Our Company has not undertaken split or consolidation of Equity Shares in last one year, immediately preceding the date of this Draft Letter of Offer.

However, the company had received shareholders' approval dated September 26, 2024 for sub-division of equity shares of face value of ₹ 10/- each to face value of ₹ 1/- each . The board has decided to postpone such sub-division until further notice and has not commenced the corporate action required for the sub-division.

SECTION III – RISK FACTORS

An investment in equity shares involves a high degree of risk. Prospective Investors should carefully consider all the information disclosed in this Draft Letter of Offer including the risks and uncertainties described below before making an investment in our Equity Shares. In order to obtain a complete understanding about us, investors should read this section in conjunction with ‘Industry Overview’, ‘Business Overview’, ‘Financial Statements’, ‘Management’s Discussion and Analysis of Financial Condition and Results of Operations’, and ‘Key Industry Regulations and Policies’ beginning on pages 66, 74, 89, 135, and 159, respectively, as well as the other financial information included in this Draft Letter of Offer.

The risks described in this section are those that we consider to be the most significant and material to our business, financial condition, results of operations, and cash flows as of the date of this Draft Letter of Offer. We have described the risks and uncertainties that we currently believe to be material, but the risks set out in this section may not be exhaustive, and additional risks and uncertainties not presently known to us, or which we currently deem to be immaterial, may arise or may become material in the future. If any or some combination of the following risks, or other risks that are not currently known or believed to be adverse, actually occur, our business, cash flows, prospects, results of operations and financial condition could be adversely affected, the trading price of the Equity Shares could decline, and investors may lose all or part of the value of their investment.

The following factors have been considered for determining the materiality: (1) some events may not be material individually but may be found material collectively; (2) some events may have material impact qualitatively instead of quantitatively; and (3) some events may not be material at present but may have material impact in future.

In making an investment decision, prospective investors must rely on their own examinations and the terms of the Offer, including the merits and risks involved. Prospective investors should consult their tax, financial and legal advisors about the consequences they could encounter in investing in the Equity Shares.

This Draft Letter of Offer also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Letter of Offer. Any potential investor in, and purchaser of, the Equity Shares should pay particular attention to the fact that our Company is an Indian company and is subject to a legal and regulatory environment which, in some respects, may be different from that which prevails in other countries. For further information, see “Forward Looking Statements” on page 15.

The financial and other related implications of risks concerned, wherever quantifiable have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence, the same has not been disclosed in such risk factors. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk over another. In this Draft Letter of Offer, any discrepancies in any table between total and sums of the amount listed are due to rounding off. Unless the context otherwise requires, in this section, reference to ‘we’, ‘us’, and ‘our’ refers to our Company.

INTERNAL RISK FACTOR

- 1. Our Company imports pulses from East African and Middle East countries and any downturn and/ or any economic, regulatory, social and political change in the global markets in which we operate or seek to operate may affect our market share and/ or may adversely affect our business, financial condition and results of operations.***

Alongwith the local markets, our products are also purchased from International markets like Africa Region and Middle East. Any failure to maintain such dispersion may impact sales, revenues, and consequently, the financial performance of the Company. Further, any failure in expanding our geographical presence in the International market may lead to loss of opportunity in earning higher revenue thereby effect our growth and profit in the Company.

Further, our business is also subject to diverse and constantly changing economic, regulatory, social and political conditions in the jurisdictions in which we operate and seek to operate. Operating in the international market exposes us to a number of risks, including, but not limited to, compliance

with local laws and regulations, which can be onerous and costly as the magnitude and complexity of, and continual amendments to, those laws and regulations are difficult to keep abreast with and the liabilities, penalties, costs, obligations and requirements associated with these laws and regulations can be substantial. Our failure to comply with and adapt to changing international regulations and/or trends may result in us failing to maintain and/or expand our international sales operations, which could adversely affect our business, financial condition and results of operations.

In case of any contingencies in the future, due to which we are unable to operate effectively in these markets, our results of operations, revenues and profitability may be adversely affected. Due to this, we may not be able to expand our business effectively in the international market, thereby affecting our business, results of operations and financial condition.

2. ***The export / import of agricultural produce and commodities are subject to seasonal factors. Our inability to accurately forecast demand for the agro commodities that we trade, may have an adverse effect on our business, results of operations, cash flows and financial condition.***

The business of trading in the agricultural produce and commodities are subject to seasonal factors. Pulses are the major commodities, in which our company deals and are exposed to seasonal risk. This is due to the fact that majority of the farmers depend on rain for cultivation. Generally, rainfall occurs during Kharif season and hence, the timing and seasonality of rainfall impacts the export operations of our Company. Thus, we are subject to seasonal factors, which make our operating results relatively unpredictable. Due to dependency on seasonality of agro crops, results of one reporting period (quarter/half year/year) may not be necessarily comparable with preceding or succeeding reporting periods. We are impacted by seasonal variations in sales volumes, which may cause our revenues to vary significantly between different quarters in a Fiscal year.

Further, each of the agricultural produce and commodities has a specific shelf life and if not sold prior to expiry, it may lead to losses. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations, future cash flows and financial condition.

3. ***We are dependent upon the pricing and continued supply of products. Any shortage in supply, or increase in the price including the taxes and levies of the products could have adverse impact on our Company's business, financial condition and profitability.***

Our major products include Agro based products. The timely availability, cost and quality of these products being supplied to us plays an important role in building strong foundation for our business operations and client retention and/ or acquisitions. If any disruption is there in either of the factors mentioned above which are not under our control, including general economic conditions, competition, production levels, transportation costs, government taxes and levies, and import-export duties and if, for any reason, our regular/primary suppliers refuse or delay or discontinue the delivery of all or certain products to us in the quantities we need and at prices that are competitive, our ability to meet our order requirements shall come to a temporary standstill and our delivery schedules could be disrupted, and we may not be able to complete and execute our projects as per schedule or at estimated costs. Further, we may also not be able to pass on any increase in the prices of these products to our customers which could affect our results of operations and impact our financial condition.

Further, we currently do not have any long term tie-ups or agreements for supply of any of products and this may expose us to the changes in the prices of agro commodity products. The increase in prices of the products increases our expenditure hence our profitability if we are not able to pass the expenses on to our customers. Any decrease in the availability of these products for whatever reason, could adversely affect our execution capacity and profitability.

4. ***Any failure in our quality control and procurement processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.***

Our agricultural produce and commodities may suffer from certain quality issues due to inadvertent lapses in procurement leading to purchase of low-quality agricultural commodities. Further the agricultural commodities may also deteriorate in quality or decay during transit. We believe that we have implemented quality control processes for our agricultural produce and commodities that we trade in, on the basis of internal and international quality standards.

In the event the quality of our agricultural products and commodities are sub-standard or the agricultural produce and commodities suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the sub-standard agricultural produce and commodities and reimburse the cost paid by our customers. Such quality lapses could strain our longstanding relationship with our domestic customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our agricultural produce and commodities and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for low quality agricultural produce and commodities sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

5. Our registered office and corporate office are on leased/ rented premises and lease & license agreement have been executed for the same. Any termination or dispute in relation to these lease/ rental agreement may have an adverse effect on our business operations and results thereof.

As of the date of this Draft Letter of Offer, our Registered Office of our Company is held on a leasehold/Rental basis. Set out in the table below are details of the address of our Registered Office, taken on lease/Rental:

Sr. No.	Particulars of Property	Address	Lessee	Lessor	Rental (₹ in Lakhs)	Validity of Agreement
1	Registered Office of our company	Room No. 202, 41/A, Tara Chand Dutta Street, 2nd Floor, Chittaranjan Avenue, Kolkata, West Bengal, India, 700073	Annvridhhi Ventures Limited (Formerly known as J. Taparia Projects Limited)	Nagesh Kumar Joshi	₹0.14 Lakhs p.m.	11 months beginning from 01 st September, 2024, further extended with mutual consent
2	Corporate Office of our Company	Office No 306 3rd Floor, Urban 2 Bhayli, Vasna Road, Vadodara, Gujarat-390007	Annvridhhi Ventures Limited (Formerly known as J. Taparia Projects Limited)	Transglobal Trade Integration Private Limited	₹0.34 per month	Period of 11 months with an increase of 5% after 11 months terms, on the existing rent of preceding year, on mutual consent of both the parties

Our business operations are also conducted from the said premises. As per the lease agreement, if there are any non-compliance by us in relation to any term of lease, lease fee and any other terms and conditions, the lease may result in the termination of the lease agreement and consequently we have to vacate the said premises. We also cannot assure you that lessor will not terminate the lease agreement, which would require us to locate to another premise and may have an adverse effect on our conducting our business operations.

In case, we may have to re-locate to another premise and/or agree to pay the extra amount for using the same prices. Increase in lease structure will lead to increase of our expenditure which in turn may affect our revenue and increase of operational cost. Also, searching for the suitable location, setting the branch from the scratch and relocating the inventory from location to another, may lead to loss of clients, reduction in sales thereby affecting our profitability.

6. *Our Company is dependent on third party transportation providers for the delivery of our goods and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.*

Our Company uses third party transportation providers for delivery of our goods. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. In addition, goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road and water infrastructure, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

7. *We do not own any warehouses/cold storage facilities to store our products instead we rely on the storage facilities available with the supplier/ third party owned warehouses. Damage to agricultural produce due to the unavailability of adequate warehouses at the right time may adversely affect our business, financial condition and results of operations.*

We do not own warehouses/cold storage facilities in which we can store our stock in trade instead we rely on the storage facilities available with the suppliers or third party owned warehouses and ship directly from the location of supplier to the location of recipient on bill to ship to business model. This arrangement could pose certain risks, including but not limited to:

Limited control over storage conditions: As we do not own the storage facilities, we may have limited control over the storage conditions such as accessibility as per the need, temperature, humidity, and cleanliness. If the quality of premises used for stocking the seeds and agricultural produce and their maintenance is improper or not as per the requirement of our products, it may diminish the quality of inventory of seeds and agricultural produce and may cause considerable damage to our inventories. Any suboptimal storage conditions could lead to spoilage or damage of our products, which could result in financial losses.

Since the company does not hold on to its inventory for a longer period of time due to the nature of the products and since our business is on "Bill To Ship To" model, as on the date of filing this draft letter of offer, the company uses storage facilities available with the supplier or third party owned warehouses, which is adequate as per the company's current needs. However, in future, as and when the need arises, the company plans to acquire warehousing/cold storage facilities to store products that have a decent shelf life owing to which we can manage our affairs more efficiently.

8. *Our Company has reported negative cash flow from operating and investing activities in the past. Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.*

The following table sets forth our cash flow for the periods indicated:

(Rs. in Lakhs)

Particulars	Audited Restated Financial Results	Audited Restated Financial Results for the Financial Year ended on		
	6 months ended on September 30, 2024	March 31, 2024	March 31, 2023	March 31, 2022
Net cash from (used in) Operating activities	(14.74)	(73.00)	0.59	0.22
Net cash from (used in) Investing activities	0.00	86.65	0.00	0.00
Net cash from (used in) Financing activities	12.44	(16.04)	0.81	2.74
Net Cash Flow	(2.30)	(2.39)	1.40	2.96

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations.

9. *We have entered into and will continue to enter into related party transactions. We cannot assure you that such transactions will not have an adverse impact on our business, financial condition, cash flows and results of operations.*

We have entered into related party transactions with our Promoters, Group Companies, Promoter group members. For further details of the related party transactions, see "Financial Statements" on page 89.

We cannot assure you that we will be able to maintain the terms of such transactions or if we enter future transactions with related parties, that the terms of the transactions will be favorable to us. Additionally, while it is our belief that all our related party transactions have been conducted on an arm's-length basis, we cannot provide assurance that we could have achieved more favorable terms had such transactions been entered with unrelated parties. We may also enter into related party transactions in the future, which could involve conflicts of interest, although going forward, all related party transactions that we may enter will be subject to audit committee or board or shareholder approval, as applicable, as under the Companies Act, 2013 and the SEBI (LODR) Regulations. As such, we can provide no assurance that these transactions will not adversely affect our business, results of operation, cash flows and financial condition.

10. *We face foreign exchange risks that could adversely affect our results of operations.*

Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuations. Our Company is involved in various business transactions with international clients and has to undertake the business transactions in accordance with the rules and regulations prescribed under FEMA. Further, our international operations make us susceptible to the risk of currency fluctuations, which may directly affect our operating results. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it could adversely affect our business, results of operations, financial conditions and cash flows.

- 11. *We depend on the success of our relationships with our customers. Our revenue is generated from certain of our key customers, and the loss of one or more such customers, the deterioration of their financial condition or prospects, or a reduction in their demand for our products could adversely affect our business, results of operations, financial condition and cash flows.***

Our Company is engaged in the business of import and local trade of agricultural produce and commodities for sale to various merchants and distributors. While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long-term agreements. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing our products. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

- 12. *Our Company has not entered into any long-term contracts with our distributors/customers and we typically operate on the basis of orders received on hand. Inability to maintain regular order flow would adversely impact our revenues and profitability.***

We have not entered into any fixed contracts with our distributors/customers and we cater to them on an order-by-order basis. As a result, our distributors/customers can terminate their relationships with us without any prior notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's distributors/customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's distributors/customers are dependent on factors such as the customer satisfaction, quality consistency, fluctuation in demand for our Company's products and customer's inventory management. Although we place a strong emphasis on quality, pricing and timely delivery of our products, personal interaction by the top management with the distributors/customers, etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

- 13. *Our inability to collect receivables and default in payment from our customers could result in the reduction of our profits and affect our cash flows.***

Our business operations depend on our ability to successfully obtain payment from our customer(s) for our products sold to them. We typically bill and collect on relatively short cycles and maintain provisions against receivables and unbilled services. Actual losses on client balances could differ from those that we currently anticipate and as a result we might need to adjust our provisions.

Our credit terms vary from the start date of the invoice to approximately 30-45 days for our customers. In spite of our efforts to collect our dues from the respective creditors within the stipulated time, and further providing extended credit periods to collect our dues, we face the risk of non-receipt of our outstanding amounts in a timely manner or at all, particularly in the absence of long-term arrangements with customers. We cannot guarantee that our customers will not default on their payments. Our inability to collect receivables from our customers in a timely manner or at all in future, could adversely affect our working capital cycle and cash flows. In Fiscal Year 2024 and for the half year ended September 30, 2024, our trade receivables were Rs. 306.24 Lakhs and Rs. 1090.90 Lakhs, respectively, which represented 92.55% and 34.90%, respectively, of our total

revenue for such periods. If we are unable to collect customer receivables or if the provisions for doubtful receivables are inadequate, it could have a material adverse effect on our business, financial condition and results of operations.

Macroeconomic conditions could also result in financial difficulties, including insolvency or bankruptcy, for our customers, and as a result could cause customers to delay payments to us, request modifications to their payment arrangements, that could increase our receivables or affect our working capital requirements, or default on their payment obligations to us. In particular, farmers may be adversely affected by a number of factors beyond their control, which could affect their financial condition. An increase in bad debts or in defaults by our customer and dealers may compel us to utilize greater amounts of our operating working capital and result in increased interest costs, thereby adversely affecting our results of operations and cash flows.

14. Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.

We may encounter problems in executing the orders in relation to our imported and exported products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, may result in the postponement of the delivery of products or cause its cancellation. Further, even though we execute orders with our customers, the order could be cancelled or there could be changes in scope and / or scheduled delivery of the products. Accordingly, it is difficult to predict with certainty if, when, and to what extent the delivery of the orders placed will be made. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business.

15. Our insurance coverage may not adequately protect us against certain operating risks and this may have an adverse effect on the results of our business.

Our insurance policies may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption, losses in transit, natural disasters etc. because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations.

16. We are subject to competition from both organized and unorganized players in the market, which may significantly affect the fixation and realization of the price for our product, which may adversely affect our business operation and financial condition.

The market for our products is competitive on account of existence of both the organized and unorganized players. Competition occurs generally on the key attributes such as quality of products, distribution network, pricing and timely delivery. Some of our competitors have longer industry experience and greater financial, technical and other resources, which may enable them to adopt faster in changing market scenario and remain competitive. Moreover, the unorganized sector can offer their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition. We operate in a rapidly consolidating industry. The strength of combined companies could affect our competitive position in all of our business areas. Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

17. *Our Company operates under several statutory and regulatory permits, licenses and approvals. Our failure to obtain and/or renew any approvals or licenses in future may have an adverse impact on our business operations.*

Our Company requires several statutory and regulatory permits, licenses and approvals to operate the business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Further, these permits, licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant permits/ licenses/ approvals. Failure by our Company to renew, maintain or obtain the required permits, licenses or approvals, or cancellation, suspension or revocation of any of the permits, licenses or approvals which may result in the interruption of our Company's operations and may have a material adverse effect on the business.

18. *Our inability to manage our growth effectively or failure to implement our business and growth strategies could adversely affect our business and future financial performance.*

The success of our business will depend greatly on our ability to achieve our financial objectives and results of operations will depend on our ability to identify and evaluate suitable markets within India and internationally and thereby accomplishing our business opportunities. To grow our business, we need to evaluate of suitable markets for our products, the willingness to purchase, purchasing power and demand for agro commodities, the ability to tie up with the local distributors, need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth, the availability and cost of financing, government directives on import-export, and the obtaining of permits and approvals for logistic is a must. If we fail to execute any of the above and our order(s) in a timely and effective manner, it may cause us to modify, delay or abandon entire order, which in turn could cause our business to suffer.

Further, our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

19. *If we are unable to raise additional capital for our business, it may delay our Company's growth plan and have a material adverse effect on our business and financial condition.*

We will continue to incur significant expenditure in growing our existing business operations. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our cash on hand and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, if we are unable to arrange adequate financing on timely basis, it could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and regulatory framework that allows us to raise capital. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

20. *Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution.*

Our funding requirements and the deployment of the proceeds of the Issue are based on

management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising or canceling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our Board. In addition, schedule of implementation as described herein are based on management's current expectations and are subject to change due to various factors some of which may not be in our control.

21. *Any variation in the utilization of the Net Proceeds as disclosed in this Draft Letter of Offer shall be subject to certain compliance requirements, including prior Shareholders' approval.*

Our Company intends to deploy and utilize Net Proceeds raised pursuant to the Rights Issue in the manner set out in the section titled "Objects of the Issue" on **page no. 52** in the Draft Letter of Offer. In accordance with SEBI LODR Regulations and other applicable provisions, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Letter of Offer without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations and it may also lead to delay in deployment of funds as per the schedule of implementation as disclosed in objects section titled "Objects of the Issue" on **page no. 52** in the Draft Letter of Offer. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Rights Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by redeploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

22. *We are dependent on our Promoter, Directors our senior management and key personnel of our Company for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.*

Our Promoter, Directors, senior management and key managerial personnel collectively have vast years of experience in the industry and are difficult to replace. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. For further details of our Directors and key managerial personnel, please refer to Section "Our Management" on **page 79** of this Draft Letter of Offer. Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Promoters, Directors and other senior management could seriously impair the ability to continue to manage and expand the business efficiently.

Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

Further, as on September 30, 2024, our Promoters, along with our Promoter Group members, hold, approximately 57.02 % issue paid up equity capital of our Company and, therefore, will have the ability to significantly influence our corporate decision making process. This will include the ability to appoint Directors on our Board and the right to approve significant actions at Board and at Shareholders' meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to the Memorandum and Articles of Association, and any assignment or transfer of our interest in any of our licenses. We cannot assure you that our Promoters along with Promoter Group members interests in any such scenario will not conflict with the interest of other Shareholders or with the interests of our Company. Any such conflict may adversely affect our ability to execute our

business strategy or to operate our business effectively or in the best interests of our other Shareholders. For details on their shareholding pattern of our company and that of the promoter and promoter group, please refer to point 9 on page 46 in the chapter titled “Capital Structure” beginning on **page no. 49** of the DLOF.

23. Our Promoters have provided guarantees for loans availed by the company.

Our Promoters have issued personal guarantees in relation to certain borrowings availed by the Company from banking institutions. In the event of default on such borrowings, these guarantees may be invoked by the lenders thereby adversely affecting the respective Promoters’ ability to manage the affairs of our Company which in turn, could adversely affect our business, prospects, financial condition and results of operations. Further, if any of these guarantees are withdrawn by our Promoters, our lenders may require alternate securities or guarantees and may seek early repayment or terminate such facilities. Any such event could adversely affect the financial condition and operations of the Company.

24. We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet.

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “Industry Overview” on page 54 of this Draft Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Letter of Offer. Further, the industry data mentioned in this Draft Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

25. As the securities of our Company are listed on BSE in India, our Company is subject to certain obligations and reporting requirements under the SEBI Listing Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties.

The Equity Shares of our Company are listed on BSE, therefore we are subject to the obligations and reporting requirements prescribed under the SEBI Listing Regulations, as well as requirements under the Companies Act for a listed Company. There have been instances in the past, wherein our Company has committed non-compliance of the SEBI Listing Regulations and actions in respect to the same have been initiated against us by the Stock Exchanges. For instance, our Company received a mail dated December 14, 2023 from BSE Limited on account of late submissions under Regulation 23(9) and 33 of The SEBI (LODR) Regulations, 2015 and Fines were levied on the company as per SEBI circular no. SEBI/HO/CFD/PoD2/CIR/P/2023/120 dated July 11, 2023 (Chapter-VII(A)-Penal Action for Non-Compliance). The details of fines levied are provided below:

Sl. No.	Quarter ending	Nature of non-compliance	Amount of penalty/fine	Date of payment
1.	For the quarter ended September 2023	Regulation 33 Non-submission of the financial results within the period prescribed under this regulation	₹11800/-	22.12.2023
2.	For the quarter ended September 2023	Regulation 23 (9) Non-compliance with disclosure of related party transactions on consolidated basis.	₹5900/-	22.12.2023

Since, during the preceding one year from the date of filing of this Draft Letter of Offer, there have been defaults in complying with the applicable provisions of SEBI Listing Regulations and

accordingly, our Company has filed this Draft Letter of Offer under Part B-1 of Schedule VI of SEBI ICDR Regulations. Our Company endeavors to comply with all applicable obligations/reporting requirements, however upon occurrence of any future instances of non-disclosures/delayed/erroneous disclosures and/or any other violations by us, our Company may be exposed to imposition of penalties, warning and show cause notices being against us by SEBI and Stock Exchanges. Any future adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

26. *We are subject to cyber security risks and security breaches and may incur increasing costs in an effort to minimize those risks and to respond to cyber incidents.*

A number of other companies have disclosed cyber-attacks and security breaches, some of which have involved intentional attacks. Attacks may be targeted at us, our customers, or both. Although we devote significant resources to maintain and regularly upgrade our systems and processes that are designed to protect the security of our computer systems, software, networks and other technology assets and the confidentiality, integrity and availability of information belonging to us and our customers, our security measures may not provide absolute security. Despite our efforts to ensure the integrity of our systems, it is possible that we may not be able to anticipate or to implement effective preventive measures against all security breaches of these types, especially because the techniques used change frequently or are not recognized until launched, and because cyber-attacks can originate from a wide variety of sources, including third parties outside the Company such as persons who are involved with organized crime or associated with external service providers or who may be linked to terrorist organizations or hostile foreign governments. A successful penetration or circumvention of the security of our systems could cause serious negative consequences, including significant disruption of our operations, misappropriation of our confidential information or that of our customers, or damage to our computers or systems or those of our customers and counterparties, and could result in violations of applicable privacy and other laws, financial loss to us or to our customers, loss of confidence in our security measures, customer dissatisfaction, significant litigation exposure, and affect to our reputation, all of which could have a material adverse effect on us.

Our servers are also vulnerable to computer viruses, physical or electronic break-ins, and similar disruptions. We may need to expend significant resources to protect against security breaches or to address problems caused by breaches. Security breaches, including any breach of our systems or by persons with whom we have commercial relationships that result in the unauthorized release of customers' or businesses' personal information, could damage our reputation and expose us to a risk of loss or litigation and possible liability.

27. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

The company has not paid any dividends in the last three Financial Years. Our ability to pay future dividends will depend on our earnings, financial condition and capital requirements. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

ISSUE SPECIFIC FACTORS

1. *Our Company will not distribute the Offer Documents to certain overseas shareholders who havenot provided an address in India for service of documents.*

Our Company will dispatch the Offer Documents to such shareholders who have provided an address in India for the service of documents or who are in jurisdictions where the offer and sale of the Rights Equity Shares permitted under laws of such jurisdictions and in each case who make a request in this regard. The

Offer Documents will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act and may subject us to fines or penalties.

2. *There is no public market for the Rights Equity Shares or Equity Shares outside India.*

After this Issue, there will continue to be no public market for our Equity Shares in the United States or any country other than India. In addition, the holders of the partly paid-up Rights Equity Shares will not be able to trade in these Equity Shares till they are credited to the holders' account as fully paid-up, and thereafter there will also be no public market for the Rights Equity Shares outside of India. We cannot assure you that the face value of the Rights Equity Shares will correspond to the price at which the Rights Equity Shares will trade subsequent to this Issue. This may also affect the liquidity of our Rights Equity Shares and Equity Shares and restrict your ability to sell them.

3. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for dilution of your percentage ownership of the equity share capital of our Company that may be caused because of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation (the last day for which is [●]), such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements.

4. *SEBI has recently, by way of Rights Issue Circulars streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.*

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI Rights Issue Circulars and ensure completion of all necessary steps in relation to providing/ updating their demat account details in a timely manner. For details, see '**Terms of the Issue**' on page 167 of this Draft Letter of Offer.

In accordance with Regulation 77A of the SEBI (ICDR) Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account (namely being [●]) opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to:

- Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI (LODR) Regulations; or
- Equity Shares held in the account of IEPF authority; or
- The demat accounts of the Eligible Equity Shareholder which are frozen or suspended for debit or credit or details of which are unavailable with our Company or with the Registrar on the Record Date; or
- Equity Shares held by Eligible Equity Shareholders holding Equity Shares in the physical form on the Record Date the details of demat accounts are not provided by Eligible Equity Shareholders to our Company or Registrar; or

- Credit of the Rights Entitlements returned/reversed/failed; or
- The ownership of the Equity Shares currently under dispute, including any court proceedings.

5. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future;

6. *Investors shall not have the option to receive Rights Equity Shares in physical form.*

In accordance with the provisions of Regulation 77A of the SEBI (ICDR) Regulations read with SEBI Rights Issue Circular, the credit of Rights Entitlement and Allotment of Rights Equity Shares shall be made in dematerialized form only. Investors will not have the option of getting the allotment of Equity Shares in physical form.

7. *The Rights Entitlement of Physical Equity Shareholders may lapse in case they fail to furnish the details of their demat account to the Registrar.*

In accordance with the SEBI Circular bearing reference number 'SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialized form only. Accordingly, the Rights Entitlements of the Physical Equity Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Equity Shareholders are requested to furnish the details of their demat account to the Registrar not later than 2 (Two) Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least 1 (One) day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than 2 (Two) Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 03, 2018 issued by the SEBI, with effect from April 01, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares). For further details, please refer to the section titled '*Terms of the Issue*' on page 167 of this Draft Letter of Offer.

8. *Our ability to pay dividends in the future will depend on our future earnings, cash flows, working capital requirements, capital expenditures and financial condition. Investors of Rights Equity Shares are only entitled to dividend in proportion to the amount paid up and the voting rights (exercisable on a poll by investors) shall also be proportional to such investor's share of the paid-up Equity Share capital of our Company.*

The amount of our future dividend payments, if any, will depend on various factors such as our future earnings, cash flows, financial condition, working capital requirements, capital expenditures and in accordance with applicable laws. We may decide to retain all our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on the Equity Shares. Additionally, in the future, we may be restricted by the terms of our financing agreements in making dividend payments unless otherwise agreed with our lenders. The amounts paid as dividends in the past are not necessarily indicative of our Company's dividend policy or the dividend amounts, if any, in the future. There is no guarantee that any dividends will be declared or paid or that the amount thereof will not be decreased in the future.

Further, with respect to the present Issue, investors are only entitled to dividend in proportion to the amount paid-up and the voting rights (exercisable on a poll by investors) shall also be proportional to such investor's share of the paid-up Equity Share capital of our Company.

9. You may be subject to Indian taxes arising out of capital gains on the sale of the Rights Equity Shares and Rights Entitlement.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realised on the sale of listed equity shares on the Stock Exchanges held for more than 12 (Twelve) months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax, on the sale of any Equity Shares held for more than 12 (Twelve) months immediately preceding the date of transfer. Securities Transaction Tax will be levied on the seller and/or the purchaser of the Equity Shares and collected by the domestic stock exchange on which the Equity Shares are sold. Further, any capital gains realised on the sale of listed equity shares held for a period of 12 (Twelve) months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India as well as Securities Transaction Tax.

Capital gains arising from the sale of the Equity Shares will not be chargeable to tax in India in cases where relief from such taxation in India is provided under a treaty between India and the country of which the seller is resident read with the Multilateral Instrument, if and to the extent applicable, and the seller is entitled to avail benefits thereunder. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. No dividend distribution tax is required to be paid in respect of dividends declared, distributed, or paid by a domestic company after March 31, 2020, and, accordingly, such dividends would not be exempt in the hands of the Shareholders, both for residents as well as non-residents. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident Shareholder for the purposes of deducting tax at source pursuant to any corporate action, including dividends.

Similarly, any business income realised from the transfer of equity shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller. Additionally, in terms of the Finance Act, 2018, which has been notified on March 29, 2018 with effect from April 1, 2018, taxes payable by an assessee on the capital gains arising from transfer of long-term capital assets (introduced as Section 112A of the Income-Tax Act, 1961) shall be calculated on such long-term capital gains at the rate of 10%, where the long-term capital gains exceed ₹1.00 Lakh (Rupees One Lakh), subject to certain exceptions in case of resident individuals and Hindu Undivided Families.

Further, the Finance Act, 2019 made various amendments in the taxation laws and clarified that, in the absence of a specific provision under an agreement, the buyer will be liable to pay stamp duty in case of sale of securities through the Stock Exchanges, while the transferor will be liable to pay stamp duty in other cases of transfer for consideration through a depository. The stamp duty for transfer of securities other than debentures, on a delivery basis, is specified at 0.015% (Zero Point Zero One Five Percent) and on a non-delivery basis is specified at 0.003% (Zero Point Zero Zero Three Percent) of the consideration amount. These amendments came into effect from July 1, 2020.

10. You may not receive the Equity Shares that you subscribe in the Issue until 15 (Fifteen) days after the date on which this Issue closes, which will subject you to market risk.

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 (Fifteen) days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time, subjecting you to market risk for such period.

11. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.

In terms of the SEBI (ICDR) Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political, or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in the Rights Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares.

The Applicants shall not have the right to withdraw their Applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Rights Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

12. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.

Under the Companies Act, any Company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

13. There is no guarantee that our Right Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.

In accordance with applicable laws and regulations and the requirements of the BSE Limited, in principle and final approvals for listing and trading of the Rights Equity Shares issued pursuant to this Issue will not be applied for or granted until after the Rights Equity Shares have been issued and allotted. Approval for listing and trading will require all the relevant documents authorising the issuance of Rights Equity Shares to be submitted. Accordingly, there could be a delay in listing the Rights Equity Shares on the BSE Limited. If there is a delay in obtaining such approvals, we may not be able to credit the Rights Equity Shares allotted to the Investors to their depository participant accounts or assure ownership of such Rights Equity Shares by the Investors in any manner promptly after the Issue Closing Date. In any such event, the ownership of the Investors over Rights Equity Shares allotted to them and their ability to dispose of any such Equity Shares may be restricted. For further information on issue procedure, please

refer to the section titled 'Terms of the Issue' beginning on page 143 of this Draft Letter of Offer.

14. No market for the Right Entitlements may develop and the price of the Right Entitlements may be volatile.

No assurance can be given that an active trading market for the Rights Entitlements will develop on the Stock Exchanges during the Renunciation Period or that there will be sufficient liquidity in Rights Entitlements trading during this period. The trading price of the Rights Entitlements will not only depend on supply and demand for the Rights Entitlements, which may be affected by factors unrelated to the trading in the Equity Shares, but also on the quoted price of the Equity Shares, amongst others. Factors affecting the volatility of the price of the Equity Shares, as described herein, may magnify the volatility of the trading price of the Rights Entitlements, and a decline in the price of the Equity Shares will have an adverse impact on the trading price of the Rights Entitlements. Since the trading of the Rights Equity Shares will be on a separate segment compared to the Equity Shares on the floor of the Stock Exchanges, the trading of Rights Equity Shares may not track the trading of Equity Shares. The trading price of the Rights Entitlements may be subject to greater price fluctuations than that of the Equity Shares.

We will not distribute the Issue Materials to overseas Shareholders who have not provided an address in India for service of documents. We will dispatch the Issue Materials to the shareholders who have provided an address in India for service of documents. The Issue Materials will not be distributed to addresses outside India on account of restrictions that apply to circulation of such materials in overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act and the rules made thereunder with respect to distribution of Issue Materials in overseas jurisdiction where such distribution may be prohibited under the applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act and may subject us to fines or penalties.

15. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

16. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a Company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian Company than as shareholder of a corporation in another jurisdiction.

17. SEBI operates an index-based market-wide circuit breaker. Any operation of a circuit breaker may adversely affect a shareholder's ability to sell, or the price at which it can sell, our Equity Shares at a particular point in time.

We are subject to an index-based market-wide circuit breaker generally imposed by SEBI on Indian stock exchanges. This may be triggered by an extremely high degree of volatility in the market activity (among other things). Due to the existence of this circuit breaker, there can be no assurance that shareholders will be able to sell our Equity Shares at their preferred price or at all at any particular point in time.

18. Investors in the Rights Equity Shares may not be able to enforce a judgment of a foreign court against us or our management, except by way of a suit in India on such judgment.

We are a limited liability company incorporated under the laws of India and majority of our directors and all executive officers are residents of India. It may be difficult for the investors to affect service of process upon us or such persons outside India or to enforce judgments obtained in courts outside India.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, which includes the United Kingdom, Singapore, Hong Kong, and the United Arab Emirates. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements of the Code of Civil Procedure, 1908. Judgments or decrees from jurisdictions, which do not have reciprocal recognition with India, cannot be executed in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us or our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favour such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within 3 (Three) years of obtaining such final judgment in the same manner as any other suit filed to enforce a civil liability in India. If, and to the extent that, an Indian court were of the opinion that fairness and good faith so required, it would, under current practice, give binding effect to the final judgment that had been rendered in the non-reciprocating territory, unless such a judgment contravenes principles of public policy in India. It is unlikely that an Indian court would award damages on the same basis or to the same extent as was awarded in a final judgment rendered by a court in another jurisdiction if the Indian court believed that the amount of damages awarded was excessive or inconsistent with Indian practice. In addition, any person seeking to enforce a foreign judgment in India is required to obtain prior approval of the RBI to repatriate any amount recovered pursuant to the execution of such a judgment.

EXTERNAL RISK FACTORS:

19. The outbreak of Novel Coronavirus, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition, and results of operations.

The outbreak, or threatened outbreak, of any severe epidemic caused due to viruses (particularly the Novel Coronavirus) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of Novel Coronavirus has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding Novel Coronavirus. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of Novel Coronavirus remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting Novel Coronavirus or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in

general. The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of Novel Coronavirus will cause an economic slowdown and it is possible that it could cause a global recession. The spread of Novel Coronavirus has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which the Novel Coronavirus further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact Novel Coronavirus may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of Novel Coronavirus or its consequences, including downturns in business sentiment generally or in our sector in particular. The degree to which Novel Coronavirus impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, and loss of life, injuries and impact the wellbeing of our people. Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

20. Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ('IFRS'), which investors may be more familiar with and consider material to their assessment of our financial condition.

The Financial Statements of our Company for the Financial Year ending March 31, 2024, March 31, 2023, March 31, 2022 and unaudited limited review for the six months ended on September 30, 2024 have been prepared in accordance with the Ind AS, the Companies Act, 2013.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI (ICDR) Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Letter of Offer should accordingly be limited.

21. Political, economic, or other factors that are beyond our control may have adversely affect our business and results of operations.

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition, and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance. We are dependent on domestic, regional, and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, and volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

22. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- Any increase in Indian interest rates or inflation;
- Any scarcity of credit or other financing in India;
- Prevailing income conditions among Indian consumers and Indian corporations;
- Changes in India's tax, trade, fiscal or monetary policies;
- Political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- Prevailing regional or global economic conditions; and
- Other significant regulatory or economic developments in or affecting India.

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

23. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects, and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. The Government of India has issued a notification dated September 29, 2016, notifying Income Computation and Disclosure Standards (hereinafter referred to as 'ICDS'), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition. The General Anti Avoidance Rules (hereinafter referred to as 'GAAR') have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us. A comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax

regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions. In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future. Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

24. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition. The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections. There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance, and the trading price of the Equity Shares.

25. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the

future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

26. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition. Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

27. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

28. We are subject to regulatory, economic, social, and political uncertainties and other factors beyond our control.

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability, and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- Any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;

- Prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- Hostile or war like situations with the neighbouring countries;
- Macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- Decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- Downgrading of India's sovereign debt rating by rating agencies; and
- Difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

29. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. The working capital projections made by the company are based on certain key assumptions, as set out below:

Particulars	Assumptions
Current Assets	
Revenues	The company began its operations under the new line of business in the last quarter of FY 2023-24 after receiving the approval for its new objects. Hence the figures for the previous years are not entirely comparable and cannot form a basis for the current year figures and projections. The company has already achieved a revenue of Rs. 31.27 Cr till the half year ended 30 th September, 2024. With a boost in the working capital through proceeds from right issue, the company projects to increase its revenue in the remaining period by atleast 100%.
Trade Receivables	The company began its operations under the new line of business in the last quarter of FY 2023-24 after receiving the approval for its new objects. Hence the figures for the previous years are not entirely comparable and cannot form a basis for the current year figures and projections. Hence the holding period has been calculated by taking into consideration a period of 90 days instead of 365 days for the FY 2023-24. Till now the company has been maintaining a holding period of around 40 days which the company aims to increase its credit cycle for customers to 90 days to boost its revenue. Due to the business growth and need for increasing the sales volume we estimate the receivable at levels to 90 days for fiscal year ended March 31, 2025.

Inventory Holding Period	The company began its operations under the new line of business in the last quarter of FY 2023-24 after receiving the approval for its new objects. Hence the figures for the previous years are not entirely comparable and cannot form a basis for the current year figures and projections. Till now the company is very low on inventory and is majorly working on consignment-to-consignment basis. The company wishes to change the same and maintain atleast 15-16 days inventory with it for adequate availability of products at more competitive prices.
Current Liabilities	
Trade Payables	The company began its operations under the new line of business in the last quarter of FY 2023-24 after receiving the approval for its new objects. Hence the figures for the previous years are not entirely comparable and cannot form a basis for the current year figures and projections. Till now the company has been able to pay to its creditors in about 35 days approximately. However, going forward, we estimate to maintain the payables at 30 days for the fiscal year ended March 31, 2025 to avail best pricing from its suppliers and also place bulk orders from large suppliers.

2. General Corporate Purposes

Our Company intends to deploy the balance Net Proceeds aggregating to Rs. [●] Lakhs towards general corporate purposes, subject to such utilization not exceeding 25% of the Issue Proceeds, in compliance with applicable laws, to drive our business growth, including, amongst other things, (a) funding growth opportunities, including strategic initiatives; (b) acquiring assets, such as plant and machinery, furniture and fixtures, and intangibles; (c) meeting any expenses incurred in the ordinary course of business by our Company including salaries and wages, rent, administration expenses, insurance related expenses, and the payment of taxes and duties; (d) meeting of exigencies which our Company may face in course of any business, (e) brand building and other marketing expenses and (f) any other purpose as permitted by applicable laws and as approved by our Board or a duly appointed committee thereof.

Our management, in response to the competitive and dynamic nature of the industry, will have the discretion to revise its business plan from time to time and consequently our funding requirement and deployment of funds may change. This may also include rescheduling the proposed utilization of Net Proceeds and increasing or decreasing expenditure for a particular object i.e., the utilization of Net Proceeds. In case of a shortfall in the Net Proceeds, our management may explore a range of options including utilizing our internal accruals or seeking debt from future lenders. Our management expects that such alternate arrangements would be available to fund any such shortfall. Our management, in accordance with the policies of our Board, will have flexibility in utilizing the proceeds earmarked for general corporate purposes. In the event that we are unable to utilize the entire amount that we have currently estimated for use out of Net Proceeds in a Fiscal, we will utilize such unutilized amount in the next Fiscal.

Introduction

India is one of the top producers of a large numbers of commodities, and also has a long history of trading in commodities and related derivatives. The commodities derivatives market has seen ups and downs, but seems to have finally arrived now. The market has made growth enormous in terms of technology, transparency and the trading activity. Interestingly, this has happened only after the government protection was removed from a number of the commodities, and the market forces were allowed to play their role. This should act as a major lesson for the policy makers in developing countries, that pricing and price risk management should be left to market forces rather.

Macro Overview Of Global GDP

Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than-expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China. The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down.

With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could lead to further easing of financial conditions. Looser fiscal policy than necessary and than assumed in the projections could imply temporarily higher growth, but at the risk of a more costly adjustment later on. Stronger structural reform momentum could bolster productivity with positive cross-border spillovers. On the downside, new commodity price spikes from geopolitical shocks—including continued attacks in the Red Sea—and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Deepening property sector woes in China or, elsewhere, a disruptive turn to tax hikes and spending cuts could also cause growth disappointments

Outlook on Advanced Economies

Global growth is projected to be in line with the April 2024 World Economic Outlook (WEO) forecast, at 3.2 percent in 2024 and 3.3 percent in 2025. However, varied momentum in activity at the turn of the year has somewhat narrowed the output divergence across economies as cyclical factors wane and activity becomes better aligned with its potential. Services price inflation is holding up progress on disinflation, which is complicating monetary policy normalization. Upside risks to inflation have thus increased, raising the prospect of higher-for-even-longer interest rates, in the context of escalating trade tensions and increased policy uncertainty. To manage these risks and preserve growth, the policy mix should be sequenced carefully to achieve price stability and replenish diminished buffers.

Global activity and world trade firmed up at the turn of the year, with trade spurred by strong exports from Asia, particularly in the technology sector. Relative to the April 2024 WEO, first quarter growth surprised on the upside in many countries, although downside surprises in Japan and the United States were notable. In the United States, after a sustained period of strong outperformance, a sharper-than-expected slowdown in growth reflected moderating consumption and a negative contribution from net trade. In Japan, the negative growth surprise stemmed from temporary supply disruptions linked to the shutdown of a major automobile plant in the first quarter. In contrast, shoots of economic recovery materialized in Europe, led by an improvement in services activity. In China, resurgent domestic consumption propelled the positive upside in the first quarter, aided by what looked to be a temporary surge in exports belatedly reconnecting with last year's rise in global demand. These developments have narrowed the output divergences somewhat across economies, as cyclical factors wane and activity becomes better aligned with its potential.

Outlook on Emerging Economies

China's economy is facing a slowdown post the pandemic recovery, primarily due to slowing of manufacturing output and decreased domestic demand. Potential for increased exports from the country will also be limited due to slow down in advanced economies such as USA and UK. According to IMF, the country is expected to remain as one of the fastest growing economies in the Asia region in the current year, contributing to ~35% of global growth. However, the economy is expected to slow down in the future due to inherent demographic characteristics and a drag in productivity. Russian economy faced contraction in 2022 due to wartime sanctions and higher focus on military spends. While EU has stopped the import of oil from Russia, the country has diverted production to other economies. Despite oil revenues, growth will slow down due to continuing global sanctions. Brazil has had faster-than-expected GDP growth due to agricultural expansion, despite a slowdown in the services sector, which accounts for 70% of GDP, and underperformance in the industrial sector. The Central Bank of Brazil has been raising interest rates to control inflation, which has so far had no effect on consumer spending due to a solid labour market. However, the job market's continuous expansion is not projected to continue, which will have an influence on consumer spending, and growth rates are expected to decline.

Macroeconomic Overview of India

Strong economic growth in the first quarter of F.Y. 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices in the second quarter of 2022-23 is estimated at US\$ 1.94 trillion (Rs. 160.06 trillion), showing a growth of 7.2% as compared to the First Revised Estimates of GDP for the year 2021-22 of US\$ 1.81 trillion (Rs. 149.26 trillion), indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022-2023. In F.Y.2021-22, India's service exports stood at US\$ 254.4 billion. Furthermore, India's overall exports (services and merchandise) was estimated at US\$ 770.18 billion in F.Y.2022-23. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalization of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

India's nominal gross domestic product (GDP) at current prices is estimated to be at US\$ 3.31 trillion (Rs.

272.41 trillion) in F.Y. 2021-22. Additionally, the Nominal GDP at current prices in Q3 of 2022-23 was US\$ 874.84 billion (Rs. 71.82 trillion), as against US\$ 792.3 billion (Rs. 65.05 trillion) in 2021-22, estimating a growth of 10.4%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at US\$ 1.3 billion, 0.2% of GDP in the fourth quarter of F.Y.2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Overview of Agriculture Commodity Trading Industry

India is one of the major players in the agriculture sector worldwide and it is the primary source of livelihood for ~55% of India's population. India has the world's largest cattle herd (buffaloes), the largest area planted for wheat, rice, and cotton, and is the largest producer of milk, pulses, and spices in the world. It is the second-largest producer of fruit, vegetables, tea, farmed fish, cotton, sugarcane, wheat, rice, cotton, and sugar. The agriculture sector in India holds the record for second-largest agricultural land in the world generating employment for about half of the country's population. Thus, farmers become an integral part of the sector to provide us with a means of sustenance.

Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%. The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth.

According to Inc42, the Indian agricultural sector is predicted to increase to US\$ 24 billion by 2025. Indian food and grocery market is the world's sixth largest, with retail contributing 70% of the sales. India's agricultural and processed food products exports stood at US\$ 43.37 billion in FY23 (April 2022-January 2023). As per Second Advance Estimates for 2022-23 (Kharif only), total foodgrain production in the country is estimated at 153.43 million tonnes. At current prices, agriculture and allied sectors account for 18.3% of India's GDP (2022-23). As per the third Advance Estimates of National Income, 2021-22 released by the National Statistical Office (NSO), Ministry of Statistics & Programme Implementation, the agriculture and allied sectors contributed approximately 18.6 % of India's GVA at current prices during 2021-22. Between April 2000-December 2022, FDI in agriculture services stood at US\$ 4.43 billion

Rapid population expansion in India is the main factor driving the industry. The rising income levels in rural and urban areas, which have contributed to an increase in the demand for agricultural products across the nation, provide additional support for this. In accordance with this, the market is being stimulated by the growing adoption of cutting-edge techniques including blockchain, artificial intelligence (AI), geographic information systems (GIS), drones, and remote sensing technologies, as well as the release of various e-farming applications.

Commodity market

In general, a commodity may be defined as a product or material that is bought and sold. It can be classified as every kind of movable property, except actionable claims, money and Securities. Commodities are split into two types: hard and soft commodities. Hard Commodities are typically Natural resources that must be mined and extracted (Gold, Oil, Petrol, Rubber etc) whereas soft commodities are agricultural products and livestock (Wheat, Sugar, Cotton, Corn, Pork, etc)

Figure 1: Commodity Classification

Structure of Commodity Market in India

Commodity market is a place where trading in commodities takes place. These are the markets where raw and primary products are exchanged. These raw commodities are traded on regulated commodity exchanges, in which they are bought and sold in standardized contracts. It is similar to an equity market, but instead of buying or selling shares one buys or sells commodities.

Road Ahead

The agriculture sector in India is expected to generate better momentum in the next few years due to increased investment in agricultural infrastructure such as irrigation facilities, warehousing, and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to the concerted effort of scientists to get early maturing varieties of pulses and the increase in minimum support price. Through the Ministry of Food Processing Industries (MoFPI), the Government of India is taking all necessary steps to boost investments in the food processing industry in India. Government of India has continued the umbrella PMKSY scheme with an allocation of Rs. 4,600 crore (US\$ 559.4 million) till March 2026.

COMPETITION:

We work in a sector that is quite competitive. Since there are no obstacles to entry in our sector, we are vulnerable to competition from new entrants. The industry is home to many active players. A significant number of unorganized and a small number of organized players provide us with fierce rivalry in our industry.

Our goal is to offer our customers branded, uniformly standardized items of high quality at cost-effective prices. We engage in regional or product-based competition with rival businesses. Many of our rivals provide a wider variety of items and have far larger capital bases and resource bases than we do. We think that customer relationships, reputation, employee skills, market focus, and the relative cost and quality of the services and goods are the main variables influencing competition in our industry. We think that maintaining consistent product quality and prompt delivery at affordable rates is essential to our capacity to compete successfully, building our brand over time. We feel that our emphasis on customer satisfaction, reliability, and quality consciousness, along with our cost-effective and integrated services, provide us a competitive advantage in our industry. We think that the key to beating the challenge posed by such organized and disorganized companies would be our technical skills, business expertise, and quality assurance.

2.2	<p>Classification of current and non-current assets and liabilities</p> <p>All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III (Division II) to the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current or non-current classification of assets and liabilities.</p> <p>Current versus non-current classification</p> <p>The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:</p> <ul style="list-style-type: none"> Expected to be realized or intended to be sold or consumed in normal operating cycle

	<ul style="list-style-type: none"> • Held primarily for the purpose of trading • Expected to be realized within twelve months after the reporting period, or • Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period. <p>All other assets are classified as non-current.</p> <p>A liability is current when:</p> <ul style="list-style-type: none"> • It is expected to be settled in normal operating cycle • It is held primarily for the purpose of trading • It is due to be settled within twelve months after the reporting period, or • There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period. <p>The Company classifies all other liabilities as non-current.</p> <p>Deferred tax assets and liabilities are classified as non-current assets and liabilities.</p>
2.3	<p>Significant accounting judgements, estimates and assumptions</p> <p>The preparation of the Company's Financial in conformity with Ind AS requires the management to make judgement, estimates and assumptions that affect the reported amount of revenue, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in next financial years.</p>
2.3.1	<p>Property Plant and Equipment/ Intangible Assets</p> <p>Estimates are involved in determining the cost attributable to bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by the management. Property, Plant and Equipment/Intangible Assets are depreciated/ amortised over their estimated useful life, after taking into account estimated residual value. Management reviews the estimated useful life and residual values of the assets annually in order to determine the amount of depreciation/ amortisation to be recorded during any reporting period. The useful life and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological and future risks. The depreciation/ amortisation for future periods is revised if there are significant changes from previous estimates.</p>
2.3.2	<p>Provisions</p> <p>The timing of recognition and quantification of the liability (including litigations) requires the application of judgement to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.</p>
2.3.3	<p>Impairment of Financial Assets</p> <p>The impairment provisions for Financial Assets are based on assumptions about risk of default and expected cash loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward-</p>

		looking estimates at the end of each reporting period.
	2.3.4	<p>Fair Value Measurement</p> <p>The Company measures financial instruments, such as investments and derivatives at fair values at each Balance Sheet date.</p> <p>Fair value is the price that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Company.</p> <p>The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.</p> <p>A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.</p> <p>Fair value for measurement and /or disclosure purpose in these financial statements is determined on such a basis, except for share based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 116, and measurements that have some similarities to fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.</p> <p>The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.</p> <p>All assets and liabilities (for which fair value is measured or disclosed in the financial statements) are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:</p> <p>Level – 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities.</p> <p>Level – 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable</p> <p>Level – 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.</p> <p>For assets and liabilities, that are recognized in the financial statements on a</p>

		<p>recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.</p> <p>The management determines the policies and procedures for both recurring fair value measurement, such as derivative instruments and unquoted financial assets measured at fair value, and for non-recurring measurement, such as assets held for disposal in discontinued operations.</p>
3. Material Accounting Policies		
3.1	Property, Plant and Equipment	<p>Property, Plant and Equipment are stated at cost, net of recoverable taxes, trade discount and rebates less accumulated depreciation and impairment losses, if any. Such cost includes purchase price, borrowing cost and any cost directly attributable to bringing the assets to its working condition for its intended use.</p> <p>The cost of an item of Property Plant and Equipment is recognized as an asset if, and only if, it is probable that the economic benefits associated with the item will flow to the Company in future periods and the cost of the item can be measured reliably. Expenditure incurred after the property plant and equipment have been put into operations, such as repairs and maintenance expenses are charged to the Statement of Profit and Loss during the period in which they are incurred.</p> <p>An item of property plant and equipment is de-recognized upon disposal or when no future economic benefits are expected to arise from the continued use of the assets. Any gain or loss arising on the disposal or retirement of an item of property plant and equipment, is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the Statement of Profit and Loss.</p> <p>Depreciation on Property, Plant and Equipment is provided using written down value method on depreciable amount at the rates specified in Schedule II of the Companies Act, 2013. Depreciation is provided based on useful life of the assets, which, in the opinion of the management, broadly corresponds to life as prescribed in Schedule II to the Companies Act, 2013. The residual values, useful lives and methods of depreciation of Property, Plant and Equipment are reviewed at each financial year end and adjusted prospectively, if appropriate. This reassessment may result in change in depreciation expense in future periods.</p>
3.2	Intangible Assets	<p>Intangible assets acquired separately:</p> <p>Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible</p>

	<p>assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.</p> <p>Internally-generated intangible assets:</p> <p>An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:</p> <ul style="list-style-type: none"> • the technical feasibility of completing the intangible asset so that it will be available for use or sale • the intention to complete the intangible asset and use or sell it; • the ability to use or sell the intangible asset; • how the intangible asset will generate probable future economic benefits; • the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and • the ability to measure reliably the expenditure attributable to the intangible asset during its development. <p>The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in the Statement of profit and loss in the period in which it is incurred.</p> <p>Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.</p> <p>An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in the Statement of profit and loss when the asset is derecognised.</p> <p>Useful lives of intangible assets</p> <p>Amortisation is provided on a written-down value method basis over estimated useful lives of the intangible assets as per details below:</p> <ul style="list-style-type: none"> • <i>Computer Software- Over a period of 6 years.</i>
3.3	<p>Impairment of tangible and intangible assets</p> <p>At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Recoverable amount is the higher of fair value less costs of disposal and value in use.</p> <p>Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the</p>

	<p>asset may be impaired. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.</p> <p>For impairment testing, assets that don't generate independent cash flows are grouped together into cash generating units (CGU's). Each CGU represents the smallest group of assets that generate cash inflows that are largely independent of the cash inflows of other assets or CGU's.</p> <p>When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash- generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.</p> <p>If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the Statement of profit and loss. When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the Statement of profit and loss.</p>
<p>3.4</p>	<p>Inventories</p> <p>Inventories are measured at the lower of cost and net realisable value.</p> <p>Cost of stock-in-trade is computed on the costs incurred from consignment-to-consignment basis where such computation is possible. Otherwise, the cost is computed on FIFO (First in, First out) basis. Such costs include all costs of purchases, and other costs incurred in bringing the inventories to their present location and condition.</p> <p>The net realisable value is the estimated selling price in the ordinary course of business less the estimated costs necessary to make the sale.</p>
<p>3.5</p>	<p>Provisions and Contingent Liabilities</p> <p>Provisions:</p> <p>Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance Sheet date.</p>

	<p>Contingencies:</p> <p>Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.</p>
3.6	<p>Taxation</p> <p>Income tax expense comprises current and deferred income tax. Tax is recognised in Statement of Profit and Loss, except to the extent that it relates to items recognised in other comprehensive income or in equity. In which case, the tax is also recognised in other comprehensive income or equity.</p> <p>Current Tax:</p> <p>Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.</p> <p>Deferred Tax:</p> <p>Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.</p> <p>The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.</p> <p>Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.</p>
3.7	<p>Foreign currency Transactions and Translation</p> <p>Transactions in currencies other than Company's functional currency (foreign currencies) are recorded at the rates of exchange prevailing on the date of transaction. At the end of the reporting period, monetary items denominated in foreign currencies are reported using the exchange rate prevailing as at reporting date. Non-monetary items denominated in foreign currencies which are carried in terms of historical cost are reported using the exchange rate at the date of the transaction.</p> <p>Exchange differences arising on the settlement of monetary items or on translating monetary items at the exchange rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognised as income or expenses in the year in which they arise.</p>
3.8	<p>Revenue Recognition</p> <p>Revenue from operations/ Sale of Goods:</p>

	<p>Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration entitled in exchange for those goods or services. The Company is generally the principal as it typically controls the goods or services before transferring them to the customer.</p> <p>Revenue is measured at the amount of consideration which the Company expects to be entitled to in exchange for transferring distinct goods or services to a customer as specified in the contract, excluding amounts collected on behalf of third parties (for example taxes and duties collected on behalf of the government). Consideration is generally due upon satisfaction of performance obligations and a receivable is recognised when it becomes unconditional.</p> <p>Generally, the credit period varies between 0-60 days from the shipment or delivery of goods or completion of services as the case may be.</p> <p>Revenue from sale of goods is net of Goods and Service Tax, returns, discounts, rebates and incentives. Further, a debit or credit note may be issued to certain customers to account for rate difference owing to market volatility, quality issues raised by the buyer and accepted by the management upon delivery of the goods , etc.</p> <p>Interest Income: Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.</p> <p>Dividends: Dividends are recognised in profit or loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the entity, and the amount of the dividend can be measured reliably.</p>
3.9	<p>Employee Benefits</p> <p>Short-term obligations: Short-term employee benefits including salaries and wages are recognized as an expense on accrual basis.</p> <p>Leave benefits: The Company provides for leave benefits to eligible employees. No provision has been made on account of leave benefits since there are no paid leaves to the credit of employees as at the end of the year.</p> <p>Gratuity: The company provides for gratuity, a defined benefit retirement plan ('the Gratuity Plan') covering eligible employees. The Gratuity plan provides a lump-sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment with</p>

	<p>the company. No Provision has been made on account of gratuity as none of the employees have put in completed years of service as required by the governing laws.</p> <p>The company has complied with Ind AS 19 'Employee Benefits'. There is no present obligation of any post employment benefit including gratuity during the year. Therefore no actuarial gain or loss arose at the end of the year.</p>
3.10	<p>Borrowings</p> <p>Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs.</p> <p>Borrowings are classified as current liabilities unless the entity has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.</p>
3.11	<p>Borrowing Costs</p> <p>Borrowing cost directly attributable to acquisition and construction of assets that necessarily takes substantial period of time are capitalised as part of the cost of such assets up to the date when such assets are ready for intended use or sale.</p> <p>All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.</p>
3.12	<p>Earnings Per Share</p> <p>Basic earnings per share are calculated by dividing the net profit for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.</p> <p>Diluted earnings per share are computed by dividing the profit after tax as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares.</p>
3.13	<p>Cash and Cash Equivalents</p> <p>Cash and cash equivalents consist of cash and cheques on hand, cash at banks, demand deposits from banks and short-term, highly liquid instruments that are readily convertible into cash and which are subject to an insignificant risk of changes in value.</p>

	3.14	Segment Reporting The Company does not have any separate segment from which any income or revenue from operation is derived neither any geographical segments exists as such, hence there are no separate reportable segments as per Ind AS.
	3.15	Investments and Financial Instruments
	a)	Investment in Subsidiaries The Company has elected to account for its investments in subsidiaries at cost.
	b)	Other Investments and Financial Assets
		<p>i) Classification</p> <p>The Company classifies its financial assets in the following measurement categories depending upon the Company's business model for managing the financial assets and the contractual terms of the cash flows.</p> <ul style="list-style-type: none"> • those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and • those measured at amortized cost. <p>For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income, as elected.</p> <p>The Company reclassifies debt investments when and only when its business model for managing those assets changes. The company does not have any debt investment for any of the periods presented in the financial statements.</p> <p>ii) Measurement</p> <p>At initial recognition, the Company measures a financial asset at its fair value including, in the case of 'a financial asset not at fair value through profit or loss', transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at 'fair value through profit or loss' are expensed in profit or loss</p> <p>Equity Instruments:</p> <p>All other equity investments are measured at fair value, with value changes recognised in Statement of Profit and Loss, except for those equity investments for which the Company has elected to present the value changes in 'Other Comprehensive Income'. However, dividend on such equity investments are recognised in Statement of Profit and loss when the Company's right to receive payment is established.</p> <p>Debt Instruments:</p> <p>Subsequent measurement of debt instruments depends on the entity's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the entity classifies its debt instruments:</p> <ul style="list-style-type: none"> • Amortised cost: Assets that are held for collection of contractual cash

			<p>flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.</p> <ul style="list-style-type: none"> • Fair value through other comprehensive income (FVOCI): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit and loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/ (losses). Interest income from these financial assets is included in other income using the effective interest rate method. • Fair value through profit or loss (FVTPL): Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented net in the statement of profit and loss within other gains/(losses) in the period in which it arises. Interest income from these financial assets is included in other income. <p>iii) Impairment of Financial Assets The entity assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost, FVOCI debt instruments, trade and other receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL. The impairment methodology applied depends on whether there has been a significant increase in credit risk.</p> <p>iv) Derecognition of Financial Assets A financial asset is derecognised only when</p> <ul style="list-style-type: none"> • The entity has transferred the rights to receive cash flows from the financial asset or • retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.
--	--	--	--

			<p>Where the entity has transferred an asset, the entity evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognised. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognised.</p> <p>Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the entity has not retained control of the financial asset. Where the entity retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.</p> <p>v) Offsetting Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on net basis or to realise the assets and settle the liabilities simultaneously.</p> <p>vi) Write-off The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the company determines that the trade receivable does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the company's procedures for recovery of amounts due.</p>
	c)	Financial liabilities and equity instruments	
		i)	<p>Classification as debt or equity Debt and equity instruments issued by Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.</p> <p>Equity instruments An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.</p> <p>ii) Measurement of Financial liabilities Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting</p>

		<p>periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included under 'Finance costs'.</p> <p>The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability.</p> <p>All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.</p>
	iii)	<p>Derecognition of Financial Liabilities</p> <p>The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired.</p>

Limited Review Report on the Unaudited Financial Results of J TAPARIA PROJECTS LIMITED for quarter and half year ended September 30, 2024 Pursuant to the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended.

Review report to

The Board of Directors

J TAPARIA PROJECTS LIMITED

Re: Limited Review Report of the Unaudited Financial Results for the quarter ended 30th September 2024 and half year ended 30th September 2024

We have reviewed the accompanying statement of unaudited financial results of **J TAPARIA PROJECTS LIMITED** for the quarter ended 30th September 2024 and half year ended 30th September 2024 ("the Statement") attached herewith.

The Statement, which is the responsibility of the Company's management and approved by its Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 'Interim Financial Reporting' ('Ind AS 34'), prescribed under Section 133 of the Companies Act, 2013, and other accounting principles generally accepted in India and in compliance with Regulation 33 and Regulation 52 the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015. Our responsibility is to issue a report on the Statement based on our review.

We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data and thus

provides less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.

Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying statement of unaudited financial results prepared in accordance with applicable accounting standards and other recognized accounting practices and policies has not disclosed the information required to be disclosed in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 including the manner in which it is to be disclosed, or that it contains any material misstatement.

Our conclusion is not modified in respect of this matter.

Note:	
1	The Statement of Unaudited Financial Results for the Quarter and Half Year ended 30th September, 2024 have been reviewed by the Audit Committee and approved by the Board of Directors at their meeting held on 14.10.2024.
2	These Financial results have been prepared in accordance with the Indian Accounting Standard (Ind-AS) prescribed under Section 133 of the Company Act, 2013, read together with the Companies (Indian Accounting Standards) Rules ,2015 (as amended) and requirement of Regulation 33 of the Securities and Exchange Board of India (SEBI) (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended.
3	The previous period figures have been regrouped/reclassified wherever required to conform to the current year's presentation.
4	The Statutory auditors of the Company have carried out a "Limited Review Report" of the above results as per Regulation 33 of the SEBI (Listing Obligation and Disclosure Requirement) Regulations, 2015. There are no qualifications in the audit report.
5	Based on the guiding principles given in Ind AS-108 on 'Operating Segments', the Company's business activity fall within a single operating segment i.e Agricultural Food Products. Subsequent to the change in the company's operations the nature of activity has changed compared to the previous reported period, hence the results are not entirely comparable.
6	During the previous financial year, at various times, the company had effected the following, thereby impacting the activities and financials during the comparatives : a) In 2011-12, the company had made an investment of ₹ 1,04,36,025/- each in five companies namely Coolhut Traders Limited, Fabert Merchandise Limited, Footflash Trading Limited, Gabarial Enclave Limited, and Gritty Marketing Limited to acquire 100% holding viz. 70,000 equity shares of Rs. 10/- each in each of the five companies. All the companies, thereafter had been converted to Limited Liability Partnership in the financial year 2018-19. Consequently, the investments made was converted into capital contributions to the tune of ₹1,04,36,025/- in each LLP respectively. b) During the previous financial year, a Supplementary Agreement of LLP had been executed in respect of each of the five LLPs on 28th June, 2023 whereby the company had retired as a partner from all the above five LLPs and the company has received an amount of ₹6,94,000/- only in respect of each of the five LLPs. The same has been duly approved by the company by passing a Board Resolution in the Board Meeting held on 28th June, 2023 and the Special resolution passed at AGM dt. 7th August, 2023. The resultant loss on such divestment has been recognised in the books as Loss from Subsidiary LLPs. c) During the previous financial year, the Company had disposed- off investment in subsidiaries namely Suvridhi Vanijya Private Limited and Waterlink Suppliers Limited w.e.f 01.10.2023 through a donation, amounting to book value of Rs. 2,10,52,000 and the same had been reflected as Loss on disposal of Investment through donation. Hence from the quarter ended 31st December 2023 and onwards, the company has adopted only standalone financial results. In view of the same the prior periods are not entirely comparable.
7	The Company has applied for change of name with the relevant government authority to reflect the appropriate business activity. The same is under process with respective government authority.
8	There are no Investor complaints pending as on 30th September, 2024

LAWS RELATED TO BUSINESS OPERATION

The Food Safety and Standards Act, 2006 ("FSS Act"):

The FSS Act was enacted on August 23, 2006 with a view to consolidate the laws relating to food and to establish the Food Safety and Standards Authority of India ("FSSAI"), for laying down science-based standards for articles of food and to regulate their manufacture, storage, distribution, sale and import, to ensure availability of safe and wholesome food for human consumption and for matters connected therewith or incidental thereto. The FSS Act, among other things, also sets out requirements for licensing and registration of food businesses, general principles of food safety, and responsibilities of the food business operator and liability of manufacturers and sellers, and adjudication by Food Safety Appellate Tribunal.

For enforcement, under the FSS Act the 'commissioner of food safety', 'food safety officer' and 'food analyst' have been granted with detailed powers of seizure, sampling, taking extracts and analysis. Penalties are levied for various defaults such as for selling food not of the nature or substance or quality demanded, sub-standard food, misbranded food, misleading advertisement, food containing extraneous matter, for failure to comply with the directions of Food Safety officer, for unhygienic or unsanitary processing or manufacturing of food, for possessing adulterant. Apart from the penalties, there are punishments prescribed for selling, storing, distributing or importing unsafe food, for interfering with seized items, for providing false information, for obstructing or impersonating a Food Safety officer, for carrying out a business without a licence and for other subsequent offences.

The FSS Act also contains the provision for offences by the companies. Further, the Food Safety and Standards Rules, 2011 ("FSSR") which have been operative since August 5, 2011, provide, among other things, the qualifications mandatory for the posts of the 'commissioner of food safety', 'food safety officer' and 'food analyst', and the procedure for taking extracts of documents, sampling and analysis.

In order to address certain specific aspects of the FSS act, the FSSAI has framed several regulations such as the following:

- a) *Food Safety and Standards (Licensing and Registration of Food Businesses) Regulations, 2011;*
- b) *Food Safety and Standards (Packaging and Labelling) Regulations, 2011;*

- c) *Food Safety and Standards (Food Product Standards and Food Additives) Regulations, 2011;*
- d) *Food Safety and Standards (Prohibition and Restriction on Sales) Regulations, 2011;*
- e) *Food Safety and Standards (Contaminates, Toxins and Residues) Regulations, 2011;*
- f) *Food Safety and Standards (Laboratory and Sampling Analysis) Regulations, 2011; and*
- g) *Food Safety and Standards (Health Supplements, Nutraceuticals, Food for Special Dietary Usage;*
- h) *Food for Special Medical Purpose, Functional and Novel Food) Regulations, 2016.*

The FSS Act also covers under its ambit foods for special dietary uses or functional foods or nutraceuticals or health supplements which is defined to mean as dietary substances which can be used by human beings to supplement their diet by increasing their total dietary intake. It also lists out certain ingredients that cannot be found in such nutraceuticals or health supplements and lays down that to be categorized as nutraceuticals or health supplements, the substance should not be represented as a conventional food. The Nutraceutical Regulations also lay down that the health claims in respect of an article of food shall be commensurate with the adequate level of documentation and valid proof made available for review by the Food Authority when called for. The Nutraceutical Regulations lays down the ways in which companies producing these kinds of food should label their packages and the kind of material that are prohibited from being used in their production. Import of foods, including Health Supplements and Nutraceuticals are subject to the FSS (Import) Regulations 2017. No person shall import any article of food without an import license from the Central Licensing Authority in accordance with the provisions of the Food Safety and Standards (Licensing and Registration of Food Business.

The FSSAI has also issued a special guidance note on Food for Special Medical Purposes (FSMP). As per this guidance note an FSMP is a food which is intended to provide nutritional support to persons who suffer from specific disease, disorder or medical condition. FSMP’s are to be used only under the guidance of medical advice and the same disclaimer should also be printed clearly on its package. The guidance note also provides a clear distinguish between the various categories of products covered under the Nutraceutical regulations.

Further, FSSAI has issued guidance note on ‘Food Hygiene and Safety Guidelines for Food Businesses during Coronavirus Disease (COVID-19) Pandemic’ (“Guidance Note”) with an intent to provide guidance to food businesses, including their personnel involved in handling of food and other employees to prevent spread of COVID-19 in the work environment and any incidental contamination of food/food packages. Additionally, it also provides guidance in relation to operative mechanism such as establishment of an in-house emergency response team in large food businesses to deal with suspected infections effectively. It mandates that employers should have a COVID-19 Screening Protocol in place to screen all personnel entering the premise. All the employees or visitors should be screened at entry point for the symptoms of COVID- 19 such as, among others, temperature (using non-contact type thermometer), cough and cold. The entrance shall mandatorily have measures installed for hand hygiene. Employees and food handlers should be encouraged to self-declare any symptoms of any respiratory illness before visiting the premises. To spread awareness and contain the spread of the disease, employers should employ and ensure compliance with numerous measures such as, among others, display of posters/standees/audio visuals on preventive measures for COVID-19, frequent usage of alcohol-based sanitisers, avoidance of close contact with symptomatic personnel, usage of face masks, and frequent cleaning and disinfection. Food businesses shall ensure that food handlers involved in food packaging should maintain a high level of personal hygiene and social distancing. All measures shall be adopted to ensure that food packaging is kept clean and away from sources of contamination. The Guidance Note mandates strict adherence to General Hygiene Practices specified under Schedule 4 of Food Safety and Standards (Licensing and Registration of Food Businesses) Regulation, 2011 (“Schedule”). The Schedule enumerates multiple compulsory measures to be adopted by food business operators in the interest of human nutrition, safety and hygiene. The Schedule mandates that the premises shall be clean, adequately lighted and ventilated, and sufficient free space for movement shall be made available. In relation to packaging of the products, it requires that the confectionary products should be wrapped/packaged only after proper cooling. No vessel, container or other equipment, the use of which is likely to cause metallic contamination injurious to health shall be employed in the preparation, packing or storage of food. The

finished products should be refrigerated with proper labels indicating date of expiry. In relation to personal hygiene—all employees should wash their hands properly and they should be made aware of measures to avoid cross-contamination. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the ‘automatic route’, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the ‘government route’, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise way such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (**‘FDI Circular 2020’**), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that:

1. The activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI (SAST) Regulations;
2. The non- resident shareholding is within the sectoral limits under the FDI Policy; and
3. The pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e., any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government. It will be the sole responsibility of the investors to ensure that the necessary approval or the pre-existing approval from the government is valid to make any investment in the Issue.

The Company will not be responsible for any allotments made by relying on such approvals. Please also note that pursuant to Circular no. 14 dated September 16, 2003, issued by RBI, Overseas Corporate Bodies have been derecognized as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as an incorporated non-resident must do so in accordance with the FDI Circular 2020 and Foreign Exchange Management (Non-Debt Instrument) Rules, 2019. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors. Our Company shall not be under an obligation to obtain any approval under any of the applicable laws on behalf of the Investors and shall not be liable in case of failure on part of the Investors to obtain such approvals.

The above information is given for the benefit of the Applicants / Investors. Our Company is not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of the Draft Letter of Offer.
