Rishabh Arora
Managing Director
DIN: 09745543

Royal Sense Limited is excited to announce the official launch of our latest Chronic Care Medical Device, the 'STERBIC SOFT LOOP FACE MASK' is a Medical disposable that is Protective gear for nose and mouth, and helps reduce airborne particle transmission.

Here are some details you might find in a typical 'Stergic Soft Loop Face Mask':

Surgical face masks are essential personal protective equipment (PPE) worn by healthcare professionals in medical settings. These masks are typically disposable, featuring multiple layers designed to filter out large particles and droplets. They provide a barrier that reduces the transmission of respiratory secretions between healthcare workers and patients. Surgical masks are loose-fitting and do not form a seal around the nose and mouth, making them effective in preventing the spread of droplets expelled by the wearer. They are crucial in preventing contamination during surgical procedures and are also used in everyday settings to limit exposure to infectious diseases." Softloop" ear loops are typically made from a stretchable material that is gentle on the ears and helps the mask fit securely.

About Royal Sense Limited: Royal Sense Limited is a leading provider of innovative diagnostic solutions for healthcare professionals worldwide. With a focus on quality, reliability, and accessibility, we are dedicated to improving patient care and advancing the field of medical diagnostics.
