#### **INTERNAL RISK FACTORS**

##### **Project Risk**

1. **The Sewerage System including Wastewater Treatment System and Supply of Recycled Water to various industries in Ghaziabad Project is a revenue generating Project, however we may face cost and time overruns.**

The Project undertaken by the Issuer, i.e., setting up a Tertiary Treatment Plant to further treat secondary-treated sewage water for supplying bulk industrial grade water by tertiary treatment of sewage water from the Indirapuram STP to produce and supply Industrial Grade water to the neighboring industrial estate of Sahibabad Industrial area. This project would enable GNN to reduce pressure on ground water resources in the city and free up the supply of potable water to the city. As the recycled water is supposed to be sold to the nearby industrial units, this is a revenue generating project. In respect of the same, a Memorandum of Understanding has been executed between GNN and Sahibabad Industries Association on February 17, 2021 ("MOU"). The details of the MOU have been provided in Section: VII (*Objects of the Issue*) on page No.46 of this Placement Memorandum.

The Project, which is being undertaken by GNN, is proposed to be financed through Green Bonds and internal accruals of GNN. Though, it would be the endeavor of GNN to complete the project on time within the prescribed cost., a funding gap due to cost overruns, if develops, could pose a contingent budgetary risk for GNN, or result in a request to the Standing Committee/Corporation for additional borrowing authority for this Project. There is also a possibility that the implementation of the Project might get delayed due to workforce issues, non-availability of approvals/ no objection certificates, delays because of third party contractors etc. Though the cash inflows from the Projects are not earmarked for servicing the obligations of the Issuer in respect of the Green Bonds, non-implementation of the Projects as per the schedule of implementation will affect the Issuer's performance and asset generation capacity thereby impacting the business, cashflow and financial conditions of the Issuer.

The Issuer has applied for the required approvals for the Eligible Green Project, however, certain approvals that have been applied for by the Issuer are yet to be received. Delay in obtaining such approvals/ non receipt may defer the project timelines. The projects are also susceptible to the policies of the state. Any delays in receipt of approvals may delay the commissioning of the project and expected revenue generation of the Issuer. The payment of interest and principal to the Green Bond Holders are backed by a structured payment mechanism. For further details, please refer to Structured Payment Mechanism on page 112 (*Summary Term Sheet*) and Annexure - 1 on page A1 of this PPM.

2. **The Project proposed to be funded by the proceeds of the Issue has not been appraised by any governmental or regulatory body, bank or financial institution.**

The proceeds of the proposed issue have been earmarked for a defined project details of which have been disclosed in of Section VII:(*Objects of the Issue*) on page 46 of this Placement Memorandum. The costs of the Project are indicative and have not been appraised by any governmental or regulatory body, bank or financial institution. The overall fund requirement for the Project and proposed deployment schedules are based on internal estimates and the detailed project report prepared by Green Design & Engineering Services Private Limited("DPR"). The DPR is based on the current plan and information as on the date of DPR and is subject to any modification/amendments as per the future requirements.

### **3. Regulatory Approvals**

Regulatory approvals, sanctions, no objection certificates and permissions are required to be obtained by the Issuer for undertaking the Eligible Green Project. The Issuer has state approvals for the proposed Eligible Green Bonds and has applied for various approvals/ no objection certificates. While the Issuer is in receipt of few approvals/ no objection certificates, certain other approvals/ permissions/ no objection certificates are yet to be obtained. The details of the approvals/ no objection certificates required for the Eligible Green Project and the status of the approvals is disclosed in Section VII (*Objects of the Issue*) on page 46. Delay in obtaining these approvals/ no objection certificates may affect the timelines of the project implementation, thus affecting the financial condition of the Issuer.

Further the Issuer may also be unable to renew the approvals (if so required) within the time. Additionally, any historical or future failure to comply with the terms and conditions of the existing regulatory or statutory approvals may cause the Issuer to lose or become unable to renew such approvals.

Any delays in receipt of approvals may delay the commissioning of the project and expected revenue generation of the Issuer. The payment of interest and principal to the Green Bond Holders are backed by a structured payment mechanism. For further details please refer to page 112 (*Summary Term Sheet*) and Annexure - I on page A1 of this PPM.

### **4. Impact from social perspective**

The implementation of the Eligible Green Project may have some impact from social perspective. The development of the STPT plant may disrupt the livelihood, displace inhabitants may lead to possible haphazard development around the project site and impact the pollution and green cover.

### **Credit Risk**

#### **5. Repayment is subject to the credit risk of the Issuer**

Potential investors should be aware that receipt of the payments that may be due in respect of the Green Bonds is subject to the credit risk of the Issuer. Potential investors assume the risk that the Issuer will not be able to satisfy their obligations under the Green Bonds. The Issuer has income from Sale, General Income, Grant in Aid and Other Income aggregating to Rs. 474.62 crores in Financial Year 2019-2020 and Rs. 425.26 crores in Financial Year 2018-2019 as per the Audited Financial Statements.

The Issuer has reported Net Surplus of Rs. 98.81 crores in Financial Year 2019-2020 and Rs. 98.14 crores in Financial Year 2018-2019 as per the Audited Financial Statements.

The Issuer believes that income generated is adequate for building up the funds in the Interest Payment Account and the Sinking Fund Account for meeting the obligations of the Issuer in respect of the Green Bonds.

#### **6. The credit rating assigned to us may be downgraded.**

India Ratings has *vide* its letter dated February 22, 2021, as reaffirmed *vide* letter dated March 09, 2021 assigned a rating of Provisional IND AA/Stable and has issued a rating rationale dated February 22, 2021, BWR has *vide* its letter dated February 19, 2021, as reaffirmed *vide* letter dated March 09, 2021 assigned a rating of Provisional BWR

AA(CE) (Stable) which was earlier assigned vide their letter dated February 20, 2020 and has issued a rating rationale dated February 22, 2021.

However, if there is a deterioration in our financial performance or position, accumulation of debt or if there are any statutory or regulatory restrictions detrimentally affecting our ability to collect revenues or manage expenditures, our credit rating and credit rating assigned to the Green Bonds may be downgraded. Any downgrading in our credit rating or credit rating of instruments will result in an enhanced risk to the Bondholders.

Further, in terms of the rating rationale issued by BWR on February 22, 2021 and rating rationale issued by India Ratings on February 22, 2021 the outlook has been kept as Stable, considering the structured payment mechanism for servicing of bond servicing dues along with the support from the Infrastructure Development Fund, stable revenue generation from tax revenues, assigned revenues and compensations and revenues grants, contribution and subsidies, steady progress in ongoing capital expenditure plans and generation of adequate net surplus.

The Issuer cannot guarantee that these credit ratings will not be downgraded by the Rating Agencies in future. The ratings provided by the Rating Agencies may be suspended, withdrawn or revised at any time including without limitation on financial deterioration of the Issuer. Any revision or downgrading in the above credit rating may lower the value of the Green Bonds and may also affect the Issuer's ability to raise further debt. In such cases where the value of the Green Bonds decreases, potential investors may incur losses on sale of their investment in the secondary market.

#### **Financial Risk including Liquidity Risk**

##### **7. Inconsistent Revenue Collection**

The revenue collections of the Issuer vary from month to month. Shortage in collections in any period may result in a mismatch in revenue and expenditure of the Issuer and the funds may be inadequate for transfer to the Escrow Account. Such shortfall will impact the Issuer's financial condition and the Issuer's ability to meet its obligations in respect of the Green Bonds. The obligations towards Green Bonds are covered through the structured payment mechanism whereby any shortfall towards payments to be made in respect of the Green Bonds will be transferred from the Infrastructure Development Fund by the GoUP, in terms of the Transaction Documents.

##### **8. Low collection ratios**

The current collection ratios of Property Tax which is one of the main sources of own revenue for the Issuer are low at 75.04%\* in Financial Year 2019-2020. The Issuer has seen a decrease in the collection ratios in the past. The current collection ratios have decreased from 83.24%\* in Financial Year 2017-2018 to 77.37%\* in Financial Year 2018-2019 and further to 75.04%\* in Financial Year 2019-2020.

While despite the impact of Covid-19, Issuer has been able to maintain the collection ratios during Financial Year 2020-2021, there can be no assurance that the collection ratios may not decrease in future which will have an impact on the financial condition of the Issuer.

*\*For further details please refer to the details of Property Tax collection (Details of Property Tax Collection) of Section X: Financial Information on page 79 of this Placement Memorandum.*

**9. High Receivables**

The Issuer has high outstanding net receivables mainly on account of high outstanding receivable from Government which comprise of income from stamp duty share. The amount of Receivables from Government has increased from Rs. 233.06 crores in Financial Year 2018-2019 to Rs. 316.06 crores in Financial Year 2019-2020 as per the Audited Financial Statements. The net receivable of various property owners was Rs. 35.55 crores in Financial Year 2018-2019 and Rs. 36.38 crores in Financial Year 2019-2020 as per the Audited Financial Statements.

**10. Financial Risk**

The Issuer's ability to pay Coupon accrued on the Green Bonds and/or the principal amounts outstanding from time to time in connection therewith would be subject to various factors, including inter alia the Issuer's financial condition, profitability, revenue generation and general economic conditions prevailing in India and in the global financial markets. The Issuer is creating a structured payment mechanism through which the tax revenues and revenue grants (which are free from all charges) are being routed to ensure 100% (One Hundred percent) cover for the Green Bonds and interest accrued thereon and the Issuer has created sufficient security to cover the repayments of the Green Bonds.

**11. GNN may not be able to pay interest accrued on the Green Bonds and/ or the principal amount outstanding from time to time**

The potential investor may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the Green Bonds.

GNN's ability to pay interest accrued on the Green Bonds and/ or the principal amount outstanding from time to time in connection therewith would be subject to various factors, including inter-alia GNN's financial condition, profitability, revenue generation and the general economic conditions prevailing in India and in the global financial markets. GNN cannot assure that GNN would be able to repay the principal amount outstanding from time to time on the Green Bonds and/ or the interest accrued thereon in a timely manner, or at all. GNN will create an appropriate escrow account in favour of the Debenture Trustee for the Bondholders to ensure sufficient funds for repayment of principal and interest accrued thereon along with sufficient fixed assets to be pledged as security. The realizable value of the Green Bonds may be lower than the outstanding principal and/ or interest accrued thereon and consequently, the potential investor may not be able to recover on a timely basis or at all, the full value of the outstanding amounts and/ or the interest accrued thereon in connection with the Green Bonds.

**12. Impact of Covid-19 virus pandemic on the Issuer**

The rapid spread of Covid-19 virus throughout the country has had an adverse impact on the operations of the Issuer. The measures taken by the Government of India and Government of Uttar Pradesh including lockdown and curfew have impacted the day to day lives of people. The Covid-19 virus has negatively impacted the ability of the Issuer to carry out its various duties and administrative functions including, but not limited to, the collection of revenue from Property Tax, as many of the departments of the Issuer were occupied in combating the spread of the Covid-19 virus and also affected the Issuer in receipt of grants. Despite the challenges brought about by the Covid-19 virus, the Issuer has been issuing property tax bills on a regular basis during the lockdown including

through short messaging service alters, E-bills on mobile having links to pay online, for ensuring ease of payment by taxpayers. Due to lower revenue inflow collection at State Government level, the SFC from State government was irregular. The cash flows from Property Tax and SFC was approximately Rs. 46.38 crores in Q1 of Financial Year 2020-2021 as a consequence of the lockdown and similar measures for curbing the spread of Covid-19. Following the relaxations of such restrictions, there has been an increase in cash flows from Property Tax and SFC to approximately Rs. 87.69 crores in Q2 of Financial Year 2020-2021 which can be attributed to the progressive relaxations of the restrictions and release of SFC grants.

The full extent of the negative financial impact cannot be reasonably estimated at this time but a sustained economic slowdown may significantly affect the financial condition, cashflows and operations of the Issuer for the coming financial years, with a major impact on the financials of FY 2020-21. This impact may further depend on future developments, which are highly uncertain and cannot be predicted, including new information which may concern the severity of the Covid-19 virus and the actions to contain the Covid-19 virus or treat its impact.

### **Business Risk**

#### **13. We are involved in large number of litigations & adverse decisions in the same may impact our working and operational efficiency**

The Issuer is a party to various legal proceedings and has received notices from certain statutory authorities. These legal proceedings are pending at different levels of adjudication before various courts, tribunals, statutory and regulatory authorities, and if determined against the Issuer, could have an adverse impact on the business, implementation of projects, income and the financial condition of the Issuer. No assurances can be given as to whether these legal proceedings will be decided in the Issuer's favour or have no adverse outcome, nor can any assurance be given that no further liability/ loss will arise out of any claims/ final outcome. The details of material litigations, a total of 30 matters pending at various forums which are based on the Materiality Policy of the issuer involving the Issuer are set out in (*Pending Litigations and Material Developments*) of *Section XI Legal and Other Information* on page 92 of this Placement Memorandum.

Further, OA No. 648/2019 in the matter of *Hindon River Resorts v. Ghaziabad Development Authority, Nagar Nigam Ghaziabad & Others* before the National Green Tribunal, Principal Bench, New Delhi, regarding irregular functioning of STPs maintained by Nagar Nigam Ghaziabad, the Principal Bench vide order dated 17.02.2021 has disposed off said Original Application. Under the said order, UP Jal Nigam or GNN have to furnish a performance report and in case of confusion regarding which department will furnish the guarantee, UPSIDC will resolve the same. However, if GNN is not able to comply with it in time, it could result in adverse outcome, thereby impacting the financial conditions of the Issuer.

A majority of the documents in respect of the aforementioned proceedings are in vernacular language and accurate translations are not available for all of them and hence, may not cover the full description of such proceedings.

#### **14. Dependency on Information Technology**

The Issuer's operations are dependent on information technology. The Issuer has undertaken various reforms towards digitisation of payment of Property Tax and other services. A failure, inadequacy or security breach in the information technology and telecommunication systems or an inability to adapt to rapid technological changes may adversely affect the Issuer's business, timely collection of taxes and the Issuer's financial condition.

The Issuer's ability to maintain and upgrade its information technology systems and infrastructure on a timely and cost-effective basis, including the ability to process a large number of transactions on a daily basis may have an impact on the Issuer's business. The Issuer's operations also rely on the secure processing, storage and transmission of confidential and other information in its computer systems and networks. The Issuer's financial, accounting or other data processing systems, real-time property tax collection data and its website are hosted on the cloud or at data centers. The Issuer has engaged various private sectors entities for enabling the digitalization. If any of these entities is unable to meet the desired objectives these services may fail to operate adequately or become disabled as a result of events that may be beyond the Issuer's control, including a disruption of electrical or communications services. Further, the computer systems, software and networks may be vulnerable to unauthorised access, computer viruses or other attacks that may compromise data integrity and security and result in information or identity theft.

**15. Changes in interest rates may affect the price of the Green Bonds.**

The secondary market pricing of the Green Bonds is subject to factors affecting the general economic condition in India and in the domestic and global financial markets. All securities where a fixed rate of interest is offered, such as the Green Bonds, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e., when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon rate, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest which frequently accompany inflation and/ or a growing economy, are likely to have a negative effect on the price of the Green Bonds. Thus, the investor may face volatility in the price of the green bond issued due to above mentioned factors.

**16. There is no guarantee that the Green Bonds issued pursuant to this Issue will be listed on the stock exchanges in a timely manner, or at all.**

In accordance with Applicable law and practice, permissions for listing and trading of the Green Bonds issued pursuant to this Issue will not be granted until after the Green Bonds have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Green Bonds to be submitted. Though the Corporation shall do all necessary actions for listing of the green bond in timely manner, there could be a failure or delay in listing the Green Bonds on the stock exchange.

**17. There may be a delay in making refunds to applicants**

The Issuer cannot assure that the monies refundable to applicants on account of (a) withdrawal applications, (b) withdrawal of the Issue, or (c) failure to obtain the final approval from the exchanges for listing of Green Bonds, (d) non-allotment due to technical rejections or over subscriptions will be refunded to the applicants in a timely manner.

**18. Reliance on third-party intermediaries**

The Issuer while undertaking various projects relies on third-party intermediaries, contractors and service providers who may not perform their obligations satisfactorily or in compliance with Applicable Laws.

The Issuer enters into outsourcing arrangements/ contracts with civil contractors for undertaking various civil contracts and with third party vendors for providing various services. The Issuer also intends to float a tender inviting bids for development of the proposed Eligible Green Project for which the funds are been raised through the proposed Issue. Any failure by the contractors or service providers to provide a specified service, develop the Project and maintaining it or a breach in security/ confidentiality or non-compliance with legal and regulatory requirements may result in financial loss, loss of reputation, delay in the Project and have an adverse impact on the financial condition of the Issuer.

**19. GNN Policy Focus**

Periodic elections and/ or rotation of the Commissioner and other officers can result in changes in policy focus for the municipal corporation, which can affect the distribution of resources devoted to both operating services and capital projects. Such changes in policy focus might affect the relative priority of capital expenditures for the Project.

The Green Bonds are secured and the payment of interest and principal to the Green Bond Holders are backed by a Structured Payment Mechanism. For further information, please refer to details of the Security on page 112 of this PPM and for details on Structured Payment Mechanism please refer page 112 (*Summary Term Sheet*) and Annexure - I on page A1 of this PPM.

**20. Labour Related Risks**

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for discharge of employees and dispute resolution and imposes financial obligations on employers upon employee layoffs. As a result of such stringent labour regulations, it is difficult for the Issuer to maintain flexible human resource policies, discharge employees or downsize, which may adversely affect our business, financial condition and results of operations. Additionally, some of the Issuer's employees are part of certain industry labour unions and such unions could result in labour unrest. Strikes or work stoppages or any mishaps/ accidents impacting the labour in future could have an adverse impact on the Issuer's operations. Recently, the Government of India has enacted (i) Code on Wages, 2019 (ii) Industrial Relations Code, 2020 (iii) Code on Occupational Safety, Health & Working Conditions Code, 2020 (iv) Code on Social Security, 2020 which has replaced 29 existing labour laws with the objective to simplify and modernize labour regulations.

The Issuer, from time to time, for certain activities, appoints independent contractors who in turn may engage on-site contract labour for performance of certain activities. The spread of the Covid-19 virus and the measures taken by the Government of India and Government of Uttar Pradesh including lockdown and curfew have had a negative impact on the movement and activities of contract labour. This has had a negative impact on the activities of execution agencies such as civil contractors and other vendors that have been engaged by the Issuer. Further, the Issuer may be held responsible for any payment of wages/ compensate for any accidents or losses relating to such contracted labourers in

certain cases even though such labourers are not directly engaged by the Issuer. Such an event may have an adverse impact on the Issuer's financial position and operations.

**21. The Issuer has not procured any insurance coverage for labourers for any contingency, which may adversely affect the Issuer's business, results of operations and financial condition**

The Issuer has not taken any insurance policy to safeguard or protect the Issuer's labourers from any illness or injuries that may occur in the course of their employment. If any such incidents or accidents happen and the labourers are affected, the Issuer may have to pay compensations for the same and it may result into interruption or increase in our labour costs. If the Issuer is held liable for large uninsured losses or amounts in this respect, the Issuer's business, results of operations and financial condition may be materially and adversely affected.

**22. Dependence on Grants**

The projects undertaken by the Issuer are very capital intensive and any reduction in budgetary allocation of capital, funding or non-receipt of grants by the GoI and GoUP may materially affect the Issuer's performance and asset generation capacity. Since grants from State Finance Corporation are one of the main sources of revenue for the Issuer, any irregularity in release of grants may affect the project implementation schedules and affect the financial condition of the Issuer. For details of grants received from the State Government please refer to Section VI: *About the Issuer and Capital Structure of the Issuer* on Page No. 37. Further, the growth plans of the Issuer are mainly determined by the amount of grants and support in the form of budgetary allocations and any adverse developments in the policy of the government in the manner in which it seeks to address the development of the infrastructure needs of India will have a material and adverse effect on the Issuer's operations. Moreover, if the funding from grants decreases or if there is any adverse change in the pattern of allocation of the tax collected by GoI or if there is a downturn in the macroeconomic environment in India or in the sectors which are directly dependent on the infrastructure projects that the Issuer undertakes/ proposes to undertake, the Issuer's operations and future performance could be materially and adversely affected.

**23. The Issuer has certain contingent liabilities, the materialisation of which may adversely affect the Issuer's financial condition.**

The Issuer, in the ordinary course of its business, is involved in various claims, suits, investigations, and legal proceedings that arise from time to time. Although the Issuer does not expect that the outcome in any of these legal proceedings, individually or collectively, will have a material adverse effect on the Issuer's financial position or results of operations, yet litigation is inherently unpredictable. Therefore, the Issuer could incur judgments or enter into settlements of claims that could adversely affect the Issuer's operating results or cash flows in a particular period. As on the date of this Placement Memorandum, there are a number of ongoing civil and consumer claims against the Issuer and for which no provision for contingent liabilities has been recognized in the Issuer's financial statements. The outcomes of these cases are remote and the financial implications are not ascertainable. In the event that any of these contingent liabilities materialise, the Issuer's financial condition may be adversely affected. For details of non-payment of statutory dues of the Issuer, please refer to paragraph G (*Details of non-*

payment of statutory dues, if any) of Section XI: Legal and Other Information on page 92 of this Placement Memorandum.

**24. Leakage of tax collection may affect volume of collections and inflows which may in turn affect the grants the Issuer receives from GoI/ GoUP and accumulation of funds for future development, and hence the Issuer's future execution capabilities and revenue collections**

The tax collections are primarily dependent on the integrity of tax/ charges collection systems and any leakage in the same due to fraud or technical faults affects the Issuer's collections and inflows and may affect grants which the Issuer receives from the GoI/ GoUP and accumulation of funds for future development, resulting in reduction of the Issuer's future execution capabilities.

If the tax collection is not properly monitored, such tax leakages may reduce the Issuer's revenue. Although the Issuer has systems in place to minimise leakages due to fraud and pilfering, yet any significant failure by the Issuer to control leakage in the collection systems, though not quantifiable monetarily, could have a material adverse effect on the Issuer's operations and prospects. Further, any leakage in the collections resulting in avoidance of payment of taxes/ charges, may also adversely affect the Issuer's operations. Further, there may be situations where the tax/ charges collection is disrupted or halted due to public agitation which may result in lesser revenue collection by the Issuer. Any such disruption or stoppage of tax/ charges collection will adversely affect the Issuer's revenue collections.

**25. We do not have our access to records and documents pertaining to our constitution**

We are unable to trace certain documents and records pertaining to our constitution such as the constitution document of the Issuer under the Uttar Pradesh Municipal Corporations Act, 1959 and the notification no.2671-F/09-07-1994 dated August 26, 1994 issued by the governor of GoUP. Despite conducting an internal search, we have been unable to locate a copy of the said notification. However, the detail of the said notification under which the Issuer was incorporated has been referred in subsequent letter dated September 01, 1994 issued by Secretary, Nagar Nigam Department, Uttar Pradesh Government. Further, a certificate from the Additional Chief secretary, Urban Development Department, GoUP, has been obtained confirming that the Issuer is validly constituted vide the notification no.2671-F/09-07-1994 dated August 26, 1994. Reliance has been placed on the above letter for our constitution details and disclosures with regards to the same.

**26. Real Estate Market Scenario**

The Issuer is undertaking projects of Auditorium and Commercial Complex which are expected to add income sources for the Issuer. However, the Issuer will have exposure to the real estate sector and any negative events affecting this sector could affect the additional sources of Issuer's business and financial condition. In the event the real estate sector is adversely affected due to a decline of demand for real estate properties, changes in regulations or other trends or events, which negatively impact the real estate sector, the value of Issuer's collaterals may diminish which may affect the Issuer's business. Among the various regulatory developments that have impacted the real estate sector recently, the implementation of the Real Estate (Regulation and Development) Act, 2016, as amended ("RERA Act") is expected to have the biggest impact over the long term. After notification of certain sections of the RERA Act with effect from May 2016, the full provisions of the RERA Act became effective from May 2017 onwards. Subsequent to this, the obligations of real estate project developers under the provisions of the RERA

Act, including mandatory project registration, enhanced disclosure norms and penal provisions for violation of rules have become effective across India. While most of the state governments have notified rules in relation to the RERA Act, other states are in the process of doing so. These developments could adversely affect the expected revenue from these projects and the financial condition.

## **EXTERNAL RISK FACTORS**

### **General Risk**

#### **27. Political Scenario**

Periodic elections and/ or rotation of the officers might pose a risk to the business of the Issuer since a change in the government might shift the policy focus for the municipal corporation which will impact the ongoing activities of the Issuer. Such changes in policy focus might affect the relative priority of capital expenditures for the Project and other projects undertaken by the Issuer. The payment of interest and principal to the Green Bond Holders are backed by a Structured Payment Mechanism. For further details, please refer to Structured Payment Mechanism on page 112 (*Summary Term Sheet*) and Annexure - I on page A1 of this PPM.

#### **28. Government Policies**

The Issuer's operations are dependent on the policies of the government, central as well as state initiatives. Any changes in government policies detrimental to the Issuer may affect the collection of revenue of the Issuer and may also affect the management of the expenditure of the Issuer. Any lack of support in terms of regulatory initiatives will adversely affect the Issuer's operations, as will any delayed response in policy alteration or other regulatory impediments, which will adversely affect the Issuer's operations. Additionally, policies of central and state government which mandate urban local bodies to focus on development in certain specific sectors or areas will affect the Issuer's projects and operations.

#### **29. Material changes in regulations to which the Issuer is subject could impair the Issuer's ability to meet payment or other obligations**

The Issuer is subject generally to changes in Indian laws, as well as to changes in government regulations and policies and accounting principles. Any changes in the regulatory framework could adversely affect the profitability of the Issuer or its future financial performance, by requiring a restructuring of its activities, increasing costs or otherwise.

#### **30. Legality of purchase**

Potential investors of the Green Bonds will be responsible for the lawfulness of the acquisition of the Green Bonds, whether under the laws of the jurisdiction of its incorporation or the jurisdiction in which it operates or for compliance by that potential investor with any law, regulation or regulatory policy applicable to it.

#### **31. The secondary market for the Green Bonds may be less liquid**

The Green Bonds may be less liquid, and no secondary market may develop in respect thereof. Even if there is a secondary market for the Green Bonds, it is not likely to provide significant liquidity. Potential investors may have to hold the Green Bond until redemption to realise any value.

**32. Tax considerations and Legal considerations**

Special tax considerations and legal considerations may apply to certain types of investors. Potential investors are urged to consult with their own financial, legal, tax and other professional advisors to determine any financial, legal, tax and other implications of this investment.

**33. Accounting considerations**

Special accounting considerations may apply to certain types of taxpayers. Potential investors are urged to consult with their own accounting advisors to determine implications of this investment.

**34. External factors like natural calamities, pandemics, protest, riots, terrorism etc. may affect our operation and may delay the implementation of proposed Eligible Green Project.**

Any occurrence of natural calamities like storm, flash floods, any instance of pandemics, protest, riots etc. could hamper the transportation facilities, impact mobility and functioning of the city and hence the implementation of proposed Eligible Green Project. Such conditions may result in hampering the functioning of GNN due to additional cost burden for retrieving the city back to normalcy. We are scaling up our internal systems to take care of any such sudden events, in case they occur in future.

Ghaziabad has not been subject to any major incidents of terrorism attacks in the last 10 years. However, a possibility cannot be ruled out as the city is house to several key defense installations and huge presence of Industries / MNCs. There have been arrests of some probable terrorists around the city limits in the past on account of proximity to the highly sensitive area of the NCT.

**35. Decentralization with respect to Municipal Corporations**

GNN has legislative and administrative control over its operating revenues, expenditures and capital plans, as permitted under the relevant Act. Nevertheless, changes in State and Central Government revenue sources and regulatory frameworks could have an effect on the credit profile of GNN (positive and negative), should those changes result in devolution of power, of revenues or of spending mandates.

Further, the Issuer also receives grants from the state and the central government and changes in the grants from state and central government, their revenue sources and regulatory frameworks could have an effect on the credit profile of the Issuer.

Additionally, being a government organization, GNN is subject to regulations by Indian governmental authorities. There may be future changes in the regulatory system or in the enforcement of the laws and regulations that could adversely affect GNN.

**36. Oversubscription of the Issue**

In case of oversubscription of the Issue the allotments will be made to the applicants on yield-time priority/ pro-rata basis in line with the SEBI Electronic Book Mechanism Guidelines. The allotment to the investors shall be done first on "yield priority" basis, however, where two or more bids are at the same yield, then the allotment shall be done on "time-priority" basis. Further, if two or more bids have the same yield and time, then allotment shall be done on "pro-rata" basis. Accordingly, investors may not receive

allotment to the full extent of their application size. Please refer to paragraph I(e) (Basis of Allotment) of Section IX(*Issue Specific Information*) on page 60 of this Placement Memorandum.

**37. The Issue may not be fully subscribed to by potential investors**

In case the Issue is not fully subscribed to by potential investors, the Issuer shall be unable to meet the funding requirements of the Eligible Project from the proceeds of the Issue to the full extent. The Issuer shall be required to raise additional funds to meet the shortfall in funding the Eligible Green Project through other sources which may lead to a delay in the completion of the Eligible Green Project. The funding gap may develop due to such shortfall in full subscription to the Issue, in which case it could pose a contingent budgetary risk for the Issuer or result in the Issuer utilising its internal accruals or a request to Go UP for additional borrowings for completion of these Eligible Green Project. Please refer to paragraph J (Capital structure relating to projects for which funds are proposed to be mobilised) of Section VI(*About the Issuer and Capital Structure of the Issuer*) on page 37 of this Placement Memorandum.

**SECTION-VII**  
**OBJECTS OF THE ISSUE**

**A. Details of the proposed project for which funds are being raised**

The Issuer is a municipal corporation validly constituted on August 26,1994 under Article 243Q (1)(c) of the Constitution of India, 1949 and in terms of the provisions of Uttar Pradesh Municipal Corporations Act, 1959 vide notification dated August 26,1994 bearing the reference number 2671-F/09-07-1994. The Government of Uttar Pradesh vide its order G.O. No. 5008/9-5-2018-167S/2018 of Municipal Administration Department dated December18, 2018 approved to raise bonds for the Project and all related activities.

Ghaziabad Nagar Nigam proposes to undertake the project for setting up a Tertiary Sewage Treatment Plant ("TSTP") to further treat secondary-treated sewage water. The project involves executing TSTP for supplying bulk industrial grade water by tertiary treatment of sewage from the Indirapuram STP to produce and supply Industrial Grade water to the neighboring industrial estate of Sahibabad Industrial area. This project would enable GNN to reduce pressure on ground water resources in the city and free up the supply of potable water to Sahibabad industrial area.

The Issuer has entered into a Memorandum of Understanding ("MoU") dated February 17, 2021 with Sahibabad Industries Association ("SIA") for the purpose of achieving various goals and objectives relating to the water supply to all the industrial units of the Second Party for their industrial use.

**Key terms of the MoU include the following as agreed between the parties:**

1. Setting up a Sewage Treatment Plant (STP) with the capacity of 40 Million Litres a Day (MLD) for industrial use by the industrial units which are members of the SIA, by raising funds through bonds as per the provisions of Securities and Exchange Board of India (Issue and Listing of Municipal Debt Securities) Regulations, 2015.
2. Issuer has agreed to supply industrial usable water to all the industrial units coming under the local jurisdiction of the SIA by setting up the aforementioned new STP.
3. Issuer and SIA have agreed that the expenditure to be incurred for setting up the STP will be recovered by collection of water charges.
4. Issuer and SIA have agreed to install meters in all the industrial units for collection of water charges and the rates of such water charges will be decided on mutually agreed terms.
5. Terms of pricing of the water charges.

The Eligible Green Project is of a revenue generating nature and is expected to yield revenues after 30 months from the project work start date.

**B. Brief details of the decision-making process that the issuer has followed for determining the eligibility of the project for which the proceeds are being raised through issuance of Green Bonds**

Process followed for determining how the project fits within the eligible green projects category, and the criteria making the project eligible for using the Green Bonds proceeds:

The proposed project involves setting up a Tertiary Treatment Plant to further treat secondary-treated sewage water. The project involves executing TSTP for supplying bulk

industrial grade water by tertiary treatment of sewage from the Indirapuram STP to produce and supply Industrial Grade water to the neighboring Indirapuram STP to produce and supply Industrial Grade water to the neighboring industrial estate of Sahibabad Industrial area. This project would enable GNN to reduce pressure on ground water resources in the city and free up the supply of potable water to Sahibabad industrial area.

Uttar Pradesh Pollution Control Board vide letter dated February 17, 2021 has certified the Project as appropriately covered under sub-clause (f) of Clause 2.1 of SEBI Circular on Disclosure Requirements for Issuance and Listing of Green Debt Securities issued via CIR/IMD/DF/51/2017 dated May 30, 2017 i.e., "Sustainable waste management including recycling, waste to energy, efficient disposal of wastage etc. Hence this Project is fit to be qualified as eligible green projects as per categories suggested in the said circular for issue of green debt securities ("**Eligible Green Project**").

Accordingly, the Bond Issue Committee while making note that the project for which the proceeds are been raised through issuance of Debenture is fit to be qualified as eligible green project as per categories suggested in relevant circular for issue of green debt securities, vide its resolution dated February 11, 2021 approved the issue of Green Bonds.

**C. Details of the project where the issuer proposes to utilise the proceeds of the issue of Green Bonds**

**(i) Broad Project Rationale and environmental sustainability objectives of the proposed issue of Green Bonds**

The board project rationale and environmental sustainability objectives of the proposed Project as per the detailed project report issued by M/s Greens Designs and Engineering Services Private Limited are follows:

1. Water is an important source for sustainability and one of the parameters that helped create, nourish and sustain life on earth. The recent trends in population rise and industrialization has led to the increase in the demand of fresh water. With the increase in the demand of water, there is depletion in the availability of water sources. The gap between the water supply-demand is increasing daily. Moreover, the natural water sources are in the verge of getting exhausted. Water has become a critical strategic issue. Envisaging the future needs for fresh water, the need of the hour is to search for novel sources of water so that the increasing water demands can be dealt with.
2. The Sewage Treatment Plants in proposed project area of Ghaziabad city under the jurisdiction of Ghaziabad Nagar Nigam consist of Indirapuram Sewage Treatment Plant of 56 MLD. There exists comprehensive sewerage system in the city, whereby the sewage is collected and treated and ultimately discharged into a water sink (River Hindon or Natural Creeks). Around 112 MLD sewerage has been anticipated to be collected and treated. The current practice is to treat the sewage up to secondary grade with a few plants designed for BNR (Biological Nutrient Removal).
3. Considering the gravity of issue of fresh water availability, it is proposed to analyze the availability of treated sewage and identify the industries/industrial areas that are water intensive.

4. Based on the location of industries around Ghaziabad city and location of Sewage Treatment Plant, the complete area has been zoned in to an Industrial area viz. Sahibabad Industrial Area.

With the Recycling / Reuse of wastewater from the Indirapuram STP, it will be able to meet the industrial grade water requirements. This will result in the reduction in potable water requirement for industrial purpose and protection of the environment of the surrounding area.

#### ***Project Benefit Assessment***

- ✓ It reduces diversion of drinking water for non-potable purposes in the long term.
- ✓ It reduces dependence of Pandesara Industrial Units on unauthorized bore-wells and private tanker operators.
- ✓ It facilitates recycling of wastewater, an environmentally sound and progressive practice.
- ✓ It protects the current revenues of GNN from sale of water for industrial purpose in the short term.
- ✓ It assures more stability in level of water supply to industrial units by providing supplementary source of water in addition to drinking water.
- ✓ It offers opportunity to private sector to contribute to invest in infrastructure sector within a regulated frame-work.

#### **(ii) Project Institution Frame Work**

- a. *Design & Preparation of Detailed Project Report (DPR)* : The design of the project & preparation of DPR were carried out by private consultant appointed by the Issuer, i.e. M/s Greens Designs and Engineering Services Private Limited., who are an expert in this filed. The details have been mentioned in the Detailed Project Report(DPR).
- b. *Implementing Agency*: The Issuer will be responsible for implementation of the proposed project. The Issuer will be executing the project through third party execution agencies such as civil contractors and other vendors. For details about the Issuer, including the capital structure of the Implementing Agency, please refer Section VI (*About the Issuer and Capital Structure of the Issuer*) at page 37 of this Placement Memorandum.
- c. *Construction of Tertiary Sewage Treatment Plant*: Construction of the project will be carried out by qualified contracting agencies by inviting open tenders. The Issuer will float tenders on turnkey basis. The same agency/ contractor will also carry out *O & M services for the period stated in the tender document*.

#### **Location of the Proposed Project**

The Sewage Treatment Plant is in proposed project area of Ghaziabad City under the jurisdiction of Ghaziabad Nagar Nigam. The land required for the construction of TSTP is kept under reservations under various town planning schemes and development plan.

Ghaziabad Nagar Nigam owns the land for the execution purposes. Since the project consists of construction of TSTP and augmentation of existing STP, it will be executed on the existing land and no additional land is required for the project.

- (c) into the Sinking Fund Account on the occurrence of a Sinking Fund Mismatch.

**Replenishment of Required DSRA Amount as well as funding of shortfall in the sinking fund account (at the time of principal repayment) in terms of the Tripartite Agreement provided by the GoUP**

In terms of the Governmental Order, the GoUP has created a policy for utilisation of the funds in the Infrastructure Development Fund for credit enhancement and other needs of local bodies to promote/ incentivise issuance of municipal bonds. One of the terms of the Governmental Order requires the opening of an escrow account, sinking fund account, interest payment account and debt service reserve account by the urban local bodies issuing municipal bonds. As stated above, the Interest Payment Account is a combination of two accounts as required under the Governmental Order, being the interest payment account and the debt service reserve account. Accordingly, the Interest Payment Account will be the account from which the interest payments on the Debentures will be serviced and the account in which the Required DSRA Amount will be maintained.

Pursuant to the Governmental Order, the Issuer has approached the GoUP for entering into the Tripartite Agreement with the Debenture Trustee and the Issuer in respect of the Debentures, for agreeing and covenanting to make payment of funds from the Infrastructure Development Fund in terms of such agreement:

- (a) into the Interest Payment Account for creation of the upfront Required DSRA Amount;
- (b) into the Interest Payment Account on the occurrence of a DSRA Amount Shortfall; and
- (c) into the Sinking Fund Account on the occurrence of a Sinking Fund Mismatch.

The GoUP shall make payment of such amounts as may be required to make good any DSRA Amount Shortfall. In case the DSRA Amount lying in the Interest Payment Account is utilized to fund the shortfall in Interest Payment Account at the time of the Coupon payment, the GoUP shall

remit the funds (to the extent that the DSRA Amount utilized to fund the shortfall in the Interest Payment Account for meeting the Coupon payment on such Coupon Payment Date) to replenish the Required DSRA Amount, in terms of the Tripartite Agreement, as per the 'Interest Payment Mechanism' as mentioned below.

Further, the GoUP shall make payment of such amounts as may be required to make good any Sinking Fund Mismatch. In case of shortfall in the Sinking Fund Account at the time of principal repayment, the GoUP shall remit the funds to fund the shortfall in the Sinking Fund Account, in terms of the undertaking provided by the GoUP, as per the 'Principal Repayment (Sinking Fund) Mechanism' as mentioned below.

### **Interest Payment Mechanism**

The Debenture Trustee shall check the amount lying to the credit of Interest Payment Account (which is over and above the Required DSRA Amount) at 25 (Twenty Five) days prior to the Coupon Payment Date (T-25 days). In case of any shortfall in the amount required to make payment of Coupon on the Coupon Payment Date in the Interest Payment Account (calculated on the basis of the amounts available in addition to the Required DSRA Amount), the Debenture Trustee shall intimate the Issuer of the shortfall and the Issuer shall make good the shortfall in the Interest Payment Account prior to the date falling 10 (Ten) days prior to the Coupon Payment Date (T-10 days). In case of shortfall in the amount required to make payment of Coupon on the Coupon Payment Date in the Interest Payment Account (calculated on the basis of the amounts available in addition to the Required DSRA Amount) at 9 (Nine) days prior to the Coupon Payment Date (T-9 days), the Debenture Trustee shall trigger the payment mechanism and shall instruct the Bank to utilise the DSRA Amount to the extent of the shortfall in the amount required to make payment of the Coupon on the Coupon Payment Date on or prior to the date falling 8 (Eight) days prior to the Interest Payment Date (T-8 days). The Coupon shall be paid by the Issuer on the Coupon Payment Date (T).

In case the DSRA Amount (or part thereof) is utilized to fund the shortfall in the amount required to make payment of the Coupon in respect of any Coupon Payment Date, immediately after the Debenture Trustee has instructed the Bank to utilise the DSRA Amount as above and in any event prior to 7 (Seven) days prior to the relevant Coupon Payment Date (T-7), the Debenture Trustee would issue a notice in writing to the Issuer (and the GoUP shall be informed of the same, by the Debenture Trustee marking a copy of such notice to the GoUP). On the issuance of such notice, the Issuer shall make good the DSRA Amount Shortfall prior to the date falling on the relevant Coupon Payment Date (T). In the event that the shortfall is not made good by the Issuer on the relevant Coupon Payment Date (T), the Debenture Trustee shall issue a notice to the Issuer (and GoUP shall be informed by marking a copy to GoUP) on the date immediately succeeding the relevant Coupon Payment Date (T+1). On issuance of such notice, the GoUP shall remit funds required to replenish the Required DSRA Amount (such that the amount in the Interest Payment Account (calculated on the basis of the amounts available in addition to the Minimum Balance) is at least equivalent to the Required DSRA Amount) within 15 (Fifteen) days from the relevant Coupon Payment Date (T+15) by depositing such amounts in to the Interest Payment Account. Further, such notice(s) would continue to get served if required, as per the same timelines for subsequent and future servicings. If any overdues on account of past servicings from the DSRA Amount continues to remain and the Required DSRA Amount continues to remain un-replenished, then such overdue amount would be added in the subsequent notice.

In any of the milestone days mentioned in the T-Structure above happens to not be a Business Day, the immediately preceding Business Day would be the deemed date for execution of the relevant action.

The Rating is based on Credit Enhancement (CE) in the form of Infrastructure development fund made available to the ULBs as per Uttar Pradesh Government Order (GoUP) with T-Structure.

Unsupported (Standalone) rating as assessed by BWR without considering the Credit Enhancement is BWR A+ (Stable) which takes into account the DSRA, Structured payment mechanism.

The provisional rating is subject to completion and submission of the executed transaction documents in line with the indicative term sheet.

**RATING ACTION / OUTLOOK**

The rating has, inter alia, factored availability of Infrastructure Development Fund provided by Government of Uttar Pradesh, structured payment mechanism, maintenance of four half-yearly coupon payments in Interest Payment Account towards DSRA, Ghaziabad being one of the prominent cities of Uttar Pradesh, proximity to Delhi/NCR region, comfortable municipal fund position of GNN with year on year generation of net cash surplus and improvement in the collection efficiency in H1FY21.

The rating is further strengthened by a comfortable financial profile with zero debt as on FY20, improved debt coverage indicators with healthy generation of cash accruals of Rs. 133.34 Crs in FY20 and Grants, Contribution and Subsidies of Rs. 250.87 Crs received from Uttar Pradesh Government in FY20.

The rating is however constrained by the high tax receivables (increasing Y-o-Y basis), which is largely comprising arrears from earlier years and implementation risk associated with the ongoing projects being implemented under various schemes. Further, overall GNN budget shows a revenue deficit for the budget estimates of 2020-21 (-Rs. 134.94 Crs) and low net surplus for the 2019-20 actuals (Rs.4.74 Crs).

Outlook for the corporation, remains Stable, considering the structured payment mechanism for servicing of bond dues along with the support from the Infrastructure Development Fund, stable revenue generation from tax revenues, assigned revenues and compensations and revenues grants, contribution and subsidies, steady progress in ongoing capital expenditure plans and generation of adequate net surplus.

#### **KEY RATING DRIVERS**

##### **Credit Strengths:**

**Strategic importance of the city:** Ghaziabad is one of the largest cities of the state of Uttar Pradesh (UP) and is also a major industrial hub of UP. It is the 2<sup>nd</sup> largest industrial city of UP after Kanpur. Further, being part of the National Capital Region (NCR), it has potential for economic growth. Demand for affordable housing and presence of quality education institutions have added to the allure of Ghaziabad as a preferred residential destination in the NCR region.

**Credit enhancement:** The proposed NCD issue of Rs.150 Crores derives credit enhancement from the availability of Infrastructure Development Fund made available to ULBs for servicing of the NCDs by way of a tripartite Agreement by the UP Government, incentive from GoI for ULBs under AMRUT which issue bonds, structured payment mechanism, escrow account for the cash flow from the revenue grants (which are free from all charges) and tax revenues (property tax) collected monthly and upfront DSRA in the Interest Payment Account for interest obligations for four half yearly coupon payments.

**Improvement in the collection efficiency:** GNN has reported improvement in collection of property taxes from Rs. 100.85 Crs in FY18 to Rs. 128.38 Crs in FY20 with collection ratio to total collection of 77.92%. Further, the collection ratio has improved to 85.60% for H1FY21.

**No external debt:** GNN has no outstanding external debt as on 31st March, 2020. This provides solvency comfort to the corporation.

##### **Credit Risks:**

**Increasing receivables position:**

GNN has reported 29.56% increase in receivables position as on FY20 to Rs. 365.11 Crs as compared to Rs. 281.79 Crs as on FY19, which is primarily from arrears of previous years and government receivables and remains a major concern for the corporation.

**High dependence on revenue Grants:** Majority of the revenue collection comes from revenue grants (52% of the total revenues) followed by Property tax (23% of the total revenues).

**Project implementation in a timely manner:**

Currently GNN is implementing various projects worth of Rs.344.63 Crs under various schemes such as JNNURM, AMRUT and others. Timely implementation of these projects and other projects under various schemes remain important for the corporation. However most of these projects are on the verge of completion and are likely to be completed within 6 months.

**ANALYTICAL APPROACH AND APPLICABLE RATING CRITERIA**

For arriving at its ratings, BWR has applied its rating methodology as detailed in the Rating Criteria detailed below (hyperlinks provided at the end of this rationale). BWR has taken a view on the unsupported rating on the basis of the operational and financial performance of the corporation while arriving at a rating, supported with structured payment mechanisms of its cash flows, to meet the interest and principal obligations of the Bonds. Further credit enhancement is derived for the CE rating from the availability of the Infrastructure Development Fund for replenishment of DSRA and sinking fund account.

**RATING SENSITIVITIES**

Going forward, improvement in tax collection, collection efficiency, ensuring adequate timely availability of cash flows from the structured payment mechanism and the Infrastructure Development Fund continued support from the State Government, timely implementation of ongoing projects and reduction in receivables would be key rating sensitivities.

**Positive:** The Outlook may be revised to "Positive" if revenue levels and collection efficiency improves through various measures and ongoing projects are implemented as scheduled resulting in improvement in service line parameters, which are in turn expected to generate higher revenues and cash accruals.

**Negative:** The Outlook may be revised to "Negative", if the corporation fails to implement the ongoing projects on a timely manner, reduces receivables and generates lower than estimated revenues/net surplus or there are delays observed in the transfer of funds as proposed under the structured payment mechanism.

### LIQUIDITY POSITION

The Liquidity of the corporation remains strong with cash surplus of Rs. 133.34 Crs and net surplus of Rs. 98.81 Crs generated during FY20. GNN has no outstanding debt as on date. The cash and cash equivalents as on FY20 were at Rs.315.26 Crs. Further debt servicing for the proposed bonds is supported by structured payment mechanism and utilization of Infrastructure development fund provided by Government of Uttar Pradesh and incentive available from GoI for ULBs issuing bonds.

### Draft terms of the proposed Municipal Bonds/NCDs:

The tenor of the proposed NCD/bonds will be 10 years, and the redemption starts from the expiry of fourth year from the Deemed Date of Allotment, in seven STRPPs. GNN has to create an interest payment account and sinking fund. Additionally, an escrow account will be created, and the cash flows received from revenue grants (which are free from all charges) and tax revenues (property tax) will be transferred to this escrow account.

GNN has to create an Escrow Account, Interest Payment Account (including the required DSRA amount) and the sinking fund (or Debenture Redemption Reserve – DRR). Escrow accounts will receive all the cash flows from the revenue grants (which are free from all charges) and tax revenues (property tax) will be transferred to this escrow account on a daily basis.

- **Infrastructure Development Fund (IDF):** The replenishment of the required DSRA, as well as, funding of the shortfall in the sinking fund account (created for principal repayment) in terms of the tripartite agreement to be executed amongst the Government of Uttar Pradesh (the GoUP/State Government), the debenture trustee and the GNN. The GoUP has issued an GO (Governmental Order) dated 30 July 2019, wherein they have created a policy for the utilisation of the funds in the infrastructure development fund for credit enhancement and other needs of local bodies to promote/incentivise the issuance of municipal bonds. Pursuant to the government order, the issuer has approached the GoUP for entering a tripartite agreement with the debenture trustee and issuer (Tripartite Agreement) in respect of the debentures, for agreeing and covenanting to make the payment of funds from the infrastructure development fund in terms of such agreement
  - into the interest payment account for the creation of the upfront required DSRA,
  - into the interest payment account on the occurrence of a DSRA shortfall and
  - into the sinking fund account on the occurrence of a sinking fund mismatch.
- **Government of India (GoI) Incentive:** The GNN is expected to receive an incentive from the Government of India. The AMRUT incentive, as and when received by the issuer, shall be deposited in the escrow account. Within five days of the receipt of the AMRUT Incentive in the escrow account, the issuer shall utilise such amounts to

create fixed deposits with any scheduled commercial bank with a dual rating of AA+ or above. However, the conditions of the fixed deposits shall not restrict premature withdrawal from the fixed deposit. A lien shall be created in the favour of the debenture trustee over such fixed deposits throughout the tenor of the debentures. Interest amounts earned on such fixed deposits shall be utilisable by the issuer, in accordance with the terms set out in the transaction documents.

● **Interest Payment Account:**

- The interest payment account is an account from which interest payments on the debentures will be serviced and the required DSRA will also be maintained. ○ For ensuring the maintenance of the required DSRA, the interest payment account shall be funded one day prior to the Pay-In Date with an amount equal to the four succeeding coupon payments required to be paid by the issuer in respect of the debentures.

- Any shortfall in the funds available in the escrow account to complete the aforesaid transfers to the above account(s) shall be made good by the GNN by transfer from other account(s) of the GNN.
- Sinking Fund Account: On each of the first 10 (ten) transfer dates occurring in each 12-month block, an amount equivalent to 1/10th of 10% (ten percent) of the issue size and any shortfall in the earlier contribution shall be transferred to the sinking fund account. Any shortfall in the funds available in the escrow account to complete the aforesaid transfers to the above account(s) shall be made good by the GNN by transfer from other account(s) of the GNN.

**Structured Payment Mechanism:**

amount required to make the payment of the coupon on the coupon payment date in the interest payment account (calculated on the basis of the amounts available in addition to the required DSRA), the debenture trustee shall intimate the issuer of the shortfall, and the issuer shall make good the shortfall in the interest payment account prior to the date falling 10 (ten) days prior to the coupon payment date (T-10 days).

- In the case of a shortfall in the amount required to make payment of coupon on the coupon payment date in the interest payment account (calculated on the basis of the amounts available in addition to the required DSRA) at nine days prior to the coupon payment date (T-9 days), the debenture trustee shall trigger the payment mechanism and instruct the bank to utilise the DSRA to the extent of the shortfall in the amount required to make the payment of the coupon on the coupon payment date on or prior to the date falling eight days prior to the interest payment date (T-8 days).

In issuing and maintaining its ratings, India Ratings relies on factual information it receives from issuers and underwriters and from other sources India Ratings believes to be credible. India Ratings conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security.

The manner of India Ratings' factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in India where the rated security is offered and sold, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors

Users of India Ratings' ratings should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information India Ratings relies on in connection with a rating will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to India Ratings and to the market in offering documents and other reports. In issuing its ratings India Ratings must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings can be affected by future events or conditions that were not anticipated at the time a rating was issued or affirmed.

India Ratings seeks to continuously improve its ratings criteria and methodologies, and periodically updates the descriptions on its website of its criteria and methodologies for securities of a given type. The criteria and methodology used to determine a rating action are those in effect at the time the rating action is taken, which for public ratings is the date of the related rating action commentary. Each rating action commentary provides information about the criteria and methodology used to arrive at the stated rating, which may differ from the general criteria and methodology for the applicable security type posted on the website at a given time. For this reason, you should always consult the applicable rating action commentary for the most accurate information on the basis of any given public rating.

## India Ratings Assigns Ghaziabad Nagar Nigam's Proposed NCDs 'Provisional IND AA'/Stable

# 22

FEB 2021

By Amit Jain

India Ratings and Research (Ind-Ra) has assigned a provisional rating to Ghaziabad Nagar Nigam's (GNN) proposed non-convertible debentures (NCDs), as follows:

Instrument Type	Date of Issuance	Coupon Rate	Maturity Date	Size of Issue (million)	Rating/Outlook	Rating Action
*Proposed NCDs	-	-	-	INR1,500	Provisional IND AA/Stable	Assigned

\*The final rating will be assigned following the final issuance and the receipt of the final documentation, conforming to the information already received by Ind-Ra.

**Bond's Purpose:** GNN plans to raise the proposed green bonds for part financing of the tertiary treatment plant (40 million litres per day output) at Indrapuram to generate industrial grade water. The project cost as per the detailed project report is INR2,399.3 million, of which GNN would fund INR1,500 million from the proceeds of the proposed bonds; the balance would be funded by the corporation with its own funds.

**Analytical Approach:** The rating of the NCDs reflects the operational and financial performance of GNN, the nature of the escrowed assets, the strength of the structured payment mechanism, and expected adequate debt service coverage.

The rating is based on the stability in the performance of assets, which are proposed to be escrowed (tax revenue (house, water and sewer tax) and revenue grant (which are free from all charges)) and the enforceable nature of these collections by the corporation.

The rating also factors in the sound legal foundation and structured payment mechanism, which is monitored and controlled by the trustee. The structured payment mechanism is backed by an interest payment account (IPA) and a sinking fund account (SFA). The IPA will be pre-funded by four semi-annual interest instalments, which is the required debt service reserve amount, instead of creating a separate debt service reserve account (DSRA) that would consist of the four semi-annual interest instalments, in order to meet with the requirements of the Securities and Exchange Board of India's (SEBI) circular dated 13 November 2019 in relation to the 'continuous disclosures and compliances by the listed entities under the SEBI (Issue and Listing of Municipal Debt Securities) Regulations, 2015,. The NCDs have been issued at a fixed rate of interest, thereby mitigating the interest rate risk.

Ind-Ra also takes comfort from the Uttar Pradesh (UP) government's order dated 30 July 2019 for the use of the Infrastructure Development Fund (IDF), which is available to replenish the debt service reserve amount in the IPA and any mismatch in SFA. The IDF is funded out of the additional stamp duty paid on transfer records of immovable properties in UP. GNN is entitled to receive its own share during the year from the IDF, which resides with the state government, based on the property registrations under its jurisdiction. In addition, it is also entitled to receive the Atal Mission for Rejuvenation and Urban Transformation (AMRUT) scheme incentive of INR195 million (13% of face value of bond) to be received from the government of India, which will also provide support in the form of additional cash collateral.

Additionally, the rating benefits from GNN's coverage of debt servicing obligations (interest payment + proportionate principal deposited in SFA or instalment of principal redemption), which Ind-Ra expects to remain above 2x. The agency expects the coverage of GNN's instrument-level debt servicing obligations, tax revenue and revenue grant and potential IDF and AMRUT incentives to remain healthy over the medium term.

## KEY RATING DRIVERS

**Adequacy of Escrowed Revenue Stream:** Under the proposed structure, the tax revenue and revenue grant, are proposed to be escrowed for the servicing of the debt repayment obligations. The escrowed collections will be first utilised for meeting the minimum balance required to be transferred to the IPA and SFA. The surplus funds, if any, can be transferred to the general fund account(s) of the municipal corporation upon a one-time written instruction of the debenture trustee for the monthly period. The revenue from these streams grew at a CAGR of 3.33% over FY16-FY20 to INR2,524 million. The escrowed receivables from the tax revenue and revenue grant, and additional cash flows (yearly share of the IDF and incentive under the AMRUT scheme) are expected to provide a strong cover for GNN's debt service obligations.

**Structured Debt Servicing Mechanism:** As per the structure, the IPA will be funded one day before the pay-in date with an amount equal to four half-yearly interest payments. At all times, the DSRA amount will be maintained at four succeeding half-yearly interest payments. GNN has created an escrow account into which the tax revenue and revenue grant collected by GNN shall be transferred for debt servicing. The funds lying in the escrow account would be first utilised to accumulate the 'minimum balance'. The minimum balance is the amount that would be transferred to the IPA and SFA on the transfer date.

On the transfer date (the date immediately preceding each monthly anniversary of the deemed date of allotment), the funds parked in the escrow account shall be used in the following order of priority:

- On each of the first five transfer dates of the 12-month block, an amount equivalent to 20% of the coupon payment to be made on the first coupon payment date, and any further interest payable as per the terms of the issuance and any shortfall in earlier contribution shall be transferred to the IPA. On each of the sixth to the tenth transfer dates of the year, an amount equivalent to 20% of the coupon payment would be made on the second coupon payment date in such a 12-month block and any further interest payable and any shortfall in the earlier contribution shall be transferred to the IPA.

- On each of the first 10 transfer dates occurring in each 12-month block, an amount equivalent to one-tenth of 10% of the issue size, and any shortfall in the earlier contribution shall be transferred to the SFA. The account will be duly monitored on an ongoing basis, including on each of the first 10 transfer dates occurring in each 12-month block.
- Any shortfall in the funds available in the escrow account to complete the aforesaid transfers to the above accounts shall be made good by GNN by transfer from its other account(s). Please refer to the annexure for the structure's detailed trustee monitoring mechanism.

**Trustee Monitoring:** The debenture trustees, on behalf of the debenture holders, shall have an exclusive first charge on the escrow account, IPA, SFA and any permitted investments made from these accounts for the exclusive benefit of the debenture holders. The amount deposited in IPA and SFA shall be used solely for meeting the debenture holders' dues. No amount can be withdrawn from these accounts without the approval of debenture trustee.

**Infrastructure Development Fund Support:** The Government of Uttar Pradesh (GoUP), via an order issued on 30 July 2019, created a policy for the utilisation of the funds in the IDF for credit enhancement and other needs of local bodies to promote/ incentivise the issuance of municipal bonds. Furthermore, the GoUP will be entering a tripartite agreement with the debenture trustee and the issuer for making funds available from the IDF into the IPA, in case of any shortfall in the DSRA amount, or the SFA for sinking fund mismatch. The IDF consists of 0.5% out of the 2% additional stamp duty paid on the transfer records of immovable properties in the state. The local bodies receive their share of these funds as per the number of registrations that have taken place under their jurisdiction. GNN receives these funds from the state government as per its requirements.

**Consistent Revenue Surplus:** GNN reported a revenue surplus of INR1,333.4 million in FY20 (FY19: INR1,307.0 million); it maintained the revenue surplus position during FY16-FY20. Ind-Ra expects the revenue surplus position to be sustained over the medium term, supported by tax revenue, non-tax revenue and grants. The operating margins remained healthy and in excess of 25.0% over FY16-FY20.

**Debt Service Coverage:** The corporation is debt free, with no debt (secured/unsecured) from the state government or any financial institutions. Ind-Ra expects GNN's DSCR to remain comfortable over the medium term, taking into consideration the debt service obligations from the issuance of the NCDs of INR1,500 million. The agency expects the coverage of its instrument-level debt servicing obligations, based on the receivables from tax revenue and revenue grant (which are free from all charges), the IDF and the AMRUT scheme, to remain healthy over the medium term. Ind-Ra will closely monitor the coverage adequacy during the entire tenure of the NCDs.

**Liquidity Indicator – Strong:** GNN's liquidity position is supported by capital grants to fund capex, moderate cash and bank balances and unencumbered investments. The debt servicing requirement pertaining to bonds will be backed by way of escrow of receivables from tax revenue and revenue grant. The corporation's cash balances and investments stood at INR3,693.5 million as on 31 March 2020. Ind-Ra expects the liquidity profile to stay healthy over the medium term.

**Scope for improvement in Capital Utilisation and Civic Services Delivery:** Capital expenditure constituted 17.0%, on an average, of the total expenditure during FY16-FY20. The capital utilisation (capital expenditure/capital income) ratio averaged 0.6x, with the capex being funded by government grants over the same period. With the implementation of the AMRUT, smart city and housing schemes, the capital utilisation ratio is likely to improve to around 1x over the medium term. The corporation has undertaken several projects, such as Ghaziabad CHA (Part-2) Reorganisation of Water Supply Scheme Phase-1, Ghaziabad CHA (Part-2) Reorganisation of Water Supply Scheme Phase-2, Ghaziabad Sewerage Phase-1 and Ghaziabad THA (Part-2) Reorganisation of Water Supply Scheme under the AMRUT scheme, and other schemes that are in various stages of progress. Ind-Ra believes there is scope for improvement, given the existing and future civic infrastructure requirements in the city.

The corporation's service delivery levels for the water and sewerage segments remained average, barring solid waste segment, as reflected in coverage network (water supply: 79.3%; sewage network: 75.9%; solid waste management service: 94.0%) as against the benchmark levels of 100% for each service set by the Ministry of Housing and Urban Affairs. In FY19, the per capita supply of water reduced to 130.1 litres per capita per day (FY18: 136 litres) (benchmark:

135 litres per capita per day). Also, the performance of GNN was less than adequate in services such as segregation of municipal solid waste; wastewater recycle and reuse; hours of water supply and reduction in unaccounted/unbilled water supply during FY16-FY20.

**Scope for Improvement in Own Revenue:** GNN's own income-to-total revenue income ratio was low at 28.4% in FY20, and averaged 29.3% over FY16-FY20. The agency believes there is scope for GNN to increase the share of its own revenue in the total revenue income; however, this would depend on the improvement in the efficiency in collection of house tax. Overall, house tax collection efficiency averaged 65.3% over FY16-FY20. The monthly collection of house, water and sewer tax stood at INR421.7 million, INR334.9 million and INR155.9 million, respectively, during April-December 2020 against INR422.1 million, INR303.3 million and INR147.9 million, respectively, during April-December 2019. The combined revenue from these three taxes grew 4.5% in 9MFY21 and accounted for 80.9% of the FY20 collections.

GNN has taken several measures to improve its collection for its house tax and other associated taxes. It has started the geographic information system survey of its area, which will help to bring in more properties under its assessment. Additionally, the corporation has started e-payments and also tied up with several banks and enabled an unified payments interface for the collection of these taxes.

## RATING SENSITIVITIES

The rating of the NCDs will be downgraded on a downgrade in GNN's rating, which forms the starting point for the rating of these NCDs.

**Positive:** Future developments that could, individually or collectively, lead to a positive rating action include:

- the operating margins exceeding 35% on a sustained basis
- the total house tax collection efficiency rising to or exceeding 85% on a sustained basis

**Negative:** The following developments could, individually or collectively, lead to a negative rating action:

- breach of the financial covenants and deviation from the structured payment mechanism
- an unanticipated increase in the debt levels, resulting in the DSCR falling below 2x for two consecutive years
  - higher dependence on grants and/or deterioration in the revenue balance for two consecutive years
  - the total house tax collection efficiency falling below 40% for two consecutive years.

## COMPANY PROFILE

**Sub. : Approval for taking up the Water Treatment Plant and Supply of Treated Water to Industries Project in Ghaziabad and related borrowing activities- Tertiary Treatment Plant 40 MLD Net Output Capacity at Indirapuram to Generate Industrial Grade Water under Ghaziabad Nagar Nigam**

Respected Sir,

We wish to bring to your kind notice that the Nagar Nigam Ghaziabad has taken up an ambitious project of setting up a Water Treatment Plant and Supply of Treated Water to various industries located in the jurisdiction of the Nagar Nigam. This project is meant to stop the current use of ground water by these industries and free up the ground water for residential purposes.

The key benefits of this project is listed below :

1. Ghaziabad has abundant supply of sewerage water and this water can be recycled for supplying to industries which can help them with 24 hour water supply.
2. This will help in preserving the ground water which is already at a much depleted level and thus preserving this water would help in a longer duration availability of water for residential supply.
3. The use of recycled water would also help in reducing this water from becoming waste and can be productively used.
4. This would also help in reducing the pollution levels of the rivers where currently this uncycled water flows in to.
5. Sale of recycled water for industrial use would also result in an added revenue source to the Nagar Nigam, expected in the range of Rs. 15 Crore p. a. for the Nigam.

Considering all the above mentioned benefits, the Nagar Nigam seeks your approval for going ahead with project. The brief details of this project is given below :

- a) This project is being set up for 40 MLD.
- b) Project is likely to cater to the water requirements of the Industrial Areas of Sahibabad & Loni.
- c) The feasibility report and the final DPR has been prepared and the final project cost is Rs. 234.61 Crores.
- d) The proposed means of financing would include a bond borrowing of approx. up to Rs. 150 Crs towards meeting out the project cost & the balance amount is expected to come from internal sources.

**A38**

1. Approving the feasibility report and the final DPR.
2. Approving the Project and its estimated cost.
3. Approving the borrowing of up to Rs. 150 crores through issuance of Municipal Bonds by Nagar Nigam Ghaziabad.
4. Approving to repay the loan from own resources of Nagar Nigam Ghaziabad.
5. Approving of the authority to create charge on Municipal Land for creation of security cover for the bond issuance for a minimum of 1.25 times the borrowed amount. The land would be identified in due course of time however the authority to pledge the land is required upfront.
6. Approving of creation of appropriate Escrow Mechanism, Interest Payment Reserves, Debenture Redemption Reserves (Sinking Fund), as required in due course, etc
