# MESSAGE FROM THE MANAGING DIRECTOR

We are excited about our upcoming Greenfield Capex Project for the Jumbo laminate segment in Gujarat, which entails an investment of ₹ 90 Crore.

## Dear Shareholders,

I am pleased to share our Annual Report for the fiscal year 2023-24, which encapsulates our performance and strategic initiatives amid a challenging global environment.

The global economy experienced significant challenges, including geopolitical tensions and inflationary pressures. However, the Indian economy exhibited resilience, driven by robust investment activity and private consumption.

Amid these conditions, we expanded our presence in both domestic and global markets and witnessed a notable surge in demand in the latter half of the year, propelled by factors such as the festive season, stable raw material prices, and improved operating leverage. The positive performance of our eco-friendly MDF segment was particularly significant, reflecting our dedication to maintaining sustainability and our innovative product offerings.

## Capitalising on India's Real Estate Boom

India's real estate market is booming, which has led to a rising demand for quality interior infrastructure products. Rushil Decor is poised for a dynamic period of expansion, benefiting from such favourable industrial trends and a strong demand outlook in both domestic and international markets.

As we enter 2024-25, we are strategically positioned to capitalise on these opportunities by leveraging our robust market presence and

operational excellence. We are well equipped to navigate and thrive in the evolving market landscape, maximising our potential for growth and profitability.

Looking ahead, our primary goal is to elevate our average total utilisation level to exceed 90%. Our manufacturing facilities have excelled in achieving efficient and scalable production. These facilities prioritise integrating ecological practices, playing a pivotal role in decarbonising our operations and fostering a sustainable ecosystem.

## Financial Highlights

Despite having faced challenges, we have continued to showcase a robust financial performance in 2023-24. Our total revenues increased to ₹ 843.9 Crore in 2023-24. Our EBITDA for the year 2023-24 stood at ₹ 119.9 Crore, while our Profit after Tax (PAT) showed a slight decrease compared to the previous year, standing at ₹ 43.1 Crore in 2023-24.

At Rushil Decor, we remain focused on optimising our operations and financial performance to adapt effectively to market dynamics and ensure sustained growth in the coming years.

Our long-term objective of reaching a turnover of ₹ 2,500 Crore acts as a catalyst, driving us to consistently innovate, seize new opportunities, and realise our full potential. Additionally, we have maintained a debt-to-equity ratio of less than 1,

ensuring a balanced and responsible financial structure. We are pleased to report that as of 31<sup>st</sup> March, 2024, our debt-to-equity ratio stands at a healthy 0.53, demonstrating our sound financial management and positioning us for sustainable growth in the future. With a projected 20% CAGR expected in the future, we are well-positioned to achieve our ambitious goals and continue to thrive in the industry.

## Segment Performance and Growth Prospects

In 2023-24, our MDF export volumes increased by 61% year-on-year, reaching 61,716 CBM. With our export obligations now fulfilled, we are positioned to sell our products at better prices and achieve improved realisations. This development has provided us the flexibility to manage export activities with desirable margins. Our strategy includes dedicating a portion of our MDF production capacity to meet export demand.

In the laminate segment, we witnessed significant year-on-year progress, with utilisation levels rising to 90%, demonstrating strong operational performance. Additionally, we maintained solid EBITDA margins for the laminate segment, which reached 10% for the year 2023-24. Our laminate segment continues to demonstrate strong capacity utilisation and export demand. The year 2023-24 was also significant for our strategic entry into the plywood segment.

This step resulted in expanding our product portfolio and provided our distributors with a more comprehensive range of options.

The rising demand for PVC products has also contributed to our business growth. This demand has been driven by factors such as the booming real estate market and the increasing need for quality interior infrastructure products. The PVC segment has grown by 96% year-on-year, to be valued at ₹ 23 Crore for 2023-24. We have allocated a portion of our total revenues to support retail branding efforts, significantly boosting our brand presence in the market. Additionally, our operational excellence in the PVC segment has played a crucial role in supporting the growth.

### Greenfield Capex and Innovation

We are excited about our upcoming Greenfield Capex Project for the

Jumbo laminate segment in Gujarat, which entails an investment of ₹ 90 Crore. This initiative will cater to premium export markets, further strengthening our competitive position. 2023-24 was also notable for our strategic entry into the plywood segment through one of our Subsidiary Company. As we transition into 2024-25, we are set to significantly boost our production capabilities. Beginning with an initial capacity of 300 boards per day, we plan to scale up to 1,000 boards per day by September 2024 and further to 3,000 boards per day by September 2025. This expansion would result in an enhanced market penetration. As a one-stop solution for the laminates and MDF panel boards industry, Rushil Décor's products, dealers, and distributors are now better equipped to meet market demands.

All our products are sold under the VIR brand, providing a cohesive and robust offering to consumers. This integration strengthens our brand presence and appeal, allowing us to capture a larger market share.

### Revolutionising Marketing with Technology

Rushil Decor remains committed to leveraging innovation and embracing new technologies to engage customers and meet their evolving demands. This approach is evident in our adoption of AI-generated content in the latest television commercial (TVC) for VIR MDF.

**The PVC segment has grown by 96% year-on-year, to be valued at ₹ 23 Crore for 2023-24.**

## A Commitment to Environmental Sustainability

I am proud to announce that we have cultivated an impressive 27,000 hectares of land and supported plantation efforts for approximately 15 Million farmers in 2023-24. As evidence of our commitment to environmental sustainability, we have planted around 140 Million trees in the states of Karnataka and Andhra Pradesh.

Looking ahead, we have set an ambitious target of planting nearly 20 Million saplings by the year 2024-25. This initiative not only contributes to our long-term raw material security but also demonstrates our dedication to preserving the environment for future generations. Our sustainable wood supply strategy reflects our values and determination to grow responsibly while minimising our ecological footprint.

## Quality, Innovation, and CSR

Our commitment to excellence is further reinforced by prestigious certifications and investments in an ecosystem of quality and innovation. We remain dedicated to

adopting impactful Corporate Social Responsibility (CSR) initiatives, and thereby fostering positive societal development.

# MANAGEMENT DISCUSSION AND ANALYSIS

## GLOBAL ECONOMY

Global GDP growth is estimated to remain steady at 3.1% in 2024, matching its levels in 2023, before increasing slightly to 3.2% in 2025. This improvement is expected to be driven by a stronger growth in real income and lower policy interest rates. In G20 economies, annual consumer price inflation is forecasted to decrease gradually, dropping from 5.9% in 2024 to 3.6% in 2025, with receding cost pressures. By the end of 2025, inflation is expected to return to the targeted levels in most major economies. However, high geopolitical tensions pose a significant near-term risk. In case of an escalation of conflicts in the Middle East, energy and financial markets could be disrupted, increasing inflation, and reducing growth.

There are indications of an improvement in the global outlook, while overall growth remains modest. Imbalances in labour markets are easing, with unemployment rates remaining at or near record lows. A gradual rise in real income is also observed, with inflation levels moderating and trade growth turning positive. However, a varied economic performance is observed across countries. Europe and most low-income countries are experiencing weaker outcomes, while the United States and many large emerging-market economies are witnessing strong growth.

## INDIAN ECONOMY

India's GDP has significantly outperformed expectations for 2023-24. The Ministry of Statistics and Programme Implementation revised GDP growth upwards to 8.2% from its earlier estimate of 7.6%. This increase marks a substantial improvement from the 7.0% growth recorded in the previous fiscal year 2022-23. It also reflects the resilience and strength of the Indian economy amid evolving global dynamics.

The manufacturing sector contributed majorly to this robust performance. The sector experienced an impressive growth of 9.9% in 2023-24, demonstrating a stark turnaround from the (2.2%) growth registered in the previous year. These trends, highlight the sector's pivotal role in driving the nation's economic expansion.

This accelerated growth has propelled the Indian economy to a milestone of US\$ 3.5 Trillion, setting the stage for achieving the ambitious US\$ 5-Trillion target in the coming years. With continued robust performance across key sectors, India is well-positioned to capitalise on this momentum and drive further economic expansion.

As India progresses towards its US\$ 5-Trillion GDP target, it will be crucial to invest strategically in infrastructure, innovation, and sustainable development will be crucial. The Government's focus on policy reforms and fostering a conducive business environment will further enhance growth prospects. Ultimately, this approach will ensure that the Country remains a key player in the global economic landscape.

## OUTLOOK

The momentum of economic activity seen in 2023-24 is expected to continue, supported by a growing investment cycle. This bolstered investment, in turn, is likely to be driven by Government capital expenditure and policy incentives like the Production Linked Incentive (PLI) schemes. Significant investments under the PLI schemes have led to increased capacity utilisation, higher production levels, and the creation of direct and indirect employment opportunities.

Private corporate investments are showing signs of revival, with optimism in the services and infrastructure sectors. The Government's focus on infrastructure development, as highlighted in the Interim Union Budget for 2024-25, aims to further stimulate private investments in critical areas like railways, roads, and renewable energy. Amid these positive developments, inflation remains a key consideration, with the 2024-25 trajectory expected to be influenced by uncertain food inflation dynamics.

**OPPORTUNITIES AND THREATS**

**Opportunities**

**Government Initiatives**

The Interim Union Budget 2024-25 not only lays the foundation for housing policies but also propels India towards a future marked by robust infrastructure and economic growth. The strategic initiatives outlined in the budget, coupled with a focus on capex, position the housing and commercial real estate sectors for sustained expansion, creating a positive impact on the broader economy.

The budget announced a housing scheme aimed at supporting the middle class in realising the dream of home ownership. The Government has committed to construct close to 2 Crore more homes under the Pradhan Mantri Awas Yojana (PMAY) rural scheme. This is a strategic move aimed at providing a substantial push to the ambitious ‘Housing for All’ agenda.

**Sustainable Furniture**

Amid growing concerns regarding sustainability and the carbon footprint of furniture, new methods and innovative

possibilities for using wood products have developed rapidly. MDF is applied in various kinds of inexpensive furniture such as bookshelves, entertainment centres, and tabletops, among others. It is also used in making pre-fabricated furniture. This material lowers manufacturing costs since it is economical and can be produced easily. Furthermore, MDF finds widespread use in the creation of flat-pack furniture owing to its cost and customisability.

**Trends in Commercial Spaces**

Commercial organisations are increasingly focused on creating more adaptable and agile work environments. This shift involves the adoption of open floor designs and activity-based workstations, driving a growing demand for modular and ergonomic office furniture.

**Growth of Residential Construction**

The rising construction industry in India is a significant factor driving market growth across the country. This rise can be primarily attributed to the increasing application of MDF Board and other wood based products in building and interior design, which is boosting market growth. **Shifting Consumer Preferences**

Currently, consumers have turned more design conscious when purchasing furniture. They seek products that not only provide comfort and functionality but also align with their aesthetic sensibilities. The rise of social media and online interior design platforms has exposed consumers to numerous design inspirations. This trend has led to an increased demand for unique and aesthetically pleasing furniture pieces.

A significant unorganised sector in the Indian laminate and panel board market gives rise to pricing disparities and quality issues, affecting organised players.

#### Infrastructure Challenges

Logistics and distribution challenges in certain regions of India can affect the efficient delivery of laminate and MDF board products.

### Counterfeit Products

The prevalence of counterfeit laminate and MDF board products undermines the reputation of genuine manufacturers and results in revenue loss.

### Supply Chain Disruptions

**CORPORATE GOVERNANCE REPORT (CONTD.)****(o) Commodity price risk or foreign exchange risk and hedging activities:**

In order to manage the Company's Foreign Exchange exposure towards exports, imports and foreign currency liabilities, the board in every quarter discusses about the foreign exchange exposure and takes appropriate actions to control the Foreign Exchange Risk. For managing the foreign exchange risk, the Company hedges on regular basis the net outstanding of foreign currency exposures to mitigate the foreign currency risk. In the Financial Year 2023-24, the Company hedged the Foreign Exchange by taking Plain Vanilla Option, Forward Contract and other similar options to mitigate adverse movement of foreign currency, if required. The unhedged foreign currency exposure has a natural hedge. Thus, the Company is reducing the majority of foreign exchange risk by proper planning.

The Company has not any direct impact of commodity price movement like major fluctuation of crude prices. However, it has an indirect impact on the Company since some of our chemical consumption is connected with crude prices and Company is taking required steps for that.

**VII- 26. Overview of the entity's material responsible business conduct issues.**

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format.

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1.	Customer delight	Opportunity	Customer Relationship Management (CRM) plays a significant part in any business. It aids in improving customer satisfaction and retention rates and helps us better understand our customers.	We have comprehensive CRM practices and a strong customer loyalty program. There is strong engagement with our customers through diverse channels viz websites, email, and social media.	Positive
2	Sustainability supply chain	Opportunity	Businesses are under increased pressure from investors, customers, and authorities to lower environmental, social and governance (ESG) risk exposures in their supply chains.	At Rushil Décor Limited, we see it as an opportunity to integrate the ESG aspect in our supply chain which can effectively reduce the overall risk. From supplier / vendor diversification to sustainable sourcing we have taken huge strides in the supply chain management. We ensure sustainable sourcing for our operations which promotes the development of local communities, generates job opportunities, streamlines transportation, and has a major impact in reducing carbon dioxide emissions. Close to 60% of our sourcing is done from domestic vendors and producers.	Positive

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
4	Climate change, energy, and emissions	Risk / Opportunity	Climate change poses a significant risk on the wood business sector because Agro Forestry wood is prime raw material in the MDF Product. In the same way, paper is the main raw material for the Laminated Sheet Business. Furthermore, the industry may also face additional costs to adapt to these changes. Our commercial activities incur significant overhead expenditures with energy being one of them. A proper energy management system with renewable energy integration is pivotal for the Company to reduce operational energy cost and carbon footprint.	Being cognisant of the potential risk due to climate change, the Company is involved in Agro Forestry and mechanism for sustainable development. Further we have systems to track and minimise energy consumption in our factories/plants.	Negative / Positive
5	Talent management and retention	Risk	Overall, effective talent management is crucial in mitigating the risks associated with managing human capital. Failing to attract and retain employees by providing them rewarding careers may lead to loss of skillful employees in an organisation.	We carry out assessment to assess potential in personnel and determine roles and leadership responsibilities. Through various processes we aim to identify and build a strong leadership pipeline at every stage, developing talent through robust development journeys. Following are the two key talent processes: (1) Leadership Assessment and Development for identification and development of future Leaders, and (2) Talent Identification and Development Initiative (TIDI) for identification and development of high potential Heads of Department (HoDs). Dialog is an annual career conversation process which enables structured focused conversations that incorporate constructive feedback and set a development plan for the year ahead. Frequent Email Communication(s) is our continuous employee engagement platform which gathers continuous feedback from employees across levels. It provides a mechanism for leaders to hear the voice of our employees thereby promoting trust and transparency.	Negative

The Financial Statements have been prepared on the historical cost convention on accrual basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle. Accordingly, all assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in Ind AS 1 – 'Presentation of Financial Statements' and Schedule III to the Companies Act, 2013.

### (c) USE OF ESTIMATES :

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting year end. **(n) LEASE**

**Operating Lease**

As a lessee

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company, as lessee, are classified as operating leases. Payments made under operating leases are charged to the Statement of Profit and Loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases.

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgment. The Company uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate. The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered

by an option to terminate the lease if the Company is reasonably certain not to exercise that option. In assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease. **(x) CRITICAL ACCOUNTING JUDGMENTS, ASSUMPTIONS AND KEY SOURCES OF ESTIMATION UNCERTAINTY**

The preparation of the Standalone Financial Statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities at the date of the financial statements. Estimates and assumptions

are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

**a) Judgements**

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the standalone financial statements:

**(i) Determination of Functional Currency**

Currency of the primary economic environment in which the Company operates ("the functional currency") is Indian Rupee (₹) in which the Company primarily generates and expends cash. Accordingly, the Management has assessed its functional currency to be Indian Rupee (₹) i.e. ₹ in Lakhs. .

**(ii) Evaluation of Indicators for Impairment of Property, Plant and Equipment**

The evaluation of applicability of indicators of impairment of assets requires assessment of external factors (significant decline asset's value, significant changes in the technological, market, economic or legal environment, market interest rates etc.) and internal factors (obsolescence or physical damage of an asset, poor economic performance of the asset etc.) which could result in significant change in recoverable amount of the Property, Plant and Equipment.

**b) Assumptions and Estimation Uncertainties**

Information about estimates and assumptions that have the significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may differ from these estimates.

**(i) Useful lives of Property, Plant and Equipment/Intangible Assets**

Property, Plant and Equipment/ Intangible Assets are depreciated/amortised over their estimated useful lives, after taking into

**NOTES TO THE STANDALONE FINANCIAL STATEMENTS (CONTD.)**  
**RUSHIL DECOR LIMITED (CIN : L25209GJ1993PLC019532)**

account estimated residual value. The useful lives and residual values are based on the Company's historical experience with similar assets and taking into account anticipated technological changes or commercial obsolescence. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation/amortisation to be recorded during any reporting period. The depreciation/amortisation for future periods is revised, if there are significant changes from previous estimates and accordingly, the unamortised/depreciable amount is charged over the remaining useful life of the assets.

**(ii) Contingent Liabilities**

In the normal course of business, Contingent Liabilities may arise from litigation and other claims against the Group. Potential liabilities that are possible but not probable of crystallising or are very difficult to quantify reliably are treated as contingent liabilities. Such liabilities are disclosed in the Notes but are not recognised. Potential liabilities that are remote are neither recognised nor disclosed as contingent liability. The management decides whether the matters need to be classified as 'remote', 'possible' or 'probable' based on expert advice, past judgements, experiences etc.

**(iii) Evaluation of Indicators for Impairment of Property, Plant and Equipment**

The evaluation of applicability of indicators of impairment of assets requires assessment of external factors (significant decline in asset's value, economic or legal environment, market interest rates etc.) and internal factors (obsolescence or physical damage of an asset, poor economic performance of the idle assets etc.) which could result in significant change in recoverable amount of the Property, Plant and Equipment and such assessment is based on estimates, future plans as envisaged by the Company.

**(iv) Provisions**

Provisions and liabilities are recognised in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability requires the application of judgement to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.

**Purpose of Reserves :**

- a) **Capital Redemption Reserve :** As per Companies Act 2013 capital redemption reserve is created when company purchases its own shares out of free reserves or securities premium. The reserve is utilised in accordance with the provisions of section 69 of the Companies Act 2013.
- b) **Security Premium :** Securities premium is used to record premium received on issue of shares. The reserve is utilised in accordance with the provisions of the Companies Act 2013.

Particulars	2023-24	2022-23
Employers contribution to provident fund	177.82	147.62

(i) Defined Contribution Plan: Employee benefits in the form of Provident Fund are considered as defined contribution plan and the contributions to Employees Provident Fund Organisation established under The Employees Provident Fund and Miscellaneous Provisions Act 1952 and Employees State Insurance Act, 1948, respectively, are charged to the profit and loss account of the year when the contributions to the respective funds are due.

**RUSHIL DECOR LIMITED (CIN : L25209GJ1993PLC019532)**

- (ii) Defined Benefit Plan: Retirement benefits in the form of Gratuity are considered as defined benefit obligation and are provided for on the basis of third party actuarial valuation, using the projected unit credit method, as at the date of the Balance Sheet.

Every Employee who has completed five years or more of service is entitled to Gratuity on terms not less favorable than the provisions of The Payment of Gratuity Act, 1972.

As the Company has not funded its liability, it has nothing to disclose regarding plan assets and its reconciliation.

- (iii) **Major risk to the plan**

**A. Actuarial Risk:**

It is the risk that benefits will cost more than expected. This can arise due to one of the following reasons:

**Adverse Salary Growth Experience:** Salary hikes that are higher than the assumed salary escalation will result into an increase in Obligation at a rate that is higher than expected.

**Variability in mortality rates:** If actual mortality rates are higher than assumed mortality rate assumption than the Gratuity Benefits will be paid earlier than expected. Since there is no condition of vesting on the death benefit, the acceleration of cash flow will lead to an actuarial loss or gain depending on the relative values of the assumed salary growth and discount rate.

**Variability in withdrawal rates:** If actual withdrawal rates are higher than assumed withdrawal rate assumption than the Gratuity Benefits will be paid earlier than expected. The impact of this will depend on whether the benefits are vested as at the resignation date.

**B. Investment Risk:**

For funded plans that rely on insurers for managing the assets, the value of assets certified by the insurer may not be the fair value of instruments backing the liability. In such cases, the present value of the assets is independent of the future discount rate. This can result in wide fluctuations in the net liability or the funded status if there are significant changes in the discount rate during the inter-valuation period.

**C. Liquidity Risk:**

Employees with high salaries and long durations or those higher in hierarchy, accumulate significant level of benefits. If some of such employees resign/retire from the Company there can be strain on the cash flows.

**D. Market Risk:**

Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits & vice versa. This assumption depends on the yields on the corporate/government bonds and hence the valuation of liability is exposed to fluctuations in the yields as at the valuation date.

**E. Legislative Risk:**

Legislative risk is the risk of increase in the plan liabilities or reduction in the plan assets due to change in the legislation/regulation. The government may amend the Payment of Gratuity Act thus requiring the companies to pay higher benefits to the employees. This will directly affect the present value of the Defined Benefit Obligation and the same will have to be recognised immediately in the year when any such amendment is effective.
