

## Annexure I

### **About Member SSO:**

**Exchange has launched the Member SSO (Single Sign On)** portal in 2018, It is a single login window to access all peripheral applications, (excluding main trading application) provided by the Exchange. With single credentials the user will be able to login to multiple applications. Some of the features are as follows

1. As mandated by the regulators, Two Factor Authentication with Google Authenticator, Cymmetri Authenticator & OTP
2. SSO for all the applications hosted by the exchange - Single user credentials.
3. Self-service option for user creation and manage passwords.
4. Uniform Enforcement of password and user management policies.

### **Advantages of SSO:**

SSO brings in a lot of discipline in the processes. It also helps in organising and automating certain processes like periodic reviews, user & password management etc.

1. Remembering a Single URL verses multiple URL for each application.
2. Single user credentials across multiple applications
3. Extra layer of security with 2 Factor authentication
4. Periodic User Reviews

### **Caution when using SSO**

*The user should ensure not to share the user credentials with anyone.*

### **Browser compatibility**

Microsoft Edge Version 114.0.1823.41  
(Official build) (64-bit)

Google Chrome Version 114.0.5735.199  
(Official Build) (64-bit)

Firefox Browser 114.0 (64-bit)
