Note I: We regularly connect with our customers through Operations review & Governance Meetings both at Corporate and Circle level to understand their requirements, issues / complaints and periodically deliberate on issues covering Energy aspects such as Diesel, Electricity Consumption and network improvisation opportunities. Resolution to complaints is an ongoing process and service level agreements exists with customers.

Note II: Notices on Websites are published regularly with a redressal at scmmahape@gtlinfra.com

Note III: Shut down / exit of 14 telecom customers resulted into abandonment of more than 14,000 towers of the Company by such discontinued telecom customers, making such towers unoccupied. Such discontinuing telecom customers did not make any payment of their

contractual dues to the Company, including rent payable to landlords, which are pass through payments for the Company. The Company has requested Edelweiss Asset Reconstruction Company Limited (“EARC”) being Monitoring Institution, for making payments due to the landlords of the unoccupied sites, however, the same is yet to be approved. Further, resolution plans submitted by the Company included payment of rents to landowners. However, none of the resolution proposals were considered by the lenders. Due to non–receipt of the rental amounts from the discontinuing operators as per contractual arrangement, pending approval of payment requests of the Company with the Monitoring Institution and non–resolution of issue of unpaid liabilities towards unoccupied towers, the rentals to landlords for those unoccupied sites remained unpaid. As a result, such landlords initiated legal actions against the Company and its directors / officials. The no. of legal notices received by the Company from various landlords are 1,109 nos. in FY 2022– 2023 and 1,168 nos. in FY 2023–2024 respectively. The Company has responded to majority of such legal notices and as on March 31, 2024, 514 number of matters have been filed by various landlords before various judicial authorities and Company is defending the same.

PRINCIPLE 2 Businesses should provide goods and services in a manner that is sustainable and safe.

Essential Indicators

1. Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.

₹ in Lakhs

	FY 2023–24 Current Financial Year	FY 2022–23 Previous Financial Year	Details of improvements in environmental and social impacts
R&D	NA	NA	NA
Capex	₹ 2,261 (67% of Total capex for the year) <i>(Capex utilization for Diesel reduction x 100/ Total Capex)</i>	₹ 3,616 (41% of Total Capex for the year)	During the year the company has made capex investments on energy conservation initiatives through the deployment of battery banks and electrification of sites. 52 sites were Electrified in the financial year 2023–2024 thereby reducing the diesel consumption.

2. a. Does the entity have procedures in place for sustainable sourcing?
YES, Sustainable sourcing is considered while making purchasing decisions. Capex investment done on class A product like Diesel Generator, Battery bank, SMPS etc. are evaluated on the basis of product lifecycle, efficiency in usage of energy resources, emissions and responsible waste management.
Sourcing of such Batteries, SMPS, Generators etc. is from vendors who discharge their ESG responsibilities and the same is reflected from their ESG published information. Thus, vendor assessment and prioritization is also done in terms of business responsibility report, ESG-related information etc.
Overall Efficiency of products on the basis of Energy Consumption is done on a regular basis.
The Company prefers services from local service providers comprising of Medium and Small-Scale enterprises and local entrepreneurs.
- b. If yes, what percentage of inputs were sourced sustainably?
Nearly 95% of CAPEX procured is continuously assessed on periodical basis
3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.
We consume batteries, and electronic products in our business operations. Batteries are classified as hazardous waste; whereas SMPS as other non-hazardous waste.
Material deployment from warehouse to sites gets completed through the process of Material Request Note (MRN). The retrieval of material from sites to warehouse is initiated post completion of its shelf life through the process of Site Return Note (SRN) which is initiated by user. Post receipt of material at warehouse, it flows into the process of Health Assessment which is done by In-house technical team i.e. TRC (Testing & Repair Centre) followed by its validation (item-wise) by a Subject Matter Expert for declaring it as either repairable or scrap. Items tagged as repairable are redeployed post completion of repair at SME Workshop. SRN Material identified as scrap by SME/TRC are further assessed by respective Circle team.
Disposal of assets falling under pollution control board norms including E-Waste/Hazardous Waste/ General Waste etc. is being done through advertisement in various publications wherein only authorized/ approved recyclers are allowed to participate in inspection followed by scrap lifting from respective warehouse locations
4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.
Not Applicable

PRINCIPLE 3 Businesses should respect and promote the well-being of all employees, including those in their value chains

GTL Infra considers its employees as its core assets and treats them accordingly by timely payment of fair wages and taking care of the wellbeing of the employee's family as a whole unit. Accordingly, employees are provided benefits and social security beyond statutory norms such as medical insurance covering their dependents, life insurance, accidental insurance, etc.

On the professional front employees and associates are encouraged to pursue higher education, add skills, reskill and are recognized for their exemplary contribution through rewards and recognitions. The Company's policies are designed to provide conducive work environment and employee's feedback is captured routinely.

Employee engagement events are conducted regularly to foster teamwork, rejuvenate and cultivate sense of belonging.

PRINCIPLE 6 Businesses should respect and make efforts to protect and restore the environment

The Company's business has a dependence on availability of electricity on 24x7 basis. To achieve this, back-up power is provided from Battery Banks and Diesel generators at sites for the telecom networks to remain live in the event of electricity grid failure, force majeure events etc.

As a part of our endeavour for cleaner environment, the Company has been consistently working towards reducing its energy dependence on Diesel. Several measures have been adopted like installation of free cooling devices, battery augmentation, electrification of sites, working with electricity providers to improve the electricity availability, etc.

Waste management is also done in a responsible manner. Redeployment of sizeable no. of batteries, SMPS, Diesel Generators, Rectifier Modules, Air-conditioners by refurbishing to enhance their useful life without compromising much on desired performance instead of disposing as scarp.

Essential Indicators

1. Details of total energy consumption (in Giga Joules) and energy intensity, in the following format:

Parameter	FY 2023–24 (Current Financial Year)	FY 2022–23 (Previous Financial Year)
Total electricity consumption (A)	12,21,763	12,64,813

7. Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details.

The Company continues to pursue its ongoing initiatives along with new opportunity to reduce the carbon emissions.

Green Sites – Regular diesel filling sites are being converted into Green Sites where diesel consumption is less than 100 liters per quarter. As of FY–2022–23, there were 2,547 green sites which increased to 2,987 sites in FY–2023–24. (on a case-to-case basis in events of prolonged EB cut or force majeure events a small quantity of diesel may be used to power Telecom Networks)

Natural Cooling is used at select sites to overcome the dependability on Air-conditioners run where ambient temperature compliments the working of the equipment.

Advanced battery bank solutions – VRLA-based HTC (High-Temperature Cyclic) batteries are being deployed, to optimize energy consumption.

GCU (Genset Controller Unit) – GCUs are deployed at 1,367 no. of sites and additionally 298 no. of GCUs are repaired / refurbished to ultimately reduce the Diesel generator run hours and to control quantity of Diesel in FY 2023–24.

Improvement in Electricity availability: With the intention of reducing the Diesel Generator run hours and diesel consumption thereof, the Company works on tapping higher availability of electricity through feeder conversion project.

8. Provide details related to waste management by the entity, in the following format:

Battery waste are battery banks used at sites

Other non-hazardous waste are paper based wastages generated from normal operations

9. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes. We consume batteries, and electronic products such as SMPS in our operations. Batteries are classified as hazardous waste; whereas SMPS as other non-hazardous waste.

The life cycle of material deployment – retrieval – repair/refurbish – waste is handled systematically. Material deployment from warehouse to sites gets completed through the process of Material Request Note (MRN). The retrieval of material from sites to warehouse is initiated post completion of its shelf life through the process of Site Return Note (SRN).

Post receipt of material at warehouse, it flows into the process of Health Assessment which is done by In-house Testing & Repair Centre followed by its validation item wise by a Subject Matter Expert for declaring it as either repairable / reusable (with acceptable performance) or scrap.

Items classified as repairable with desired performance are redeployed for extended useful life. SRN Material identified as scrap is disposed-off through authorized recyclers / OEMs taking back such material for responsible waste management.

10. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required, please specify details in the following format:
