53 Chandipura cases reported in country, Gujarat tops list: Nadda tells Rajya Sabha

PRESS TRUST OF INDIA NEW DELHI, AUGUST 6

INDIA HAS reported 53 confirmed cases of Chandipura virus — 51 from Gujarat and two from Rajasthan — as on July 31, Union Health Minister J P Nadda told the Rajya Sabha Tuesday.

Of these 53 cases, 19 people have died and all deaths have been reported from Gujarat, Nadda said in a written response to a question.

Elaborating on the steps taken to prevent the outbreak of the virus, Nadda said a National Joint Outbreak Response Team (NJORT) has been deployed to assist the Gujarat government for undertaking public health measures and for detailed epidemiological investigation into the outbreak.

Experts from the Integrated Disease Surveillance Programme, National Centre for Disease Control, Indian Council of Medical Research and National Institute of Virology Pune are part of the NJORT, Nadda said.

A team from the NCDC, Delhi, and ICMR NIV Pune is undertaking an epidemiological investigation into the acute Encephalitis cases and related deaths.

Besides, entomologists from National Centre for Disease Control (NCDC) are stationed at the affected areas.

Health rapid response teams and Accredited Social Health Activists and Auxiliary Nurse and Midwives have conducted surveillance for early identification of cases and timely referral of suspected cases to the nearby hospitals and medical colleges which are offering 24 hours services and ventilator support.

Nadda said indoor residual spraying for control of the vector (sandfly) has been intensified in the areas from where cases have been reported.

"The Government is closely monitoring and reviewing the situation in coordination with state government," he stated.
