# June Services PMI rises to 60.5 on surge in international sales

**SUPER-ACTIVE.** Firms saw rise in orders, output; hiring at fastest pace in over 19 years

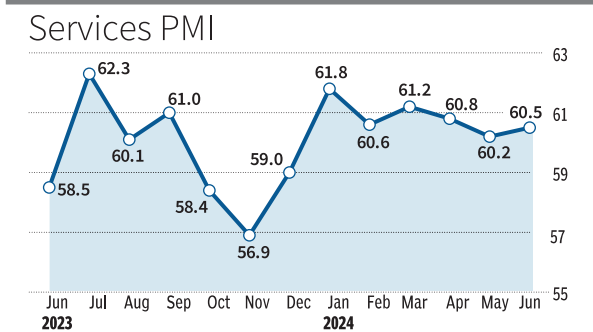

**Shishir Sinha**  
New Delhi

Unprecedented surge in international sales helped the services sector to perform well in June. The Purchasing Managers' Index (PMI) for services rose to 60.5 as against 60.2 of May and services firms increased their staffing level.

Services has a share of over 53 per cent in gross value added (GVA). Good performance of services sector was followed by a similar trend in manufacturing. PMI for manufacturing rose to 58.3 in June, 0.8 percentage points higher than in May.

It was supported by rise in new orders and output. Consequently, firms increased hiring at the fastest pace in over 19 years.

"Activity growth in India's service sector accelerated in

June, with the index rising by 0.3 ppt to 60.5, led by an increase in both domestic and international orders.

**STAFFING**

This encouraged services firms to increase their staffing levels at the fastest pace since August 2022," Pranjal Bhandari, Chief India Economist at HSBC said. The index is prepared on the basis of responses from purchas-

ing executives of 400 firms. Based on responses, the survey report mentioned that positive client appetite encouraged service providers in India to recruit additional staff at the end of the first fiscal quarter. The pace of job creation was marked as the strongest in 22 months. Anecdotal evidence highlighted a mixture of short term and permanent hires for junior, medium- and senior level po-

sitions, it added. The report listed Asia, Australia, Europe, Latin America, the Middle East and the US as sources of new work. Though companies recorded rise in the cost, but it wasn't a sharp rise. "Input costs rose at a moderate pace, resulting in a softer uptick in output charges in June," Bhandari said. Reportedly due to higher food, fuel and labour costs, service providers recorded a moderate increase in average expenses. The pace of inflation was the weakest in four months. Subsequently, selling prices rose at the slowest pace since February. Additional recruitment added to firms' labour expenses and average cost burdens. Panellists reported higher prices for food (chicken, eggs and vegetables) and fuel. Average input prices rose at a below-trend rate, softest in four months.

# Self-declaration for advertisers limited to food, health sectors

**Meenakshi Verma Ambwani**  
New Delhi

Ashwini Vaishnaw, Minister for Information and Broadcasting

The Information & Broadcasting Ministry has decided to ease norms of self-declaration certificate (SDC) for advertisers in a big relief for the advertisers.

In an advisory issued on Wednesday, the Ministry stated that advertisements issued for products related to food and health sectors will be required to upload an annual self-certificate on the Broadcast Seva Portal and Press Council of India portal.

This advisory supersedes all previous advisories by the Ministry, which means the mandate of the SDC has been limited to only the food and health sectors, industry sources pointed out.

"In light of the directions of the Hon'ble Supreme Court of India, and in supersession of previous Advisories dated 03.06.2024 and 05.06.2024, advertisers/advertising agencies issuing ad-

vertisements on the internet, etc. for the record."

So far, advertisers and agencies across sectors were mandatorily required to upload a self-declaration certificate before releasing any new advertisements. These norms had come into force on June 18.

However, various ad and media industry bodies had urged the Ministry to limit the mandate of SDCs for only health and food sectors. They had also suggested that uploading of SDC should be required to be done only once a year and not for every advertisement released.

**'ADHERENCE TO LAW'**

"It is clarified that it shall be the responsibility of the advertisers/advertising agencies to ensure that every advertisement being issued by them is in adherence to the applicable Indian laws, rules and regulations in letter and spirit," the I&B Ministry added in its advisory.

**PROOF OF SDC**

It added that advertisers and agencies need to "make available the proof of uploading the self-declaration to the concerned media stakeholders, such as TV channels, newspapers, entities in-

# 'Welfare measures could boost rural demand, consumption'

**Our Bureau**  
Mumbai

While India's GDP growth is expected to modestly slow down in the remaining three quarters of 2024, potential Government focus on welfare measures could help boost the rural demand and support private consumption, according to a HSBC Global Private Banking (HSBC GPB) report.

"We also expect a pick-up in private capex and FDI, with the election uncertainty behind us," HSBC GPB said, adding India's economic momentum remains robust. In the first quarter ended March 2024, India's GDP

growth exceeded consensus estimates yet again, clocking in a 7.8 per cent year-on-year GDP growth, it added.

**ON EQUITIES**

"We maintain a mild overweight on Indian equities over the next 6-12 months as long-term fundamentals still paint a supportive backdrop," the report said.

Indian equities benefit from strong domestic investor base - both institutional and retail, light positioning from foreign investors and strong GDP growth trajectory which is expected to translate to corporate earnings growth.

The aforementioned factors should offset the con-

cerns of elevated valuation, HSBC GPB said. "We continue to favour large-cap equities over small and mid-cap equities, owing to their more defensive characteristics and cheaper valuation-

"From a sector perspective, we favour Indian banks, consumer discretionary and industrials which benefit from the booming digital economy, consumer spending and government spending push towards infrastructure and manufacturing," said James Cheo, CIO for South East Asia and India at HSBC GPB and Wealth, adding he is bullish on Indian local currency bonds.

**ON RATE CUT**

"While we acknowledge the risk of delay in RBI rate cuts, the 4-2 split vote in the June meeting points to eventual pivot to rate cuts, leading to capital appreciation (and decline in yields)," the report

said. The supportive demand-supply dynamics should allow markets to absorb any increase in supply to fund welfare scheme.

HSBC GPB noted the recent rating action by S&P, upgrading Indian sovereign ratings outlook to "positive" points to chances of a rating upgrade. "We remain sanguine on INR (Indian Rupee). INR remains one of the best performing currencies in Asia, aided by RBI's proactive stance to use its sizeable forex reserves to manage currency volatility and the structural inflows into Indian bonds," the report said.

# 8 Cabinet Committees reconstituted

**Our Bureau**  
New Delhi

The Government has reconstituted 8 Cabinet Committees with Prime Minister heading six of them. Out of remaining two, one will be headed by the Home Minister and other by the Defence Minister.

The most powerful Appointment Committee of the Cabinet, responsible for appointment of bureaucrats, will be headed by the Prime Minister.

Home Minister Amit Shah will be only member of the Committee. Cabinet Committee on Economic

Affairs (CCEA), responsible for taking key economic decisions, will be a 10-member committee.

Apart from Defence, Home, Finance, Surface Transport and Agriculture Ministers, four other Ministers - Commerce & Industry, Education, Heavy Industries and Panchayati Raj - are part of the Committee.

Cabinet Committee on Parliamentary Affairs, which recommends calling of the Parliamentary Sessions will be headed by Defence Minister Rajnath Singh and has 9 other Ministers mainly Home, Finance and Health besides oth-

ers. Cabinet Committee on Political Affairs will be the largest among all committees with 14 members including PM as Chairman.

**'SECURITY' PANEL**

Cabinet Committee on Security will be an all-BJP-ministers-as-members committee with PM as Chairperson and Home, Defence, Finance and External Affairs Ministers as Members. Two other Committees - one on investment and growth and the second on skill, employment and livelihood - will be headed by Prime Minister and will have 13 and 12 members respectively.

# Banks must step up efforts against 'mule accounts': RBI

**Our Bureau**  
Mumbai

Banks across the country should step up efforts against 'mule accounts', which are used to launder the proceeds of fraud schemes, Reserve Bank of India Governor Shaktikanta Das told chiefs of banks on Wednesday.

In a meeting with the managing directors (MDs) and chief operating officers (COOs) of Public and Private Sector banks, the RBI Governor also asked them to intensify customer awareness and education initiatives, among other measures, to curb the extent of digital frauds.

The RBI has already issued instructions, which banks are required to strictly follow for the process of opening accounts and monitoring financial transactions.

The aforementioned instructions are with a view to

minimising the operations of "money mules" which are used to launder the proceeds of fraud schemes (for example, phishing and identity theft) by criminals who gain illegal access to deposit accounts by recruiting third parties which act as "money mules."

**IDLE ACCOUNTS**

Fraudsters, sometimes, can use idle accounts for receiving and transferring large funds without the knowledge of account holders.

The Governor emphasised the need for banks to ensure robust cybersecurity controls and effectively manage third-party risks.

The issue of persisting gap between credit and deposit growth was discussed at the meeting held with the top executives of banks. This was underscored by the fact that credit growth (at 18.85 per cent year-on-year) of all scheduled banks' as on June 14, 2024, outstripped de-

**ON GUARD.** RBI Governor Shaktikanta Das says fraudsters, sometimes, can use idle accounts for receiving and transferring large funds without the knowledge of account holders

posit growth (at 12.37 per cent).

**PRUDENT BALANCE**

In his June 2024 monetary policy statement, Das observed that the persisting gap between credit and deposit growth rates warrants a rethink by the boards of banks to re-strategise their business plans.

A prudent balance

between assets and liabilities has to be maintained.

In the latest financial stability report (FSR), RBI noted that despite the divergence in credit and deposit growth, elevated credit-deposit ratio and narrowing credit-GDP gap, credit growth at 16.1 per cent as on May 31, 2024 (net of merger of an HFC with a bank) remains sustainable and

Instructions have been issued to minimise the operations of "money mules" used to launder the proceeds of fraud schemes (for instance, phishing and identity theft) by criminals.

**CAUTION**

However, the central bank cautioned that credit growth beyond 18 per cent may lead to higher impairments.

The meeting also discussed the trends in unsecured retail lending in the backdrop of RBI increasing risk weights on unsecured

consumer credit and bank credit to NBFCs on November 16, 2023 to pre-empt build up of any potential risk in these segments.

Recent data suggest that there is some moderation in these loans and advances, Das had noted in his last monetary policy statement.

**COMPLIANCE**

While acknowledging the higher resilience and strength of the banking sector, the Governor impressed upon the bankers the importance of further strengthening the governance standards, risk management practices and compliance culture in banks.

The other issues that were discussed at the meeting include liquidity risk management and ALM (asset-liability management); credit flows to MSMEs; increasing the usage of Indian Rupee for cross-border transactions; and banks' participation in innovation initiatives of RBI.

# J&K lithium block 'gets no bids in second attempt'

**Reuters**  
New Delhi

Jammu and Kashmir did not receive any bids in a second attempt to auction mining rights for lithium reserves found last year, a source with direct knowledge of the matter said.

The Government in February 2023 found its first lithium deposits in J&K with estimated reserves of 5.9 million metric tons.

After it failed to get a required minimum of three bids in its first auctions in November, the block was again put up for auction in March with a May 14 deadline for bids.

The source, who declined to be identified as they were not authorised to talk to the media, said the block was likely to be given to a government agency for further exploration after no bids were made.

Ministry of Mines did not immediately respond to a Reuters request for comment.

As electric vehicles have focused on the need for lithium, used in making batteries, India has sought to secure assets overseas as well as domestically.

Analysts have questioned the composition of the deposit in Jammu and Kashmir.

# 'Solar thermal tech needs incentives'

**Rishi Ranjan Kala**  
New Delhi

The upcoming solar thermal technology, which uses heat from the sun rays to produce energy, will require incentives to make it economically viable and wider market adoption.

For the purpose, State-run Solar Energy Corporation of India (SECI) will float a tender by the end of FY25 for a 500-megawatt (MW) capacity project of solar thermal energy technology, its Chairman and Managing Director (CMD) RP Gupta said on Wednesday.

**IESW 2024**

In his address at the India Energy Storage Week (IESW) 2024, Gupta said: "SECI is expected to float a tender for 500 MW of solar thermal capacity by the end of FY25. This will be the first time in India that such a

tender would be floated on this scale. The projects under the 500 MW tender will have advanced technology where steam would be generated through heat and it would also help in running turbines."

This is also one of the innovative solutions. It will need "incentivisation" in the first instance.

But hopefully it will find its role on its own in the RE sector, he added.

The heat produced by solar thermal can be converted into electricity, which can in turn be utilised to heat water for household use and businesses, and for heated homes and offices as well.

Use of solar thermal technology to generate electricity is most popular for large, utility-scale solar projects.

The thermal energy produced by this technology can also be used for water desalination, enhancing oil recovery, food processing, chemical production and mineral processing.

**ENERGY STORAGE**

The energy storage session at IESW focused on storage for 500 gigawatt (GW) renewable energy, grid modernisation and decarbonisation of the commercial and industrial (C&I) sector, and

the role of energy storage in the electricity value chain, among other topics.

"We require energy round the clock and we let the developer find its own solution for instance, what is the kind of solar component they want to have, the wind component they want to have and the energy storage component they want to have. Let them design it and offer round the clock energy to us," Gupta said.

**PRICING**

Emphasising on the waiver of transmission level for charging and discharging, CERC Chairperson Jishnu Barua said: "A lot of new developments have taken place and prices are bound to come down. Energy storage has a big role in stabilising the grid, enhancing reliability and optimising use of RE. From energy access and availability, electricity sector is focusing on stabilising it."
