office of our Company is not registered and is insufficiently stamped.*

The leave and license agreement executed for the registered office of our Company is insufficiently stamped and has not been registered as required by the Registration Act, 1908. According to Section 17 of the Registration Act, 1908, the effect such nonregistration is that it (i) does not affect any immovable property comprised therein (ii) cannot be received as evidence of any transaction affecting such property, thus making it redundant for practical purposes and any future enforcement of the same may expose our Company to dangers comprised therein.

43. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulations, 2015 which will require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

RISKS RELATING TO OUR EQUITY SHARES

44. *The Equity Shares issued pursuant to the Issue may not be listed on the Stock Exchange in a timely manner, or at all, and any trading closures at the Stock Exchange may adversely affect the trading price of our Equity Shares.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of Equity Shares to be submitted and there could therefore be a failure or delay in listing the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining such approval would restrict your ability to dispose of your Equity Shares.

The regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in Europe and the U.S. The Stock Exchanges have in the past experienced problems, including temporary exchange closures, broker defaults, settlements delays and strikes by brokerage firm employees, which, if continuing or recurring, could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares, in both domestic and international markets. A closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of the Equity Shares.

45. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time.*

The price of our Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

46. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Issue, there has been no public market for the Equity Shares and an active public market for the Equity Shares may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a trading market for the Equity Shares will develop or, if a market does develop, the liquidity of that market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined following a book-building process by agreement between the BRLMs and the Company on the Pricing Date and may not be indicative of prices that will prevail in the trading market. You may not be able to resell your Equity Shares at a price that is attractive to you.

47. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.*

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the real estate sector;
- adverse media reports about us or the Indian real estate sector;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

In addition, Indian securities markets are more volatile than the securities markets in certain countries which are members of the OECD. Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

48. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax (“STT”) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

49. *Future issuances or sales of the Equity Shares could dilute your shareholding and significantly affect the trading price of the Equity Shares.*

The future issuance of Equity Shares by us, the disposal of Equity Shares by any of our major shareholders or the perception that such issuance or sales may occur, may lead to the dilution of your shareholding in the Company or significantly affect the trading price of the Equity Shares. These sales could also impair our ability to raise additional capital through the sale of our equity securities in the future.

Furthermore, under the Securities Contract (Regulation) Rules, 1957, as amended (“SCRR”), listed companies are required to maintain public shareholding of at least 25% of their issued share capital. Failure to comply with the minimum public shareholding provision would require a listed company to delist its shares and may result in penal action being taken against the listed company pursuant to the SEBI Act. This may require us to issue additional Equity Shares or require our Promoters or Promoter Group to sell their Equity Shares, which may adversely affect our trading price.

50. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.*

We are a real estate development company. Our future ability to pay dividends will depend on the earnings, financial condition and capital requirements of our Company. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. We cannot assure you that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all.

Our business is capital intensive and we may plan to make additional capital expenditures to complete the real estate that we are developing. Our ability to pay dividends could also be restricted under certain financing arrangements that we may enter into. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements for the real estate projects, financial condition and results of operations.

EXTERNAL RISK FACTORS

RISKS RELATING TO THE REAL ESTATE DEVELOPMENT INDUSTRY IN INDIA

51. *Our business is heavily dependent on the performance of, and the prevailing conditions affecting, the real estate market in Nashik and in India generally.*

Our real estate projects are located primarily in Nashik. As of July 31, 2017, all our Completed, Ongoing and Planned projects, are located in Nashik. For details of our projects and land reserves, please see the section entitled “*Business Overview*” on page 87. As a result, our business, financial condition and results of operations have been and will continue to be heavily dependent on the performance of, and the prevailing conditions affecting, the real estate market in Nashik and in India generally.

The real estate market in Nashik and in India generally may be affected by various factors outside our control, including, among others:

- prevailing local economic, income and demographic conditions;
- availability of consumer financing (interest rates and eligibility criteria for loans);
- availability of and demand for properties comparable to those we develop;
- changes in governmental policies relating to zoning and land use;
- changes in applicable regulatory schemes; and
- the cyclical nature of demand for and supply of real estate.

These factors may result in fluctuations in real estate prices and the availability of land, which may negatively affect the demand for and the value of our projects, and may result in delays to or the cancellation of our projects, the cancellation of sales bookings or the termination of lease agreements. During times of crisis, market sentiment may be adversely affected, buyers may become cautious, rentals of office space may face downward pressure and sales or collections could be adversely affected which may have a material adverse effect on our financial condition and results of operations.

Our inability to acquire adjoining parcels of land may also affect some of our existing and future development activities as we acquire parcels of land at various locations, which can be subsequently consolidated to form a single land area, upon which we can undertake development. Any failure to acquire neighbouring parcels of land in the future on terms that are acceptable to us, or at all, may cause a delay or force us to abandon or modify our development plans, which may adversely affect our returns on our initial investment.

52. *Our operations could be adversely affected by changes to the FSI/TDR regime in Nashik.*

We and other developers are subject to municipal planning and land use regulations in effect in Nashik and in other cities in India, which limit the maximum square footage of completed buildings we may construct on plots to specified amounts, calculated based on a ratio of maximum floor space of completed buildings to the surface area of each plot of land (the floor space index, or “FSI”).

Transferable Development Rights (“TDRs”), in the form of a Development Rights Certificate granted by the relevant statutory authority, provide a mechanism by which a person, who is unable to use the available FSI of his/her plot for various reasons, is permitted to use the unused FSI on other properties in accordance with applicable regulations or transfer the unused FSI to a third party. Some of our development sites may be reserved for public purposes or for providing public amenities such as roads, gardens, playgrounds, hospitals and schools. If we decide to develop such sites, we are required to develop them in accordance with the applicable reservation and hand over the completed development to the relevant authority. In return, we are compensated by grants of TDRs in the form of FSI, which can be used by us within the same development or, subject to certain restrictions, within another development or transferred to a third party.

Sometimes, a development site has potential for development, but FSI has already been consumed. In such cases, we can acquire FSI by way of TDRs and utilise it on such developments. For example, we acquire TDRs from third parties to enable us to build beyond the approved limit for our buildings (therefore resulting in an increase in the total Saleable Area of our projects). If we are unable to acquire such TDRs or if we are unable to acquire them at the expected price, then this may impact our ability to complete certain projects due to us having insufficient FSI or because of a significant increase in the cost of completing such projects. The price and availability of TDRs may have an adverse affect on our ability to complete our projects and on our financial condition and results of operations.

53. *We may require real estate financing, which may not be available to us on commercially viable terms, or at all.*

Our business is cyclical and highly capital intensive, requiring substantial capital to develop and market our projects. We expect that we will require additional funding to meet our capital expenditure needs, which could result in incurrence of indebtedness and leverage and therefore, borrowing costs and require us to comply with certain restrictive covenants.

Our ability to obtain financing on favourable commercial terms, if at all, will depend on a number of factors, including:

- our future financial condition, results of operations and cash flows;
- the amount and terms of any existing indebtedness;
- general market conditions and market conditions for financing activities by real estate companies; and
- economic, political and other conditions in India and, in particular, Nashik.

Challenging conditions such as the global financial conditions, including continued disruptions in the capital and credit markets as a result of uncertainty, changing or increased regulation of financial institutions, reduced alternatives or failures of significant financial institutions, may significantly diminish the availability of credit to us and our customers. This may require us to delay or abandon some or all of our planned projects, reduce planned expenditures and advances to obtain land or development rights, and reduce the scale of our operations, and may adversely affect the sales of, and market rates for, our projects, and, consequently, our profitability. In addition, Indian regulations on foreign investment in housing, built-up infrastructure and construction and development projects impose significant restrictions, which may impact the availability of financing for our operations. Further, under current Indian regulations except for certain limited purposes, external commercial borrowings cannot be raised for investment in real estate, which may further restrict our ability to obtain necessary financing. In the event we are not able to raise additional financing on favourable terms, or at all, our planned capital expenditure, business, results of operations and prospects could be adversely affected.

54. *Our business and growth plan could be adversely affected by the incidence and rate of property taxes and stamp duties, service and other value added taxes.*

As a property owning and development company, we are subject to the property tax regimes in jurisdictions in which we operate. Stamp duty is payable for the agreements entered into in respect of the properties we buy and sell. These taxes could increase in the future, and new types of property taxes, stamp duties and goods and services tax shall increase our overall costs. If these property taxes, stamp duties and goods and service tax were to increase, our acquisition costs and sale values may be affected, resulting in a reduction of our profitability. Any such changes in the incidence or rates of property taxes or stamp duties or goods and service tax could have an adverse affect on our financial condition and results of operations.

55. *We face labour risks, including potential increases in labour costs.*

We operate in a labour - intensive industry and we or our contractors hire casual labour to work on our projects. In the event of a labour dispute, if our contractors are unable to successfully negotiate with the workmen or sub-contractors, it could result in work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. It may also be difficult to procure the required skilled workers for existing or future projects. Either of these factors could adversely affect our business, financial condition, results of operations and cash flows. In addition, we may be liable for or exposed to sanctions, penalties or losses arising from accidents or damages caused by our workers or contractors.

56. *Our operations and the work force on our development sites are exposed to various hazards.*

We conduct various site studies prior to the acquisition of any parcel of land and its construction and development. However, there are certain unanticipated or unforeseen risks that may arise due to adverse weather and geological conditions, such as storms, outbreaks of disease, hurricanes, lightning, floods, landslides, rockslides and earthquakes and other reasons. Additionally, our operations are subject to hazards inherent in providing these services, such as the risk of equipment failure, impact from falling objects, collision, work-related accidents, fire, or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage. If any one of these hazards or other hazards were to affect our business, our results of operations may be adversely affected. Moreover, any injury to or loss of life of the workers employed on our construction sites may expose us to liability and / or compensation claims.

57. *Changes in interest rates in India could adversely affect our business and the market for our real estate developments.*

Our results of operations, and the purchasing power of our real estate customers, are substantially affected by prevailing interest rates and the availability of credit in the Indian economy. Interest rates in India have fluctuated over the last few years. Our ability to borrow funds for the development of our real estate projects is affected in part by the prevailing interest rates available to us from leading Indian banks. Changes in prevailing interest rates affect our interest expense in respect of our borrowings, and our interest income in respect of our interest on short-term deposits with banks and loans to associates. Significantly, the interest rate at which we may borrow funds, and the availability of capital to us for development purposes, affects our results of operations by limiting or facilitating the number of projects we may undertake and determining the return which we must obtain from each project to meet our obligations under our borrowings.

Changes in interest rates also affect the ability and willingness of our prospective real estate customers, particularly the customers for our residential properties, to obtain financing for their purchases of our completed developments. The interest rate at which our real estate customers may borrow funds for the purchase of our properties affects the affordability and purchasing power of, and hence the demand for, our real estate developments.

There can be no assurance that variations in interest rates and interest rate policy by the RBI will not adversely affect our financial condition and results of operations.

58. *Our business is subject to extensive regulation, including various environmental laws and regulations, which may become more stringent in the future.*

The real estate sector in India is heavily regulated by the central, state and local governments. Real estate developers are therefore required to comply with various Indian laws and regulations, including policies and procedures established and implemented by local authorities. Regulatory authorities may allege that we are not in compliance with applicable laws and regulations and may subject us to regulatory action including penalties, seizure of land and other civil or criminal proceedings. We may also not be able to adapt to new laws, regulations or policies that may come into effect from time to time with respect to the real estate sector, which may cause a delay in the implementation of our projects.

In particular, we are subject to various national and local laws and regulations relating to the protection of the environment. These may require us to investigate and clean-up hazardous or toxic substances and materials at a property and be liable for the costs of removal or remediation of such substances and materials. Such liability may be imposed irrespective of whether we knew of, or were responsible for, any environmental damage or pollution or the presence of such substances and materials. The cost of investigation, remediation or removal of these substances and materials may be substantial. Environmental laws may also impose compliance obligations on owners and operators of real property with respect to the management of hazardous materials and other regulated substances. Failure to comply with these laws can result in penalties or other sanctions and we cannot assure you that we will be at all times in full compliance with these regulatory requirements.

59. *We face significant risks before we realise any income from our real estate developments because of the length of time required for completion of each project.*

Real estate developments typically require substantial capital outlay during the acquisition of land or development rights and/or construction phases and it may take a year or more before income or positive cash flows may be generated through sales of a real estate development. Depending on the size of the development, the time span for completing a real estate development runs into several years. Consequently, changes in the business environment during the length of time a project requires for completion may affect the revenue and cost of the development during the period from project commencement to completion, directly impacting on the profitability of the project. Factors that may affect the profitability of a project include the risk that the receipt of government approvals may take more time than expected, the failure to complete construction according to original specifications, schedule or budget, and lack lustre sales or leasing of properties. The sales and the value of a real estate development project may be adversely affected by a number of factors, including but not limited to the national, state and local business climate and regulatory environment, local real estate market conditions, perceptions of property buyers and tenants in terms of the convenience and attractiveness of the project and competition from other available or prospective properties developments.

If any of the risks described above materialises, our returns on investment may be delayed and/or lower than originally expected by us and our financial performance may be adversely affected.

RISKS RELATING TO THE INDIAN ECONOMY

60. *Our business is substantially affected by prevailing economic conditions in India.*

We perform all of our real estate development activities in India, all of our projects are located in India, and the predominant portion of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;

- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our real estate developments and the purchase thereof by our customers;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing national, regional or global economic conditions, including in India's principal export markets; and
- other significant regulatory or economic developments in or affecting India or its real estate development sector.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the residential, and office space real estate markets. Demand in the residential real estate market may be adversely affected by changes such as a decrease in disposable income or a rise in residential mortgage rates or a decline in the population. Demand for our office space developments may be adversely affected by deteriorating economic conditions that could prompt current and potential tenants to place any expansion plans on hold or to search for locations with lower rental rates.

61. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

62. *A downgrade of India's sovereign debt rating may adversely affect our ability to raise debt financing.*

Any adverse revisions by international rating agencies to the credit ratings of the Indian national government's sovereign domestic and international debt may adversely affect our ability to raise financing by resulting in a change in the interest rates and other commercial terms at which we may obtain such financing. This could have a material adverse effect on our capital expenditure plans, business and financial performance. A downgrading of the Indian national government's debt rating may occur, for example, upon a change of government tax or fiscal policy, which are outside our control.

63. *Public companies in India, including our Company, are required to compute Income Tax under the Income Computation and Disclosure Standards (the "ICDS"). The transition to ICDS in India is very recent and we may be negatively affected by such transition.*

The Ministry of Finance had issued a notification dated September 29, 2016 notifying ICDS which creates a new framework for the computation of taxable income. The ICDS shall apply from assessment year 2017-18 onwards. This will have impact on computation of taxable income for Financial Year 2017 onwards. ICDS deviates in several respects from concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. For example, where ICDS-based calculations of taxable income differ from Indian GAAP or Ind AS-based concepts, the ICDS-based calculations have the effect of requiring taxable income to be recognised earlier, increasing overall levels of taxation or both. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operation and financial condition.

SECTION III: INTRODUCTION

SUMMARY OF OUR INDUSTRY

THE REAL ESTATE SECTOR IN INDIA

Real Estate as a sector is the second largest employer, after agriculture and constitutes almost 6% of our GDP. In India, urbanization is the biggest growth driver for real estate, which is fuelled by growth in business environment in the country and it is estimated that around 10-12 million people getting urbanized annually. Further, the government is backing the sector with several initiatives like a push to develop 100 cities into smart cities, initiatives like “Housing for all by 2022” for a growing population in both urban as well a rural India backed by both financial and regulatory support for the buyers and developers. In a falling interest rate scenario with the GDP of the country growing at the fastest pace among the major economies and an easy business environment which is being pushed by the government to bolster the “Make in India” initiative, the demand for assets across the sector may see gradual revival in the next 1-3 years.

The sector is broadly classified into three segments viz. Residential, Commercial and Retail-Malls. There are 8 major real estate markets in the country, with Mumbai, NCR and Bengaluru being the top cities, followed by Pune, Hyderabad, Chennai, Kolkata and Ahmedabad.

The residential real estate segment is fragmented by nature with dominant regional players and very few developers having a pan-India presence. Commercial real estate and Retail real estate segment has fewer players which hold most of the quality office and retail spaces which ensures transparent transactions and accountability in the business for investors and buyers/leasers alike compared with the residential segment.

The real estate sector is headed for greater transparency, and accountability after the introduction of Real Estate Regulation and Development Act, 2016 (RERA) and various other regulatory and policy initiatives. Sources of funds to the cash-starved sector have recently witnessed innovation with introduction of structured products through CMBS, REITs, PE funding etc.

On a CAGR basis they have grown 6.8%, 5.9% and 8.5% respectively between 2012 and 2016 while on an absolute basis, they have grown 29.9%, 25.7% and 38.8% respectively. This shows that while the sales growth has been tepid in the broader market, the debt outstanding and interest expenditure has outpaced the same consistently. This suggests addition in debt levels are not in line with the sales growth for the overall industry. In the last couple of years, with stress in the banking system due to mounting NPA's, domestic non-banking finance companies; private equity etc. have stepped in with funds for longer duration and structured project-specific debt in order to aid the ailing developers.

Private Equity investment in real estate (PERE) in India

Real estate as a sector has been at a disadvantage when it comes to sourcing of funds. Most of the funding occurred either through debt which entails higher interest cost of around 15% and above on an average. Funding through equity is scarce but is one of the avenues. With the opening up of the sector for investments by FDI, global private equity players have been steadily investing in the real estate sector in India with an eye on the urbanization and industrialization theme. Data from a Cushman & Wakefield report states that Private Equity investment in Real Estate (PERE) in India increased 20% to US\$ 4.2 billion from US\$ 3.6 billion in FY15. On a cumulative basis it is forecasted to touch US\$ 7.2 billion in PERE in 2016. Out of this, US\$ 2.5 billion worth of investment has been made by domestic investors. Investment from domestic investors across realty segments constituted of 63% in residential projects, 20% in office projects, and 12% in mixed use projects and rest in retail. While most of these investments are at project level, foreign investors mostly invest in the form of equity due to regulatory restriction on investment through debt. An insight into city level investment shows that Mumbai topped in attracting investments with 41% of residential segment investments and 61% of office segment investments followed by Delhi-NCR in all the three segments namely residential, commercial and retail. Up to Q3 of 2016, foreign investors invested about US\$ 1.15 billion in the Indian real estate markets if one were to go by forecasts made by leading consultants. In terms of segmental investment, 40% were into retail, 36% in residential, 17% in office spaces whereas rest in others like hospitality.

Regulatory changes and policy initiatives for the industry

The industry witnessed introduction of regulatory changes and policy initiatives in order to transform it into an organized, transparent, accountable and investor-friendly sector. Lack of long term funds has been the biggest impediment for the sector which could not be fulfilled by banking institutions owing to regulatory restrictions of the Central bank. Some of the regulatory changes and additions between 2014-16 are as follows-

Real Estate Investment Trusts (REITs): One of the most transformational changes which have been brought in to make the entire sector more transparent and investor centric. Apart from the fact that REIT would let small investors buy into the real estate asset class at a much smaller ticket size, REIT gives large portfolio investors the chance to exit from investments, which makes Indian real estate market favorable for more investments from global investor community. Additionally, Budget 2016-17 exempted dividend distribution tax (DDT) on special purpose vehicles (SPVs). Rules for REITs were relaxed, and the investment cap in under-construction projects was raised from 10% to 20%. Currently, around 229 m. s. ft. of office space can be seen as REIT compliant. (Source: JLL Research)

Real Estate (Regulation & Development) Act 2016: RERA, was passed by the Parliament in March 2016. States have to implement the bill within one year from the time it was passed. This bill is primarily aimed at bringing in transparency to the sector and is being touted as a pro-consumer law. One of the biggest industry wide change is registration of properties under development by developers which would mean only organized and professionally managed companies would be able to carry on with the business, thus the sector would see lot of consolidation going forward.

Goods and Services Tax: The GST is the single-biggest tax reform to be ever introduced in India. GST aims at eliminating the difference in indirect taxes applicable across various states, hence bringing in ease of doing business

and simplified taxation procedure for businesses. The tax regime would be introduced in the year 2017, with most states having accepted the law after debate and discussion. The sector stands to benefit from the fact that GST would provide more clarity on tax-credits for RE transactions and allowance of input credit would reduce the price of properties. GST rate for the real estate sector is expected to be announced in the next year.

Infrastructure status to affordable housing: The affordable housing segment has been accorded infrastructure status which would ensure more funding from the banking system as well as Pension funds being eligible to invest long term into affordable housing segment which in turn would reduce the cost of construction. For classification of affordable housing, instead of “built-up” area of 30/60 sqm, the new classification is “carpet- area” of 30/60 sqm. The 30 sqm limit applies only in case of municipal limits of 4 metropolitan cities while for the rest of the country including the peripheral areas of metros, limit of 60 sqm will apply. The government has also extended the time of completion of such projects from 3 years to 5 years.

Benami Transactions Act 2016: This bill will curb black money flow into real estate and will render holding of property under fictitious names a punishable offence. This bill aims at bringing transparency and accountability in the sector as a whole especially with regard to funding.

Policy initiatives: Pradhan Mantri Awas Yojana and National Urban Housing Policy 2015 set up to meet the gap of housing through increased private sector participation and policy initiatives to support housing for all across by 2022. Total housing shortage envisaged to be addressed through the new mission is 20 million by 2022.

Smart Cities mission for revival and creation of 100 cities into smart cities, Atal mission for rejuvenation and urban transformation, heritage city development and augmentation yojana (HRIDAY) are some other policy initiatives, which if implemented in line with the projected plan of implementation would be huge growth drivers for housing segment of real estate.

THE REAL ESTATE SECTOR IN NASHIK

About Nashik

Known as the wine capital of India, Nashik is now attracting scores of property buyers and investors excited by the city's affordable realty prices, excellent infrastructure, temperate climate and better quality of life in stark contrast to saturated cities like Mumbai and Pune.

Nashik, popularly known as the 'wine city' of India is located around 190 km away from Mumbai and Pune. Besides being a famous pilgrimage centre, Nashik also boasts of a strong industrial base with a strong presence spanning the auto, engineering and electrical industries. Ambad, Satpur, Gonde, Igatpuri and Sinnar are the five major industrial zones developed by the Maharashtra Industrial Development Corporation (MIDC) here and host reputed corporate majors including Hindustan Aeronautics Ltd (HAL), Mahindra & Mahindra, CEAT, LG Electronics, Samsonite, Garware, Siemens, Blow Plast, Bosch, Carbon, Thyssen Krupp, Ceat, Atlas Copco, TI Cycles and Glaxo among others.

Private banks have been major drivers for commercial real estate in Nashik, with ICICI, HDFC and HSBC having expanded their operations phenomenally. Moreover, the Government of Maharashtra is investing heavily into the already thriving Wine Parks industry in Nashik, which is already famous for its Sula Vineyards and York Vinery. It also plays an utmost important role in agriculture. Onion, tomatoes and many other vegetables are exported from Nashik to various parts of the world.

Nashik has been the educational hub of North Maharashtra. The city has two state run universities: Yashwantrao Chavan Maharashtra Open University (YCMOU), near Gangapur village on the outskirts of the city and the Maharashtra University of Health Sciences. Also located here are several leading educational institutions including: Adv. Baburao Ganpatrao Thakare College of Engineering, SND College of Engineering & Research Centre, KTHM College, NDMVP's College of Engineering, Symbiosis Institute of Operations Management and BYK College to name a few. Further Nashik also scores well above average in the infrastructure front with well-developed roads, ample water supply and fast developing social infrastructure. In recent years the city has witnessed huge investments in the infrastructure sector especially in the development of National Highways.

Real Estate Overview

Nashik's realty market is geared for rapid growth going forward given its proximity to major cities like Mumbai and Pune and current saturation of the realty markets in both these cities. Another important factor likely to influence the real estate growth of Nashik is its lower entry costs vis-a-vis Mumbai and Pune and attractive appreciation rates that have made it a haven for property investors. Adding to its lure as a commercial destination has been the entry of several IT, ITeS, BPO and KPO companies who have set up base here attracted by the city's much-lower property prices and the abundant supply of young, English-speaking youth.

Nashik realty has also benefited from a slew of major infrastructure development projects like the four-laning of the Nashik-Mumbai highway and the coming of the Nashik-Pune highway which have done wonders on the connectivity front.

The Sinnar SEZ is at an advanced stage and Accenture has recently announced setting up of a massive 200-acre facility in Nashik. The recently upgraded airport at Ozar with an air cargo terminal and the proposed international airport at Shirdi have catapulted Nashik's to one of the country's fastest developing cities.

Ample water supply and excellent road and rail connectivity to most major cities are some of the other key factors that have played a key role in its rise as a hot realty destination. Other key factors that have also contributed towards this end include its salubrious climate (much like Pune had about two decades ago), affordable property prices, low cost of living and the world-renowned Kumbh Mela, which is hosted here every twelve years.

Key Trends

Traditionally locations adjoining the old city like College Road and Gangapur Road have been the front runners in terms of Nashik's real estate development. However with rapid highway development in recent years areas near the Mumbai-Agra National Highway (NH-3) and Nashik-Pune National Highway (NH-50) are also witnessing a hectic pace of realty development. Other fast upcoming realty destinations include areas such as Pathardi, Adgaon, Nashik Road and Deolali Camp.

The city's residential landscape is in the midst of a change and villas and row houses are now being replaced by apartment complexes and high-rises equipped with the latest amenities. Some of Nashik's leading developers include: Thackers Developers, Archit Group, Karda Constructions, Samraat Group, Nishant Builders, Nayantara Estates, Shree Buildcon, Deepak Builders & Developers, Mittal Developers and Lalwani Constructions among several others.

With the exception of a few prime areas, residential rates here are in the range of INR 3, 000 - 4500 psf, while prime locations such as Gangapur and College Road command a premium with prices in the region of INR 5, 000 - 6,000 psf. The prime areas for commercial development are still the Old City, College Road, Nashik Road and Gangapur Road.

COMPETITIVE STRENGTHS

We believe that the following are our primary competitive strengths:

Strong presence in Nashik

Nashik's realty market is geared for rapid growth going forward given its proximity to major cities like Mumbai and Pune and current saturation of the realty markets in both these cities. Another important factor likely to influence the real estate growth of Nashik is its lower entry costs vis-a-vis Mumbai and Pune and attractive appreciation rates that have made it a haven for property investors (*Source: https://www.propertycrow.com/blog/news_nashik-city-of-limitless-real-estate-potential_171.html*). Our Company as on the date of the Draft Red Herring Prospectus has successfully completed and delivered 10,05,253 sq. ft. of carpet area, comprising of 15 projects and 1,072 units. Having successfully completed and delivered such significant amount of carpet area, we believe that we have good knowledge of the market and regulatory environment in Nashik that assists us in identifying opportunities in this region. Further we currently have 13 Ongoing and 3 Planned projects, with which we expect to provide a total carpet area of approximately 17,59,017 square feet. We believe that having an experience of over two decades of developing real estate projects in Nashik, and having a strong presence in the Nashik real estate market we can exploit the growth opportunities in the Nashik.

Established brand and reputation

All of our Completed, Ongoing and Planned projects are located in Nashik. Further most of our project names begin with the word "Hari" (such as "Hari Vishwa", "Hari Sanskruti" "Hari Amrut", etc) which differentiates our projects from the projects of the other developers in Nashik. The term "Hari", has become Synonymous with our Company and its path breaking constructions that have contributed immensely in revamping Nashik's Skyline over the years. We believe that over the years through successful completion and delivery of the projects we have been able to establish and strengthen the "Hari" brand will enable us to get a positive support for future projects using the same brand in the form of advance bookings, revenue share deals, development rights, government approvals, etc.

Our proven execution capabilities

We believe that we are a knowledge-based organisation and we undertake research for our projects prior to making any decisions to acquire, develop or sell our properties. Our projects span different segments of the real estate market, such as residential and office space and we believe this diversity will allow us to better weather market cycles. We have also demonstrated our ability to develop projects in diverse market conditions. Our track record of successful developments is due primarily to our Promoter who has an established reputation in the industry and has completed a significant number of projects. Our Company has successfully completed and delivered 14 residential projects and office space projects as on the date of this draft red herring prospectus and had received "***Mega Builder of the Year***" award of Divya Marathi in June 2013, for having an exceptional performance in the real estate segment in Nashik. Further our Mr. Naresh Karda had also been awarded as "***Business Icon of Nashik***" by Lokmat in December 2014.

Further as on the date of this Draft Red Herring Prospectus, our Company has been successful in getting all its ongoing projects registered under the "Real Estate (Regulation and Development) Act 2016" (RERA) which we believe will help us compete against other real estate developers in Nashik.

Strong project pipeline providing cash flow visibility

We believe that we have a strong project pipeline, which provides cash flow visibility. We currently have 13 Ongoing and 3 Planned projects, which we expect to provide a total Carpet Area of approximately 17,59,017 square feet. These include twelve Ongoing and three Planned residential projects with approximately 13,30,583 square feet of estimated Carpet Area, one Ongoing residential-cum-office space project with approximately 4,28,414 square feet of estimated Carpet Area.

In addition, we follow a sale model for our residential and residential-cum-office projects and may in the future also follow this model. For these projects we typically receive a certain portion of the purchase price as down payment at the time of booking a particular unit and the remainder through periodic payments linked to certain other construction milestones while the project is being developed. We generally launch such projects and commence the sales process for a portion of the total number of units to be sold around the time of commencing construction. As on March 31st, 2017 our Company has collected advances of ₹ 5,855.09 lakhs from our customers towards the units sold.

Vast land reserves and an ability to identify new projects

An important element of our success is our acquisition of land in and around Nashik. As on the date of this Draft Red Herring Prospectus, our land reserves included approximately 3,00,754 square feet of estimated Developable Land Area in and around Nashik. We actively attempt to identify and acquire land that may be available for sale in areas where our customers demand residential or commercial projects or where we foresee development in the future. We have the ability to assess the potential of a location, identify locations that are relatively underdeveloped and gain the first mover advantage in such locations at a reasonable cost.

For risks related to our business, our Company and our industry, please refer “Risk Factors” on page 15 of this Draft Red Herring Prospectus.

OUR STRATEGY

Diversify the portfolio of projects we undertake and our business activities

Our Company has so far been a real estate development company, developing residential and residential-cum commercial projects in Nashik. However with a view to expand the portfolio of our business activities our Company recently has ventured into construction contracts. For further details refer section titled “Description of Our Business” on page 89 of this Draft Red Herring Prospectus. By diversifying the portfolio of our activities we intend to create additional sources of income which will further increase the cash flow visibility of our Company. Further we believe diversification of our portfolio of our activities will help us mitigate the risk caused by any adverse effect on the real estate sector in Nashik and the country as a whole.

Continue to strengthen relationships with key service providers and take benefit of scalability by outsourcing model

We intend to continue to follow our outsourcing model and further strengthen our relationships with key service providers such as architects and contractors. This will enable our management to focus more on our core business by continuing to outsource the design and construction to our service providers. We also believe that our outsourcing model will enable us to develop projects with quality design and construction as we are able to access the best service providers in their respective fields to create the type of projects that we believe our customers want.

Cultivate long-term relationships with major financial institutions and others

We cultivate long-term relationships with the banks, financial institutions, and individual investors as lenders and co-investors in future projects. Entering into co-investor relationships with the banks, financial institutions and individual investors provides a number of benefits, including a lower cost of funds; access to larger fund pools; improved sourcing capabilities; assistance in entering new markets; and access to the expertise and general manpower of the organization. The expertise and resources available to us as a result of such relationships improve our ability to assess the economic risks involved in potential deals and thereby allow us to make more informed investment decisions.

Continue our focus on developing projects in and around Nashik

All of our Ongoing and Upcoming Projects are concentrated in and around Nashik. We believe that the real estate industry in India is predominantly regional due to difficulties with respect to large scale land acquisition in unfamiliar locations, inadequate infrastructure to market projects in new locations, the complex legal framework and the large number of approvals which must be obtained from different authorities at various stages of construction under local laws, and the long gestation period of projects. We believe that due to our familiarity and experience of the markets in and around Nashik, we will be able to use our expertise to expand our business in and around Nashik. Further, we believe that the real estate market in India will be dominated by local players rather than pan-India players and therefore, we will continue to focus on these core markets.

THE REAL ESTATE SECTOR IN INDIA

Real Estate as a sector is the second largest employer, after agriculture and constitutes almost 6% of our GDP. In India, urbanization is the biggest growth driver for real estate, which is fueled by growth in business environment in the country and it is estimated that around 10-12 million people getting urbanized annually. Further, the government is backing the sector with several initiatives like a push to develop 100 cities into smart cities, initiatives like “Housing for all by 2022” for a growing population in both urban as well a rural India backed by both financial and regulatory support for the buyers and developers. In a falling interest rate scenario with the GDP of the country growing at the fastest pace among the major economies and an easy business environment which is being pushed by the government to bolster the “Make in India” initiative, the demand for assets across the sector may see gradual revival in the next 1-3 years.

The sector is broadly classified into three segments viz. Residential, Commercial and Retail-Malls. There are 8 major real estate markets in the country, with Mumbai, NCR and Bengaluru being the top cities, followed by Pune, Hyderabad, Chennai, Kolkata and Ahmedabad.

The residential real estate segment is fragmented by nature with dominant regional players and very few developers having a pan-India presence. Commercial real estate and Retail real estate segment has fewer players which hold most of the quality office and retail spaces which ensures transparent transactions and accountability in the business for investors and buyers/leasers alike compared with the residential segment.

The real estate sector is headed for greater transparency, and accountability after the introduction of Real Estate Regulation and Development Act, 2016 (RERA) and various other regulatory and policy initiatives. Residential Real Estate

Residential real estate constitutes almost 80% of the real estate market in the country (Source: JLL). Kochi and Lucknow with the launch of Metro Rail have joined the ranks of tier-2 metro cities and have been included in the table below on the Residex. The residential real estate prices for cities namely Bangalore, Hyderabad and Kochi have been more or less stagnant in the past 9 years since the inception of the index whereas the prices of properties in Chennai, Pune, Mumbai, Ahmedabad and Lucknow have grown over 2X during the same period. A look at the prices in top-10 cities also reveals that the prices of properties across these markets have remained stable or have corrected in the last three years, which on inflation adjusted basis shows an overall downtrend in prices.

RESIDEX is a housing price index updated quarterly by National Housing Bank (NHB). NHB, the Apex level housing finance institution wholly owned by Reserve Bank of India (RBI), regulates activities of housing finance companies (HFCs) in India. NHB Residex tracks residential property prices in 26 JNNURM cities with the starting index value of 100 and 2007 as the base year. Residex tracks prices over a period of time by dwelling size (small /medium / large) and location (city / zones / locations). Data on housing prices is collected from diverse sources such as survey of real estate agents, CERSAI registry and housing prices being collected from banks & HFCs based on home loans sanctioned by them.

Demand and supply

Residential property sales has for the first time since 2008 crisis been more than the new launches during the years 2015 & 2016. This also shows that developers have been going slowly with new launches of projects owing to regulatory changes like Real Estate (Regulation and Development) Act 2016. Besides, they have also tried to bring down inventories in line with the demand in the market. According to data from India Brand Equity Foundation (IBEF), the demand from top-8 cities namely Mumbai, NCR, Bangalore, Kolkata, Hyderabad, Chennai, Pune and Ahmedabad for Middle Income Group (MIG) and High Income Group (HIG) housing would stand at 2.5 million units till 2017.

In terms of inventory overhang up to Q3Y16 across segments (majorly HIG and MIG), the three biggest markets with highest unsold units (including under-construction properties) are NCR, Mumbai and Bangalore. NCR at 37% of unsold inventory is more than a third of India's unsold (including under-construction) residential inventory (Source: JLL). Even though the highest demand in housing continues to be in Lower Income Group (LIG) housing segment, the supply barely fulfils the demand according to a report by Cushman and Wakefield. One reason for lower number of LIG launches over MIG and HIG housing is lower margin for developers in LIG housing segment vis-a-vis the high cost of funds leading to higher number of launches in the MIG and HIG segment that offer better margins.

Real estate in major cities has predominantly been seen as an investment avenue. The investment demand that comprised a substantial part of the total demand in the sector is largely drying up in the absence of any visible price appreciation resulting in lower returns to investors. On the other hand failed to notice the change in demand and kept adding new inventory in these existing segments. These were primarily debt funded at interest rates over 15%. Lack of proper price discovery due to non-transparent transactions and broker driven market coupled with low investment demand has led to high inventory levels with the developers.

The below graph exhibits that the total forecasted segment-wise housing supply addition and demand for the period 2016-20. It can be clearly seen that the demand in HIG and MIG segment is 52% of the total demand for housing in the market while supply is 98% thus adding to the inventory level. The total demand for LIG housing is 48% of the total demand across segments, but new inventory added in this segment constitutes only 2% of the total new inventory added. Therefore, despite shortage and large pent up demand in LIG segment, the inventory levels may would remain stagnant and increase as more LIG houses are added to meet the demand in the segment. This would make developers renegotiate prices in MIG and HIG segments for liquidating the inventory, leading to correction in prices of MIG and HIG housing segments.

Notably, some developers known for their quality construction, timely completion and proven project management record have held on to their land parcels and have lower inventory addition. Smaller and well located projects led to better demand for these projects. Since, their inventory was in sync with the market demand-supply and the projects were well within their financial wherewithal, they were impacted less unfavourably during the downturn. These developers have been more sensitive towards the requirement of the market and have launched projects well spread across all the housing segments.

Outlook

The sector post-introduction of Real Estate (Regulation and Development) Act (RERA) is on the path to transformation, especially for the residential real estate segment. Some of the new regulations under RERA include disallowing the common practice among many developers of pre-launching projects without getting requisite approvals from the local authorities, making project registration mandatory with the regulator, and developers will have to disclose approval status, project layout and timeframe for completion to the regulator as well as customers. Additionally, in order to curb diversion of funds the developer will now have to deposit 70% of the project funds in a separate account which can only be used for the earmarked project. The Act also restricts developers from changing plans post approvals without the consent of the buyers further empowering the buyers.

The sector is expected to witness large scale consolidation. Smaller developers would find it difficult to meet their cash flow requirements due to prohibition on pre-sales until a project is registered post approval with the regulatory authority. This would require the small developers to merge or tie-up with large developers and then co-develop properties.

The implementation of RERA may entail initial hiccups across the states and hence the more established and bigger

developers would be at an advantageous position compared to the small and marginal developers when it comes to adhering to regulations.

Growth of sales would be muted for the year 2017 owing to following factors:

- With high liquidity in banking system post-demonetization, the buyers would be on a wait-and-watch mode expecting further cut in borrowing rates.
- End-user markets like Pune, Bangalore and Chennai, which has more buyers employed in the IT and outsourcing industry, the global downturn could lead to some deferral in buying from this segment.
- Markets like Mumbai and NCR, which are investment centric property markets would continue to see tepid sales, with most buyers adjusting to the demonetization shock and deferring purchases in expectation of correction in prices of the properties post-demonetization.
- Development of new micro-markets like Vishakhapatnam, Surat, Vadodara etc. where entry of large developers and new-construction activity could be a positive for the segment owing to better industrial development and rapid urbanization of these cities as compared to its Metro-counterparts. It would be only after the complete implementation of all regulations across markets and as well as developers changing gears with regard to new addition of inventory LIG and EWS (Economically Weaker Section) housing segments that the sales of residential spaces may pick-up.

Commercial real estate

Commercial real estate much contrary to the residential segment has witnessed sustained demand during 2016, primarily from industries like ITeS, Consulting, BFSI, Telecom and E-Commerce etc. The demand was partially offset due to scarcity of Grade-A quality office spaces in cities like Bengaluru, Chennai and Pune, which has led to deferral of leasing or curtailment of the same (Source: JLL). The Government’s initiative of “Make in India” is providing a major boost to real estate assets like warehouses, industrial assets and logistics assets which form a part of the commercial real estate. There is renewed interest in these segments from various funds/investors and developers for new developments and investment.

Demand and supply

Grade-A buildings are classified on the basis of their location, providing good access and proximity to public-transport and infrastructure, and are professionally managed by property managers. They represent the newest and highest quality buildings and infrastructure in their market and attract high profile tenants and command the highest rents. The Grade-A inventory in the top 8 cities has doubled in the last 7 years till September 2016, with Mumbai, NCR and Bengaluru contributing to about 65% of the total Grade-A office spaces.

Bengaluru saw the highest addition of commercial real estate, even though it took a hit due to Municipal Authorities reassessing previous building sanctions during the past year, followed by Mumbai and NCR. This new addition of office space has been primarily absorbed by IT and its allied sectors and E-commerce, which has grown in the past few years and seems to be lapping up more office space in line with their growing business and operation. The net supply in the top-8 cities for office space stands at 434 m.s.f. and an additional 132 m.s.f is expected to be added in the period 2017-20. Bengaluru, Hyderabad, Chennai and Pune with higher investment in infrastructure, are expected to drive the demand

growth in commercial real estate and would see the highest addition of commercial/office spaces followed by Delhi-NCR and Mumbai.

Outlook

During the year 2017, the commercial real estate segment is poised to see lot of interest especially from the investor point of view. India is the fastest growing emerging economy. Major realty funds and private equity funds have been acquiring Grade-A properties across the top business centres of the country in the past few years with an eye on rapid business expansion which would lead to demand for commercial and office space. The market would see inflow of investments as REIT finally enters its implementation phase. REIT, or Real Estate Investment Trust, is a company that owns or finances income-producing real estate. Modelled after mutual funds, REITs allow investors to invest in portfolios of large-scale properties and in turn they earn a share of the income produced through rentals generated on these properties – without actually having to go out and buy or finance a property.

Most REITs are traded on major stock exchanges globally. REIT helps provide exit to developers, portfolio investors and private equity funds by listing their properties. IT, E-Commerce and BFSI, have been major growth demand drivers for commercial real estate segment. They have more recently been cutting down on their costs to bring in efficiency and hence there would be a sharp decrease in demand going forward from these sectors. Owing to higher addition of commercial spaces in Bengaluru, Hyderabad and Pune, which are high demand markets, the lease for commercial properties may not appreciate the way they have historically. With all the major sectors mentioned above which contribute towards higher demand and growth in rentals in the commercial segment, under pressure due to macro and micro factors, commercial space owners would find it difficult to keep their properties occupied especially since there is higher supply addition in the commercial real estate segment going forward. Except for the immediate absorption due to deferred leasing from the previous year, absorption rate would be slow until the above mentioned sectors experience some tailwinds.

Interestingly, as a new trend, IT companies who used to build/buy spaces of their own have now shifted to leasing spaces for offices. This is an industry-wide change and as the global business for IT companies improve, they may going forward lease more spaces to ramp up operations. Lower grade office spaces may find it difficult to find occupiers other than markets like Bengaluru, Hyderabad, Chennai and Pune. Developers and owners of these spaces may have to upgrade and standardize their properties to be RERA compliant spaces. A possible disruption in commercial space leasing business could be a concept called “co-working spaces”, which is still in its initial stages, but is steadily picking up in developed markets like Mumbai. Co-working spaces are fully functional offices, shared by professionals. Such spaces typically provide desks, cabins, meeting rooms, internet, cafe services and other basic resources. They are convenient as there is zero setup time and cost to be invested by a user. Co-working spaces are more affordable than offices, and are being adopted by businesses in cities like Mumbai and Bangalore.

Financing mechanisms in Real Estate Sector in India

Debt financing in real estate

The table given below shows the debt outstanding, sales and interest expense of sample of 109 companies.

Year	2012	2013	2014	2015	2016	Growth (Abs)	CAGR
Debt	40,908.8	41,445.0	43,039.3	47,580.8	53,136.1	29.8%	6.7%

*Source: Aceequity (All figures in Crores)

On a CAGR basis they have grown 6.8%, 5.9% and 8.5% respectively between 2012 and 2016 while on an absolute basis, they have grown 29.9%, 25.7% and 38.8% respectively. This shows that while the sales growth has been tepid in the broader market, the debt outstanding and interest expenditure has outpaced the same consistently. This suggests addition in debt levels are not in line with the sales growth for the overall industry. In the last couple of years, with stress in the banking system due to mounting NPA's, domestic non-banking finance companies; private equity etc. have stepped in with funds for longer duration and structured project-specific debt in order to aid the ailing developers.

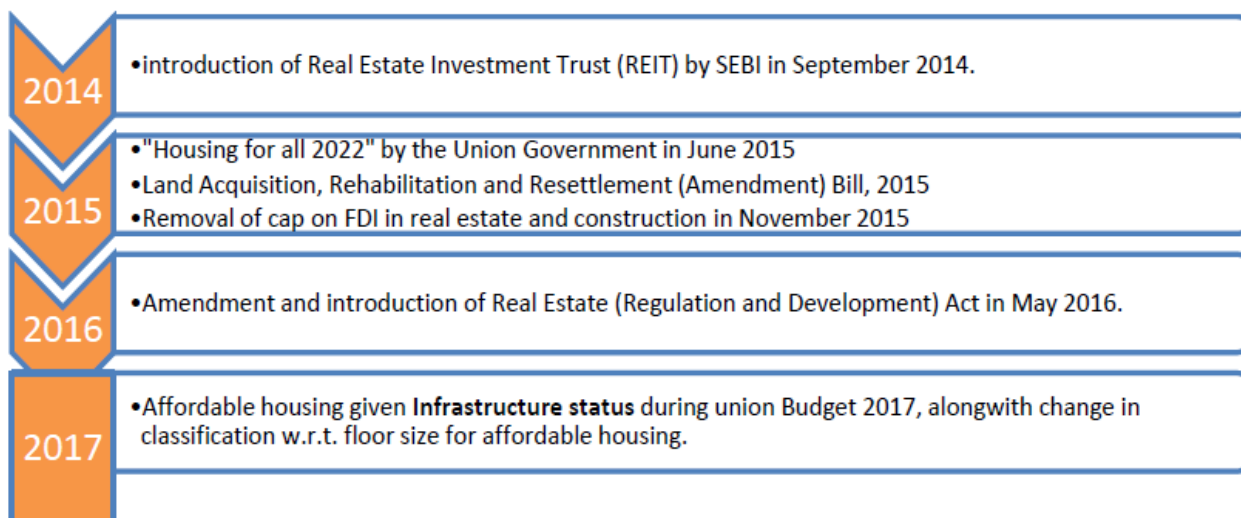

Private Equity investment in real estate (PERE) in India

Real estate as a sector has been at a disadvantage when it comes to sourcing of funds. Most of the funding occurred either through debt which entails higher interest cost of around 15% and above on an average. Funding through equity is scarce but is one of the avenues. With the opening up of the sector for investments by FDI, global private equity players have been steadily investing in the real estate sector in India with an eye on the urbanization and industrialization theme. Data from a Cushman & Wakefield report states that Private Equity investment in Real Estate (PERE) in India increased 20% to US\$ 4.2 billion from US\$ 3.6 billion in FY15. On a cumulative basis it is forecasted to touch US\$ 7.2 billion in PERE in 2016. Out of this, US\$ 2.5 billion worth of investment has been made by domestic investors.

Investment from domestic investors across realty segments constituted of 63% in residential projects, 20% in office projects, and 12% in mixed use projects and rest in retail. While most of these investments are at project level, foreign investors mostly invest in the form of equity due to regulatory restriction on investment through debt. An insight into city level investment shows that Mumbai topped in attracting investments with 41% of residential segment investments and 61% of office segment investments followed by Delhi-NCR in all the three segments namely residential, commercial and retail. Up to Q3 of 2016, foreign investors invested about US\$ 1.15 billion in the Indian real estate markets if one were to go by forecasts made by leading consultants. In terms of segmental investment, 40% were into retail, 36% in residential, 17% in office spaces whereas rest in others like hospitality.

Regulatory changes and policy initiatives for the industry

The industry witnessed introduction of regulatory changes and policy initiatives in order to transform it into an organized, transparent, accountable and investor-friendly sector. Lack of long term funds has been the biggest impediment for the sector which could not be fulfilled by banking institutions owing to regulatory restrictions of the Central bank. Some of the regulatory changes and additions between 2014-16 are as follows-

Real Estate Investment Trusts (REITs): One of the most transformational changes which have been brought in to make the entire sector more transparent and investor centric. Apart from the fact that REIT would let small investors buy into the real estate asset class at a much smaller ticket size, REIT gives large portfolio investors the chance to exit from investments, which makes Indian real estate market favourable for more investments from global investor community. Additionally, Budget 2016-17 exempted dividend distribution tax (DDT) on special purpose vehicles (SPVs). Rules for REITs were relaxed, and the investment cap in under-construction projects was raised from 10% to 20%. Currently, around 229 m.s.ft. of office space can be seen as REIT compliant. (Source: JLL Research)

Real Estate (Regulation & Development) Act 2016: RERA, was passed by the Parliament in March 2016. States have to implement the bill within one year from the time it was passed. This bill is primarily aimed at bringing in transparency to the sector and is being touted as a pro-consumer law. One of the biggest industry wide change is registration of properties under development by developers which would mean only organized and professionally managed companies would be able to carry on with the business, thus the sector would see lot of consolidation going forward.

Goods and Services Tax: The GST is the single-biggest tax reform to be ever introduced in India. GST aims at eliminating the difference in indirect taxes applicable across various states, hence bringing in ease of doing business and simplified taxation procedure for businesses. The tax regime would be introduced in the year 2017, with most states having accepted the law after debate and discussion. The sector stands to benefit from the fact that GST would provide more clarity on tax-credits for RE transactions and allowance of input credit would reduce the price of properties. GST rate for the real estate sector is expected to be announced in the next year.

Infrastructure status to affordable housing: The affordable housing segment has been accorded infrastructure status which would ensure more funding from the banking system as well as Pension funds being eligible to invest long term into affordable housing segment which in turn would reduce the cost of construction. For classification of affordable housing, instead of "built-up" area of 30/60 sqm, the new classification is "carpet-area" of 30/60 sqm. The 30 sqm limit applies only in case of municipal limits of 4 metropolitan cities while for the rest of the country including the peripheral areas of metros, limit of 60 sqm will apply. The government has also extended the time of completion of such projects from 3 years to 5 years.

Benami Transactions Act 2016: This bill will curb black money flow into real estate and will render holding of property under fictitious names a punishable offence. This bill aims at bringing transparency and accountability in the sector as a whole especially with regard to funding.

Policy initiatives: Pradhan Mantri Awas Yojana and National Urban Housing Policy 2015 set up to meet the gap of housing through increased private sector participation and policy initiatives to support housing for all across by 2022. Total housing shortage envisaged to be addressed through the new mission is 20 million by 2022.

Smart Cities mission for revival and creation of 100 cities into smart cities, Atal mission for rejuvenation and urban transformation, heritage city development and augmentation yojana (HRIDAY) are some other policy initiatives, which if implemented in line with the projected plan of implementation would be huge growth drivers for housing segment of real estate.

THE REAL ESTATE SECTOR IN NASHIK

About Nashik

Known as the wine capital of India, Nashik is now attracting scores of property buyers and investors excited by the city's affordable realty prices, excellent infrastructure, temperate climate and better quality of life in stark contrast to saturated cities like Mumbai and Pune.

Nashik, popularly known as the 'wine city' of India is located around 190 km away from Mumbai and Pune. Besides being a famous pilgrimage centre, Nashik also boasts of a strong industrial base with a strong presence spanning the auto, engineering and electrical industries. Ambad, Satpur, Gonde, Igatpuri and Sinnar are the five major industrial zones developed by the Maharashtra Industrial Development Corporation (MIDC) here and host reputed corporate majors including Hindustan Aeronautics Ltd (HAL), Mahindra & Mahindra, CEAT, LG Electronics, Samsonite, Garware, Siemens, Blow Plast, Bosch, Carbon, Thyssen Krupp, Ceat, Atlas Copco, TI Cycles and Glaxo among others.

Private banks have been major drivers for commercial real estate in Nashik, with ICICI, HDFC and HSBC having expanded their operations phenomenally. Moreover, the Government of Maharashtra is investing heavily into the already thriving Wine Parks industry in Nashik, which is already famous for its Sula Vineyards and York Vinery. It also plays an utmost important role in agriculture. Onion, tomatoes and many other vegetables are exported from Nashik to various parts of the world.

Nashik has been the educational hub of North Maharashtra. The city has two state run universities: Yashwantrao Chavan Maharashtra Open University (YCMOU), near Gangapur village on the outskirts of the city and the Maharashtra University of Health Sciences. Also located here are several leading educational institutions including: Adv. Baburao Ganpatrao Thakare College of Engineering, SND College of Engineering & Research Centre, KTHM College, NDMVP's College of Engineering, Symbiosis Institute of Operations Management and BYK College to name a few. Further Nashik also scores well above average in the infrastructure front with well-developed roads, ample water supply and fast developing social infrastructure. In recent years the city has witnessed huge investments in the infra sector especially in the development of National Highways.

Real Estate Overview

Nashik's realty market is geared for rapid growth going forward given its proximity to major cities like Mumbai and Pune and current saturation of the realty markets in both these cities. Another important factor likely to influence the real estate growth of Nashik is its lower entry costs vis-a-vis Mumbai and Pune and attractive appreciation rates that have made it a haven for property investors. Adding to its lure as a commercial destination has been the entry of several IT, ITeS, BPO and KPO companies who have set up base here attracted by the city's much-lower property prices and the

abundant supply of young, English-speaking youth.

Nashik realty has also benefited from a slew of major infrastructure development projects like the four-laning of the Nashik-Mumbai highway and the coming of the Nashik-Pune highway which have done wonders on the connectivity front.

The Sinnar SEZ is at an advanced stage and Accenture has recently announced setting up of a massive 200-acre facility in Nashik. The recently upgraded airport at Ozar with an air cargo terminal and the proposed international airport at Shirdi have catapulted Nashik's to one of the country's fastest developing cities.

Ample water supply and excellent road and rail connectivity to most major cities are some of the other key factors that have played a key role in its rise as a hot realty destination. Other key factors that have also contributed towards this end include its salubrious climate (much like Pune had about two decades ago), affordable property prices, low cost of living and the world-renowned Kumbh Mela, which is hosted here every twelve years.

Key Trends

Traditionally locations adjoining the old city like College Road and Gangapur Road have been the front runners in terms of Nashik's real estate development. However with rapid highway development in recent years areas near the Mumbai-Agra National Highway (NH-3) and Nashik-Pune National Highway (NH-50) are also witnessing a hectic pace of realty development. Other fast upcoming realty destinations include areas such as Pathardi, Adgaon, Nashik Road and Deolali Camp.

The city's residential landscape is in the midst of a change and villas and row houses are now being replaced by apartment complexes and high-rises equipped with the latest amenities. Some of Nashik's leading developers include: Thackers Developers, Archit Group, Karda Constructions, Samraat Group, Nishant Builders, Nayantara Estates, Shree Buildcon, Deepak Builders & Developers, Mittal Developers and Lalwani Constructions among several others.

With the exception of a few prime areas, residential rates here are in the range of INR 3, 000 - 4500 psf, while prime locations such as Gangapur and College Road command a premium with prices in the region of INR 5, 000 - 6,000 psf. The prime areas for commercial development are still the Old City, College Road, Nashik Road and Gangapur Road.

Popular realty investment destinations here include upcoming locations like Anandwalli, Indiranagar, Pathardi, Makhmalabad and Pune Road, though the rental values here are still in their nascent stage, the potential for higher returns going forward remains impressive. Ongoing projects at locations like Takli Road, Chandsi, Nashik-Peth-Gujarat Highway and properties along Nashik Road are being preferred by investors looking for slightly upmarket locations offering a good potential for real estate development. Further with the western side of the city already well-developed, one of the fastest-developing areas is the southern side, Pathardi, which already has fast-selling projects, holds immense promise for future appreciation. Deolali on the outskirts of Nashik is another potential location for investors looking for good returns in the future.

Investment Potential

Overall, Nashik offers very encouraging fundamentals for real estate investors. Some of the advantages it enjoys over other major cities in Maharashtra include:

- Well-developed physical infrastructure.
- Adequate and reliable water supply.
- Strategic located at one vertex of the golden triangle of Mumbai, Pune and Nashik.
- Comparatively lower environmental pollution.
- Efficient and well-developed intra and intercity commuting facilities.
- Excellent connectivity with other regional growth centres.
- Developed industrial estates such as Ozar, Sinnar, Satpur and Ambad in the immediate vicinity.
- Modern Software Technology Park at Ambad.
- Salubrious year-round climate.
- A safe and secure social environment thanks to the presence of a major defense base here.
- Excellent air and rail connectivity with other major cities.
- Large pool of skilled, English-speaking professionals.
- Well developed educational and healthcare sector with a large number of reputed institutions having a presence here.

Future Prospectus

With growing urban agglomeration and the rapid development of connectivity between Mumbai and Nashik, people are looking at a future wherein people will be able to live in Nashik and travel to Mumbai and back for work purposes. Property experts unanimously believe that the current property rate will double in the next five years due to the huge infrastructural investments being done in the city which forms a crucial part of the state's golden triangle with a huge opportunity for growth and accelerated returns on investments in property.

According to local realty players, over the last few years the general real estate trend in Nashik has been one of accelerated growth even in the face of a marked slowdown in the real estate market across the country. It's a fact borne out by the steady rise in the number of ongoing projects and construction-related activities across the city in the last few years. Developers in the city are displaying remarkable vision and appear to be replicating the urban development model set by their counterparts in bigger cities like Mumbai and Pune, with an array of bigger and better projects equipped with the latest in terms of amenities now mushrooming all over the city.

All these factors are also boosting the city's employment generation potential and rising income levels, which directly influence the demand for residential real estate. Going forward, Nashik, by virtue of its strategic location and growing economic importance has the capability to emerge as an ideal real estate destination and a potential Smart city.

As on July 31, 2017 we have 56 employees on the pay roll of our Company.

COMPETITIVE STRENGTHS

We believe that the following are our primary competitive strengths:

Strong presence in Nashik

Nashik's realty market is geared for rapid growth going forward given its proximity to major cities like Mumbai and Pune and current saturation of the realty markets in both these cities. Another important factor likely to influence the real estate growth of Nashik is its lower entry costs vis-a-vis Mumbai and Pune and attractive appreciation rates that have made it a haven for property investors (*Source: https://www.propertycrow.com/blog/news_nashik-city-of-limitless-real-estate-potential_171.html*). Our Company as on the date of the Draft Red Herring Prospectus has successfully completed and delivered 10,05,253 sq. ft. of carpet area, comprising of 15 projects and 1,072 units. Having successfully completed and delivered such significant amount of carpet area, we believe that we have good knowledge of the market and regulatory environment in Nashik that assists us in identifying opportunities in this region. Further we currently have 13 Ongoing and 3 Planned projects, with which we expect to provide a total carpet area of approximately 17,59,017 square feet. We believe that having an experience of over two decades of developing real estate projects in Nashik, and having a strong presence in the Nashik real estate market we can exploit the growth opportunities in the Nashik.

Established brand and reputation

All of our Completed, Ongoing and Planned projects are located in Nashik. Further most of our project names begin with the word "Hari" (such as "Hari Vishwa", "Hari Sanskruti" "Hari Amrut", etc) which differentiates our projects from the projects of the other developers in Nashik. The term "Hari", has become Synonymous with our Company and its path breaking constructions that have contributed immensely in revamping Nasik's Skyline over the years. We believe that over the years through successful completion and delivery of the projects we have been able to establish and strengthen the "Hari" brand will enable us to get a positive support for future projects using the same brand in the form of advance bookings, revenue share deals, development rights, government approvals, etc.

Our proven execution capabilities

We believe that we are a knowledge-based organisation and we undertake research for our projects prior to making any decisions to acquire, develop or sell our properties. Our projects span different segments of the real estate market, such as residential and office space and we believe this diversity will allow us to better weather market cycles. We have also demonstrated our ability to develop projects in diverse market conditions. Our track record of successful developments is due primarily to our Promoter who has an established reputation in the industry and has completed a significant number of projects. Our Company has successfully completed and delivered 14 residential projects and office space projects as on the date of this draft red herring prospectus and had received "***Mega Builder of the Year***" award of Divya Marathi in June 2013, for having an exceptional performance in the real estate segment in Nashik. Further our Mr. Naresh Karda had also been awarded as "***Business Icon of Nashik***" by Lokmat in December 2014.

Further as on the date of this Draft Red Herring Prospectus, our Company has been successful in getting all its ongoing projects registered under the "Real Estate (Regulation and Development) Act 2016" (RERA) which we believe will help us compete against other real estate developers in Nashik.

Strong project pipeline providing cash flow visibility

We believe that we have a strong project pipeline, which provides cash flow visibility. We currently have 13 Ongoing and 3 Planned projects, which we expect to provide a total Carpet Area of approximately 17,59,017 square feet. These include twelve Ongoing and three Planned residential projects with approximately 13,30,583 square feet of estimated Carpet Area, one Ongoing residential-cum-office space project with approximately 4,28,414 square feet of estimated Carpet Area.

In addition, we follow a sale model for our residential and residential-cum-office projects and may in the future also follow this model. For these projects we typically receive a certain portion of the purchase price as down payment at the time of booking a particular unit and the remainder through periodic payments linked to certain other construction milestones while the project is being developed. We generally launch such projects and commence the sales process for a portion of the total number of units to be sold around the time of commencing construction. As on March 31st, 2017 our Company has collected advances of ₹ 5,855.09 lakhs from our customers towards the units sold.

Vast land reserves and an ability to identify new projects

An important element of our success is our acquisition of land in and around Nashik. As on the date of this Draft Red Herring Prospectus, our land reserves included approximately 3,00,754 square feet of estimated Developable Land Area in and around Nashik. We actively attempt to identify and acquire land that may be available for sale in areas where our customers demand residential or commercial projects or where we foresee development in the future. We have the ability to assess the potential of a location, identify locations that are relatively underdeveloped and gain the first mover advantage in such locations at a reasonable cost.

OUR STRATEGY

Diversify the portfolio of projects we undertake and our business activities

Our Company has so far been a real estate development company, developing residential and residential-cum commercial projects in Nashik. However with a view to expand the portfolio of our business activities our Company recently has ventured into construction contracts. For further details refer section titled “*Description of Our Business*” on page 89 of this Draft Red Herring Prospectus. By diversifying the portfolio of our activities we intend to create additional sources of income which will further increase the cash flow visibility of our Company. Further we believe diversification of our portfolio of our activities will help us mitigate the risk caused by any adverse effect on the real estate sector in Nashik and the country as a whole.

Continue to strengthen relationships with key service providers and take benefit of scalability by outsourcing model

We intend to continue to follow our outsourcing model and further strengthen our relationships with key service providers such as architects and contractors. This will enable our management to focus more on our core business by continuing to outsource the design and construction to our service providers. We also believe that our outsourcing model will enable us to develop projects with quality design and construction as we are able to access the best service providers in their respective fields to create the type of projects that we believe our customers want.

Cultivate long-term relationships with major financial institutions and others

We cultivate long-term relationships with the banks, financial institutions, and individual investors as lenders and co-investors in future projects. Entering into co-investor relationships with the banks, financial institutions and individual investors provides a number of benefits, including a lower cost of funds; access to larger fund pools; improved sourcing capabilities; assistance in entering new markets; and access to the expertise and general manpower of the organization. The expertise and resources available to us as a result of such relationships improve our ability to assess the economic risks involved in potential deals and thereby allow us to make more informed investment decisions.

Continue our focus on developing projects in and around Nashik

All of our Ongoing and Upcoming Projects are concentrated in and around Nashik. We believe that the real estate industry in India is predominantly regional due to difficulties with respect to large scale land acquisition in unfamiliar locations, inadequate infrastructure to market projects in new locations, the complex legal framework and the large number of approvals which must be obtained from different authorities at various stages of construction under local laws, and the long gestation period of projects. We believe that due to our familiarity and experience of the markets in and around Nashik, we will be able to use our expertise to expand our business in and around Nashik. Further, we believe that the real estate market in India will be dominated by local players rather than pan-India players and therefore, we will continue to focus on these core markets.

DESCRIPTION OF OUR BUSINESS

We are a real estate development company primarily operating in Nashik, focused on quality and affordable developments. We have a diversified portfolio of Completed, Ongoing and Planned projects in mixed-use or single-segment developments, which cover key segments of the real estate market, namely: (i) residential and (ii) residential-cum-office space. Further in order to expand the portfolio of our business activities our company has recently ventured into Construction Contracts. The existing business model of our Company is depicted in the following diagram:

KEY BUSINESS PROCESS

(A) Real Estate Development:

Our Business process depends upon nature of the project i.e. whether project is taken on contract basis or is owned by us. In case the project is obtained on contract basis, the main phase of process involved is construction, and in owned projects, the following process is adopted:-

A. Land Identification and Acquisition and/Joint Development Arrangements:

The profitability of our business is dependent on our land acquisition costs and our growth is dependent on the availability of land for our future development. We acquired a substantial portion of the land for our currently Completed, Ongoing and Planned projects when land prices were generally lower than prevailing market prices. Land costs have generally increased in the past years (although the recent economic downturn had an impact on the real estate sector generally) and we expect that this trend will continue, subject to general economic conditions and other factors.

We acquire land and land development rights from the government and private parties. From time to time, we seek to acquire land or land development rights through a competitive bidding process. The cost of acquisition of land, which includes the amounts paid for freehold rights, leasehold rights, cost of registration and stamp duty, represents a substantial part of our project cost. We are typically required to enter into a deed of conveyance, a lease deed or a deed for development rights transferring title or leasehold rights or development rights in our favour. The registration

charges and stamp duty are also typically payable by us. Additional costs include those incurred in complying with regulatory formalities, such as fees paid for change of land use.

Typically for acquisition of land or land development rights, we are required to pay an advance at the time of executing transaction agreements, with the remaining purchase price due upon completion of the acquisition. We may acquire lands through auction and prior to bidding in the auction, we may be required to pay a refundable deposit or earnest money. In certain cases, we may be required to furnish a bank guarantee for which we would be required to pay the applicable bank charges.

We also acquire the right to develop properties through arrangements with other entities, which own the land or land development rights. The other party is typically given the option, as consideration, to either share the sale proceeds in a pre-determined proportion depending upon the nature of the project and the location of the land or to receive a pre-determined portion of the developed area which such party may market at its expense. We may also look at acquiring land holding companies as a means of acquiring land and/or land development rights.

Once a potential development site has been identified, site visits and feasibility studies/surveys are undertaken, which include detailed analysis of the following factors, among others:

- location, including frontage, surrounding developments and landmarks and views;
- size of the development site;
- potential end use of the site;
- land acquisition cost;
- regional demographics;
- gap analysis of current property development initiatives and market needs;
- financial viability of the proposed project;
- feasibility of construction and adequacy of support infrastructure;
- availability of utility services;
- title searches and related legal due diligence;
- market trends; and
- regulatory issues.

After conducting such analysis, our senior management makes the final decision with regard to the financial feasibility of the acquisition and the scope of the projects to be developed on the proposed site.

After a decision is made to proceed with the acquisition of land or land development rights, we take necessary steps to acquire the land or development rights. We enter into negotiations with the seller of land or land development rights in order to reach a preliminary acquisition agreement, usually memorialised in a memorandum of understanding. Once we have completed our preliminary due diligence on the land, we enter into final agreements to acquire the land.

B. Project Planning, Design and Regulatory Approvals:

We coordinate with the design firms and architects for our projects. In particular, we hire third parties, to design projects which are complex and require specific technical expertise and to design specific high-end projects. Our emphasis is on use of advanced technologies like computer aided design software to ensure optimisation of costs and space. We also have in-house design and project management teams that are responsible for designing, budgeting, planning, contracting and tracking the execution of projects. Our specialised in-house design and project management teams are experienced in adapting international design concepts to suit the requirements of the Nashik real estate market. In addition, we also engage other external consultants for the planning of our projects. The designing and architect firms and structural consultants are engaged by us separately for each project and are particular to the project. The work performed by these third parties must comply with specifications provided by us and, in all cases, is subject to our review.

Generally, depending upon the size and complexity of a project, it takes approximately six months to a year to complete the planning and design phase and to obtain all necessary approvals and permits required to commence work.

Concept design and master planning

Following acquisition of a development site or development rights, we determine the type and scale of project to be undertaken, based upon, among other things, research reports, which profile prospective clients. This process results in

the preparation of a project brief, which is submitted to an external architect, who is responsible for the conceptual design of the project. The conceptual design includes master planning, phasing of development and the type and orientation of buildings. Once a concept design is prepared, it is sent to our experienced in-house design management team, which evaluates the design and coordinates with the architect to finalise the concept. The final decision on the conceptualisation of each project and the development of each property is made by our senior management.

Design development

The output of the concept design phase is a master plan with a broad description of the planned development in presentation format. The design development phase involves further detailing of the design concept. Detailed specifications and drawings of each activity are prepared by our in-house design management team, which ensures certifications, No Objection Certificates (NOCs) and approvals are obtained for the commencement of the project from various regulatory and governmental authorities. In accordance with our outsourcing strategy, we intend to use external design firms to perform this role for our projects.

Regulatory approvals

We retain responsibility for obtaining all necessary approvals and permits for each of our projects and have a liaison team, comprising architects, engineers and legal professionals, whose function is to obtain approvals from various government authorities. We also use external professionals, as necessary, to obtain such approvals and permits. Approvals and permits are required throughout the development process.

C. Construction:

For execution of the project, whether owned by us or taken on contract, we rely on external contractors for the construction of projects. Our Company looks at the experience of the proposed subcontractor in similar works done by them and the also the financial soundness of the party. Other factors which are considered by us while selecting sub-contractors are:-

- ✓ The employee strength of the proposed subcontractor i.e. number of technical persons who are experienced in the similar type of work.
- ✓ The equipment & machinery which is used for execution of the said work.
- ✓ Technical know-how, particularly in using the state of the art equipment and machinery for optimization of all resources invested towards the execution of the work.

D. Sales and Marketing:

Marketing

We market our projects through our internal marketing team, and through external brokers and consultants. We maintain a database consisting of our existing customers, referrals and leads we have generated through various advertising and awareness campaigns. Our direct sales efforts are a combination of telephonic marketing, tours of our model homes and digital marketing, all of which is handled by our internal marketing team. We employ various marketing approaches depending on whether the project is residential or office space. These include launch events, corporate presentations, internet marketing, direct and indirect marketing, as well as print advertising, site branding and outdoor advertising.

Sales

For our residential and residential-cum-office space projects, we typically follow a pre-sale model, whereby we offer units for sale prior to completion. Sales generally are conducted by our sales staff on the project site, as well as through third party brokers. Upon booking of a residential unit, we typically receive a certain percentage of the purchase price as down payment at the time of booking a particular unit and the remainder through periodic payments linked to certain other construction milestones while the project is being developed. We price our residential units based on our analysis of demand in a particular region, taking into consideration market demographics, location, future supply and competition. Under applicable laws, we are liable to pay interest on payments already made to us by our customers in respect of any delay in the completion and hand over of the project to our customers and, where the customer exercises a right to cancel the sale, we are liable to refund amounts paid to date with interest. The interest payable is calculated at a fixed rate on a monthly basis for the period of the delay.

We transfer title to the customer upon completion of construction of the building or structure and after execution of the definitive agreement with the customer. We transfer the title of the land on which the building is located to an independent housing society after all the buildings or structures within a project are turned over to owners or housing societies. The day-to-day management and control of the completed building is then relinquished to the management board or society of the owners.

OUR COMPETITORS

The real estate development industry in India, including Nashik, while fragmented, is highly competitive. We expect to face increased competition from large domestic development companies. We compete for the sale of our projects. We believe that we are able to distinguish ourselves from our competitors on the basis of our strong presence in Nashik, our established brand and reputation, the quality of our design and construction, and the location of our projects.

We also compete to acquire land and land development rights. The availability of suitable land parcels for our projects (particularly of the size we target and in desirable locations) may be limited in Nashik. However, we believe that our established brand and reputation provide us with a competitive advantage when competing for land development rights, as we believe third-party land owners recognise the premium that may be obtained on the sale of projects developed under our brand.

We presently compete in Nashik with various regional companies, including Nirman Group, Sanghi Builders and Developers, Brijwasi Bulcon, etc. As we may expand our business activities to include real estate development in other parts of India, we may experience competition in the future from competitors with significant operations elsewhere in India.

HEALTH, SAFETY AND ENVIRONMENT

We are committed to complying with applicable health, safety and environmental regulations and other requirements in our operations. To help ensure effective implementation of our safety policies and practices, at the beginning of every property development we identify potential material hazards, evaluate material risks and institute, implement and monitor appropriate risk mitigation measures. We believe that accidents and occupational health hazards can be significantly reduced through the systematic analysis and control of risks and by providing appropriate training to management, employees and sub-contractors.

As a real estate developer in India, we are subject to various mandatory national, state and municipal environmental laws and regulations. Our operations are also subject to inspection by government officials with regard to various environmental issues, and we are required to obtain clearance in respect of each of our projects.

MANPOWER

Currently, we subcontract most of our construction and execution work related to projects to third party contractors, therefore our requirement of manpower for construction activities is met by third parties. The Indian Contract Act, 1872 ("Contract Act") codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and the breach enforced. It provides a framework of rules and regulations that govern formation and performance of contract. The contracting parties themselves decide the rights and duties of parties and terms of agreement.

The Specific Relief Act, 1963

The Specific Relief Act is complimentary to the provisions of the Contract Act and the T.P. Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. 'Specific performance' means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

G. Regulations Regarding Foreign Investment

Regulations Regarding Foreign Investment

Foreign investment in companies in the construction development sector is governed by the provisions of the Foreign Exchange Management Act, 1999 (“FEMA”) read with the applicable regulations. The Department of Industrial Policy and Promotion (“DIPP”), Ministry of Commerce and Industry has issued the Consolidated FDI Policy (the “**Consolidated FDI Policy**”) which consolidates the policy framework on Foreign Direct Investment (“FDI”), with effect from August 28, 2017. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP till August 27, 2017. All the press notes, press releases, clarifications on FDI issued by DIPP till August 27, 2017 stand rescinded as on August 28, 2017. Vide an Office Memorandum dated June 5, 2017 (“**Office Memorandum**”), issued by Ministry of Finance, Department of Economic Affairs the Government of India has abolished Foreign Investment Promotion Board (“FIPB”).

In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. Subsequent to the abolition of FIPB, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the Government, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where Government approval is obtained, no approval of the RBI is required except with respect to fixing the issuance price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2000 to prohibit, restrict or regulate, transfer by or issue of security to a person resident outside India.

The Consolidated FDI Policy dated August 28, 2017 issued by the DIPP permits Foreign investment up to 100% in the Company under the automatic route.

Further, the FDI Policy dated June 07, 2016 permits investment, subject to the following conditions:

- (A) (i) The investor will be permitted to exit on completion of the project or after development of trunk infrastructure i.e. roads, water supply, street lighting, drainage and sewerage.
 - (ii) Notwithstanding anything contained at (A) (i) above, a foreign investor will be permitted to exit and repatriate foreign investment before the completion of project under automatic route, provided that a lock-in-period of three years, calculated with reference to each tranche of foreign investment has been completed. Further, transfer of stake from one non-resident to another non-resident, without repatriation of investment will neither be subject to any lock-in period nor to any government approval.
- (B) The project shall conform to the norms and standards, including land use requirements and provision of community amenities and common facilities, as laid down in the applicable building control regulations, bye-laws, rules, and other regulations of the State Government/Municipal/Local Body concerned.

(C) The Indian investee company will be permitted to sell only developed plots. For the purposes of this policy "developed plots" will mean plots where trunk infrastructure i.e. roads, water supply, street lighting, drainage and sewerage, have been made available.

(D) The Indian investee company shall be responsible for obtaining all necessary approvals, including those of the building/layout plans, developing internal and peripheral areas and other infrastructure facilities, payment of development, external development and other charges and complying with all other requirements as prescribed under applicable rules/bye-laws/regulations of the State Government/Municipal/Local Body concerned.

(E) The State Government/Municipal/Local Body concerned, which approves the building/development plans, will monitor compliance of the above conditions by the developer.

It is clarified that FDI is not permitted in an entity which is engaged or proposes to engage in real estate business, construction of farm houses and trading in transferable development rights (TDRs). "Real estate business" for the purpose of the Consolidated FDI Policy Circular of 2015 means dealing in land and immovable property with a view to earning profit therefrom and does not include development of townships, construction of residential/ commercial premises, roads or bridges, educational institutions, recreational facilities, city and regional level infrastructure, townships. Further, earning of rent/ income on lease of the property, not amounting to transfer, will not amount to real estate business.

No approvals of the RBI are required for such allotment of equity Shares under this Issue. The Company will be required to make certain filings with the RBI after the completion of the Issue.

Annexure IV

SIGNIFICANT ACCOUNTING POLICIES

The policies adopted in the preparation and presentation of the financial statements are as follows:

1. System of Accounting:

- a) The entity follows a mercantile system of accounting and recognises income and expenditure on accrual basis. Interest income will be accounted at the time of receipt in case the income is not quantifiable at the time of finalisation of accounts.
- b) Financial Statements are based on historical cost and their costs are not adjusted to reflect the impact of the changing purchasing value of money.
- c) Sale of land and plots (including development rights) is recognised in the financial year in which the agreement to sell/ application forms (containing salient terms of agreement to sell) is executed and there exists no uncertainty in the ultimate collection of consideration from buyers. Where the Company has any remaining substantial obligations as per agreements, revenue is recognised on “percentage of completion method”.

2. Fixed Asset and Depreciation:

Fixed Assets are carried at cost of acquisition or construction less accumulated depreciation. Fixed assets include all duties, non-refundable taxes and directly attributable costs incurred for bringing the asset into working condition for intended use.

Depreciation for fixed asset is calculated on straight line basis using the rates arrived at, based on the useful lives estimated by the management, which are equal to the useful lives prescribed under Schedule II to the Companies Act, 2013.

3. Valuation of Inventories:

Items of inventories are valued on the basis of landed cost on FIFO basis or market value whichever is lower.

- (i) Raw Materials : At landed cost on FIFO Basis
- (ii) Construction – Work-in-progress: At Cost or net realisable value whichever is lower.

4. Revenue Recognition:

Revenue from constructed properties for all projects commenced on or after April 01, 2012 or project where the revenue is recognized for the first time on or after the above date, is recognized in accordance with the Revised Guidance Note issued by the Institute of Chartered Accountants of India (“ICAI”) on ”Accounting for Real Estate Transactions (Revised 2012)”. As per the guidance note, the revenue have been recognized on percentage of completion method provided all of the following conditions are met at the reporting date.

- (i) Required critical approvals necessary for commencement of the project have been obtained.
- (ii) At least 25% of estimated construction and development costs (excluding land cost) has been incurred
- (iii) At least 25% of the saleable project area is secured by the Agreements to sell/ application forms (containing salient terms of the agreement to sell); and
- (iv) At least 10% of the total revenue as per agreement to sell are realized in respect of the agreements.

5. Other Income:

Interest income is accounted on accrual basis. Dividend Income is accounted for when the right to receive is established.

6. Provision for Current and Deferred Tax:

Provision for current, fringe and deferred tax is made after taking into consideration benefits admissible under the provisions of the Income Tax Act 1961. Deferred tax resulting from the “timing difference” between book and

taxable profit for using the tax rates and laws that have been enacted or substantively enacted as on the balance sheet date. The deferred tax asset is recognised and carried forward only to the extent that there is a reasonable certainty that the asset will be realised in the future.

7. Earnings per Share:

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to the equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of the equity shares outstanding during the period.

8. Cash flow statement:

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

9. Current / Non-current classification:

The Schedule III to the Act requires assets and liabilities to be classified as either Current or Non-current. An asset is classified as current when it satisfies any of the following criteria:

- (i) it is expected to be realised in, or is intended for sale or consumption in, the Company's normal operating cycle;
 - (ii) it is held primarily for the purpose of being traded;
 - (iii) it is expected to be realised within twelve months after the reporting date; or
 - (iv) it is cash or a cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.
- All other assets are classified as non-current.

A liability is classified as current when it satisfies any of the following criteria:

- (i) it is expected to be settled in, the Company's normal operating cycle;
 - (ii) it is held primarily for the purpose of being traded;
 - (iii) it is due to be settled within twelve months after the reporting date; or
 - (iv) The Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the opinion of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.
- All other liabilities are classified as non-current.

Operating Cycle

Based on the nature of services and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 3 to 4 years for the purpose of current and non-current classification of assets and liabilities.

10. Investments:

- (i) Long term Investments are carried at Cost plus brokerage and other charges. Provision is made to recognise a decline, other than temporary in value of investments and is determined separately for each individual investment.
- (ii) Current investments are carried at lower of cost and fair value, computed separately in respect of each category of investment.
- (iii) Investment properties are carried individually at cost less impairment, if any.

11. Employee Benefits:

(i) Short-Term Employee Benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries and wages, leave salary etc. and the expected cost of ex-gratia are recognized in the period in which the employee renders the related services.

(ii) Post Employment Benefits

Defined contribution & benefit plans:

The provisions of the Employees' Provident Funds and Miscellaneous Provisions Act, 1952 and the Gratuity Act, 1972 are not applicable to the Company. The Company does not have any other retirement benefit scheme for employees.

12. Borrowing Cost:

Borrowing costs that are attributable to the acquisition, construction or production of qualifying assets are treated as direct cost and are considered as part of the cost of such assets. A qualifying asset is an asset that necessarily requires a substantial period of time to get ready for its intended use or sale. All other borrowing costs are recognised as an expense in the period in which they are incurred.

13. Impairment of Assets:

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. The recoverable amount is the greater of the net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value based on an appropriate discount factor. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the Profit and Loss Statement. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciable historical cost.

14. Provision, Contingent Liabilities and Contingent Assets:

The Company creates a provision where there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made where there is a possible obligation that may, but probably will not require an outflow of resources. When there is a possible obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

For further details regarding our business operations, please see the chapter titled “*Business Overview*” beginning on page no. 87 of this Draft Red Herring Prospectus.

COMPETITION

The real estate development industry in India, including Nashik, while fragmented, is highly competitive. We expect to face increased competition from large domestic development companies. We compete for the sale of our projects. We believe that we are able to distinguish ourselves from our competitors on the basis of our strong presence in Nashik, our established brand and reputation, the quality of our design and construction, and the location of our projects.

We also compete to acquire land and land development rights. The availability of suitable land parcels for our projects (particularly of the size we target and in desirable locations) may be limited in Nashik. However, we believe that our established brand and reputation provide us with a competitive advantage when competing for land development rights, as we believe third-party land owners recognise the premium that may be obtained on the sale of projects developed under our brand.

We compete against our competitors by establishing ourselves as a well equipped manufacturing company with following strengths:

- *Strong presence in Nashik*
- *Established brand and reputation*
- *Our proven execution capabilities*
- *Strong project pipeline providing cash flow visibility*
- *Vast land reserves and an ability to identify new projects*

Significant Developments after March 31, 2017 that may affect our Future Results of Operations

Except as mentioned elsewhere in this Draft Red Herring Prospectus, we confirm that there have been no events or circumstances since the date of last financial statements as disclosed in the Draft Red Herring Prospectus which materially or adversely affect or is likely to affect the profitability of our company, or the value of our assets, or our ability to pay liabilities within next twelve months.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the Draft Red Herring Prospectus and the Risk Factors given in the Draft Red Herring Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Fluctuations in market prices for our projects

Our total income is affected by the sales prices of our projects which are affected by prevailing market conditions and prices in the real estate sector in Nashik and in India generally (including market forces of supply and demand), the nature and location of our projects, and other factors such as our brand and reputation and the design of the projects.

Supply and demand market conditions are affected by various factors outside our control, including:

- *Prevailing local economic, income and demographic conditions;*
- *Availability of consumer financing (interest rates and eligibility criteria for loans);*
- *Availability of and demand for projects comparable to those we develop;*
- *Changes in governmental policies relating to zoning and land use;*
- *Changes in applicable regulatory schemes; and*
- *Competition from other real estate developers.*

Sales volume and rate of progress of construction and development

Income from projects, which comprised 94.98% of our total income in the year ended March 31, 2017, 91.98% in the year ended March 31, 2016, 97.00% in the year ended March 31, 2015, 97.40% in the year ended March 31, 2014 and 95.97% in the year ended March 31, 2013 is recognised in accordance with the percentage of project completion method with respect to that portion relating to the sale of our projects. Under the percentage of project completion method of revenue recognition, our income from sales and costs recognised in any particular period depend on the volume of bookings (as compared with the Saleable Area for the respective project) we have been able to obtain, as well as the rate of progress of construction of our projects.

The volume of bookings depends on our ability to design projects that will meet customer preferences and market trends, and to timely market and pre-sell our projects, the willingness of customers to pay for the projects or enter into sale agreements well in advance of receiving possession of the projects and general market conditions. We market and pre-sell our projects in phases from the time we launch the project, which is typically after we have procured the land or land development rights and when are in the process of planning and designing the project, up until the time we complete our project, depending on market conditions.

Construction progress depends on various factors, including the availability of labour and raw materials, the actual cost of construction (which is particularly affected by fluctuations in the market price for steel and cement) and changes to the estimated total construction cost, the competence of and priority given to our projects by our contractors, the receipt of approvals and regulatory clearances, access to utilities such as electricity and water, and the absence of contingencies such as litigation and adverse weather conditions. We generally do not recognise income for our residential projects until the construction work reaches a certain level depending on the type of project and the percentage of completion over the course of construction is not distributed equally through the period as it depends on the actual cost incurred during any particular period as well as the amount of estimated total construction cost which may vary during the period of development.

Cost and availability of land and TDRs

The cost of land, which includes the amounts paid for freehold rights, leasehold rights, construction cost of area given to landlords in consideration for joint development rights, cost of registration and stamp duty, may represent a substantial part of our project cost, particularly in Nashik. We acquire land and land development rights from the government and private parties. We acquire land or enter into arrangements to develop land in advance of planning and designing our projects. Please see the section entitled “*Our Business – Key Business Processes*” on page 98. The profitability of our business is dependent on our land acquisition costs and our growth is dependent on the availability of land for our future development. We compete with other developers to identify and acquire land of suitable size and location for the development of our projects.

We acquire TDRs to increase the Saleable Area of our developments and, to the extent we generate TDRs from reservations on land we own, we generally retain these TDRs, although we may liquidate a portion of these TDRs for short-term cash flows. There is an active market for the purchase and sale of TDRs which is affected by a number of factors, including prevailing conditions of demand and supply in the real estate market, timing of completion of projects which generate TDRs, the extent to which increase in developable plot ratio may be allowed by making payment to the state government and changes in the TDR regulatory regime in Nashik. The cost of TDRs as a proportion of project costs depends upon the quantum of TDR utilised in the project and the cost of acquisition of TDRs.

Cost of construction/development

In addition to the cost of land and TDRs described above, our cost of construction/development comprises primarily the cost of raw materials (in particular cement and steel), contractors, architects and other consultants, construction materials, etc.

Cost of third party contractors, architects and consultants

We outsource the design and construction of our projects. We engage domestic architects under fixed price contracts and third-party contractors under item rate contracts which specify a fixed contract price, which includes all materials and labour costs, other than cement and steel, which are provided by us. Certain of our contracts with our contractors also provide for an incentive bonus to be paid if the project is completed within a specified time frame. Other variable

costs comprise indirect taxes in connection with the contract. We typically engage contractors through a competitive bidding process.

The progress and quality of construction of the projects we develop depends on the availability and skill of our contractors and consultants, as well as contingencies affecting them, including labour and industrial actions such as strikes and lockouts. Such labour and industrial actions may cause significant delays to the construction timetables for our projects, and we may therefore be required to find replacement contractors and consultants at higher cost. As a result, any increase in prices resulting from higher construction costs could adversely affect our profit margins, demand for our projects and the relative affordability of our projects as compared to our competitors' products.

Cost of raw materials, construction materials and finishings

Our cost of construction/development is affected by price fluctuations in raw materials (in particular cement and steel), electrical accessories, plumbing materials, flooring (tiles), painting, lifts and escalators. These and other construction materials and finishings form a significant portion of our cost of construction. Raw materials prices may be affected by shortages in supply and price volatility caused by various factors beyond our control, including general economic conditions, competition, production levels, transportation costs and changes in import restrictions. In addition, our supply chain may be periodically interrupted by circumstances beyond our control, including work stoppages and labour disputes affecting our suppliers, their distributors, or the transporters of our supplies.

In the past, we generally outsourced the construction of our projects to third party contractors under fixed price contracts which cover the cost of raw materials except cement and steel. However, in the future, we intend to award contracts which provide that the contractor will also provide cement and steel although we may allow the contractor to vary the contract price depending on the actual prices of cement and steel. We are therefore directly affected by any price increases of these raw materials. If there are extraordinary price increases in construction materials due to increase in demand, or shortages in supply, the contractors we hire for construction or development work may be unable to fulfil their contractual obligations and we may have to engage another contractor at a higher cost, or we may end up doing the work ourselves or we may face delay in the construction of our projects. Prices for steel and cement in particular fluctuated significantly during the last five fiscal years.

In addition, during periods of volatility in the price of building materials, where prices have increased significantly or unexpectedly, we may not be able to pass price increases through to our customers, particularly as we generally aim to pre-sell a significant portion of our residential units prior to project completion, which could reduce or eliminate the profits we attain with regard to our projects, or even result in losses. As a result, increases in costs for any construction materials may impact our construction costs, and consequently our profitability. If the actual cost of a project increases so that the total cost of the project exceeds or is estimated to exceed total income, we recognise the loss immediately.

Our Financial Expenses

We have term loan and working capital facilities from our bankers and also certain unsecured borrowings from our Directors and other concerns (ICDs). Our profitability is significantly impacted by our financial costs. For the fiscal 2017, 2016 and 2015, our financial expenses were ₹ 1,825.92 lakhs, ₹ 1,713.05 lakhs, and ₹ 1,113.66 lakhs. Our financial growth depends on how well we manage and service our debts.

Our ability to successfully implement its strategy and its growth and expansion plans

Our growth plans are considerable and would put significant demands on our management team and other resources. Any delay in implementation of our strategy and growth and expansion plans could impact our Company's roll out schedules and cause cost and time over runs.

General economic and business conditions

As a Company with its complete operations in India, we are affected by general economic conditions in the country and in particular economic factors that affect real estate sector in India. India's gross domestic product, or GDP, has been and will continue to be of importance in determining our operating results and future growth.

5.6 BASIS OF ALLOCATION

- a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Bidders/Applicants in an Offer depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Offer size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP/Prospectus. For details in relation to allocation, the Bidder/Applicant may refer to the RHP/Prospectus.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spillover from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Offer, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Offer. For allocation in the event of an under-subscription applicable to the Issuer, Bidders/Applicants may refer to the RHP.
- d) Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLMs, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

- e) **Alternate Method of Book Building**

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/Offer Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Offer. As the Offer Price is mentioned in the Fixed Price Offer therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Offer Opening Date.

In a fixed price Offer, allocation in the net offer to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Offer Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“**Maximum RII Allottees**”). The Allotment to the RIIs will then be made in the following manner:

- a) In the event the number of RIIs who have submitted valid Bids in the Offer is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Offer Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Offer Price. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Offer Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

- a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Offer Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- b) In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Offer Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

Anchor Investors are then required to pay any additional amounts, being the difference between the Offer Price and the Anchor Investor Offer Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.
- d) **In the event the Offer Price is lower than the Anchor Investor Offer Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Offer being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders may be categorized according to the number of Equity Shares applied for;
- b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
- e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category.
