New Delhi: Biotechnology firm Biocon said its subsidiary has received approval from the US health regulator to market a generic medication to treat chronic heart failure. Biocon Pharma has received approval of its ANDA for Sacubitril/Valsartan Tablets, in 24 mg/26 mg, 49 mg/51 mg and 97 mg/103 mg strengths, from the USFDA, the firm said. **PTI**

GST collection in August rises 10% on robust consumption

POSITIVE SIGN. The mop-up seen getting a boost in the upcoming festival season

Shishir Sinha
New Delhi

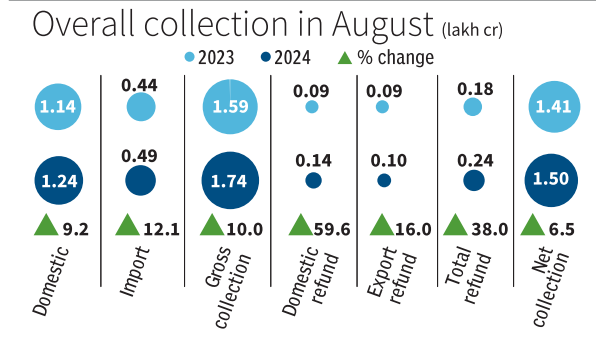

Improved compliance and robust consumption enabled the Centre and States to collect ₹1.75-lakh crore through the Goods and Services Tax (GST) in August. With this, the average monthly collection in the current fiscal has reached ₹1.82-lakh crore.

The August collection reflects goods consumed and services availed in July. Though it shows a growth of 10 per cent over August last year, on a sequential basis, it is down around 4 per cent.

Another key point is that the collection growth has remained in single digit in States such as Gujarat, Andhra Pradesh, and Tamil Nadu.

Despite this, experts believe that collection will receive a boost with the upcoming festival season.

Additionally, a special

Source: GST portal

drive to curb the use of fake Input Tax Credit (ITC) is expected to improve collections.

NET COLLECTION UP

The data from the GST portal showed that the growth in collection through imports (12.1 per cent) was higher than domestic sources (9.2 per cent). At the same time, the refund was higher for both domestic and export

sources, all of which affected net collection, which rose 6.5 per cent to ₹1.50-lakh crore. The net collection recorded a growth of over 14 per cent in July.

The Centre and States will come together to conduct the second all-India drive to detect suspicious or fake GSTINs. This initiative aims to carry out necessary verifications and take corrective actions to remove fraudulent

billers from the GST system, thereby protecting government revenues.

Commenting on the overall collection, M S Mani, Partner with Deloitte India, said that the 10 per cent increase in collections on a YTM basis at the start of the festival season for the year indicates that consumption is robust and will only improve further in the coming months. "This would give renewed confidence that the collection targets for the year would be achieved," he said.

ROBUST ECONOMY

According to Saurabh Agarwal, Tax Partner with EY, despite a decline in net GST revenue due to increased refunds, the continued growth in gross GST collections indicates a robust economy. The shift towards self-reliance is evident in the decreased imports and increased exports.

Total EV registrations decline to a 14-month low in August

G Balachandrar
Chennai

E3Ws outpaced electric two-wheelers in terms of volumes in August

Total EV (electric vehicle) registrations dropped to a 14-month low in August, declining both over month and year.

Both electric two- and three-wheelers saw lower volumes compared to July. However, electric three-wheelers outpaced electric two-wheelers in terms of volumes in August.

Total EV registrations (all segments put together) in August declined 17 per cent at about 1.06 lakh units compared with 1.28 lakh units in July, according to Vahan data (as of September 1).

The electric two-wheeler segment saw a marked dip in sales, with registrations dropping to 46,085 units in August, down from 61,498 units in July and 62,646 units in August 2023. The electric three-wheeler segment managed to outpace two-wheelers, registering 54,861 units in August, al-

though this was still lower than the 59,151 units in July and the 56,581 units recorded in August 2023.

In the electric two-wheeler segment, market leader Ola Electric's scooter volumes fell to 12,628 units in August, down from 18,602 units in July.

TI Clean Mobility, the electric vehicle arm of the Murugappa Group, sold about 598 units in August, up slightly from 580 units in July.

Electric car registrations also experienced a decline, falling to 4,755 units in August compared to 7,797 units in July. Similarly, Bajaj Auto followed with 4,030 units, up from 3,694 units in July. YC Electric Vehicle sold 3,545 units, slightly down from 3,651 units, while Piaggio saw sales drop to 1,558 units from 1,959 units.

Bank credit to commercial real estate soars in July on high demand for office space

K Ram Kumar
Janaki Krishnan
Mumbai

Bank credit to the commercial real estate sector rose to ₹4.85-lakh crore as of July 26, from ₹4.38-lakh crore on July 28, 2023. The loan growth was driven by higher activity in office leasing as also stable, predictable cash flows. Other segments, such as warehousing, data centres, and retail, are also becoming more attractive.

While growth this year has slowed to 10.6 per cent compared to 44.9 per cent last year, it is on a higher base,

and the period 2022-23 saw unprecedented commercial activity after the lull during the pandemic years.

OFFICE LEASINGS

According to several independent property consultants, office leasing is expected to hit 50-60 million square feet in 2024. In the first half, leasing crossed 29 million square feet, a rise of 19 per cent year-on-year. In the June quarter, leasing activity increased 50 per cent across Mumbai, Delhi-NCR, and Bengaluru, three major office markets.

"Indian commercial real

estate is highly attractive to banks for lending due to its potential for high returns, low vacancy rates and strong long-term corporate tenants in sectors like IT, ITES, BFSI, cutting-edge RD, engineering design and services, co-working and managed offices," said Saurabh Shatdal, Managing Director, Capital Markets and Head-Retail, Cushman & Wakefield, Global Capability Centres are also, to some extent, driving the demand for office space in India. According to

C&W, India is projected to have 2,400 GCCs by 2030, up from 1,600 now.

CRISIL UPBEAT

Crisil Ratings, which is upbeat on the sector, said in a note that improved absorption will stem rising vacancy levels, partly aided by denotification in under-performing special economic zones (SEZs) units. "This will improve cash accruals of Crisil-rated CRE entities and, in turn their credit profiles." A Crisil Rating analysis of of-

office space owners with a debt of over ₹70,000 crore and total leasable area of 150 million square feet, accounting for a fifth of Grade A office space in seven top cities, indicated as much.

The buoyancy is not only in office space but in other emerging segments in the commercial sector as well. "It's important to note that while traditional office spaces remain a key focus, other segments like warehouses, data centres and even retail spaces such as

such as Blackstone in logistics and data centres, has created confidence among lenders on the stability of cash flows. India's total data centre capacity is projected to increase over three times to 3.3 GW by 2028, while warehousing stock is seen rising over 50 per cent to close to 600 million square feet by 2027.

malls are gaining traction," said Himanshu Jain, VP, Sales/Marketing, Satellite Developers. "This diversification reduces the overall risk for lenders as these segments offer stable and often long-term revenue streams."

FPIs bullish on India, but flows into equity dip to ₹7,320 crore in August

KR Srivats
New Delhi

Foreign Portfolio Investors (FPIs) remained net buyers of equity for the third straight month in August, but inflows moderated to ₹7,320 crore, depositories data showed. The net investment in August was substantially lower than the inflows of ₹32,365 crore in July and ₹26,565 crore in June 2024.

Domestic and global factors, including higher capital gains tax announced in the Budget, high equity valuations, yen carry trade unwind and US recession fears have driven this moderation in FPI flows, experts said. So far this calendar year, FPI inflows totalled ₹42,886 crore. In the April-August period, FPI inflows stood at ₹31,992 crore. FPIs had, this past week, made net investments

of ₹9,200 crore, reversing the net selling trend seen in earlier three weeks. On Friday alone, FPIs pumped ₹5,318.14 crore into equities while domestic institutional investors (DIIs) were net buyers for ₹3,198.07 crore.

Capital market experts, however, feel that FPIs recent buying interest is unlikely to sustain in September, given the rich valuations. The likely US Fed rate cut in September may reignite FPI flows into emerging markets, but India may not be a big beneficiary, they said.

EXPENSIVE MARKET

VK Vijayakumar, Chief Investment Strategist, Geojit Financial Services, said that the fundamental reason for the poor FPI interest is the high valuation in the Indian market. With Nifty now trading at above 20 times the es-

timated FY25 earnings, India is the most expensive market in the world now, he said. "FPIs have opportunities to invest in much cheaper markets and therefore, their priority is markets other than India," Vijayakumar added.

Vipul Bhowar, Director, Listed Investments, Waterfield Advisors, said that the unwinding of the yen carry trade on August 24 significantly impacted FPI behaviour, leading to substantial sell-offs in Indian equities. "This unwinding coincided with rising fears of a potential recession in the US and disappointing economic data, which further exacerbated the market's reaction." The recent announcement of increased capital gains tax on equity investments in India has also prompted FPIs to sell their holdings, shifting funds towards safer debt instruments, he added.
