## Chairman Message

Mr. Mahendra Kumar Dhanuka Chairman

Dhanuka Agritech is a leading Indian agrochemical company. Dhanuka is working with the vision of Transforming India through Agriculture. We have a pan-India presence in all major states to reach out to more than 10 million farmers with our products and services. Dhanuka's key focus has been on introduction of novel chemistries and extensive product development distinguishing us from the rest of the industry.

With four manufacturing units and 41 warehouses across India, we cater to around 6,500 distributors and around 80,000 retailers. Dhanuka has a strong Sales and Marketing team to promote and develop new products. Dhanuka's strong R&D division has world-class NABL accredited laboratory as well as an excellent team for new product registration and development. Dhanuka has international collaboration with ten leading global agrochemical companies from Japan, US and Europe, which helps us to introduce the latest technology in India. Quarter 3 is important from the perspective of Rabi crops like Rice in South and East India, Wheat in North and Central India. This quarter is also important for farmers for harvest of Kharif crops and selling the harvest to generate money for the next season. In horticulture segment, Q3 is key season for Potato in North India, Grapes in West India Chilli in South India. This year the disease appearance in Potato, Grapes and Chilli was less, resulting in lower sales of some key fungicides. Also, due to carry over stocks of Chili from last season the commodity prices remained low resulting in fewer sprays in the crop.

However, I am happy to share that we got excellent sales and Liquidation for the key product Lanevo as well as Mycore Super in this season. Both these products were introduced in this year it self and have been well accepted by farmers across India. Further, we introduced 1 new 9(4) product – "Roxa" – Pyroxasulfone 85% WG to control weeds in wheat crop and received good response from the market.

We have also informed that the Company has acquired international rights to the active ingredients Iprovalicarb and Triadimenol (invented by Bayer AG). With this acquisition, Dhanuka plans to expand its footprint in more than 20 countries, including the regions of Latin America, Europe Middle East & Africa as well as Asia including India. This acquisition will enable Dhanuka to embark on a journey of global market expansion. Dhanuka will be shifting the manufacturing of at least one of the products to India, leveraging the capabilities of our manufacturing unit at Dahej, Gujarat.

## Why Dhanuka Agritech?

## Creating breakthroughs in Chemical Synthesis

Synthesis plant at Dahej supported by Fully equipped R&D Lab with 30 Chemists to master new expertise

#### **Rural FMCG Play**
