ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon

the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “Civil Procedure Code”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

2. Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

Our Company had reported certain negative cash flows from its investing and financing activities in the previous years as per the restated financial statements and the same are summarized as under:

(₹ in lakhs)

For further details please refer to the section titled “Financial Information” and chapter titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page numbers 92 and 155, respectively, of the Letter of Offer.

3. Misconduct or errors by manpower engaged by us could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Misconduct or errors by manpower engaged by us could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such misconduct includes breach of security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. Consequently, our ability to control the workplace environment in such circumstances is limited. The risks associated with the deployment of manpower engaged by us across locations include, among others, possible claims relating to; actions or inactions, including matters for which we may have to indemnify our clients; our failure to adequately verify personnel backgrounds and qualifications resulting in deficient services; failure of manpower engaged by us to adequately perform their duties; errors or malicious acts or violation of health and safety regulations; or criminal acts.

These claims may give rise to litigation and claims for damages, which could be time-consuming. These claims may also result in negative publicity and adversely impact our reputation and brand name. Further, we may be forced to indemnify our clients against losses or damages suffered by our clients as a result of negligent acts of manpower

engaged by us. We may also be affected in our operations by the acts of third parties, including sub-contractors and service providers. Any claims and proceedings for alleged negligence as well as regulatory actions may in turn materially and adversely affect our brand and our reputation, and consequently, our business, financial condition, results of operations and prospects.

4. We face intense competition in our businesses, which may limit our growth and prospects. Our Company faces significant competition from other companies.

We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than in certain of our businesses;
- Greater brand recognition among consumers;
- More diversified operations which allow profits from certain operations to support others with lower profitability.

These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

5. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

6. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

The Board has declared an Interim Dividend @ 0.01% i.e., 1 paisa/- per Equity Share of face value of Re. 1/-each for the Financial Year 2022-23 for the Financial Year 2023-2024. Further, our ability to pay future dividends will depend on our earnings, financial condition and capital requirements. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

7. Our Company has incurred losses in the past.

Our Company has incurred losses in the past as set out below:

Particulars	<i>(INR in Lacs)</i>			
	Dec 31, 2023*	March 31, 2023*	March 31, 2022*	March 31, 2021*
Total Comprehensive Income	153.81	50.84	(21.30)	(12.28)

**Details as per Restated standalone Financials*

There can be no assurance that our Company will not incur losses in the future, or that there will not be any adverse effect on our reputation or business as a result of such losses. For details, please see "**Restated Financial Statements**" on page 92 of this Letter of Offer.

8. Our Company has not yet applied for the registration of the logo or any of the intellectual property that it uses with the registrar of Trademarks.

Our Company has not yet applied for the registration of the logo i.e.  or any of the intellectual property that it uses. Any failure to get the same registered in our name may cause any third-party claim and may lead to litigation and our business operations could be affected. Even if our trademarks are registered, we may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or infringement will not cause damage to our business prospects.

9. We have financial indebtedness which could adversely affect our financial condition and results of operations and further we may not be able to meet our obligations under the debt financing agreements.

Our total outstanding debt is ₹ 43.25/- Lakhs consisting of unsecured and secured loans (including unsecured loan of ₹ 22.84/- from Directors & other related parties). If we fail to meet our debt servicing obligations under our financing documents, the relevant lenders could declare us to be in default, accelerate the maturity of our obligations or takeover our Company's movable and immovable assets. We cannot assure investors that in the event of any such acceleration we will have enough resources to repay these borrowings. Failure to meet obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate enough cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds.

10. We have not obtained the insurance coverage to protect against any business risks and this may have an adverse effect on the business operations.

Operations in our business carry inherent risks of personal injury, damage to or destruction of property, plant and equipment and damage to the environment, and are subject to risks such as fire, theft, flood, earthquakes and terrorism. However, we have not obtained any insurance coverage and are in the process of obtaining the same. The occurrence of any event for which we are not insured, could have an adverse effect on our business, reputation, results of operations, financial condition and cash flows.

11. We have in the past entered into related party transactions and may do so in the future. We cannot assure you that we could not have achieved more favourable terms if such transactions had not been entered into with related parties.

We will enter into related party transactions with our Promoters, its group members/ entities, and Directors. While we believe that all such transactions will be conducted on arm's length basis, however it is difficult to ascertain whether more favorable terms will be achieved if such transactions be entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future as well. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. We are in compliance with Related Party Transactions as per the provisions of the Companies Act, 2013, SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. For further details regarding the related party transactions, see the disclosure on related party transactions contained in the financial statements included in this Letter of Offer and, also see the section "Financial Information" on page no. 92 of this Letter of Offer.

12. Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.

Our business requires significant amount of working capital. Major Portion of our working capital is utilized towards debtors and inventory. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

Further, we have high Debtors which may result in a high risk in case of non-payment by these Debtors. In the event we are not able to recover our dues from our Debtors, we may not be able to maintain our sales level and thus adversely affecting our financial health. If this situation persists, we may not be able to pay our lenders / creditors which may result in adversely affecting our operations and future prospects.

13. *Some of the property including Registered Office of company as used by the Company for the purpose of its operations is not owned by us. Any termination of the relevant lease or leave and license agreement in connection with such property or our failure to renew the same could adversely affect our operations.*

Our current registered office situated at Office No. 412, 4th Floor Shilp Zaveri, Samruddhi Soc., NR. Shyamal Cross Road, Satellite, Polytechnic (Ahmedabad), Ahmedabad, Ahmadabad City, Gujarat, India, 380015 is not owned by us. In our business the most integral part is the location and space of the property. We have obtained this property on lease basis. Periodic renewals of such lease may increase our costs, since it is subject to rent escalation. Any termination of the lease and/or rental deed in connection with these properties or our failure to renew the same, and upon favourable conditions, in a timely manner or at all could adversely affect our operations. For details regarding properties taken on lease refer the Section title our Properties “**Our Business**” beginning on page no. 77 of this letter of offer.

14. *The success of our business operations depends largely upon our Promoter, Directors, and Key Managerial Personnel, the loss of any of them may negatively impact our business operations and financial conditions.*

Our success is highly dependent on the expertise of our Promoter Nishant Subhashchandra Gandhi, and other key managerial personnel. Our ability to successfully function and meet future business challenges partly depends on our ability to attract and retain these key managerial personnel. We believe that our relation with our Promoters, who have rich experience in setting up business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoters have also promoted other companies / firms / ventures and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

Further, we also depend significantly on our Key Managerial Persons for executing their day-to-day activities. If our Promoters / Directors or any member of the senior management team is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

15. *Any failure to maintain effective quality control systems for our supply chain could have a material adverse effect on our business, reputation, results of operations and financial condition.*

The quality and safety of the products we serve is critical to our success. Maintaining consistent quality and preventing food contamination and other health hazards depends significantly on the effectiveness of the quality control systems, policies and guidelines that we, our third-party distributor, approved suppliers of our third-party distributor and our suppliers have in place, which in turn depends on a number of factors, including the design of the quality control systems and employee implementation and compliance with those quality control systems. There can be no assurance that the quality control systems that we, our third-party distributor, approved suppliers of our third-party distributor and our suppliers have in place will prove to be effective. Any significant failure or deterioration of these quality control systems could have a material adverse effect on our business, reputation, results of operations and financial condition and can cause negative publicity that can affect our brand. We could also be subject to civil and/or criminal liability and other regulatory consequences in the event that a health hazard were to be found at any of our restaurants as a result of a failure of the quality control systems that we, our third-party distributor, approved suppliers of our third-party distributor, our suppliers and our sub-franchisees have in place, including the spread of any infection or disease. We may be the subject of public interest litigation in India relating to allegations of such hazards, as well as in cases having potential criminal and civil liability filed by regulatory authorities. If such cases are determined against us, there could be an adverse effect on our reputation, business, results of operations and financial condition.

16. We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.

The market in which our company is doing business is highly competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

17. Our Company, if not able to manage our growth or to successfully implement our business plan could have an adverse effect on our business, results of operations and financial conditions.

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. If our Company is not able to execute our strategy on time and within our estimated budget, or that our expansion and development plans fail to generate the required results, it may adversely impact our profitability. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long-term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes in trends and fashions and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

18. There is an outstanding legal proceeding involving our Company

There is an outstanding legal proceeding involving our Company. Decisions in such proceeding, adverse to our interests, may have a material adverse effect on our business, cash flows, financial condition, and results of operations. Failure to successfully defend these or other claims, or if our current provisions prove to be inadequate, our business and results of operations could be affected.

19. Our funding requirements and deployment of the issue proceeds are based on management estimates and actual cost may vary compared with the estimated amount.

Our funding requirement and deployment of the proceeds of the issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by banks or financial institutions and are based on our estimates. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our funding requirements may also change as a result of various factors which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the working capital limits maintained from time to time at the discretion of our board in compliance with all applicable laws. In addition, schedule of implementation as described herein are based on the management's current expectations and are subject to change due to various factors some of which may not be in our control. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors in compliance with all applicable laws and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee.

20. As the Equity Shares of our Company are listed on BSE, our Company is subject to certain obligations and reporting requirements under SEBI Listing Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us/our promoter liable to prosecution and/or penalties.

Our Company is subject to the obligations and reporting requirements under SEBI Listing Regulations. In the past, our Company had complied with all the provisions of the SEBI Listing Regulations. Further our Company did not receive any communication regarding non-compliances from the Stock Exchange or any authority.

Further, as per the SEBI Listing Regulations, our company is obligated to adhere to the various reporting requirements. While we strive to comply with these obligations, there may be instances of non-disclosures, delayed disclosures, erroneous disclosures, or other violations. Such occurrences may lead to penalties, show cause notices, or other actions by regulatory authorities such as the BSE and SEBI, as per the SEBI Act, Rules, Regulations, and applicable circulars. Any adverse regulatory action may impact our business reputation, divert management focus, and have a material adverse effect on our business prospects, financial performance, and the trading price of our Equity Shares. Further, we would like to clarify that as on date we have no such instances of non-compliances from the Stock Exchange or any authority. However, we may face such kind of issue in the future. Therefore, we have included the same in the risk factor.

21. Trading under ESM: Stage 1 on BSE

The shares of our company are traded under the Enhanced Surveillance Measure (ESM) Stage 1 on the Bombay Stock Exchange (BSE). The Securities and Exchange Board of India (SEBI) and the exchanges have jointly introduced the ESM framework for Micro-Small Companies, defined as those with a market capitalization less than 500 crores. 23. ***The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.***

In accordance with the SEBI Circular SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialised form only.

Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 03, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

24. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see “Terms of the Issue” on page 175.

25. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

26. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

27. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant’s demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national

monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline

- 28. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.***

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

- 29. *There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

- 30. *Holder of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.***

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

- 31. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange

rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

32. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

33. *Investors will not have the option of getting the allotment of Equity Shares in physical form.*

In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see "Terms of the Issue" on page 175. This may impact the ability of our shareholders to receive the Equity Shares in the Issue.

34. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

35. *Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.*

Summary statements of assets and liabilities as at March 31, 2022 and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscals 2022 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Letter of Offer, nor do we provide a reconciliation of our restated financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Letter of Offer should accordingly be limited.

36. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.*

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

37. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- Any increase in Indian interest rates or inflation;
- Any scarcity of credit or other financing in India;
- Prevailing income conditions among Indian consumers and Indian corporations;
- Changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- Prevailing regional or global economic conditions; and
- Other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counter parties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

38. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- The General Anti Avoidance Rules ("GAAR") have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may

have an adverse tax impact on us.

- A comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

39. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

40. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GOI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

41. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

42. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

43. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations*

The regulatory environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations that could affect the insurance industry, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the GoI and other regulatory bodies, or impose onerous requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely

affect our operations. Accordingly, any adverse regulatory change in this regard could lead to fluctuation of price points of various input costs and thereby increase our operational cost.

The Taxation Laws (Amendment) Act, 2019, also prescribes certain changes to the income tax rate applicable to companies in India. According to this Act, companies can henceforth voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate (on gross basis) for Indian companies from 34.94% to approximately 25.17%. Any such future amendments may affect our ability to claim exemptions that we have historically benefited from, and such exemptions may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability. Due to COVID -19 pandemic, the Government of India had also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, among others, the Central Goods and Service Tax Act, 2017 and Customs Tariff Act, 1975. Furthermore, the Government of India announced the Union Budget for Fiscal 2023 (“Budget 2023”), pursuant to which the Finance Bill 2023 (defined below) has proposed various amendments which will only come into effect upon receipt of Presidential assent to the bill and notification in requisite acts. We have not fully determined the impact of these recent and proposed laws and regulations on our business.

There can be no assurance that we will not be required to comply with additional procedures or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations in connection with GST. While we are and will comply with the GST rules and regulations, any failure to comply with the same may result in noncompliance with the GST and may adversely affect our business and results of operations. The GoI announced the union budget for fiscal year 2023, following which the Finance Bill, 2022 was introduced in the Lok Sabha on February 1, 2022. Subsequently, the Finance Bill 2022 received the assent from the President of India on March 30, 2022, and became the Finance Act, 2022 (“Finance Act 2022”). We cannot predict whether the amendments made and yet to be notified pursuant to the Finance Act 2022 would have an adverse effect on our business, financial condition, future cash flows and results of operations. Any changes in the Finance Act 2022 or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws that are applicable to our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

Changes in other laws may impose additional requirements, resulting in additional expenditure and time cost. For instance, the GoI has announced four labour codes which are yet to come into force as on the date of this Letter of Offer, namely, (i) the Code on Wages, 2019, (ii) the Industrial Relations Code, 2020; (iii) the Code on Social Security, 2020; and (iv) the Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. While the rules for implementation under these codes have not been announced, we are unable to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. For example, the Social Security Code aims to provide uniformity in providing social security benefits to employees which were previously segregated under different acts and had different applicability and coverage. The Social Security Code has introduced the concept of workers outside traditional employer-employee work-arrangements, such as “gig workers” and “platform workers” and provides for the mandatory registration of such workers in order to enable these workers to avail themselves of various employment benefits, such as life and disability cover, health and maternity benefits and old age protection, under schemes framed under the Social Security Code from time to time. Any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future

44. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concerns

regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

45. *We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.*

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- Any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- Hostile or war like situations with the neighbouring countries;
- Macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- Decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- Downgrading of India's sovereign debt rating by rating agencies; and
- Difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

46. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

The major reasons behind the increase in the working capital requirements of our company in the last 3 Financial years and stub period are as follows:

Growth in Revenue and Expansion in Business Activities:

In the year 2021, the Company was acquired by current promoter through Share Purchase Agreement (SPA) dated December 09, 2021 and Letter of Offer dated February 01, 2022 in terms of Regulation 4 of SEBI (SAST) Regulations, 2011.

The new management of the Company decided to change business strategy of the Company e.g. extending credit period to customers, providing advances to its suppliers. As a result, the Company was able to attract more customers, leading to a revenue increase to Rs. 554.56/- Lakh in the FY 2022-2023 from revenue of Rs. 145.63/- Lakhs in FY 2021-2022 and correspondingly the losses of the Company were converted into profit during the FY 2022-23.

Further, the Company is going to extend the business into Agri-Commodity Business, which required additional investment. This investment will be directed towards enhancing our procurement processes, expanding our product range, and investing in sustainable agricultural practices. Our aim is to solidify our position in the market, improve supply chain efficiency, and respond effectively to the growing demand for agri-commodities. The inventory days from 82 days in 2023-24 will be increased to 215 days due to increase in stocking of the agri-comodities products to meet customer demand.

Addition to the Agri-comodities business remaining fund will be allocated to stock trading business. This fund will be used to diversify portfolio, implement advanced trading tools and technologies, and capitalize on emerging market opportunities. The focus will be on optimizing our trading strategies, enhancing risk management, and achieving superior returns for our investments.

This decision has been made with the future growth and sustainability of both sectors in mind. The allocated funds are expected to bolster our market position, enhance operational capabilities, and generate significant returns on investment, thereby contributing to the overall growth, the Company is expecting to increase its sales which will lead to increase in trade receivable and inventory which will impact the working capital requirement for FY 2025 as compare to F.Y.2024.

The expansion and increased business activities of the Company, required higher levels of working capital to support larger sales volumes and a serve a larger customer base.

Assumption of working capital requirement

Holding levels and justifications for holding period levels based on the Restated Financial Statements.

Particulars	<i>(in days)</i>					
	2020-21	2021-22	2022-23	31-Dec-23	2023-24	2024-25
No. of Days for Trade Payables	2	21	21	83	75	15
No. of Days for Trade Receivables	469	36	259	222	259	200
No. of Days for Inventory Days	506	-	75	17	82	215

Justifications for Holding Period levels:

Trade Payable Days	The outstanding dues to trade payables for the period ending December 31, 2023, and for the financial years ended on March 31, 2023, 2022, and 2021 were Rs. 123.50/- Lakhs, Rs. 33.78/- Lakhs, Rs. 0.10/- Lakhs, and Rs. 0.96/- Lakhs respectively. The holding periods for our trade payables for the period ending December 31, 2023, and for the financial years 2023 and 2021 were 83 days, 21 days, and 2 days respectively. Notably, there were no significant trade payables and purchases in the financial year 2022 due to the company being in a transitional phase following a change in management.
---------------------------	--

	Using the net proceeds from the IPO, we aim to expedite payments to our suppliers, thereby capitalizing on potential cash discounts and enhancing our negotiation leverage. Consequently, we anticipate a reduction in the cost of procuring goods. We estimate that the trade payables holding periods for the financial years ending on March 31, 2024, and 2025 will be 75 days and 15 days respectively.
Trade Receivable Days	<p>Debtor days are computed based on the restated standalone financial statements of the Company (revenue from operation) and analysing the trend. For the financial year 2021, debtor holding was 469 days. However, this decreased significantly to 36 days in the financial year 2022. This reduction was attributed to the transition phase of the Company during FY 21-22, marked by a change in management. The current management successfully collected outstanding debts from debtors and settled payments with trade creditors.</p> <p>During the financial year 2022-23, the Company began offering extended credit periods to customers, resulting in the acquisition of more customers and a significant increase in revenue. As a consequence, the debtor holding period extended to 259 days for FY 22-23.</p> <p>For the financial year 2024, the Company has projected the debtor holding days to be 259 days of revenue from operations. Furthermore, for the financial year 2025, it is anticipated to be 200 days of revenue from operations.</p>
Inventory	<p>Inventory days are derived from restated standalone financial statements of the Company (consumption of material). In the financial years 2021 and 2023, the inventory holding periods were 506 and 75 days respectively. There was no inventory in the financial year 2022 due to a management change, during which the company was undergoing a turnaround process.</p> <p>Considering the unique nature of the company's operations, including agricultural commodities and share trading, there isn't a fixed inventory holding period. However, the company has projected inventory holding levels of 82 days for the financial year 2024 and 215 days for the financial year 2025. These projections are made to accommodate the specific requirements of the business and to ensure effective management of inventory throughout the coming years.</p>
Other Current Liabilities	Other current liabilities are computed from the historic restated financial information include, statutory dues payable and advances from customer.
Other Financial liabilities	Other financial liabilities are computed from the historic restated financial information and include, provision for employee benefits, expenses payable and provision for taxation. Other financial liabilities have been maintained in line with the increase of projected business income/expenses for the forthcoming years.
Short-term Loans and Advances	Short term loan and advances include loan and advances given for business purposes. Short term loans and advances have been maintained in line with anticipated expansion of operations, necessitating advance payments to facilitate more business in the coming years.
Other Current Assets	Other current assets include, prepaid insurance expenses, Duty and taxes recoverable, accrued interest.

GLOBAL SCENARIO

Global growth is projected to fall from an estimated 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024. While the forecast for 2023 is modestly higher than predicted in the April 2023 World Economic Outlook (WEO), it remains weak by historical standards. The rise in central bank policy rates to fight inflation continues to weigh on economic activity. Global headline inflation is expected to fall from 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upward.

The recent resolution of the US debt ceiling standoff and, earlier this year, strong action by authorities to contain turbulence in US and Swiss banking reduced the immediate risks of financial sector turmoil. This moderated adverse risks to the outlook. However, the balance of risks to global growth remains tilted to the downside. Inflation could remain high and even rise if further shocks occur, including those from an intensification of the war in Ukraine and extreme weather-related events, triggering more restrictive monetary policy. Financial sector turbulence could resume as markets adjust to further policy tightening by central banks. China's recovery could slow, in part as a result of unresolved real estate problems, with negative cross-border spillovers. Sovereign debt distress could spread to a wider group of economies. On the upside, inflation could fall faster than expected, reducing the need for tight monetary policy, and domestic demand could again prove more resilient.

In most economies, the priority remains achieving sustained disinflation while ensuring financial stability. Therefore, central banks should remain focused on restoring price stability and strengthen financial supervision and risk monitoring. Should market strains materialize, countries should provide liquidity promptly while mitigating the possibility of moral hazard. They should also build fiscal buffers, with the composition of fiscal adjustment ensuring targeted support for the most vulnerable. Improvements to the supply side of the economy would facilitate fiscal consolidation and a smoother decline of inflation toward target levels.

Under our baseline forecast growth will slow from last year's 3.5 percent to 3 percent this year and next, a 0.2 percentage points upgrade for 2023 from our April projections. Global inflation is projected to decline from 8.7 percent last year to 6.8 percent this year, a 0.2 percentage point downward revision, and 5.2 percent in 2024.

The slowdown is concentrated in advanced economies, where growth will fall from 2.7 percent in 2022 to 1.5 percent this year and remain subdued at 1.4 percent next year. The euro area, still reeling from last year's sharp spike in gas prices caused by the war, is set to decelerate sharply.

By contrast, growth in emerging markets and developing economies is still expected to pick-up with year-on-year growth accelerating from 3.1 percent in 2022 to 4.1 percent this year and next. (The corresponding annual growth, shown on the chart below, is 4 percent for 2022 and 2023 and 4.1% for 2024.)

Growth projections

The global economic outlook for this year is slightly brighter, but growth remains weak.

 Note: The 3% global growth estimate for 2023 reflects upgrade from 2.8% in the April World Economic Outlook.

IMF

This average, however, masks significant differences between countries, with emerging and developing Asia growing strongly at 5.3 percent this year, while many commodity producers will suffer from a decline in export revenues.

Global trade will continue to face multiple challenges in 2023 as inflation and high interest rates, debt distress and geopolitical frictions weigh on many economies. The downside risks to the global economy and international trade are significant, ranging from an escalation of Russia's war on Ukraine to deepening tensions between the US and China.

'Reglobalization' – rather than deglobalization – best describes the current pattern of economic integration and fracturing across different economies and sectors. Globalization is far from finished, but will increasingly emphasize greater regional links and the formation of economic blocs for sensitive and strategically important sectors. Comprehensive decoupling from China is neither achievable nor desirable for the G7 and like-minded partners.

The supply-chain disruptions of 2020–22 will continue to ease. Given that extreme weather events are the biggest threat to global production networks, supply-chain resilience and diversification efforts will persist, with added impetus to act on 'greening' trade.

The future of trade is closely linked to the transition to green and digital economies. As climate ambitions and technological leadership are intertwined with industrial policy objectives, concerns about unfair trade practices and protectionism are coming to a head not just as regards China, but also among the US, the EU and like-minded partners.

With major breakthroughs at the World Trade Organization unlikely in 2023, limited progress can be expected in some bilateral, regional and sectoral agreements. Meanwhile, efforts to avoid further trade fragmentation will progress more readily under Japan's G7 presidency than under India's G20 presidency.

Greater cooperation to build a more inclusive, sustainable and resilient trade system can help drive economic growth at a time when many countries are already in or entering an economic downturn.

How successfully China navigates the reversal of its zero-COVID policy and the country's economic reopening may be the most consequential determinant – and source of uncertainty – for the global economy and trade in 2023. Interconnected global crises – the scarring economic impacts of the pandemic and uneven recovery, compounded by high inflation, debt distress as well as energy and food insecurity following Russia's invasion of Ukraine – are likely to cast a long shadow over international trade. There is a significant risk that the Russia-Ukraine war could escalate, and that US-China strategic competition will increase.

But even if these risks do not materialize, 2023 will likely see a continuation of three major shifts in global trade:

First, an increasing confluence of national security and economics will intensify the geopolitical aspects of trade. Second, efforts to reconfigure supply chains will continue to prioritize (at least in rhetoric) shifts from dependence to diversification. And third, while globalization will not go into reverse, it will continue to change in nature through the emphasis on greater regional links amid the formation of blocs for critical and sensitive sectors of the economy. However, full-scale decoupling from China is neither achievable nor desirable for the G7 and like-minded countries.

For the G7, under Japan's presidency, responding to economic coercion that Beijing has applied to some trading partners and addressing concerns regarding China's non-market economy policies and practices will be a major focus in 2023.

Global trade cooperation at the WTO will remain highly challenging, and is unlikely to deliver any breakthrough achievements ahead of the 13th ministerial conference in February 2024. Plurilateral negotiations among a sub-group of WTO members – most importantly talks on e-commerce – stand a better chance of success by the end of this year.

Trade and the transition to green and digital economies

The future of trade is both green and digital. A number of trade policy tools and models for managing cooperation and competition are emerging, a trend that will likely accelerate during 2023.

Transatlantic tensions have flared over the US's Inflation Reduction Act, signed into law by President Joe Biden in August 2022. These centre on the EU's concerns – also shared by countries including the UK, Japan and South Korea – over US tax credits that favour North American-made electric vehicles and subsidies for renewables that the US's trade partners see as unfair and discriminatory. While the EU has welcomed the act's potential contribution to tackling climate change, the legislation has led to an outcry in the bloc over fears that the incentives offered could redirect investment from the EU to the US – especially at a time when lower energy prices in the US also lure European investors. The European Commission has threatened to bring the dispute to the WTO (although this is increasingly unlikely) and announced a Green Deal Industrial Plan, which includes temporarily adapting EU state aid rules in response to the US subsidies.³⁸ The two sides are trying to resolve the issues via the US-EU Task Force on the Inflation Reduction Act. But while some compromises are likely that could widen the scope for EU firms to benefit from the act's provisions, its overall thrust will not change. Avoiding a transatlantic trade war over climate is desirable for both sides in order to accelerate the low carbon transition and to reduce dependence on China-heavy supply chains for critical minerals and batteries used in electric vehicles.

Under a provisional deal reached by European co-legislators in December 2022,⁴⁰ the EU's Carbon Border Adjustment Mechanism (CBAM) will enter into force on 1 October 2023. Initially, the mechanism will only cover products, from a limited number of carbon-intensive sectors, that are deemed to be at higher risk of carbon leakage (such as iron and steel, cement, fertilizers, aluminium, electricity and hydrogen, as well as some precursors and a limited number of downstream products). After a three-year transition phase during which only reporting obligations apply, CBAM will start in 2026 and become fully operational by 2034, requiring EU importers to purchase certificates equivalent to the EU carbon price. While CBAM is stated to be designed in full compliance with WTO rules, the question of compatibility remains and will also come down to how the mechanism is implemented. Moreover, political sensitivities persist, including concerns about the impact on developing countries. Beyond CBAM, other parts of the EU's Green Deal (for example its new regulation on deforestation-free supply chains) have the potential to reshape global trade.

“Climate action is still not very high on Japan’s political agenda, but a focus on energy security could stand a better chance of success under its G7 presidency in 2023.”

The idea of a ‘Climate Club’ gained traction in 2022, when Germany used its G7 presidency to propose the creation of an alliance of countries committed to stronger action on climate change. In December, G7 members endorsed the terms of reference and agreed ‘to support further development of the Climate Club towards a full launch in 2023, ideally by COP28’. With Japan holding the G7 presidency in 2023, however, the Climate Club is unlikely to remain a focal point for the grouping. Climate action is still not very high on Tokyo’s political agenda, but a focus on energy security could stand a better chance of success under Japan’s G7 presidency. Meanwhile, the Climate Club discussions will be shifted to an interim secretariat (to be hosted by the Organisation for Economic Co-operation and Development, in tandem with the International Energy Agency) and a Climate Club Task Force (chaired by Germany and a yet-to-be-determined Climate Club member from beyond the G7).

As already noted, the WTO is a key forum for advancing discussions at the nexus of trade and sustainability. Three separate environmental initiatives were launched in 2021 to make progress on plastics pollution, reform of fossil fuel subsidies, and environmental sustainability. Technical discussions over the course of 2023 are intended to lead to concrete outcomes by the time of the 13th WTO ministerial conference, although political will is ultimately going to be the deciding factor for how much progress can be achieved.

Semiconductors play an important role in the transition to green and digital economies. The US CHIPS and Science Act, signed into law by President Biden in August 2022, provides \$ 52.7 billion for American semiconductor research, development, manufacturing and workforce development. Similarly, the proposed EU Chips Act (which is expected to be adopted in 2023) seeks to mobilize €43 billion in investment for the EU’s semiconductor sector by 2030. There is a risk of a subsidy race between the US and the EU, despite both sides vowing to avoid this and to instead cooperate on creating secure semiconductor supply chains. Another risk concerns friction over the Biden administration’s efforts to get European governments, among others, to fall in line with US controls on semiconductor technology exports to China.

Many of the US’s recent legislative initiatives – including the CHIPS and Science Act, the Inflation Reduction Act and the Infrastructure Investment and Jobs Act – indicate a shift away from a more market-oriented framework towards embracing industrial policy. This more interventionist approach will have a fundamental impact on trade flows as well as on the US’s relations with major trading partners, not least in the form of tensions with the EU over subsidies.

“The US’s more interventionist approach will have a fundamental impact on trade flows as well as on its relations with major trading partners.”

The evolving landscape of digital regulation in the EU – exemplified by the entry into force of the Digital Services Act and the Digital Markets Act in November 2022, as well as the pending proposals for the Artificial Intelligence Act – is aimed at strengthening European digital sovereignty and competitiveness. But the full effect of these rules governing the internet and the digital economy remains to be seen. 2023 will be a critical year, as the Digital Markets Act starts to apply and as progress on the Artificial Intelligence Act could bring about its adoption before the year ends.

New governance models concerning digital trade are emerging. For example, the Digital Economy Partnership Agreement (DEPA) between Singapore, New Zealand and Chile entered into effect in 2021. This has been hailed as a landmark agreement on digital trade – not only in terms of its provisions, but also in its approach to allowing parties to make continual updates and other countries to adopt DEPA modules into their own trade agreements. DEPA is designed to be open to all WTO members – and Canada, China and South Korea have already applied to join.

The UK is also at the forefront of initiatives on digital trade, as evidenced by its constructive role in the WTO and G7 as well as its approach to trade and digital economy agreements. For example, the UK-Singapore Digital Economy Agreement entered into force in June 2022, and is the first such agreement between a European and an Asian country.

Important developments on digital trade in 2023 will likely focus on promoting inclusive and sustainable growth of the digital economy, while preventing further digital policy fragmentation. Hopes remain that the negotiations on e-commerce that are currently taking place among WTO members can be finalized before the end of 2023. While such progress would represent a significant accomplishment, it should also be noted that major digital economies – among them India – are not participating in the plurilateral discussions because of both substantive issues (e.g. the contested issue of free flow of data across borders) and procedural matters (e.g. general concerns that the plurilateral process erodes the integrity of the multilateral WTO framework).

“The UK is also at the forefront of initiatives on digital trade, as evidenced by its constructive role in the WTO and G7 as well as its approach to trade and digital economy agreements.”

In 2023–24, WTO members will once again debate whether to maintain the current practice of not imposing customs duties on electronic transmissions. The so-called e-commerce moratorium has been renewed at every ministerial conference since its adoption in 1998, and will remain in effect until the next. However, there is a high chance that it will not be renewed at the 13th ministerial conference (India’s ongoing concerns regarding tariff revenue losses being just one likely obstacle to renewal). Letting the moratorium expire would not only hurt digital trade, but would also represent a significant setback for the WTO’s relevance and credibility.

Thus, in 2023 and beyond, most progress on updating trade rules to address technological change will happen outside the traditional WTO structures. Japan’s G7 presidency in 2023 could seek to advance cooperation on ‘data free flow with trust’ – a concept that Japan proposed under its G20 presidency in 2019. But India’s G20 presidency in 2023 is not likely to give great impetus to cooperation on digital trade given the country’s stance on data regulation and cross-border data flows.

Indian retail industry 2023

The market after 2021 has been an eye-opening time for the Indian retail sector. The industry saw a decline of 8.5% in FY 2021, but it recovered in 2022 to reach \$836 billion with 81.5% contribution from traditional retail. However, the COVID-19 disruptions led to a rapid increase in e-commerce and digital adoption. Now, brands across segments are concentrating on increased online presence and direct sales as customers continue to shop online.

Quite interestingly, shoppers from Tier II and Tier III cities make up over 61 percent of the total market share in FY 2022 in comparison to 53.8 percent in FY 2021. While Tier I cities have a lesser growth rate for e-commerce at 47.2 percent, tier II and III cities showcased growth of 92.2 percent and 85.2 percent, respectively. In 2023, tier II and III cities dominance is likely to continue. Looking at the way Indian retail industry is moving, 2023 will be the year to watch.

Encouragingly, India has had a boom in attracting international companies over the past few years; it is now the fifth-largest global destination for retail. The industry growth is riding on several factors, including rising disposable incomes, exposure of Gen Z to international brands, and ease of doing business.

Even if we only consider the government’s initiatives from 2021, the retail sector is in for fascinating times as we enter the new year. These actions would soon show their benefits; the transformation has already begun, paving the way for a more noticeable impact. The adoption of digital payments pushed by the new framework for retail digital payments in offline mode has created a more accurate and efficient environment making it easier for customers to make purchases or complete transactions. Time is money, as they say, and the digital transformation has ensured that the time saved is compounded by allocating additional resources to other parts of business improvement.

The central government has allowed 100 percent FDI in the online retail of products and services via the automatic route. Additionally, we have news on the inclusion of retail and wholesale trades as MSMEs, which would give these trades access to loans for the priority sector. The government’s promotion of digital transformation on the war front has been the best thing to happen, and the retail industry is just one of the many sectors that have benefited from this revolutionary innovation.

Strong growth in the Indian retail industry

According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation stood at 6.44% YoY in February 2023.

- According to the Retailers Association of India (RAI), the retail industry has experienced moderate growth over the last year as consumers are getting into regular business routines, which accounts for the high base in April and May 2023.

- Indian retail market is expected to reach US\$ 1.1 trillion by 2027 and US\$ 2 trillion by 2032.

- India is one of the most promising and developing marketplaces in the world. There is a great deal of desire among multinational corporations to take advantage of the consumer base in India and to enter the market first. Due to India's wealth of resources, availability of labour at relatively low costs, and special investment wages such tax breaks, etc., foreign corporations prefer to invest here.

- India is the fifth largest and preferred retail destination globally. The country is among the highest in the world in terms of per capita retail store availability.

- As per Kearney Research, India's retail industry is projected to rise at a slower pace of 9% between 2019 and 2030, from US\$ 779 billion in 2019 to US\$ 1,407 billion by 2026 and more than US\$ 1.8 trillion by 2030.

- India's retail sector was experiencing exponential growth with retail development taking place not just in major cities and metros, but also in small cities. Healthy economic growth, changing demographic profile, increasing disposable income, urbanisation, and changing consumer tastes and preferences have been some of the factors driving growth in the organised retail market in India.

Indian retail industry has emerged as one of the most dynamic and fast-paced industries due to the entry of several new players. It accounts for over 10% of the country's gross domestic product (GDP) and around eight % of the employment. India is the world's fifth-largest global destination in the retail space. India ranked 73 in the United Nations Conference on Trade and Development's Business-to-Consumer (B2C) E-commerce Index 2019. The sizeable middle class and nearly unexplored retail market in India are the main enticing factors for international retail behemoths seeking to move into newer markets, which will help the Indian retail business grow more quickly. The urban Indian consumer's purchasing power is increasing, and branded goods in categories like apparel, cosmetics, footwear, watches, beverages, food, and even jewellery are gradually evolving into business and leisure that are well-liked by the urban Indian consumer. The retail sector in India is expected to reach a whopping US\$ 2 trillion in value by 2032, according to a recent analysis by the Boston Consulting Group (BCG).

India is the world's fifth-largest global destination in the retail space. In the FDI Confidence Index, India ranked 17 (after US, Canada, Germany, United Kingdom, China, Japan, France, Australia, Switzerland, and Italy).

India is one of the most promising and developing marketplaces in the world. There is a great deal of desire among multinational corporations to take advantage of the consumer base in India and to enter the market first. Nearly 60 shopping malls encompassing a total retail space of 23.25 million sq. ft are expected to become operational during 2023-25.

India ranks among the best countries to invest in Retail space. Factors that make India so attractive include the second largest population in the world, a middle-income class of ~158 households, increasing urbanization, rising household incomes, connected rural consumers, and increasing consumer spending.

As of 2021, there were 1.2 million daily e-commerce transactions. Online shoppers in India are expected to reach ~500 million in 2030 from +150 million in 2020. The E-Commerce market is expected to touch US\$ 350 billion in GMV by 2030.

India's retail sector was experiencing exponential growth with retail development taking place not just in major cities and metros, but also in small cities. Healthy economic growth, changing demographic profile, increasing disposable income, urbanisation, and changing consumer tastes and preferences have been some of the factors driving growth in the organised retail market in India.

To improve the business climate and make it simpler for foreign companies to register fully owned subsidiaries in India, the Indian government has implemented a number of rules, regulations, and policies.

The Government has approved 51% FDI in multi-brand retail and 100% FDI in single-brand retail under the automatic route, which is expected to give a boost to Ease of Doing Business and Make in India schemes, with plans to allow 100% FDI in E-commerce.

The future outlook of the Indian Retail sector looks on track with pandemic easing out.

E-commerce is expanding steadily in the country. Customers have the ever-increasing choice of products at the lowest rates. Online retail market in India is projected to reach US\$ 350 billion by 2030 from an estimated US\$ 55 billion in 2021, due to rising online shoppers in the country. India is expected to become the world's third-largest consumer economy, reaching Rs. 27.95/- lakh crore (US\$ 400 billion) in consumption by 2025. Healthy economic growth, changing demographic profile, increasing disposable income, urbanisation, changing consumer tastes and preferences are some of the factors driving growth in the organised retail market in India.

The retail industry is growing

NRF forecasts that retail sales during 2023 will grow between 4% and 6% over 2022 to between \$5.13 trillion and \$5.23 trillion. Last year's annual retail sales grew 7% over 2021 and totaled \$4.9 trillion. This growth rate is above the pre-pandemic, average annual retail sales growth of 3.6%.

Annual Retail Sales and Sales Growth

NRF National Retail Federation

NRF Forecasts 2023 Retail Sales to Grow Between 4% and 6%

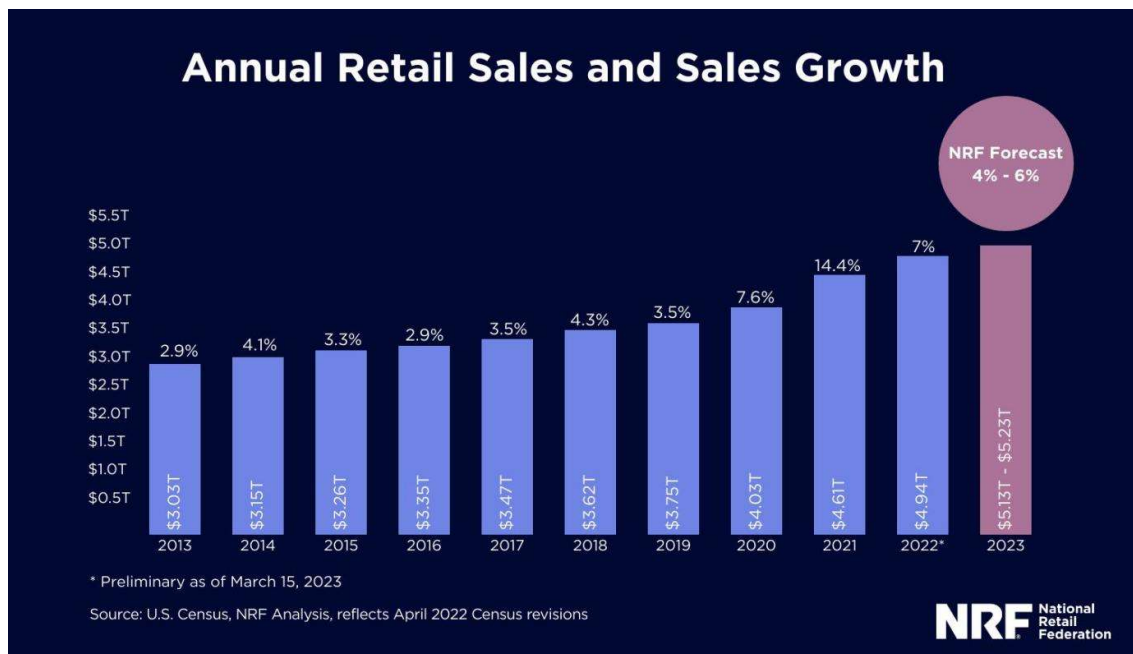

The National Retail Federation today issued its annual forecast, anticipating that retail sales will grow between 4% and 6% in 2023. In total, NRF projects that retail sales will reach between \$5.13 trillion and \$5.23 trillion this year.

“In just the last three years, the retail industry has experienced growth that would normally take almost a decade by pre-pandemic standards,”

NRF President and CEO Matthew Shay said. “While we expect growth to moderate in the year ahead, it will remain positive as retail sales stabilize to more historical levels. Retailers are prepared to serve consumers in the current economic environment by offering a range of products at affordable prices with great shopping experiences.”

NRF’s annual sales forecast was announced during the third annual State of Retail & the Consumer virtual conversation, where retail executives from major brands, prominent economists and consumer experts discussed the health of American consumers and the retail industry.

The 2023 figure compares with 7% annual growth to \$4.9 trillion in 2022. The 2023 forecast is above the pre-pandemic, average annual retail sales growth rate of 3.6%.

Non-store and online sales, which are included in the total figure, are expected to grow between 10% and 12% year over year to a range of \$1.41 trillion to \$1.43 trillion. While many consumers continue to utilize the conveniences offered by online shopping, much of that growth is driven by multichannel sales, where the physical store still plays an important component in the fulfillment process. As the role of brick-and-mortar stores has evolved in recent years, they remain the primary point of purchase for consumers, accounting for approximately 70% of total retail sales.

NRF projects full-year GDP growth of around 1%, reflecting a slower economic pace and half of the 2.1% increase from 2022. Inflation is on the way down but will remain between 3% and 3.5% for all goods and services for the year.

Although the labor market has remained resilient, the trade organization anticipates job growth to decelerate in the coming months in lockstep with slower economic activity and the prospect of restrictive credit conditions. The unemployment rate is likely to exceed 4% before next year.

NRF Chief Economist Jack Kleinhenz noted that aggregate economic activity has held up well, despite restrictive monetary policy that is working purposefully to curb inflation. He also acknowledged that recent developments in the financial markets and banking sector as well as some unresolved public policy issues complicate the outlook.

“While it is still too early to know the full effects of the banking industry turmoil, consumer spending is looking quite good for the first quarter of 2023,” Kleinhenz said. “While we expect consumers to maintain spending, a softer and likely uneven pace is projected for the balance of the year.”

As the leading authority and voice for the retail industry, NRF provides data on retail sales each month and also forecasts annual retail sales and spending for key periods such as the holiday season each year.

NRF’s calculation of retail sales excludes automobile dealers, gasoline stations and restaurants to focus on core retail.

Three retail industry trends and priorities

The confluence of obstacles retailers face can make the next steps daunting. As such, we believe there are three key areas that retailers can—and should—address now to create efficiencies while addressing the changing consumer: last-mile capabilities, reverse logistics, and social commerce.

Supply chain: Last-mile capabilities

Seven in 10 leaders say they are very confident that they will be able to deliver a seamless experience to consumers across channels, compared with only two of 10 laggards. To do so, retailers should consider creating more profitable last-mile delivery solutions by investing in automated micro-fulfillment centers (MFCs). MFCs can increase storage capacity and throughput rates—filling orders for multiple stores—and create efficiencies by freeing up employees who otherwise would be picking orders. MFCs are particularly attractive given they can expand the range of same-day and next-day services retailers can potentially reach.

Omnichannel: Reverse logistics

Every return is an opportunity for retailers to save a sale. Retailers should look to take advantage of in-store reverse logistics capabilities. In-person returns satisfy customers' desire for immediate credit while reducing expenses for mailed return delivery. And with the growing popularity of return bars—stores that pack and ship returns for partnering retailers—there is an opportunity to drive additional store traffic and expand the footprint of their client base, an ideal situation during inflationary times. Recent data suggests that retailers participating in return bars save over 20% in processing costs.

Digital: Social commerce

The cost of acquiring a new customer can be up to six to seven times more than retaining old customers,⁴ and social commerce can help reinforce existing customer loyalty. Retailers should invest in technologies to provide a seamless purchasing experience within social channels and shoppable media to nudge users toward purchases and create loyalty. Enabling shoppable tags with product information, embedding the brand website into the social media app, and enabling in-app transactions can help reduce friction on the shopping journey.

Methodology

This survey was commissioned by Deloitte and conducted online by an independent research company from October 21 to 31, 2022. It polled a sample of 50 retail industry executives, of which 70% were from companies with annual revenues of \$10 billion or more. The respondents included C-suite and senior executives who were directly responsible or exerted significant influence on major strategic initiatives in their organizations.

Economic outlook for the retail industry

A slowing economy will keep retail sales growth in check. In our baseline scenario (55% probability), we forecast GDP growth to slow to 0.9% in 2023 from an estimated 2% in 2022 and 5.9% in 2021. A relatively healthy labor market will, however, continue to boost sales. And there is a significant chance that a recession

would make things much worse. In the event of a recession (which Deloitte rates at a 35% probability), the economy would contract, and unemployment would rise.

Inflation has lowered consumers' purchasing power despite gains in nominal income due to the strong labor market. Even though nominal average weekly earnings have increased by 8.3% since December 2020, real earnings have fallen by 5%. This will weigh on consumer demand and, hence, retail sales volume.

Consumer spending on services has been picking up steadily as consumers return to bars and restaurants, take vacations, and enjoy sporting events as they did before the pandemic. To some extent, consumers are dipping into their savings to make up for what they missed during 2020-2021. The personal saving rate is now at 3.1%, much lower than pre-pandemic levels. A shift in spending to services will therefore weigh on retail sales at stores selling consumer goods.

Agriculture and Allied Industries

India is one of the major players in the agriculture sector worldwide and it is the primary source of livelihood for ~55% of India's population. India has the world's largest cattle herd (buffaloes), the largest area planted for wheat, rice, and cotton, and is the largest producer of milk, pulses, and spices in the world. It is the second-largest producer of fruit, vegetables, tea, farmed fish, cotton, sugarcane, wheat, rice, cotton, and sugar. The agriculture sector in India holds the record for second-largest agricultural land in the world generating employment for about half of the country's population. Thus, farmers become an integral part of the sector to provide us with a means of sustenance.

Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%. The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth.

Foodgrain production in India touched 330.5 million metric tonnes (MT) in 2022-23 (3rd Advance Estimate). India is the world's 2nd largest producer of food grains, fruits and vegetables and the 2nd largest exporter of sugar. A total of 521.27 LMT rice has been anticipated for procurement for the upcoming KMS 2023-24, up from 496 LMT produced during the previous KMS 2022-23.

Advantages to India

- Factors contributing to the sharp growth in demand for processed foods include increasing urbanization, increasing disposable incomes, changing spending patterns/ priorities, the emergence of nuclear families, and the growing need for convenience foods in dual-income nuclear families.

- The demand for organic products in the Indian market is growing and is anticipated to rise with a CAGR of 25.25% between 2022-27.
- A total of 521.27 LMT rice has been anticipated for procurement for the upcoming KMS 2023-24, up from 496 LMT produced during the previous KMS 2022-23.
- Entry of foreign players has been key to sustainable growth in some sectors such as dairy.

Leveraging of our Marketing Skills and Relationships

We continue to enhance our business operations by ensuring that our network of customers increases through our marketing efforts. Our core competency lies in our deep understanding of our customers' buying preferences and behavior, which has helped us in achieving customer loyalty. We endeavor to continuously improve the product mix offered to the customers as well as strive to understand and anticipate any change in the expectation of our clients towards our products.

We seek to diversify our credit risk and ensure that no individual credit product contributes a large portion to our overall credit book. We believe that this mitigates the risk of concentration to any particular product or sector and helps us to manage our risk exposure in a more effective manner.

Diversify our assets and liabilities

We intend to remain diversified in our loan book by strategically focusing on adjacent high growth and profitable lending businesses and further expand our lending and other businesses. We intend to continue to focus on developing a diversified funding model to achieve optimal cost of funds while balancing liquidity and concentration risks. As our cost of borrowings is determined by our financial discipline and business performance, we intend to source funding at competitive rates. In particular, with respect to our credit business, a decrease in cost of borrowings will enable us to price our products in a more competitive manner. We intend to further diversify and strengthen our profile, strategically adding additional funding resources.

Growth of the business through increasing geographical presence across India

Competition

We face competition from organized as well as unorganized players in the domestic market. The financial services industry is highly competitive and we expect competition to intensify in the future. We face competition in the lending business from domestic and international banks as well as other NBFCs, fintech lending platforms and private unorganized lenders. Banks are increasingly expanding into retail loans in the rural and semi-urban areas of India. We are exposed to the risk that these banks continue to expand their operations into the markets in which we operate, which would result in greater competition and lower spreads on our loans. In particular, many of our competitors may have operational advantages in terms of access to cost-effective sources of funding and in implementing new technologies and rationalising related operational costs.

2.1 Statement of compliance

These financial statements are prepared in accordance with Indian Accounting Standards (Ind AS), the provisions of the Companies Act, 2013 ("the Companies Act"), as applicable and guidelines issued by the Securities and Exchange Board of India ("SEBI"). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

The financial statements correspond to the classification provisions contained in Ind AS 1, "Presentation of Financial Statements". For clarity, various items are aggregated in the statements of profit and loss and balance sheet. These items are disaggregated separately in the notes to the financial statements, where applicable.

Accounting policies have been applied consistently to all periods presented in these financial statements.

2.2 Basis of Preparation of consolidated financial Statements

The consolidated financial statements of the group have been prepared in accordance with IND AS notified under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time. The consolidated financial statements have been prepared under the historical cost convention, as modified by the application of fair value measurements required or allowed by relevant IND AS at the end of each reporting period.

The consolidated financial statements of the Company and its subsidiary companies have been combined on a line-by-line basis by adding together the book values of like items of assets, liabilities, income and expenses, after fully eliminating intra-group balances and intra-group transactions resulting in unrealized profits or losses as per Indian Accounting Standard notified by Companies (Accounting Standards) Rules, 2006.

Minority Interest in the net assets of consolidated subsidiaries is identified and presented in the Consolidated Balance Sheet separately from liabilities and equity of the Company's shareholders. Minority interest in the net assets of consolidated subsidiaries consists of:

- The amount of equity attributable to minority at the date on which investment in a subsidiary is made; and

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS, AS RESTATED

2.3 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

2.4 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for leasing transactions that are within the scope of Ind AS 17 and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS, AS RESTATED

2.5 Use of estimates

The preparation of these financial statements in conformity with the recognition and measurement principles of Ind AS requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of income and expense for the periods presented. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected. Key source of estimation of uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of valuation of deferred tax assets and provisions and contingent liabilities.

Valuation of deferred tax assets

In view of uncertainty of future taxable profits, the Company has not recognized deferred tax asset (net of deferred tax liabilities) at the year end.

2.6 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

The specific recognition criteria described below must also be met before revenue is recognised:

- a) Income is recognized on accrual basis except income related to non-performing assets, which is accounted on cash basis in accordance with prudential norms of Reserve Bank of India.
- b) The Company has adopted Implicit Rate of Return (IRR) method of accounting in respect of finance charges income for hire purchase/loan transactions. As per this method, the IRR involved in each hire purchase/loan transaction is recognized and finance charges calculated by applying the same on outstanding principal financed thereby establishing equitable distribution of income over the period of the agreement.
- c) Interest on overdue installments is accounted for on receipt basis.
- d) Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.
- e) Dividend income is recognised at the time when right to receive the payment is established, which is generally when the shareholders approve the dividend.

2.7 Foreign currencies

The functional currency of the Company is Indian rupee (Rs.).

Income and expenses in foreign currencies are recorded at exchange rates prevailing on the date of the transaction. Foreign currency denominated monetary assets and liabilities are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses arising on settlement and restatement are recognised in the statement of profit and loss.

2.8 Employee benefits

The Company provides post-employment benefits through various defined contribution and defined benefit plans.

2.8.1 Defined contribution plans

A defined contribution plan is a plan under which the Company pays fixed contributions into an independent fund administered by the government. The Company has no legal or constructive obligations to pay further contributions after its payment of the fixed contribution, which are recognised as an expense in the year in which the related employee services are received.

2.8.2 Defined benefit plans

The defined benefit plans sponsored by the Company define the amount of the benefit that an employee will receive on completion of services by reference to length of service and last drawn salary. The legal obligation for any benefits remains with the Company.

Gratuity is post-employment benefit and is in the nature of a defined benefit plan. The liability recognised in the financial statements in respect of gratuity is the present value of the defined benefit obligation at the reporting date, together with adjustments for unrecognised actuarial gains or losses and post service costs. The defined benefit obligation is calculated at or near the reporting date by an independent actuary using the projected unit credit method.

Actuarial gains and losses arising from past experience and changes in actuarial assumptions are credited or charged to the statement of OCI in the year in which such gains or losses are determined.

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS, AS RESTATED

Other long-term employee benefits

Liability in respect of compensated absences becoming due or expected to be availed more than one year after the balance sheet date is estimated on the basis of an actuarial valuation performed by an independent actuary using the projected unit credit method.

Actuarial gains and losses arising from past experience and changes in actuarial assumptions are credited or charged to the statement of OCI in the year in which such gains or losses are determined.

Short-term employee benefits

Expenses in respect of other short term benefits is recognised on the basis of the amount paid or payable for the period during which services are rendered by the employee.

2.9 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

2.9.1 Current tax

2.9.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

2.9.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.10 Inventories

Repossessed assets are valued at the end at lower of book value or net realizable value as certified by the management of the Company.

2.11 Property plant and equipment

The Company has elected to continue with the carrying value of all of its plant and equipment (including freehold land) as at the transition date, viz., 1 April 2015 measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

Property plant and equipment and capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and impairment loss (if any).

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. Repairs and maintenance are charged to the Statement of Profit and Loss during the financial period in which they are incurred.

Depreciation is computed on Written down value ("WDV") method based on estimated useful lives as determined by internal assessment of the assets in terms of Schedule of II to the Companies Act, 2013.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

No further charge is provided in respect of assets that are fully written down but are still in use.

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS, AS RESTATED

2.12 Intangible assets

Development of property (website) and software costs are included in the balance sheet as intangible assets, when they are clearly linked to long term economic benefits for the Company. These are measured initially at purchase cost and then amortised on a straight-line basis over their estimated useful lives.

2.13 Impairment of tangible and intangible assets

Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit and loss.

2.14 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

2.15 Financial Instruments

A. Initial recognition

Financial assets and financial liabilities are recognised when a Company entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS, AS RESTATED

B. Subsequent measurement

I. Non-derivative financial instruments

a. Financial assets carried at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b. Financial assets at fair value through other comprehensive income

Investment in equity instruments (other than subsidiaries / associates / joint ventures) - All equity investments in scope of Ind-AS 109 are measured at fair value. Equity instruments which are held for trading are generally classified at fair value through profit and loss (FVTPL). For all other equity instruments, the Company decides to classify the same either at fair value through other comprehensive income (FVOCI) or fair value through profit and loss (FVTPL). The Company makes such election on an instrument by instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the other comprehensive income (OCI). There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity. Dividends on such investments are recognised in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

c. Financial assets at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in profit or loss.

d. Financial liabilities

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit and loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

II. Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issuance of new ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

C. Derecognition of financial instruments

The company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

2.16 Fair value of financial instruments

In determining the fair value of its financial instruments, the Company uses a variety of methods and assumptions that are based on market conditions and risks existing at each reporting date. The methods used to determine fair value include discounted cash flow analysis, available quoted market prices and dealer quotes. All methods of assessing fair value result in general approximation of value, and such value may never actually be realised.

2.17 Impairment of financial assets (other than at fair value)

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition

NOTES FORMING PART OF THE STANDALONE FINANCIAL STATEMENTS, AS RESTATED

1 Corporate Information

IFL Enterprises Limited (CIN L74110DL2009PLC186958) was incorporated on January 23rd, 2009 under the Companies Act, 1956 with the Registrar of Companies Delhi. The Company is involved in the business of trading of all type of paper for writing, wrapping, kraft and semi kraft cloth paper, wall paper and related products, also act as commission agent stockist on behalf of others as well as shares and securities within permissible limits prescribed by the regulators such as RBI or SEBI. The company is listed on Bombay Stock exchange (BSE) [Script code: 540377].

2 Significant Accounting Policies :

2.1 Statement of compliance

These financial statements are prepared in accordance with Indian Accounting Standards (Ind AS), the provisions of the Companies Act, 2013 ("the Companies Act"), as applicable and guidelines issued by the Securities and Exchange Board of India ("SEBI"). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

The financial statements correspond to the classification provisions contained in Ind AS 1, "Presentation of Financial Statements". For clarity, various items are aggregated in the statements of profit and loss and balance sheet. These items are disaggregated separately in the notes to the financial statements, where applicable.

Accounting policies have been applied consistently to all periods presented in these financial statements.

2.2 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

2.3 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for leasing transactions that are within the scope of Ind AS 17 and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

NOTES FORMING PART OF THE STANDALONE FINANCIAL STATEMENTS, AS RESTATED

2.4 Use of estimates

The preparation of these financial statements in conformity with the recognition and measurement principles of Ind AS requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of income and expense for the periods presented. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected. Key source of estimation of uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of valuation of deferred tax assets and provisions and contingent liabilities.

Valuation of deferred tax assets

In view of uncertainty of future taxable profits, the Company has not recognized deferred tax asset (net of deferred tax liabilities) at the year end.

2.5 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

The specific recognition criteria described below must also be met before revenue is recognised:

- a) Income is recognized on accrual basis except income related to non-performing assets, which is accounted on cash basis in accordance with prudential norms of Reserve Bank of India.
- b) The Company has adopted Implicit Rate of Return (IRR) method of accounting in respect of finance charges income for hire purchase/loan transactions. As per this method, the IRR involved in each hire purchase/loan transaction is recognized and finance charges calculated by applying the same on outstanding principal financed thereby establishing equitable distribution of income over the period of the agreement.
- c) Interest on overdue installments is accounted for on receipt basis.
- d) Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.
- e) Dividend income is recognised at the time when right to receive the payment is established, which is generally when the shareholders approve the dividend.

2.6 Foreign currencies

The functional currency of the Company is Indian rupee (Rs.).

Income and expenses in foreign currencies are recorded at exchange rates prevailing on the date of the transaction. Foreign currency denominated monetary assets and liabilities are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses arising on settlement and restatement are recognised in the statement of profit and loss.

2.7 Employee benefits

The Company provides post-employment benefits through various defined contribution and defined benefit plans.

2.7.1 Defined contribution plans

A defined contribution plan is a plan under which the Company pays fixed contributions into an independent fund administered by the government. The Company has no legal or constructive obligations to pay further contributions after its payment of the fixed contribution, which are recognised as an expense in the year in which the related employee services are received.

2.7.2 Defined benefit plans

The defined benefit plans sponsored by the Company define the amount of the benefit that an employee will received on completion of services by reference to length of service and last drawn salary. The legal obligation for any benefits remains with the Company.

Gratuity is post-employment benefit and is in the nature of a defined benefit plan. The liability recognised in the financial statements in respect of gratuity is the present value of the defined benefit obligation at the reporting date, together with adjustments for unrecognised actuarial gains or losses and post service costs. The defined benefit obligation is calculated at or near the reporting date by an independent actuary using the projected unit credit method.

Actuarial gains and losses arising from past experience and changes in actuarial assumptions are credited or charged to the statement of OCI in the year in which such gains or losses are determined.

NOTES FORMING PART OF THE STANDALONE FINANCIAL STATEMENTS, AS RESTATED

Other long-term employee benefits

Liability in respect of compensated absences becoming due or expected to be availed more than one year after the balance sheet date is estimated on the basis of an actuarial valuation performed by an independent actuary using the projected unit credit method.

Actuarial gains and losses arising from past experience and changes in actuarial assumptions are credited or charged to the statement of OCI in the year in which such gains or losses are determined.

Short-term employee benefits

Expenses in respect of other short term benefits is recognised on the basis of the amount paid or payable for the period during which services are rendered by the employee.

2.8 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

2.8.1 Current tax

2.8.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

2.8.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.09 Inventories

Repossessed assets are valued at the end at lower of book value or net realizable value as certified by the management of the Company.

2.10 Property plant and equipment

The Company has elected to continue with the carrying value of all of its plant and equipment (including freehold land) as at the transition date, viz., 1 April 2015 measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

Property plant and equipment and capital work in progress are stated at cost of acquisition or construction net of accumulated depreciation and impairment loss (if any).

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. Repairs and maintenance are charged to the Statement of Profit and Loss during the financial period in which they are incurred.

Depreciation is computed on Written down value ('WDV') method based on estimated useful lives as determined by internal assessment of the assets in terms of Schedule of II to the Companies Act, 2013.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

No further charge is provided in respect of assets that are fully written down but are still in use.

NOTES FORMING PART OF THE STANDALONE FINANCIAL STATEMENTS, AS RESTATED

2.11 Intangible assets

Development of property (website) and software costs are included in the balance sheet as intangible assets, when they are clearly linked to long term economic benefits for the Company. These are measured initially at purchase cost and then amortised on a straight-line basis over their estimated useful lives.

2.12 Impairment of tangible and intangible assets

Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit and loss.

2.13 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

2.14 Financial Instruments

A. Initial recognition

Financial assets and financial liabilities are recognised when a Company entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

NOTES FORMING PART OF THE STANDALONE FINANCIAL STATEMENTS, AS RESTATED

B. Subsequent measurement

I. Non-derivative financial instruments

a. Financial assets carried at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b. Financial assets at fair value through other comprehensive income

Investment in equity instruments (other than subsidiaries / associates / joint ventures) - All equity investments in scope of Ind-AS 109 are measured at fair value. Equity instruments which are held for trading are generally classified at fair value through profit and loss (FVTPL). For all other equity instruments, the Company decides to classify the same either at fair value through other comprehensive income (FVOCI) or fair value through profit and loss (FVTPL). The Company makes such election on an instrument by instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the other comprehensive income (OCI). There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity. Dividends on such investments are recognised in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

c. Financial assets at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in profit or loss.

d. Financial liabilities

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit and loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

II. Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issuance of new ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

C. Derecognition of financial instruments

The company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

2.15 Fair value of financial instruments

In determining the fair value of its financial instruments, the Company uses a variety of methods and assumptions that are based on market conditions and risks existing at each reporting date. The methods used to determine fair value include discounted cash flow analysis, available quoted market prices and dealer quotes. All methods of assessing fair value result in general approximation of value, and such value may never actually be realised.

2.16 Impairment of financial assets (other than at fair value)

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Consolidated FDI Policy and FEMA. The FDI Policy prescribes the limits and conditions subject to which foreign investment can be made in different sectors of the Indian economy and FEMA regulates the precise manner in which such investment may be made.

The government bodies responsible for granting foreign investment approvals are the concerned ministries/departments of the Government of India and the RBI. Pursuant to the press release dated May 24, 2017, the Union Cabinet phased out the FIPB and it was replaced by the Foreign Investment Facilitation Portal (FIFP) to speed up the FDI inflow and to increase the transparency in the FDI approvals in the country. The DIPP issued the Standard Operating Procedure (SOP) for Processing FDI Proposals on June 29, 2017 (the "SOP"). The SOP provides a list of the competent authorities to grant approvals for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under the automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned Administrative Ministry/Department shall act as the competent authority (the "Competent Authority") for the grant of post facto approval for foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP will identify the Competent Authority.

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DIPP, has issued a consolidated FDI Policy DPIIT File Number 5(2)/2020-FDI Policy Dated the October 15, 2020 ("FDI Policy 2020"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI policy issued by the DIPP that were in force till that date. The Government of India proposes to update the consolidated circular on FDI policy once every year and therefore, the FDI Policy 2020 will be valid until the DIPP issues an updated circular.

Under the FDI Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to 100% without any prior approvals, however the foreign investor must follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ("FDI") and approval from the Government of India will now be handled by the FIFP.

The transfer of shares between an Indian resident and a non-resident does not need prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA, and the transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the extant policy of the Government of India, erstwhile OCBs cannot participate in this Issue. OCBs or Overseas Corporate Bodies have been derecognised as a class of investor entity in India with effect from September 16, 2003.

Overseas Corporate Body means a company, partnership firm, society and other corporate body owned directly or indirectly to the extent of at least sixty per cent by Non- Resident Indians and includes overseas trust in which not less than sixty percent beneficial interest is held by Non-resident Indians directly or indirectly but irrevocably, which was in existence as on September 16, 2003 and was eligible to undertake transactions pursuant to the general permission granted under FEMA. Any investment made in India by such entities will be treated as investments by incorporated non-resident entities, i.e. a foreign company.

The Issue, if renounced by our shareholders, may include offers within India, to Indian institutional, non-institutional and retail investors in offshore transactions as defined in, and made in reliance upon exemptions from the registration requirements under the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), including the exemption under Regulation S ("Regulation S") of the U.S. Securities Act. The above information is given for the benefit of the Applicants / Investors. Our Company is not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Letter of Offer. Investors are advised to make their independent investigations and ensure that the number of Equity Shares applied for do not exceed the applicable limits under laws or regulations.
