#### **Highly fragmented and competitive industry**

In paper division- The Company is operating in highly competitive and fragmented industry. It is exposed to intense competition from several players operating in the industry. The kraft paper manufacturers in India are exposed to the risk of volatility in waste paper prices, largely due to intense competition. On account of competitive pressures, players face challenges in passing on increased costs to end users. Business risk profile will remain constrained by exposure to the downturn in the paper industry. The rise in the prices of duplex paper over that of waste paper is expected to be gradual, rendering the profitability susceptible to volatility in the price of paper. Furthermore, any abrupt change in raw material prices due to supply-demand scenario can lead to distortion of prices and affect the profitability of the company.

In hotel division- The hospitality sector is vulnerable to downturns in both the domestic and global economy. It is also sensitive to high competition and cyclical. In a downturn, premium hotels are more negatively impacted because, despite high operating costs, their revenue per available room falls more precipitously than that of mid-sized or budget hotels. As a result, the cash flow from premium properties is more vulnerable to economic downturns. Also, the Indian hotel business is seeing fierce rivalry as a result of the expansion of domestic players and the growing presence of overseas competitors.
