XVII. EARNING PER SHARE

Basic Earnings per share are computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the year. Diluted earning per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per shares that could have been issued upon conservation of all dilutive potential equity shares.

XVIII. INCOME TAXES

The Income Tax expense or credit for the year is the tax payable on the current year's taxable income based on the applicable income tax rates adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses, if any.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting year. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognized if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss). Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting year and are expected to apply when the related deferred income tax is realized or the deferred income tax liability is settled.

The carrying amount of deferred tax assets are reviewed at the end of each reporting year and are recognized only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balance relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has legally enforceable rights to offset and intends either to settle on a net basis, or to realize the assets and settle the liability simultaneously.

XIX. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Detailed information about each of these estimates and judgments is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements.

The areas involving critical estimates or judgments are:

- i. Useful life of tangible assets refer Note-2V

- iv. Impairment of non-financial assets refer Note-2VIII

Ind AS 115- Revenue from Contracts with Customers

On March 28, 2018, Ministry of Corporate Affairs (MCA) has notified the Ind AS 115, Revenue from Contract with customers. Further the new standards requires enhanced disclosures about the nature, amount timing and uncertainty of revenue and cash flows arising from the entity's contracts with customers.

The Standard permits two possible methods of transition:

- **Retrospective Approach-** Under this approach the standards will be applied retrospectively to each prior reporting period presented in accordance with Ind AS 8 – Accounting Polices, Changes in Accounting Estimates and Errors.
- **Retrospectively with cumulative effect of initially applying standard** recognized at the date of application (cumulative catch-up approach). The effective date for adoption of Ind AS 115 is financial periods beginning on or after April 01, 2018.
