Dear Sirs,

Re : L&T wins (Mega*) Orders to Build Advanced Grid Systems
Orders include HVDC Transmission Line & GIS packages in Middle East

We send herewith a copy of Press Release that is being issued by the Company today, in connection with the above.

We request you to take note of the same.

Thanking you,

Yours faithfully,
for **LARSEN & TOUBRO LIMITED**

L&T wins (Mega*) Orders to Build Advanced Grid Systems

Orders include HVDC Transmission Line & GIS packages in Middle East

Mumbai, September 24 2024: The Power Transmission & Distribution (PT&D) vertical of Larsen & Toubro has won new orders in the Middle East for expanding and strengthening the electricity grids at high voltage levels.

Saudi Arabia

The different operating regions in Saudi Arabia's national electricity network are being interconnected through High Voltage Direct Current links that enable exchange of power between regions and enhanced system resilience. L&T has secured orders to establish ± 500 kV HVDC Transmission Links associated with these interconnections.

L&T has also won orders for three more packages involving two 380kV overhead transmission lines and a bulk supply 380kV Gas Insulated Substation. These elements contribute significantly to the renewable generation interconnection and fortification of the grid.

United Arab Emirates

In Abu Dhabi, L&T has received an order to build two major 400kV Gas Insulated Substations. In addition to civil works, the scope also involves Series Current Limiting Reactors, Auto Transformers, related control, protection, substation monitoring & alarm systems including fault and power quality monitoring, telecommunication systems and integration with the Load Dispatch Centre. These substations will enhance the power transfer capacity of the electricity grid.

Commenting on the development **Mr T. Madhava Das, Whole-Time Director & Senior Executive Vice President (Utilities) - Larsen & Toubro** said: "The fortification and modernization of transmission systems is the foremost step in establishing a secure, resilient grid capable of handling variable renewable generation in an evolving energy market. We thank our customers for entrusting these projects with us".

Background:

Larsen & Toubro is a USD 27 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for over eight decades.

*** Project Classification**

<i>Classification</i>	Significant	Large	Major	Mega	Ultra-Mega
<i>Value in ₹ Cr</i>	1,000 to 2,500	2,500 to 5,000	5,000 to 10,000	10,000 to 15,000	> 15,000
