***Bilateral trade to triple *Cuts shipping time by 40%**

Chennai-Vladivostok Maritime Corridor game changer, says Thangappan

Milestone in Indo-Russian friendship

Chennai, Aug 7: In a significant development for global logistics, the proposed Chennai-Vladivostok Eastern Maritime Corridor is set to reduce shipping time between India and Russia by 40%, cutting the current 40-day journey through the Suez Canal down to just 24 days. This announcement was made by P. Thangappan, General Secretary of the Indo-Russian Chamber of Commerce, at a recent BRICS event in Chennai.

The event, organized by BRICS Generation, focused on various aspects of BRICS cooperation and highlighted the potential of BRICS Plus countries. Thangappan's

speech emphasized the critical role of BRICS in addressing logistics constraints exacerbated by geopolitical tensions in the West.

Thangappan noted that conflicts in regions such as West Asia have disrupted global shipping routes, leading to renewed interest in the Chennai-Vladivostok Corridor. Enhanced freight and passenger connectivity between Southern India and Russia's Far East is expected to open new avenues for bilateral trade, including the export of machinery, auto parts, and engineering goods from India. This corridor aims to progressively integrate the economies of the two nations.

The Chennai-Vladivostok Maritime Corridor, spanning 10,300 kilometers, was initially conceived during Prime Minister Narendra Modi's visit to Vladivostok for the

Eastern Economic Forum in September 2019. An MoU was signed to develop this sea route, intended to transport coal, oil, liquefied natural gas, fertilizers, containers, and other

cargo already part of bilateral trade.

The plan also envisions ships calling at other Russian and international ports.

With the current geopolitical climate creating logistical nightmares for global trade, including the ongoing conflicts in Ukraine, Israel, Syria, and Somalia, the prospects for the Chennai-Vladivostok Corridor have gained considerable traction. Over 100 participants from Indian companies and government agencies attended the recent BRICS event, reflecting the growing interest on both sides.

Thangappan highlighted that the Eastern Maritime

Corridor's 5,608 km savings compared to the Suez Canal route will "reduce logistics costs immensely and boost efficiency in cargo transportation between the two countries." He projected that within the next 20 years, this project will become a major economic growth catalyst for emerging economies.

Currently, Russia-India bilateral trade stands at \$48 billion and is expected to surpass \$50 billion this fiscal year. The Chennai-Vladivostok Corridor is poised to further strengthen this trade relationship, offering a faster, more cost-effective route for goods between India and Russia.

25-30% of non-obese adults also face high bad cholesterol levels

Chennai, Aug 7: In today's health-conscious world, understanding the relationship between obesity and bad cholesterol is essential for maintaining optimal heart health. Research by British Medical Journal highlights that high levels of LDL-C (low-density lipoprotein cholesterol), often dubbed as "bad cholesterol," can be present even in individuals who are not obese. This underscores the importance of regular cholesterol screenings for everyone, regardless of body weight and BMI.

Recent guidelines from

the Lipid Association of India (LAI) in 2024 emphasize on tailored LDL cholesterol targets approach based on individual risk factors, aiming to promote optimal heart health.

Dr. Nagendra Boopathy S, Professor of Cardiology, Sri Ramachandra Institute

of Higher Education and Research, Chennai, says, "Understanding the relationship between obesity and elevated LDL-C levels is essential. In my practice, 25-30% of individuals with high LDL cholesterol are not obese. It's a myth that high LDL happens only

in obese patients. Yes, obese patients are at higher risk than non-obese patients. However, being non-obese does not make an individual immune to high LDL levels. This emphasizes the importance of regular cholesterol screening and lipid testing."

Pomeroy Technologies forays into Indian market

Chennai, Aug 7: Pomeroy Technologies, LLC an industry leader in technology solutions and services has forayed into the Indian market with the launch of Pomeroy Technologies India Private Limited (Pomeroy India). The expansion into India is a strategic move designed to enhance service offerings to Pomeroy's existing and prospective clients, primarily in North America, with a global

reach. The objective is to cultivate a robust talent pool of technology experts capable of delivering unparalleled solutions worldwide.

Pomeroy is recognized across North America and Europe for its ability to deliver best-in-class technology solutions and services. The company's comprehensive portfolio includes managed services, professional services, technology and lifecycle solutions,

and strategic technical staffing. "This launch reflects our continued commitment to excellence and our focus on strategic growth," added Pomeroy CEO Tom Signorello. "As our company continues to expand its global footprint, we remain dedicated to delivering value-driven solutions that empower businesses to thrive in an ever-evolving digital landscape."

Amazon Pay also offers a range of benefits for customers, including 5% cashback on shopping with the Amazon Pay ICICI bank credit card (terms and conditions may apply), no-cost EMI options on Amazon Pay ICICI credit card.

Refex registers 74.78% growth

Chennai, Aug 7: Refex Industries Limited (RIL), a leading conglomerate in India, reported its financial results for the first quarter ending June 30th, 2024. The company has registered a 74.78% in revenue growth when compared to Q4 FY24.

The highlights of the Q1 FY25 results include quarter-on-quarter increase in revenue by Rs 252.27 crores from Q4 FY24 to Q1 FY25, year-on-year increase in EBITDA by Rs 8.74 crores from Q4 FY24 to Q1 FY25 and

Chennai, Aug 7: BSH Home Appliances Pvt. Ltd, a subsidiary of BSH Hausgeräte GmbH, a global leader in the home appliance industry has introduced its latest range of 'Made-in-India' Bosch and Siemens front-loading washing machines. With a capacity to handle 9-10kg loads, advanced energy efficiency, and

cutting-edge technology, these washing machines are designed to meet all laundry needs with precision and power. Available in an elegant palette of Silver, Dark Grey, and Dark Lake, these machines not only offer robust performance but also add a touch of sophistication to your laundry space.

The new range is designed with a deep understanding of consumer needs in India, seamlessly integrating innovative features that deliver the perfect blend of gentle care and robust performance, ensuring true care for your entire wardrobe.

Bosch and Siemens front loading washing

machines are India's first to pass the TUV test, guaranteeing that even after 50 washes, your clothes retain their fabric integrity and color vibrancy. This test is a testament to the brands commitment to providing reliable, high-quality care that preserves the look and feel of your garments wash after wash.

Sucralose safe in small doses for diabetic patients

Chennai, Aug 7: The Madras Diabetes Research Foundation (MDRF), a non-profit organization and a premier medical research institute for diabetes and its complications, recently published India's first study on the effect of sucralose on cardio metabolic risk factors among adults with type 2 diabetes (T2D). Intending to explore the effect of replacing table sugar (Sucrose) with artificial sweetener Sucralose[1] in coffee/tea in Asian Indians, the randomized controlled trial (RCT) examined 179 Indians with T2D for 12 weeks.

The findings reveal that small quantities of Sucralose in daily beverages like coffee

and tea have no adverse effect on glycaemic markers like glucose or HbA1c levels. On the other hand, the study shows a slight improvement in body weight (BW), waist circumference (WC), and body mass index (BMI).

The study comes at a time when the WHO cautioned against using NNS to control body weight, but clearly stated that the guidelines were mainly meant for

people without diabetes. However, the WHO warning raised concerns among healthcare stakeholders and the public regarding the use of NNS, even among those with T2D.

Senior Diabetologist Dr V. Mohan, Chairman of MDRF, who led the study said, "This study is very relevant to India as the dietary habits of Indians vary significantly when compared to the rest of the world. Typically,

in India NNS is used to replace sugars in daily beverages like tea or coffee. This can help in cutting down calories, sugar intake and increase dietary compliance. Judicious use of NNS like sucralose within the permissible ADI (Acceptable daily intake), in daily beverages like tea and coffee appears to be safe. He added that more studies are underway on the safety and efficacy of Sucralose."

PUBLIC NOTICE
My client J. SARITHA, (Aadhar No. 490470085538) W/O. Jayaveran, Hindu aged about 46 Years residing at No.47, Erikarai Street, Nesappakkam Kalaingar Karunanidhi, Nagar, Chennai-600 078.
