# Exxaro Tiles Limited

**Ratings downgraded to 'CRISIL BBB / CRISIL A3+ '; outlook revised to 'Negative'**

## Rating Action

<b>Total Bank Loan Facilities Rated</b>	<b>Rs.122 Crore</b>
<b>Long Term Rating</b>	<b>CRISIL BBB/Negative (Downgraded from 'CRISIL BBB+ / Stable' and outlook revised to 'Negative')</b>
<b>Short Term Rating</b>	<b>CRISIL A3+ (Downgraded from 'CRISIL A2')</b>

*Note: None of the Directors on CRISIL Ratings Limited's Board are members of rating committee and thus do not participate in discussion or assignment of any ratings. The Board of Directors also does not discuss any ratings at its meetings.*

*1 crore = 10 million*

*Refer to annexure for Details of Instruments & Bank Facilities*

## Detailed Rationale

CRISIL Ratings has downgraded its ratings on the bank facilities of Exxaro Tiles Ltd (ETL) to '**CRISIL BBB/Negative/CRISIL A3+**' from '**CRISIL BBB+/Stable/CRISIL A2**'

The downgrade in the ratings factors in the significant moderation in its overall business risk profile is reflected in its overall revenue and profitability over the years as well as over the past several quarters (ending June 30, 2024). Revenue of the company remained at Rs 301.68 crores with an operating margin of 8.8% in FY24 from Rs 314.89 crores with an operating margin of 11.03% in FY23. This further declined to 0.25% in the first quarter of fiscal 2025 (Q1FY25); this resulted in negative profit after tax (PAT) of Rs 4.27 crore and negative net cash accrual (NCA) of Rs 1.92 crore in Q1FY25. This was a result of high marketing expenditure incurred, closure of the plant for 3-4 weeks for its upgradation, low offtake and high competition in the market resulting in lower realisation of few of its product range, impacting cost efficiency, which weakened the debt coverage metrics.

CRISIL believes that the business risk profile of ETL, particularly its operating profitability, will see a moderation in fiscal 2025 (as against previous fiscals) and the recovery thereafter shall remain stable. Operating profitability is expected at 7-8% for fiscal 2025 due to lower-than-expected profitability of reported during Q1FY25. This in turn narrowed the cushion between net cash accruals (NCA) and repayment obligation (RO) for Q1FY25 and this will lead to adequate though stretched liquidity as BLU too remained high over the last 12 months ended June 2024. While operating performance is expected to improve over the medium term amidst strategic decision undertaken by the management with further management's expectation of normalisation in operating performance from the second quarter of fiscal 2025 onwards and low impact of aforesaid reasons over the medium term, its timely recovery and sustenance thereafter will remain monitorable. Any delay in recovery of the operating margin or further decline shall impact on the business risk profile and its liquidity, hence it will be closely monitored.

The ratings consider comfortable financial risk profile owing to sizeable network and moderate debt on books. Resultantly, gearing is estimated at 0.35 time and total outside liabilities to tangible network (TOL/TNW) ratio at 0.76 time as on March 31, 2024. While NCA declined in fiscal 2024, and further declined to negative Rs 1.92 crore in Q1FY25, narrowing the cushion in NCA/RO, liquidity for Q1FY25 shall remain supported by available balance in the bank limit and cash and bank balance of Rs 2.74 crore as on June 30, 2024.

The ratings continue to reflect an established market presence and comfortable financial risk profile. These strengths are partially offset by declining scale of operations, large working capital requirement, susceptibility of profitability to volatile raw material and gas prices and vulnerability to intense competition and cyclical in the end-user industry.

### **Key Rating Drivers & Detailed Description**

#### **Strengths:**

##### **Established market presence**

ETL has an established market presence, benefiting from the two-decade experience of the promoters, their strong understanding of market dynamics and healthy distribution network. The company has a network of over 800 dealers and 2000+ touch points where its products are sold under the Exxaro brand. It benefits from its production being almost totally in house and sales in its own brand with presence in large-sized tiles. Revenue stood at Rs 301.68 crore in fiscal 2024 and is expected to improve with capacity utilisation and new arrangements made by the company; however, it will remain a key monitorable.

##### **Comfortable financial risk profile**

Networth stood at Rs 276.8 crore with gearing at 0.35 time and TOL/TNW ratio at 0.76 time as on March 31, 2024. In the past few fiscals through 2024, the company had moderate debt protection metrics supported by steady profitability and leverage; interest coverage ratio is estimated at 1.89 times and NCA to adjusted debt ratio at 0.12 time for fiscal 2024. High borrowing and interest costs/burden restrained interest coverage. The capital structure is expected to remain comfortable going forward. Peak leverage is expected to remain below 0.7 time over the medium term. In the absence of any large, debt-funded capital expenditure (capex) over the medium term, the financial risk profile is expected to improve further with accretion to reserve and scheduled debt repayment.

#### **Weaknesses:**

##### **Declining scale of operations and large working capital requirement**

ETL had clocked revenue of Rs 301.68 crore in fiscal 2024 (registering on-year degrowth of 5%), reflecting average scale of operations. In Q1FY25, revenue remained Rs 59.83 crore, which is lower than the average of its past five quarters on account of overall decline in demand for its double charge vitrified tiles and lesser offtake of its glazed vitrified tiles.

Further, gross current assets have been 270-350 days for the past three fiscals and were 350 days as on March 31, 2024, driven by huge inventory of 195 days on account of a wide range of designs and continuous changes in the same with production being largely in-house. Also, the company had debtors of around 120-150 days, led by extension of large credit to dealers. The working capital is partially supported by extended credit received from suppliers 200-300 days. While ETL is undertaking measures to control the working capital cycle, the extent and sustenance of the improvement remains a key monitorable.

##### **Susceptibility of its profitability to volatile raw material and gas prices**

Raw materials (different types of clay, feldspar, silica, kaolin and carbonates) comprise 35-40% of the total operating cost, while cost of gas and power forms 35-40%. Hence, even a slight variation in input prices will drastically impact profitability.

Operating margin declined to 8.8% in fiscal 2024 from 20.25% in fiscal 2021 and further to 0.25% in Q1FY25. This led to a negative PAT of Rs 4.27 crore in Q1FY25. Profitability was also impacted by sizeable marketing expenditures incurred in Q1FY25 for its advertising campaign. Improvement and sustenance of the margin will remain monitorable.

### **Vulnerability to intense competition and cyclicity in the end-user industry**

ETL caters to the real estate, construction and infrastructure industries, whose performance is strongly correlated with economic cycles. Due to economic recessions in the past, the construction sector faced a slowdown, with several projects getting delayed or cancelled, restraining the performance of ceramic tile manufacturers. Besides, the industry is intensely competitive and dominated by unorganised entities. However, with changes such as closure of ceramic units running on coal gasifiers, and implementation of the Goods and Services Tax and Real Estate (Regulation and Development) Act, 2016, organised players have gained market share in value terms.

Despite being a leading player in the ceramic tiles industry, the company faces intense competition from unorganised entities and reputed brands. The ability to pass on any increase in raw material cost, amidst the competitive scenario, remains a key rating sensitivity factor. Any moderation in demand from the real estate sector and its impact on pricing and offtake will be closely monitored.

### **Liquidity: Adequate**

Bank limit utilisation was around 89.47% (fund-based + non-fund-based) for the 12 months through June 2024. Cash accrual is projected at more than Rs 11 crore, against yearly debt obligation of Rs 7.5 crore over the medium term. Unencumbered fixed deposit/cash and bank balance stood at Rs 3.4 crore and current ratio at 1.62 times on March 31, 2024. Low gearing and moderate networth also support financial flexibility.

### **Outlook: Negative**

The business risk profile of ETL will continue to weaken, marked by lower-than-expected operating performance, leading to lower cash accrual and stretched liquidity.

### **Rating Sensitivity factors**

#### **Upward factors**

- Considerable rise in revenue with operating margin over 11-12% leading to higher net cash accruals
- Decline in working capital intensity and subsequently improvement in financial risk profile, especially liquidity

#### **Downward factors**

- Decline in revenue or operating profitability declining below 7% over the next few quarters, resulting in lower-than-expected NCA.
- Further stretch in the working capital cycle, constraining the debt servicing ability of the company.
- Any large, debt-funded capex

### **About the Company**

ETL is engaged in the manufacturing and marketing of vitrified tiles that are primarily used as flooring solutions. It was set up fiscal 2008 as a partnership firm that manufactured frit, a raw material used in tile manufacturing and have over the years, diversified, expanded and evolved into a manufacturer of vitrified tiles. It has two manufacturing units in Gujarat (Unit 1 - Padra in Vadodara and Unit 2- Talod in Sabarkantha) and has total installed capacity of 146 lakh square metre. The company is listed on the Bombay Stock Exchange and National Stock Exchange.

**Key Financial Indicators**

As on / for the period ended March 31		2024	2023
Operating income	Rs crore	303.96	318.54
Reported profit after tax	Rs crore	2.28	7.30
PAT margins	%	0.75	2.29
Adjusted Debt/Adjusted Net worth	Times	0.35	0.34
Interest coverage	Times	1.89	3.79

**Status of non-cooperation with previous CRA:** ETL had previously not cooperated with Brickwork Ratings India Pvt Ltd, which had published its ratings as an issuer not cooperating vide a release since June 15, 2023. The reason provided by Brickwork Ratings India Pvt Ltd was non furnishing of information by ETL for monitoring the ratings.

**About CRISIL Ratings Limited (A subsidiary of CRISIL Limited, an S&P Global Company)**

CRISIL Ratings pioneered the concept of credit rating in India in 1987. With a tradition of independence, analytical rigour and innovation, we set the standards in the credit rating business. We rate the entire range of debt instruments, such as bank loans, certificates of deposit, commercial paper, non-convertible/convertible/partially convertible bonds and debentures, perpetual bonds, bank hybrid capital instruments, asset-backed and mortgage-backed securities, partial guarantees and other structured debt instruments. We have rated over 33,000 large and mid-scale corporates and financial institutions. We have also instituted several innovations in India in the rating business, including ratings for municipal bonds, partially guaranteed instruments and infrastructure investment trusts (InvITs).

CRISIL Ratings Limited ('CRISIL Ratings') is a wholly-owned subsidiary of CRISIL Limited ('CRISIL'). CRISIL Ratings Limited is registered in India as a credit rating agency with the Securities and Exchange Board of India ("SEBI").
