PRESS RELEASE

## Infosys Foundation USA joins forces with Congressional App Challenge to Champion STEM Education across the U.S.

**Washington D.C., United States – July 12, 2024:** [Infosys Foundation USA](#), a non-profit organization dedicated to expanding computer science, maker, and STEM education, today announced that it is a sponsor of [The Congressional App Challenge](#).

The Congressional App Challenge is an official initiative of the U.S. House of Representatives, where members of Congress host contests in their districts for middle school and high school students, encouraging them to learn to code and inspiring them to pursue careers in computer science. Since its inception in 2015, the Challenge has inspired over 58,000 students across all 50 states to engage with STEM education, transforming Congress' approach to expanding skilling and STEM education.

This initiative exemplifies Infosys Foundation USA's commitment to increasing diversity and equity in computer science education, through focused initiatives that reach under-represented communities.

The 2023 Challenge saw record high participation, with 374 members of Congress representing all 50 states hosting app challenges for a remarkable 11,334 students. Among the participants, nearly 40% were girls and around 25% were Black, Hispanic or Native Americans. The Challenge is demonstrating remarkable results, with 80% of the program's alumni studying STEM fields in college.

"We are excited to join forces with Infosys Foundation USA in our shared commitment to promoting STEM education for all," said **Joseph Alessi, Program Director, Congressional App Challenge**. "Together, we will continue to expand opportunities for student innovators from all backgrounds to showcase their talents and give them the tools to enhance the future of technology."

"We are delighted to be a sponsor of the Congressional App Challenge and advance our shared mission to expand STEM education," said **Kate Maloney, Executive Director, Infosys Foundation USA**. "By sponsoring this initiative, we hope to inspire more students nationwide to learn CS and pursue a career that leverages digital skills. Together, we will empower students from all backgrounds to unlock their potential and contribute to the future of technology."

As the 2024 Challenge gains momentum following its launch on May 1st, the Congressional App Challenge pledges to leverage this collaboration and its growing network of supporters to deliver the most impactful and inclusive program yet.

## About Infosys Foundation USA

Infosys Foundation USA is the private foundation of Infosys Ltd with a commitment to expand K12 computer science and maker education while working to upskill the next generation in digital skills, particularly within underrepresented communities across the United States.

## About Infosys

Infosys is a global leader in next-generation digital services and consulting. Over 300,000 of our people work to amplify human potential and create the next opportunity for people, businesses and communities. We enable clients in more than 56 countries to navigate their digital transformation. With over four decades of experience in managing the systems and workings of global enterprises, we expertly steer clients, as they navigate their digital transformation powered by cloud and AI. We enable them with an AI-first core, empower the business with agile digital at scale and drive continuous improvement with always-on learning through the transfer of digital skills, expertise, and ideas from our innovation ecosystem. We are deeply committed to being a well-governed, environmentally sustainable organization where diverse talent thrives in an inclusive workplace.

## Safe Harbor

Certain statements in this release concerning our future growth prospects, or our future financial or operating performance, are forward-looking statements intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results or outcomes to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding the execution of our business strategy, increased competition for talent, our ability to attract and retain personnel, increase in wages, investments to reskill our employees, our ability to effectively implement a hybrid work model, economic uncertainties and geo-political situations, technological disruptions and innovations such as Generative AI, the complex and evolving regulatory landscape including immigration regulation changes, our ESG vision, our capital allocation policy and expectations concerning our market position, future operations, margins, profitability, liquidity, capital resources, our corporate actions including acquisitions, and cybersecurity matters. Important factors that may cause actual results or outcomes to differ from those implied by the forward-looking statements are discussed in more detail in our US Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2024. These filings are available at [www.sec.gov](http://www.sec.gov). Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the Company's filings with the Securities and Exchange Commission and our reports to shareholders. The Company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the Company unless it is required by law.
