02

India: Renewable Growth Opportunity & Adani Green Energy Limited (AGEL): Company Profile

India power demand growing faster than historical growth rates

▪ **Power Demand to grow with projected peak demand of 388 GW by FY32 from 250 GW in FY25**

▣ **Factors driving electricity demand**

- Data Centre Demand
- GDP growth
- Manufacturing Demand
- Electrification
- Consumer goods penetration
- Urbanization

Robust RE growth so far but much more needed to match the demand growth

Total Installed Power Capacity (GW)

Total Renewable Capacity (GW)

Installed Capacity Mix (%)

■ Renewables ■ Other Sources

Renewable energy capacity mix (%)

■ Solar PV ■ Wind ■ Small-Hydro ■ Bio Power

Renewables on a consistent growth path with continued growth in solar contribution

Source: CEA, Niti Ayog, National Electricity Plan – Volume II – Transmission (Oct 2024)

Note: Energy storage systems – hydro pumped storage and battery - have been excluded in the abovementioned capacities.

India: Shifting peak power demand

Policy level interventions has enabled integration of solar thereby shifting the evening peak to day time

- Separation of Agriculture feeders – enabling better load management, assured power supply during off-peak hours
- Promotion of solar pumps – subsidizing solar powered irrigation
- Energy efficiency – Ujala scheme, Energy Conservation building code and smart metering

Forecasted Demand & Supply Profile FY30

India can solve the supply-demand mismatch by:

- Power demand management - shifting power load to daytime
- Flexing thermal and hydro
- **Storage – Hydro PSP and Batteries**

As per CEA's National Electricity Plan – Volume II (Transmission), the peak demand by FY32 to be ~388 GW. RE contribution in the power supply is expected to increase from current 35% to 59% by FY32. Given the intermittent nature of RE sources, the energy storage systems are planned to be integrated in the grid - **47 GW BESS and 36 GW PSP capacity by FY32.**

Load curve to flatten, however significant unmet demand during non-solar hours creates a strong case for Storage
