## 1 Introduction

As an Exchange Participant, you have a range of alternatives to connect to our markets. BSE Exchange interfaces offer hardware independence, high levels of customization and flexibility. Our portfolio of connectivity alternatives is designed to meet the needs of a variety of users, from low-latency program trading users to cliental trading business models. With this broad offering, you can select which connectivity solution best suits your individual needs. Every business user has different needs, we designed a customized approach to ensure that you can choose the connectivity alternatives based on your unique business needs.

The sections below describe the Interactive interface and various market data interfaces that is offered to the market participants.

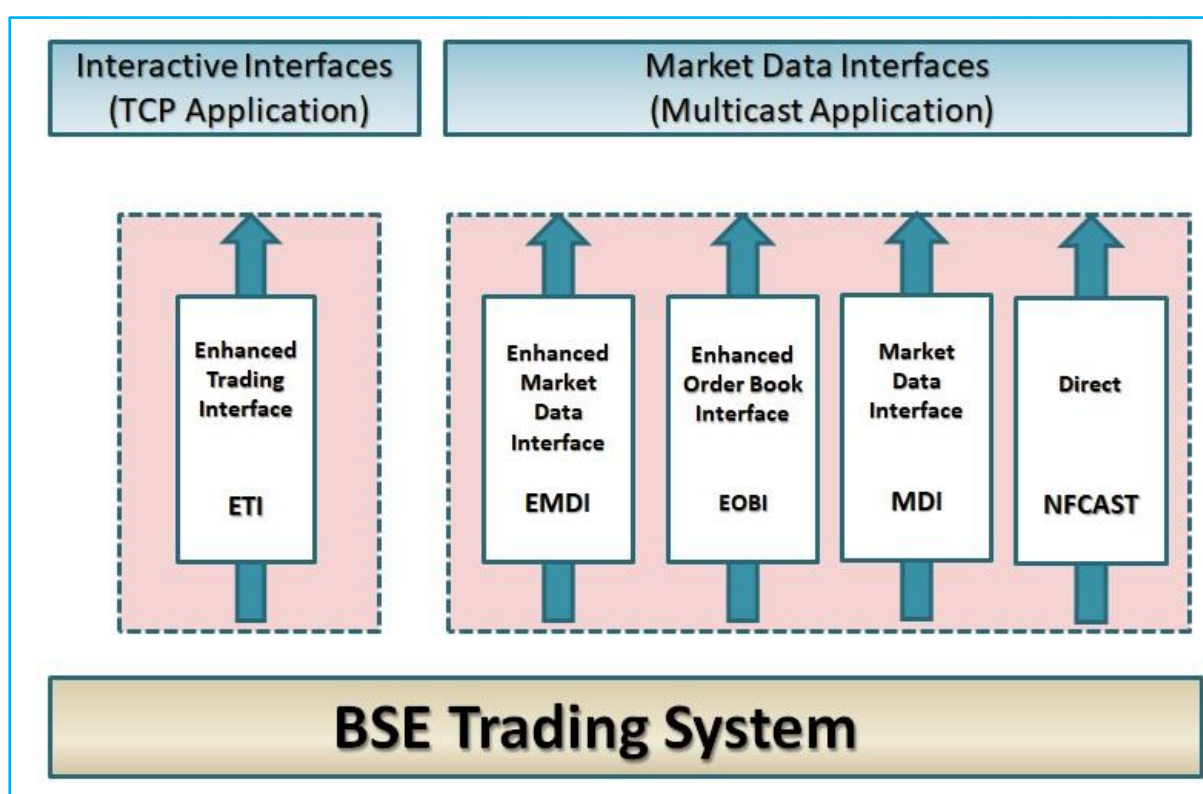

Figure 1: Trading Interface landscape

## 2 Interactive Interfaces

BSE offers only one interactive interface to connect to BOLTPLUS system. The interface is platform independent and offers wide flexibility in terms of implementation. **The legacy IML interface supported by exchange is discontinued.**

## 2.1 BSE Enhanced Trading Interface (BSE ETI)

The BSE ETI is the high-performance, low-latency trading interface designed for Participants that require optimal performance and customization. This interface supports full trading functionality, drop copy and risk alerts. The communication supported in this interface is in binary format.

The ETI is an asynchronous message-based interface. A connection between participants and exchange is established via a TCP/IP connection. The interface is session oriented. A session is established between the participants' machine and ETI gateway.

In order to establish a session with a trading gateway, a TCP/IP connection to a connection gateway must be established first. The connection gateway provides the connection parameters for the assigned primary and secondary gateway to be used for trading purposes. The connectivity to exchange is a 3-step process and the process is described below

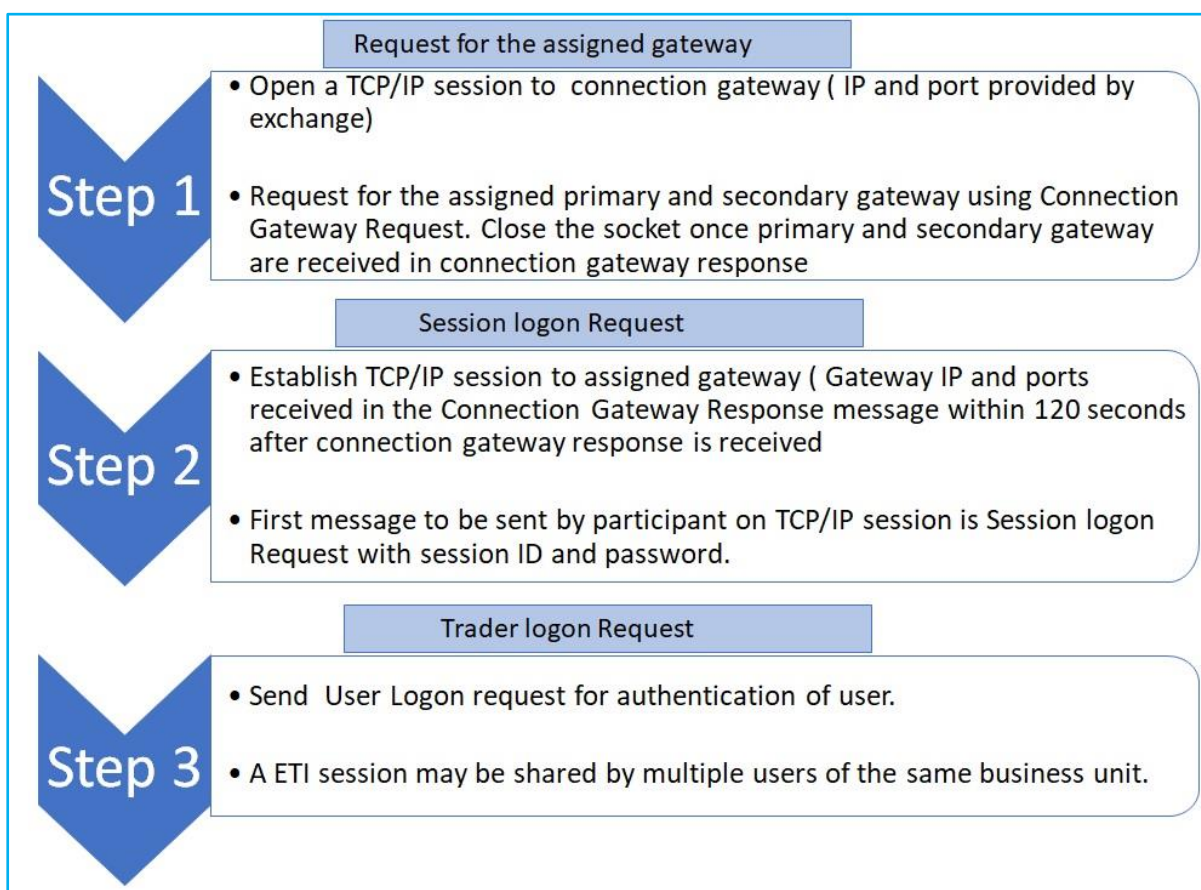

Figure 2: The TCP/IP connection flow of ETI connection

The gateway infrastructure of BSE is built redundantly with set of gateways including a connection gateway, trading gateways for low frequency (LF) sessions and trading gateways for high frequency (HF) sessions.

For each Session ID a pair of primary and secondary gateway remains constant every day. The pair of gateways are provided to each session in the Connection Gateway Response message. Though the pair remains constant the member application cannot directly connect to primary or secondary gateway. The first connection is mandatorily required to be made to the connection gateway IP published by the exchange.

The pair of primary and secondary gateway may remain constant however periodically, exchange does redistribution of connections on gateways based on the load thus the pair of primary and secondary gateway may or may not change after redistribution.

It is highly recommended that the provision for all gateways are made in member network based on the routes provided in the range provided in the section [Routes](#)

## 3 Market Data Streams

BSE support broadly two category of market data interfaces which are designed for low bandwidth client and high bandwidth clients.

### 3.1 Low Bandwidth Interfaces

The low bandwidth interfaces include market data interfaces whose bandwidth consumption is capped by exchange to less than 2MBPS. These interfaces provide netted price level data only. They include the following interfaces

#### 3.1.1 BSE Market Data Interface (MDI)

This interface provides netted price level aggregated market data using multicast technology. The data is in FAST FIX format. The data for all partitions are provided on same feed.

#### 3.1.2 BSE Direct NFCAS

This interface provides netted price level aggregated market data using multicast technology. The data is in proprietary binary format. The data for all partitions are provided on same feed.

### 3.2 High Bandwidth Interfaces

The high bandwidth interfaces include market data interfaces whose bandwidth consumption is not capped by exchange, and it varies from 10 MBPS to 200 MBPS. The feeds are provided partition wise. Each partition will be sent on one set of feed only. These interfaces provide un-netted price level data. They include the following interfaces

#### 3.2.1 BSE Enhanced Market Data Interface (EMDI)

This interface provides un-netted price level aggregated market data using multicast technology. The un-netted data is for a defined price level only. The data is in FAST FIX format.

### 3.2.2 BSE Enhanced Order Book Interface (EOBI)

This interface provides every visible order in the order book i.e., tick by tick update is sent in this stream of market data. Most of the functional concepts are like EMDI, however the data is sent in the proprietary binary format.

## 3.3 Reference Data Interface

### 3.3.1 BSE Reference Data Interface (RDI)

This interface provides reference data or the master through multicast channel. The data is continuously published on the channel throughout the day. The reference data is also provided through master data file at EOD.

### 3.4 Comparison Between market data streams:

Attributes	EOBI	EMDI	MDI	Direct NFOCAST
<b>Price Level</b>	Full depth	Depth up to configured level (5 Level)	Depth up to configured level (5 Level)	5 level
<b>Price level Aggregation</b>	Every tick is sent as individual update	Unnetted but price level aggregated	Netted Price level aggregated	Netted Price level aggregated
<b>Format</b>	Binary	FAST	FAST	Binary
<b>Bandwidth</b>	High (Approx. 800 MBPS)	High (Approx. 80 MBPS)	Low (Approx. 2.5 MBPS)	Low (Approx. 3 MBPS)
<b>Usage</b>	Algorithmic trading	Algorithmic trading	Used for Terminal based trading application	Used for Terminal based trading application
<b>Recovery</b>	The current pending order book is replayed & should be read again to build the book	The current snapshot up to the configured level is replayed in a separate stream and should be used in case of missed packets	The current snapshot up to the configured level is replayed at regular interval and should be used in case of missed packets	Every update sent is a complete snapshot of 5 level order book, so no separate recovery is required
<b>Availability</b>	Only in BSE Colocation	All networks	All networks	All networks
<b>Composition</b>	Partition wise feed	Partition wise feed	Single feed for all partitions	Single feed for all partitions.

## 4 Routes

In order to have network reachability to each of the connectivity described in the document, necessary routes need to be configured in the client network. Below the routes recommended by exchange to be configured in the client network.

### 4.1 Routes

Segment	Primary Site	DR site	Simulation
<b>EQUITY</b>	<b>Interactive</b> 10.255.255.1/24 Port: 18906 to 18920 <b>Market Data</b> 137.75.1.1/16	<b>Interactive</b> 10.255.241.1/24 Port: 18906 to 18920 <b>Market Data</b> 138.75.1.1/16	<b>Interactive</b> 10.255.254.1/24 Port: 11406 to 11420 <b>Market Data</b> 137.74.1.1/16
<b>EQUITY DERIVATIVES</b>	<b>Interactive</b> 10.255.255.1/24 Port: 15906 to 15920 <b>Market Data</b> 137.75.1.1/16	<b>Interactive</b> 10.255.241.1/24 Port: 15906 to 15920 <b>Market Data</b> 138.75.1.1/16	<b>Interactive</b> 10.255.254.1/24 Port: 12406 to 12420 <b>Market Data</b> 137.74.1.1/16
<b>EQUITY SHORTAGE AUCTION</b>	10.1.101.36 Port: 1001	10.1.101.194 Port:1001	10.1.101.105 Port:1000
<b>CURRENCY DERIVATIVES</b>	<b>Interactive</b> 10.255.255.1/24 Port: 13906 to 13920 <b>Market Data</b> 137.75.1.1/16	<b>Interactive</b> 10.255.241.1/24 Port: 13906 to 13920 <b>Market Data</b> 138.75.1.1/16	<b>Interactive</b> 10.255.254.1/24 Port: 10406 to 10420 <b>Market Data</b> 137.75.1.1/16
<b>COMMODITY DERIVATIVES &amp; ELECTRONIC GOLD RECEIPTS (EGR)</b>	<b>Interactive</b> 10.255.255.1/26	<b>Interactive</b> 10.255.241.1/26	<b>Interactive</b> 10.255.254.1/26

	Port: 14906 to 14920 <b>Market Data</b> 137.75.1.1/16	Port: 14906 to 14920 <b>Market Data</b> 138.75.1.1/16	Port: 15406 to 15420 <b>Market Data</b> 137.75.1.1/16
<b>Additional Route for members having servers in BSE Colocation</b>	Interactive 10.255.253.1/24 Port: 15906 to 15920 Port: 18906 to 18920 <b>Market Data</b> 10.255.225.1/24	Not applicable	Not applicable

It is highly recommended that the client should allow the above-mentioned routes in their network. The subnet is kept wide enough to provision any new server in future that will be incorporated in the exchange farm **without impacting the settings done at client side. Also note that the exchange may add a new server in the defined range without prior intimation as well.**

## 5 Connection Parameters

The Various Connection parameter for Interactive and market data feed is mentioned below. The Below section provides all the parameters associated with trading and various set-up such Production, Simulation and Disaster Recovery.

5.1 Production: Equity

Interactive Interfaces				Reference Data Interface				
Connection Gateway		Host IP	Port	RDI	Incremental		Snapshot	
	Primary	10.255.255.6	18909		227.0.0.1 1	227.0.0.1 2	227.0.0.1 3	227.0.0.1 4
	Secondary	10.255.255.7	18909		12984	12985	12986	12987

## 6 Change Log

Sr. No.	Version	Date	Description				
1.	1.0	25 <sup>th</sup> September 2020	Original Document				
2.	1.1	13 <sup>th</sup> November 2021	New Multicast IP 227.0.0.17 and 227.0.0.18 added for Equity Derivative segment in MDI Feed.				
3.	1.2	1 <sup>st</sup> April 2022	<p>Production: New Multicast IP 228.0.0.21 added for EGR in commodities derivatives segment.</p> <p>Simulation: New Multicast IP 226.1.1.2 added for EGR in commodities derivatives segment.</p> <p>Simulation Secondary Connection Gateway IP changed as follows for all segments.</p> <table border="1" data-bbox="836 927 1399 1010"> <thead> <tr> <th>OLD IP</th> <th>New IP</th> </tr> </thead> <tbody> <tr> <td>10.255.254.7</td> <td>10.255.254.40</td> </tr> </tbody> </table>	OLD IP	New IP	10.255.254.7	10.255.254.40
OLD IP	New IP						
10.255.254.7	10.255.254.40						
4	1.3	16 <sup>th</sup> May 2023	<p>The Generic route section is removed.</p> <p>The section Specific routes renamed as Routes and range of each route updated.</p>				
5	1.4	10 <sup>th</sup> July 2023	Partition 5 and 6 multicast Ip ports added for EOBI and EMDI in equity and equity derivatives segment in production, simulation, and Disaster Recovery				
6	1.5	10 <sup>th</sup> August 2023	Partition 7 and 8 multicast Ip ports added for EOBI and EMDI in equity and equity derivatives segment in production, simulation, and Disaster Recovery				
7	1.6	10 <sup>th</sup> October 2023	<p>Segregation of equity and equity derivatives segment. Changes in following sections</p> <p>(a) Section 4.1 Routes: Routes added for equity derivatives segment.</p> <p>(b) Section 5.3 Production: Equity Derivatives Section 5.6 Disaster Recovery: Equity Derivatives Section 5.10: Simulation: Equity Derivatives</p>				

			<p>New sections added for IP ports of equity derivatives segment in Production, DR and Simulation.</p> <p>Multicast IP and ports change in production and DR for Commodities derivatives and EGR segment. Section 5.4 and section 5.8</p>
8	1.7	27 <sup>th</sup> Nov 2023	(Section 5.2) Change in IP of MDI Service B low bandwidth (Section 5.6) Connection Gateway parameters for DR Equity Derivatives
9	1.8	6 <sup>th</sup> Dec 2023	(Section 4.1) Change in Routes of Simulation Equity and Derivatives (Section 5.9, Section 5.10) Connection Gateway Parameters change for Equity and Derivatives in Simulation
10	1.9	15 <sup>th</sup> Dec 2023	(Section 5.7, Section 5.8) Connection Gateway Parameters change for Currency Derivatives and Commodities derivatives and EGR in Disaster Recovery.
11	1.10	10 <sup>th</sup> Jun 2024	Partition 9 and 10 multicast IP ports added for EOBI and EMDI in equity derivatives segment in production, simulation, and Disaster Recovery
12	1.11	8 <sup>th</sup> July 2024	Connection gateway parameters revised for Encryption channel in all segments.
13	1.12	1 <sup>st</sup> Oct 2024	Connection gateway ports revised for DR Currency and Simulation all segments
14	1.12.1	4 <sup>th</sup> Nov 2024	EMDI ports updated to 12988 and 12989 respectively Equity production
15	1.12.2	18 <sup>th</sup> Nov 2024	LPP multicast parameters have been added to Equity Derivatives sections
