INTERNAL RISK FACTORS

1. ***We, as an NBFC have to adhere to several regulatory norms prescribed by RBI from time to time. Any non-compliance with such norms or any adverse change in the norms could negatively affect our Company’s operations, business, financial condition and the trading price of Equity Shares.***

NBFCs in India are subject to strict regulation and supervision by the RBI. We require certain approvals, licenses, registrations and permissions for operating our business. Such approvals, licenses, registrations and permissions

must be maintained / renewed over time and we may have to comply with certain conditions in relation to these approvals. Moreover, the applicable requirements may change from time to time. We are required to obtain and maintain a license for carrying on business as an NBFC. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. RBI has the authority to change these norms/ criteria as and when required. Inability to meet the prescribed norms/ criteria, can adversely affect the operations and profitability of our Company.

2. ***Our inability to recover the full value of collateral, or amounts outstanding under defaulted loans in a timely manner, or at all, could adversely affect our business, results of operations, cash flows and financial condition***

Our company specializes in providing financial services to corporate entities and individuals, comprising of corporate finance, retail loans, gold loans and personal loans.

At the time of disbursement of Gold Loan, our portfolio is secured by collateral. However, the value of the collateral on the loans disbursed by us may decline due to adverse market conditions, including an economic downturn. Any failure to recover the expected value of collateral could have a direct impact on our business and expose us to losses and, in turn, result in a material adverse effect on our business, results of operations, cash flows and financial condition.

3. ***Any disruption in our sources of funding or increase in costs of funding could adversely affect our liquidity and financial condition.***

The liquidity and profitability of our business majorly depend on our timely access to, and the costs associated with, raising funds. Our business thus depends and will continue to depend on our ability to access a variety of funding sources. Further, our ability to compete effectively will depend, in part, on our ability to maintain or increase our margins. Our margins are affected in part by our ability to continue to secure low-cost funding at rates lower than the interest rates at which we lend to our customers. Our ability to raise funds on acceptable terms and at competitive rates depends on various factors including our current and future results of operations and financial condition, global and local macroeconomic conditions and the effect of events such as a pandemic, our risk management policies, the shareholding of Promoter in our Company, our brand equity, the regulatory environment and policy initiatives in India and developments in the international markets affecting the Indian economy. If we are unable to access funds at an effective cost that is comparable to or lower than that of our competitors, our net interest margins, income, and market share may be adversely affected.

Certain regulatory developments including the restrictions imposed on NBFCs by the RBI through a Master Circular – Bank Finance to Non- Banking Financial Companies dated July 1, 2015 (the “Master Circular”) may restrict our ability to obtain bank financing for specific activities. Pursuant to the Master Circular, the RBI has imposed certain restrictions on banks providing financing to NBFCs. Under this Master Circular, certain activities by NBFCs are ineligible for financing by banks, including certain types of discounting and rediscounting of bills, current and long term investments in shares, debentures, loans and advances by NBFCs to their subsidiaries and group companies, lending by NBFCs to individuals for subscribing to public offerings and purchasing shares from the secondary market, unsecured loans, inter-corporate deposits provided by NBFCs, and subscription to shares or debentures by NBFCs. In addition, the Master Circular prohibits:

- banks from granting bridge loans of any nature, provide interim finance against capital or debenture issues or in the form of loans of a temporary nature pending the raising of long-term funds from the market by way of capital, deposits, or other means to any category of NBFCs;
- banks from accepting shares and debentures as collateral for secured loans granted to NBFCs; and
- banks from executing guarantees covering inter-Company deposits or loans that guarantee refund of deposits or loans accepted by NBFCs. The Master Circular also requires that guarantees not be issued by banks for the purpose of indirectly enabling the placement of deposits with NBFCs.

Changes in economic, regulatory and financial conditions or any lack of liquidity in the market could adversely affect our ability to access funds at competitive rates, or at all, which could adversely affect our liquidity and financial condition.

4. ***We are affected by volatility in interest rates for both our lending and fund raisings operations, which could cause our net interest income to decline and adversely affect our results of operations and profitability.***

A significant component of our revenue is the interest on term loans and other financing activity (net of reversal) we receive from the loans we disburse as given below:

Particulars	Unaudited, reviewed	Restated Consolidated Financial Statements		
	December 31, 2023	March 31, 2023	March 31, 2022	March 31, 2021
Total Income (In ₹ Lakhs)	137.58	208.96	127.10	94.44
Interest Income (In ₹ Lakhs)	137.58	208.28	121.63	92.04
Percentage of Total Income (in %)	100	99.67	95.70	97.46

Our net interest margins are affected by any volatility in interest rates in our lending operations. Interest rates are highly sensitive to many factors beyond our control, including competition from other banks and NBFCs, the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions and other factors, which have historically generated a relatively high degree of volatility in interest rates in India. Persistently high inflation in India may discourage the Government from implementing policies that would cause interest rates to decrease. Moreover, if there is an increase in the interest rates, we pay on our borrowings that we are unable to pass to our customers, we may find it difficult to compete with our competitors, who may have access to funds at a lower cost or lower cost deposits. To the extent our borrowings are linked to market interest rates, we may have to pay interest at a higher rate than lenders that borrow only at fixed interest rates. Further, our ability to pass on any increase in interest rates to borrowers may also be constrained by regulations implemented by the Government or the RBI. In a declining interest rate environment, if our cost of funds does not decline simultaneously or to the same extent as the yield on our interest-earning assets, it could lead to a reduction in our net interest income and net interest margin.

5. *Any inability on our part to effectively utilize the Issue Proceeds could adversely affect our financial results. The objects of the Issue are based on the internal estimates of our management and have not been appraised by any bank or financial institution.*

The perception that any such sale may occur could also adversely affect the market price of our Equity Shares.

21. ***We are subject to cyber security risks and security breaches and may incur increasing costs in an effort to minimize those risks and to respond to cyber incidents.***

A number of other companies have disclosed cyber-attacks and security breaches, some of which have involved intentional attacks. Attacks may be targeted at us, our customers, or both. Although we devote significant resources to maintain and regularly upgrade our systems and processes that are designed to protect the security of our computer systems, software, networks and other technology assets and the confidentiality, integrity and availability of information belonging to us and our customers, our security measures may not provide absolute security. Despite our efforts to ensure the integrity of our systems, it is possible that we may not be able to anticipate or to implement effective preventive measures against all security breaches of these types, especially because the techniques used change frequently or are not recognized until launched, and because cyber-attacks can originate from a wide variety of sources, including third parties outside the Company such as persons who are involved with organized crime or associated with external service providers or who may be linked to terrorist organizations or hostile foreign governments. A successful penetration or circumvention of the security of our systems could cause serious negative consequences, including significant disruption of our operations, misappropriation of our confidential information or that of our customers, or damage to our computers or systems or those of our customers and counterparties, and could result in violations of applicable privacy and other laws, financial loss to us or to our customers, loss of confidence in our security measures, customer dissatisfaction, significant litigation exposure, and affect to our reputation, all of which could have a material adverse effect on us.

Our servers are also vulnerable to computer viruses, physical or electronic break-ins, and similar disruptions. We may need to expend significant resources to protect against security breaches or to address problems caused by breaches. Security breaches, including any breach of our systems or by persons with whom we have commercial relationships that result in the unauthorized release of customers' or businesses' personal information, could damage our reputation and expose us to a risk of loss or litigation and possible liability.

22. ***Security breaches of customers' confidential information that we store may harm our reputation and expose us to liability.***

We store customers' bank information, credit information and other sensitive data. Any accidental or wilful security breaches or other unauthorized access could cause the theft and criminal use of this data. Security breaches or unauthorized access to confidential information could also expose us to liability related to the loss of the information, time-consuming and expensive litigation and negative publicity. If security measures are breached because of third party action, employee error, malfeasance or otherwise, or if design flaws in our software are exposed and exploited, and, as a result, a third party obtains unauthorized access to customer data, our relationships with customers will be severely damaged, and we could incur significant liability. Further, we engage with certain third-party service providers, and although our contracts with them restrict the usage of client data and impose protective precautions, there can be no assurance that they will abide by such contractual terms or that the contracts will be found to be in compliance with data protection laws.

23. ***We rely on the accuracy and completeness of information concerning borrowers and counterparties for credit evaluation and risk management. Any misrepresentation, inaccuracies, or omissions in such material could have a negative impact on our business and financial results.***

We rely on information provided to us by or on behalf of borrowers when evaluating whether to provide credit or engage in other transactions with clients (including in relation to their financial transactions and past credit history). We may also depend on borrowers' assurances about the accuracy and completeness of the information. For ascertaining the creditworthiness and encumbrances on collateral, we may depend on the respective registrars and sub-registrars of assurances, credit information companies or credit bureaus and on independent valuers in relation to the value of the collateral, and our reliance on any misleading information given may affect our judgment of credit worthiness of potential borrowers, and the value of and title to the collateral, which may affect our business, prospects, results of operations and financial condition. We may receive inaccurate or incomplete

information as a result of negligence or fraudulent misrepresentation on the part of our customers or employees. In addition, customers may misrepresent information in the loan application forms including in relation to the intended end use of the loans and may apply the loans disbursed for end uses different from those mentioned in the loan application form. Our risk management measures may not be adequate to prevent or deter such activities in all cases, which may adversely affect our business prospects, financial condition and results of operations.

There may be relatively less financial and credit information available on retail and rural individual borrowers, micro, small and medium enterprises and in relation to the possibility of double-financing obtained by any such clients, than may have been available in a more developed economy, and the availability of such financial and credit information in India may be considered to suffer from an absence of competitive pressure at present.

24. *Our inability to completely detect money laundering and other illicit actions or detect the same in a timely manner or at all may expose us to extra responsibility and affect our business and reputation.*

In India, we must follow all applicable anti-money laundering ("AML") and anti-terrorism laws and regulations. We bear the risk of failing to follow the statutory know your customer ("KYC") requirements, as well as fraud and money laundering by dishonest customers, in the ordinary course of our business. Despite having internal rules, processes, and controls in place to prevent and identify any AML activity and maintain KYC compliance, we cannot guarantee that we will be able to entirely manage instances of any possible or attempted violation. Any failure or ineffectiveness of our control system to detect such activities completely and immediately may subject us to regulatory action, including fines and penalties, and have a negative impact on our business and reputation.

25. *As we expand our lending business, we may encounter asset-liability mismatches, which might negatively impact our cash flows, financial condition, and results of operations.*

As we expand our lending operations, we may encounter liquidity concerns due to mismatches in the maturity of our assets and obligations. If we are unable to obtain additional borrowings or renew our existing credit facilities in a timely and cost-effective manner, or at all, for matching tenures of our loan portfolio, it may result in mismatches between our assets and liabilities, which could harm our cash flows, financial condition, and results of operations.

26. *Failure to stay up to date with technological changes, as well as the uses and regulation of the internet, might be detrimental to our Company.*

The industry of delivering finance products and services via a mobile app or the internet is dynamic and fresh. We must keep up with changing technical breakthroughs, customer and small company usage habits, internet security threats, system failure or inadequacy hazards, and governmental regulation and taxation, all of which could have a negative influence on our Company.

If we are unable to adequately react to such developments, decreased demand for loans as a result of higher savings or income could result in a loss of revenues or a fall in profitability. The demand for loan products in the markets we serve could fall as a result of a variety of factors, including regulatory restrictions that limit customer access to specific products, the availability of competing or alternative products, or changes in customers' financial circumstances, such as increases in income or savings. A shift in focus from borrowing to saving would also lessen demand. Our revenues could be severely reduced if we fail to adjust to a significant change in our clients' desire for, or access to, our financing products. Customers may refuse or reject products whose changes make them less appealing or less available, even if we make adjustments or launch new products to meet customer demand.

27. *We have not commissioned an industry report for the disclosures made in the section titled 'Industry Overview' and made disclosures based on the data available on the internet and such third-party data has not been independently verified by us.*

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the section titled "Industry Overview" on page 52 of this Letter of Offer. We have made disclosures in the said section based on the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such third-party data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Letter of Offer. Further, the industry data mentioned in this Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Letter of Offer in this context.

28. *The outbreak of COVID-19, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several containment measures such as travel bans and restrictions, quarantines and shutdowns. These measures may have an impact on the workforce and our operations and the operations of our customers. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may further cause significant economic disruption across India. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian economy in general.

The COVID – 19 outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees and customers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak. The extent to which COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken to contain the coronavirus or treat its impact, among others. The degree to which COVID-19 may impact our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or the ability to treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, loss of life, injuries and impact the wellbeing of our people.

EXTERNAL RISK FACTORS

29. *Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and IFRS, which investors may be more familiar with and consider material to their assessment of our financial condition.*

Our audited summary statements of assets and liabilities as at March 31, 2023, March 31, 2022 and March 31, 2021 and audited summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Financial Year 2023, 2022 and 2021 have been prepared in accordance with the Ind AS, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Letter of Offer should accordingly be limited.

30. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.*

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

31. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

32. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

33. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

34. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

35. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

36. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions including

wars amongst nations like the current Russia Ukraine conflict could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

ISSUE SPECIFIC RISKS

37. Our Company will not distribute the Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.

Our Company will dispatch the Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the “**Offering Materials**”) to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e- mail. Presently, there is a lack of clarity under the Companies Act and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

38. SEBI has by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021, October 01, 2021 and May 19, 2022 streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Letter of Offer.

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021, October 01, 2021 and May 19, 2022 and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “Terms of the Issue” on page 105 of this Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

39. Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncee(s) may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncee(s) prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements.

40. ***You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. However, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if STT was paid on the sale transaction and, additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of equity shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, has now levied taxes on long-term capital gains arising from sale of equity shares. However, where specified conditions are met, such long-term capital gains are only taxed to the extent they exceed Rs. 100,000.00 and unrealized capital gains earned up to January 31, 2018, continue to be exempt. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity Shares.

Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning Equity Shares.

41. ***You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.***

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

42. ***There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchange until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

43. ***Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.***

Under the Companies Act, 2013, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

44. ***Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

45. ***Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

46. ***Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

Indian Economy

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. (Source : <https://www.ibef.org/economy/indian-economy-overview>)

Introduction to the Financial Services Industry

India has a diversified financial sector undergoing rapid expansion, both in terms of strong growth of existing financial services firms and new entities entering the market. The sector comprises commercial banks, insurance companies, non-banking financial companies, co-operatives, pension funds, mutual funds and other smaller financial entities. The banking regulator has allowed new entities such as payment banks to be created recently, thereby adding to the type of entities operating in the sector. However, the financial sector in India is predominantly a banking sector with commercial banks accounting for more than 64% of the total assets held by the financial system.

The Government of India has introduced several reforms to liberalise, regulate and enhance this industry. The Government and Reserve Bank of India (RBI) have taken various measures to facilitate easy access to finance for Micro, Small and Medium Enterprises (MSMEs). These measures include launching Credit Guarantee Fund Scheme for MSMEs, issuing guidelines to banks regarding collateral requirements and setting up a Micro Units Development and Refinance Agency (MUDRA). With a combined push by Government and private sector, India is undoubtedly one of the world's most vibrant capital markets.

Evolution

Over the years, NBFCs have evolved given the extensive changes in the regulatory framework for NBFCs in India which have moved from simplified regulations to stringent and extensive regulations as well as towards rationalisation per the currently revised NBFC regulatory framework. Given these high levels of regulation, NBFCs have also emerged as preferred options to meet credit needs since the low cost of operations has provided these NBFCs an edge over banks.

Financial Access and Supportive Government Schemes

Additionally, NBFCs have gradually become important mechanisms to fuel growth and entrepreneurship due to the launch of government-backed schemes including Pradhan Mantri Jan-Dhan Yojana which has contributed to a significant increase in the number of bank accounts.

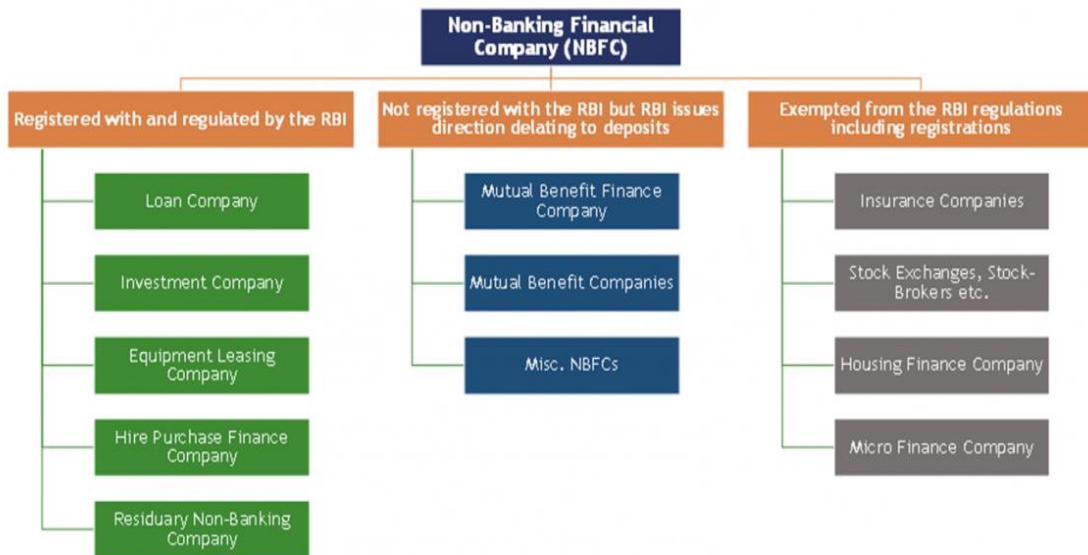

These NBFCs have also been key in being able to mitigate and manage the spread of risks during times of financial duress and have increasingly become recognized as complementary services to banks.

NBFCs have become integral for all business services, including loans and credit facilities, retirement planning, money markets, underwriting and merger activities. As such these companies play an important role in providing credit to the unorganized sector and for small borrowers at local level. Additionally, hire purchase finance is also the largest activity of NBFCs and the rapid growth of NBFCs has gradually blurred the lines between banks and NBFCs although commercial banks have retained importance. These NBFCs facilitate long term investment and financing, which is challenging for banking sector, and the growth of NBFCs widens range of products available for individuals/institutions with resources to invest.

Opportunities for NBFCs

Ongoing stress in public sector banks (PSUs) because of increasing bad debt, lending in rural areas deterioration has provided NBFCs with the opportunity to increase presence. The success of these NBFCs vs. PSUs can be attributed to product lines, lower cost, wider and effective reach, strong risk management capabilities to check and control bad debts, and a better understanding of customer segments versus banks. NBFCs have witnessed success in the passenger and commercial vehicle finance segments as well as growing AUM in personal loan and housing finance sector. Additionally, improving macro-economic conditions, higher credit penetrations, consumption themes and disruptive digital trends have influenced NBFC credit growth. Stress in public sector units (PSUs), underlying credit demand, digital disruption for MSMEs and SMEs as well as increased consumption and distribution access and sectors where traditional banks do not lend are major reasons for the switch from traditional banks to NBFCs.

Present NBFC Classifications and Industry Structure

Source: RBI; Pradhan Mantri Jan Dhan Yojana; Indian Banks' Association - Indian Banking Sector 2020

As of May 31, 2023, there were 9,404 NBFCs registered with the RBI categorized as Asset Finance Companies, Loan Companies, Infrastructure Finance Companies (IFCs), Systematically Important Core Investment Company (NBFC – CIC – ND – SI), Infrastructure Debt Fund (NBFC – IDF) and Micro Finance Institutions (NBFC – MFIs).

NBFC Engines of Growth as Growth Drivers

NBFCs have also been an integral cornerstone of key financing to MSMEs, and been driven by significant growth in rural, small scale and unbanked sectors. Structural catalysts include a large vibrant start-up and entrepreneurial ecosystem which has created NBFC demand and government policy initiatives such as Pradhan Mantri Yojana and National Rural Financial plan further augmenting the industry. These include diversified financial needs of Indian economy driven by growth in lending, credit, and vehicle financing. As a result of these growth drivers, we see that NBFCs have seen bigger balance sheets & increasing public funds. Improved profitability ratios of NBFCs has been observed for NBFC-ND-SIs across metrics for ROA, ROE and NIMs with impressive returns Y-o-Y returns between 2019-2020. For NBFC-Ds the ROA has been relatively flat, ROE has declined while NIMs improved Y-o-Y for 2019-2020.

Source: RBI; Pradhan Mantri Jan Dhan Yojana; Indian Banks' Association - Indian Banking Sector 2020

Challenges in NBFC sector:

- Business is highly regulated, and it may be adversely affected by future regulatory changes.
- Financial performance is vulnerable to interest rate risk, as most of the funding is from banking channels.
- Greater competition from NBFCs/banks/fintech could impact growth in AUM and profits.

The Road Ahead

NBFC segments provides huge growth opportunities particularly after the development of last few years. We have witnessed reasonable degree of consolidation in the NBFC sector. Liability side stress in the sector has largely reduced in last couple of years led by focussed efforts from the regulators side. With the passing of the second COVID wave, the outlook is brightening. During the year under review, the balance sheet of NBFCs expanded at a faster rate than a year ago, driven essentially by growth in credit and investments of NBFCs-ND-SI.

Competition

We may face competition from organized as well as unorganized players in the domestic market. The financial services industry is highly competitive, and we expect competition to intensify in the future. We may face competition in the lending business from domestic and international banks as well as other NBFCs, fintech lending platforms and private unorganized lenders. Banks are increasingly expanding into retail loans in the rural and semi-urban areas of India. We may be exposed to the risk that these banks continue to expand their operations into the markets in which we operate, which would result in greater competition and lower spreads on our loans. In particular, many of our competitors may have operational advantages in terms of access to cost-effective sources of funding and in implementing new technologies and rationalising related operational costs. Competition in our industry depends on, amongst others, the ongoing evolution of government and regulatory policies, the entry of new participants and the extent to which there is consolidation among banks and financial institutions in India.

2.2 Principles of Consolidation

i.

The consolidated financial statements incorporate the financial statements of the Parent Company and its subsidiary (from the date control is gained), being the entity that it controls. Control is evidenced where the investor is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Power is demonstrated through existing rights that give the ability to direct relevant activities, which significantly affect the entity's returns. The financial statement of subsidiary is prepared for the same reporting year as the parent company. Where necessary, adjustments is made to the financial statements of subsidiary to align the accounting policies in line with accounting policies of the Parent Company.

Subsidiary has been consolidated by combining like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiary. Intragroup balances and transactions, and any unrealised income and expenses arising from intragroup transactions, are eliminated in preparing the consolidated financial statements.

Non-controlling interests (NCI):

NCI are measured at their proportionate share of the acquiree's net identifiable assets at the date of acquisition.

Profit or loss and each component of other comprehensive income are attributed to the equity holders of the parents of the Group and to the non-controlling interest, even if this results in the non-controlling interests have a deficit balance. Changes in the Group's equity interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

When the Parent loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related NCI and other components of equity. Any interest retained in the former subsidiary is measured at fair value at the date the control is lost. Any resulting gain or loss is recognised in profit or loss.

- ii. The consolidated financial information of the Parent Company includes financial information of its subsidiary, consolidated in accordance with Ind AS 110 'Consolidated Financial Statements'.

2.3 Presentation of financial statement

The financial statements of the Group are presented as per Schedule III (Division III) of the Companies Act, 2013, applicable to NBFCs as notified by the Ministry of Corporate Affairs (MCA). Financial assets and financial liabilities are generally reported on a gross basis except when, there is an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event and the parties intend to settle on a net basis in the following

- i. The normal course of business
- ii. The event of default
- iii. The event of insolvency or bankruptcy of the Group and/ or its counterparties

2.4 Revenue recognition

The Company recognizes revenue from contracts with customers based on a five step model asset out in Ind AS 115, Revenue from contracts with customers, to determine when to recognize revenue and at what amount. Revenue is measured based on the consideration specified in the contract with a customer. Revenue from contracts with customers is recognised when services are provided and it is highly probable that a significant reversal of revenue is not expected to occur.

Revenue is measured at fair value of the consideration received or receivable. Revenue is recognized when (or as) the Company satisfies a performance obligation by transferring a promised service (i.e. an asset) to a customer. An asset is transferred when (or as) the customer obtains control of that asset.

When (or as) a performance obligation is satisfied, the Company recognizes as revenue the amount of the transaction price (excluding estimates of variable consideration) that is allocated to that performance obligation.

The Company applies the five-step approach for recognition of revenue:

- * Identification of contract {s} with customers;
- * Identification of the separate performance obligations in the contract;
- * Determination of transaction price;
- * Allocation of transaction price to the separate performance obligations; and
- * Recognition of revenue when (or as) each performance obligation is satisfied.

(i) Interest income

Interest income is recognized on actual basis in Statement of profit and loss for all financial instruments measured at amortized cost.

(ii) Fee and commission income

Fee based income on loan transactions are recognized when they become measurable and when it is probable to expect their ultimate collection.

2.5 Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses. Current and deferred tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

Current Tax

Current tax is measured at the amount of tax expected to be payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Current tax assets and current tax liabilities are off set when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle the asset and the liability on a net basis.

Deferred Tax

Deferred tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets are recognized for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

2.6 Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial Institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

2.7 Financial instruments

Initial recognition and measurement:

Financial assets and financial liabilities are recognized when the entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

Fair value of financial instruments:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date regardless of whether that price is directly observable or estimated using another valuation technique.

Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities are disclosed.

Financial assets

i) Classification and subsequent measurement

All recognised financial assets are subsequently measured at either amortised cost or fair value depending on their respective classification.

On initial recognition, a financial asset is classified as-measured at:

- Fair value through profit or loss (FVTPL);
- Fair value through other comprehensive income (FVOCI); or
- Amortized cost.

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

Financial assets at amortized cost are subsequently measured at amortised cost using effective interest method. The amortised cost is reduced by Impairment losses. Interest income, foreign exchange gains and losses and impairment are recognized in profit or loss. Any gain and loss on de-recognition is recognized in profit or loss.

Financial assets at FVTPL are subsequently measured at fair value. Interest Income is recognised using the effective interest (EIR) method. The impairment losses, if any, are recognized through statement of Profit and loss.

The loss allowance is recognized does not reduce the carrying value of the financial asset. On de-recognition, gains and losses accumulated In OCI are reclassified to the Statement of Profit and Loss.

Financial assets at FVTPL are subsequently measured at fair value. Net gains and losses, Including any Interest or dividend income, are recognized in profit or loss.

ii) Impairment

The Company recognizes impairment allowances using Expected Credit Losses ("ECL") method on all the financial assets that are not measured at FVPTL:

ECL are probability weighted estimate of credit losses. For ECL all financial loans are classified as follows:

Stage 1: Financials assets that are not credit Impaired.

Stage 2: Financials assets with significant increase in credit risk.

Stage 3: Financials assets that are credit impaired.

Financial assets are written off / fully provided for when there is no reasonable of recovering a financial asset in its entirety or a portion thereof.

However, financial assets that are written off could still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised In the Statement of Profit and Loss.

iii) Derecognition

A financial asset is derecognized only when:

The Company has transferred the rights to receive cash flows from the financial asset or retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the Company has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is de recognised. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognized.

Where the Company has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset Is derecognised if the Company has not retained control of the financial asset.

Where the Company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

Financial Liabilities

i) Initial recognition and measurement

Financial liabilities are classified at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held for trading, or it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss. Other financial liabilities are subsequently measured at amortized cost using the effective Interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on de-recognition is also recognized in Statement of Profit or loss.

ii) Subsequent measurement

Financial liabilities carried at fair value through profit or loss is measured at fair value with all changes in fair value recognized in the Statement of Profit and loss.

iii) De-recognition

A financial liability is derecognized when the obligation specified in the contract is discharged, cancelled or expires.

2.8 Leases

The company does not have any lease assets.

2.9 Property, plant and equipment (PPE)

Property, plant and equipment are stated at cost of acquisition less accumulated depreciation. Cost includes expenditure that is directly attributable to the acquisition and installation of the assets.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Depreciation methods, estimated useful lives and residual value

Depreciation is calculated using the Written down method to allocate their cost, net of their residual values, over their estimated useful life prescribed under Schedule II to the Companies Act, 2013. The Company provides pro-rata depreciation from the date of installation till date the assets are sold or disposed.

De-recognition:

The carrying amount of an item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. Gains and losses on disposals are determined by comparing proceeds with carrying amount and are recognized in the statement of profit and loss when the asset is derecognized.

2.10 Intangible assets

An intangible asset is recognised only when its cost can be measured reliably, and it is probable that the expected future economic benefits that are attributable to it will flow to the Group.

Intangible assets acquired separately are measured on initial recognition at cost. The cost of an intangible asset comprises its purchase price and any directly attributable expenditure on making the asset ready for its intended use and net of any trade discounts and rebates. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life, or the expected pattern of consumption of future economic benefits embodied in the asset, are accounted for by changing the amortisation period or methodology, as appropriate, which are then treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is presented as a separate line item in the statement of profit and loss. Amortisation on assets acquired/ sold during the year is recognised on a pro-rata basis to the Statement of Profit and Loss from/ upto the date of acquisition/ sale.

Amortisation is calculated using the straight-line method to write down the cost of intangible assets to their residual values over their estimated useful lives.

Intangible assets with indefinite useful life is tested for impairment at each reporting period.

Gains or losses from derecognition of intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset are recognised in the Statement of Profit and Loss when the asset is derecognised.

2.11 Impairment of non-financial assets

At each reporting date, the Company assesses whether there is any indication based on internal and external factors, that an asset may be impaired. If any such Indication exists, the Company estimates the recoverable amount of the asset. The recoverable amount of asset is the higher of its fair value or value in use. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects the current market assessment of time value of money and the risks specific to it. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount and the reduction is treated as an impairment loss and is recognized in the statement of profit and loss. All assets are subsequently reassessed for indications that an impairment loss previously recognized may no longer exist. An Impairment loss is reversed if there has been a change in estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the assets carrying amount would have been determined, net of depreciation or amortization, had no Impairment loss been recognized.

2.12 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counter party.

2.13 Segment reporting

The company has only one segment i.e. Financial Services.

2.14 Provisions and contingencies

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the reporting date.

Provisions are determined by discounting the expected future cash flows (representing the best estimate of the expenditure required to settle the present obligation at the balance sheet date) at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance cost. Expected future operating losses are not provided.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

2.15 Earnings per share (Ind AS 33)

a) Basic earnings per share

Basic earnings per share is calculated by dividing the net profit for the period (excluding other comprehensive income) attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the financial year, adjusted for bonus element in equity shares issued during the year.

b) Diluted earnings per share

Diluted earnings per share is computed by dividing the net profit for the period attributable to equity shareholders by the weighted average number of shares outstanding during the period as adjusted for the effects of all diluted potential equity shares except where the results are anti-dilutive.

2.16 Rounding of amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest rupees.

2.17 Events after reporting date

Where events occurring after the balance sheet date provide evidence of conditions that existed at the end of the reporting period, the impact of such events is adjusted within the financial statements. Otherwise, events after the balance sheet date of material size or nature are only disclosed.

2.18 Risk Management

While risk is inherent in the Company's activities, it is managed through an integrated risk management framework, including ongoing identification, measurement and monitoring, subject to risk limits and other controls.

The Board of Directors are responsible for the overall risk management approach and for approving the risk management strategies and principles.

Credit risk

The company manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counter parties and industry concentrations, and by monitoring exposures in relation to such limits.

2.19 Operating Cycle

Based on the nature of products/ activities of the Group and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Group has determined its operating cycle as 12 months.

2.20 Foreign Currency

Foreign currency transactions:

Foreign currency transactions are recorded on initial recognition in the functional currency using the exchange rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date.

Exchange differences arising on the settlement or translation of monetary items are recognised in Restated Statement of profit or loss in the year in which they arise.

2.21 Recent Accounting Pronouncements

Ministry of Corporate Affairs (MCA) notifies new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On 23 March 2022, MCA issued the Companies (Indian Accounting Standards) Amendment Rules, 2022, applicable from 1 April 2022, as below:

Ind AS 103 – Reference to Conceptual Framework

The amendments specify that to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Conceptual Framework for Financial Reporting under Indian Accounting Standards (Conceptual Framework) issued by the Institute of Chartered Accountants of India at the acquisition date. These changes do not significantly change the requirements of Ind AS 103.

The Group does not expect the amendment to have any significant impact in its financial statements.

Ind AS 16 – Proceeds before intended use

The amendments mainly prohibit an entity from deducting from the cost of property, plant and equipment amounts received from selling items produced while the Group is preparing the asset for its intended use. Instead, an entity will recognise such sales proceeds and related cost in profit or loss. The Group does not expect the amendments to have any impact in its recognition of its property, plant and equipment in its financial statements.

Ind AS 37 – Onerous Contracts - Costs of Fulfilling a Contract

The amendments specify that that the 'cost of fulfilling' a contract comprises the 'costs that relate directly to the contract'. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials) or an allocation of other costs that relate directly to fulfilling contracts. The amendment is essentially a clarification and the Group does not expect the amendment to have any significant impact in its financial statements.

Ind AS 109 – Annual Improvements to Ind AS (2021) The amendment clarifies which fees an entity includes when it applies the '10 percent' test of Ind AS 109 in assessing whether to derecognise a financial liability. The Group does not expect the amendment to have any significant impact in its financial statements.

KEY ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires management to make judgments. Estimates and assumption in the application of accounting policies that affect the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on ongoing basis. Any changes to accounting estimates are recognized prospectively. Information about critical Judgments in applying accounting policies, as well as estimates and assumptions that have the most significant effect on the amounts recognized in the financial statements are included in the following notes:

- a) Provision and contingent liability: On an ongoing basis, Company reviews pending cases, claims by third parties and other contingencies. For contingent losses that are considered probable, an estimated loss is recorded as an accrual in financial statements. LossContingencies that are considered possible are not provided for but disclosed as Contingent liabilities in the financial statements. Contingencies the likelihood of which is remote are not disclosed in the financial statements. Gain contingencies are not recognized until the contingency has been resolved and amounts are received or receivable.
- b) Allowance for impairment of financial asset: Judgments are required in assessing the recoverability of overdue loans and determining whether a provision against those loans is required. Factors considered include the aging of past dues, value of collateral and any possible actions that can be taken to mitigate the risk of non-payment.
- c) Recognition of deferred tax assets: Deferred tax assets are recognized for unused tax-loss carry forwards, deductible temporary differences and unused tax credits to the extent that realization of the related tax benefit is probable. The assessment of the probability with regard to the realization of the tax benefit involves assumptions based on the history of the entity and budgeted data for the future.
- d) Property, plant and equipment: Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation to be recorded during any reporting period. The useful lives and residual values as per schedule II of the Companies Act, 2013 or are based on the Company's historical experience with similar assets and taking into account anticipated technological changes, whichever is more appropriate.
- e) Fair Value Measurement: Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e., an exit price), regardless of whether that price is directly observable or estimated using a valuation technique. In order to show how fair values have been derived, financial instruments are classified based on a hierarchy of valuation techniques, as explained below:

*Level 1

Units held in mutual funds are measured based on their published net asset value (NAV), taking into account redemption and/or other restrictions. Treasury bills are valued based on market quotes.

*Level 2

Fair value of debt securities, borrowings other than debt securities and subordinated liabilities have estimated by discounting expected future cash flows discounting rate near to report date based on comparable rate / market observable data.

*Level 3

Fair value of loans have estimated by discounting expected future cash flows using discount rate equal to the rate near to the reporting date of the comparable product. Unquoted equity shares are measured at fair value using suitable valuation models viz., net asset value technique.

Review Report to
The Board of Directors of Viji Finance Limited

1. We have reviewed the accompanying statement of unaudited standalone financial results of Viji Finance Limited (hereinafter referred to as "the Company") for the quarter as well as nine months ended 31st December, 2023 (hereinafter referred to as "the Statement") attached herewith, being submitted by the Company pursuant to the requirement of regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations 2015 ('the Regulation') as amended, read with SEBI Circular No. CIR/CFD/CMDI/44/20919 dated March 29, 2019 ("the Circular").
2. The preparation of the Statement in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, (Ind AS 34) "Interim Financial Reporting" prescribed under Section 133 of the Companies Act, 2013, as amended, read with relevant rules issued there under and other accounting principles generally accepted in India, read with the circular is the responsibility of the Company's Management and has been approved by the Board of Directors of the Company. Our responsibility is to express a conclusion on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.
4. Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standards ('Ind AS') specified under section 133 of the Companies Act, 2013 as amended, read with relevant rules issued there under and other recognized accounting practices and policies has not disclosed the information required to be disclosed in terms of Regulation, read with the Circular, including the manner in which it is to be disclosed, or that it contains any material misstatement.

3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will not be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs through the FDI Circular 2020 (defined below).

The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“**FDI Circular 2020**”), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as at October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under the FEMA Rules will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Offer shall be on the basis of the FEMA Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

Please also note that pursuant to Circular no. 14 dated September 16, 2003 issued by RBI, Overseas Corporate Bodies (“OCBs”) have been derecognised as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003.
