## **OnMobile and DeOSphere partner to deploy one of the most advanced Global Gaming & AI Edge Network**

**November 11<sup>th</sup>, 2024, Bengaluru**

OnMobile Global Limited, the leader in cutting-edge mobile gaming & entertainment, announced its partnership with DeOSphere, to offer advanced gaming and network services by deploying the DeOS Operating system, including streaming and edge computing technologies over OnMobile's current global network infrastructure.

DeOSphere which partners with leading gaming and entertainment providers, is a decentralised operating system, that runs any application by bypassing processing on device operating systems and cloud computing. With this collaboration, DeOSphere will be offering one of the largest interactive edge gaming, AI and content networks, enabling new revenue opportunities for game studios and developers while generating important performance efficiencies.

In DeOSphere, OnMobile has found a partner and client to greatly upscale its current gaming services and network infrastructure. This partnership leverages the strengths of both organizations and enables future services to be launched; and also complements OnMobile's gaming offering with an unmatched experience.

More importantly, this will allow OnMobile to monetize its core asset and bring important economies of scale as new services and enterprises are onboarded onto its network. DeOSphere will be leasing a minimum of 30 points of presence (POPs) from OnMobile.

Commenting on the partnership, Bikram Singh Sherawat, President & COO, OnMobile Global said "These are exciting times! By joining forces with DeOSphere, we will be able to reach streaming performances never obtained before. It also opens up our global private network to key industry players and capitalises on the robust infrastructure we've built over years. We welcome them as our partner in this innovative foray."

"We are excited to collaborate with OnMobile to build and launch the DeOSphere Edge — the world's premier edge gaming and AI network," said Orlando Bayter, CEO and Founder of DeOSphere. "The DeOSphere Edge revolutionizes the way games, movies, AI models, and other GPU-intensive

applications are developed and run anywhere in the world, delivering near-zero latency and unprecedented economic advantages.”

#### **About OnMobile**

OnMobile Global [NSE India: ONMOBILE] [BSE Ltd: 532944], a leader in cutting-edge mobile gaming and entertainment, is headquartered in Bangalore, India, with its presence in 69 countries across the globe. OnMobile is focused on building customer-first Mobile Gaming products while offering a wide array of digital products such as Videos, Tones, & Contests. #### **About DeOSphere**

DeOSphere is the world's leading edge gaming and AI network. The DeOSphere Edge transforms how interactive games, movies, AI models, real-time inferencing, and other GPU-intensive applications are developed and operated globally. The DeOSphere Edge platform integrates a real-time streaming protocol, a decentralized operating system, and a federated provisioning service to provide near-zero application latency and exceptional economic benefits. DeOSphere partners with leading gaming and entertainment companies, top service providers, telecommunications companies, and data center providers to deliver premier content and AI models on the highest-performing GPU and edge network worldwide.
